English Animated — A2.2 · Telling the Story

Ballinmore, west coast of Ireland

About this volume

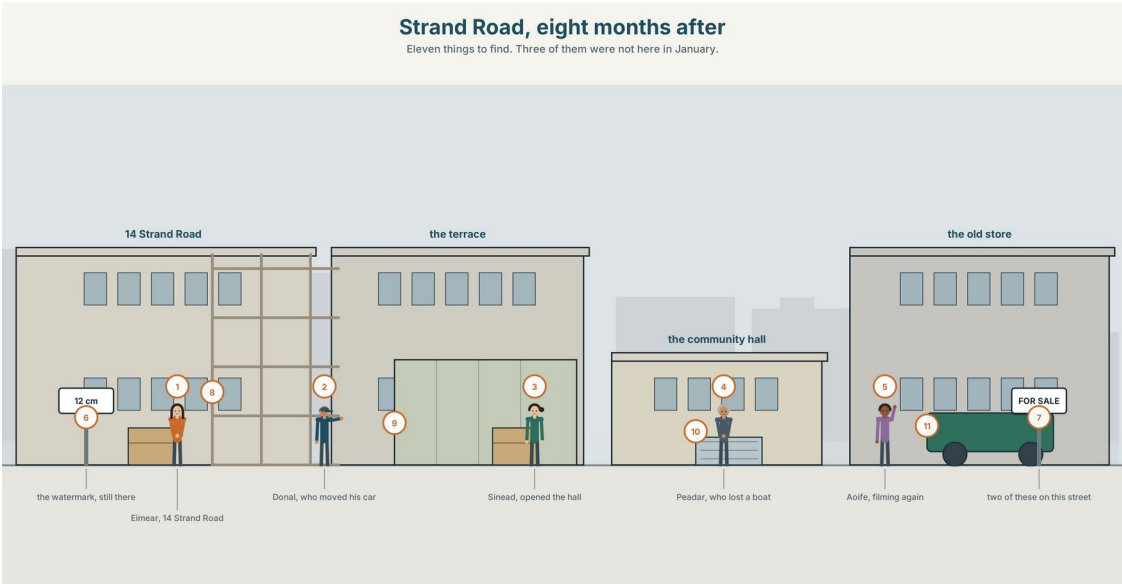

English Animated A2.2 · *Telling the Story* — Ballinmore, west coast of Ireland.

This volume contains **10 of 10 units**, written in full: every text, every task, every figure drawn. Units are 20 pages each at B-level and 22 at A-level, which is the extent specified in the series plan.

A2.2 • Unit 1 • Twelve Centimetres

English Animated • *Telling the Story* • Ballinmore, west coast of Ireland Student's Book pages 6–27 • 22 pp • ~10 hours

Part 0 • The Big Picture ♦ A • THE WORLD

6in}

Strand Road, eight months after — Eleven things to find. Three of them were not here in January.

What would you do differently?

By the end of this unit you can say what you would do if it happened again, and what you would not. Ninety words.

◆ A • THE WORLD

A town eight months after the water came, and what it has decided about itself

◆ B • THE SYSTEM

the second conditional • *would* collocations • 23 words for risk and recovery • 17 words for saying it differently • *would* as /wəd/

◆ C • THE PERFORMANCE

Ninety words on a different decision

0A • Find it

Find eleven things in this picture. Three of them are new since January.

sea wall • slipway • sandbags • the community hall • a skip • a dehumidifier • a watermark on a wall • scaffolding • a boat on a trailer • a new drain • a For Sale sign

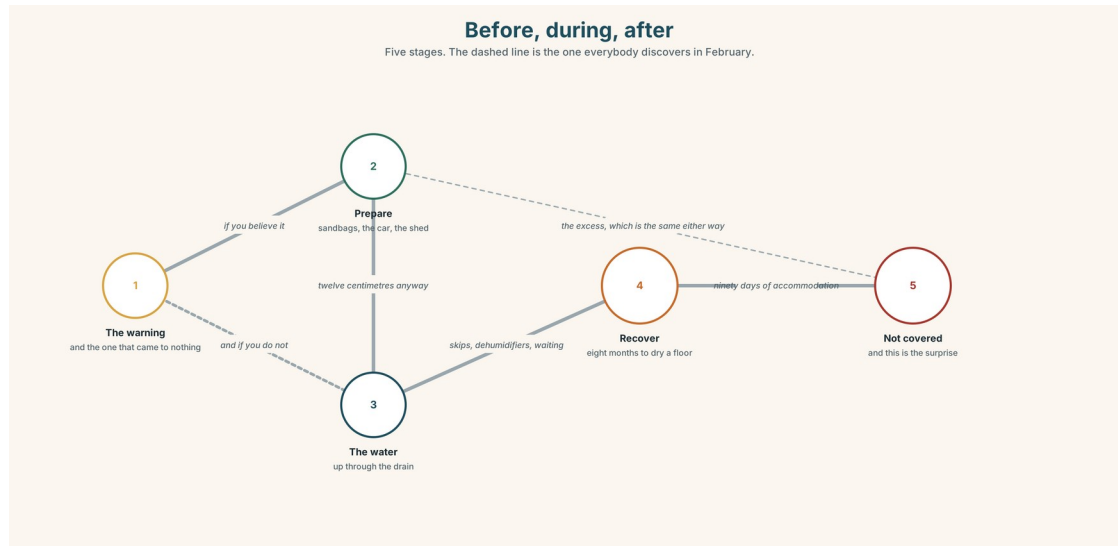

0B • Guess it

The water reached a different height in three places on this street. Where was it worst, and why there?

0C • Say it

Record thirty seconds. Think of one thing that went wrong in your life. If it happened again tomorrow, what would you do differently? You will record it again at the end of this unit.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

6in}

{width=6.

Before, during, after — Five stages. The dashed line is the one everybody discovers in February.

1A • Meet — before, during, after

Match each word to one place on the map.

warning • prepare • protect • flood • damage • recover • rubble • shelter • cost • storm

1B • Sort — a thing, an action, or a judgement?

Three columns.

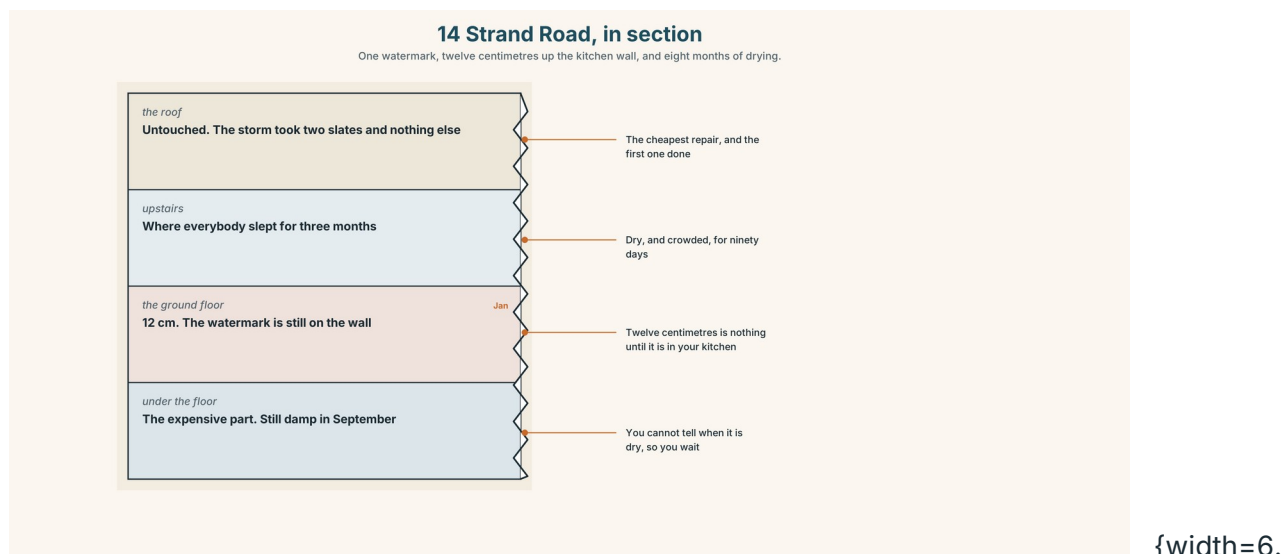

protect • recover • wall • rubble • prepare • shelter • damage • foolish • lucky • safe

Two of them are only ever said afterwards. Which, and why?

1C • Meet — the money words

cover • cost • ready

An insurance policy **covers** some things and not others. The thing people discover in February is which. **What would you expect a flood policy not to cover?**

6in}

14 Strand Road, in section — One watermark, twelve centimetres up the kitchen wall, and eight months of drying.

Look at Eimear's house in section. Four levels, one watermark. **Which floor took the water, and which floor is the expensive one to dry?**

1D • Stretch — the phrases

Complete each one with one word.

- Three houses on this road are **at** _____ every winter now.
- He moved the car on Thursday. Everybody said he was **taking a** _____ with his reputation.
- Sinéad opened the hall **in** _____, which is why nobody slept outside.
- The** _____ **of it** was over by two in the morning.
- They have _____ **up with** a dehumidifier in the kitchen since January.

1E • The saying

f We were lucky.

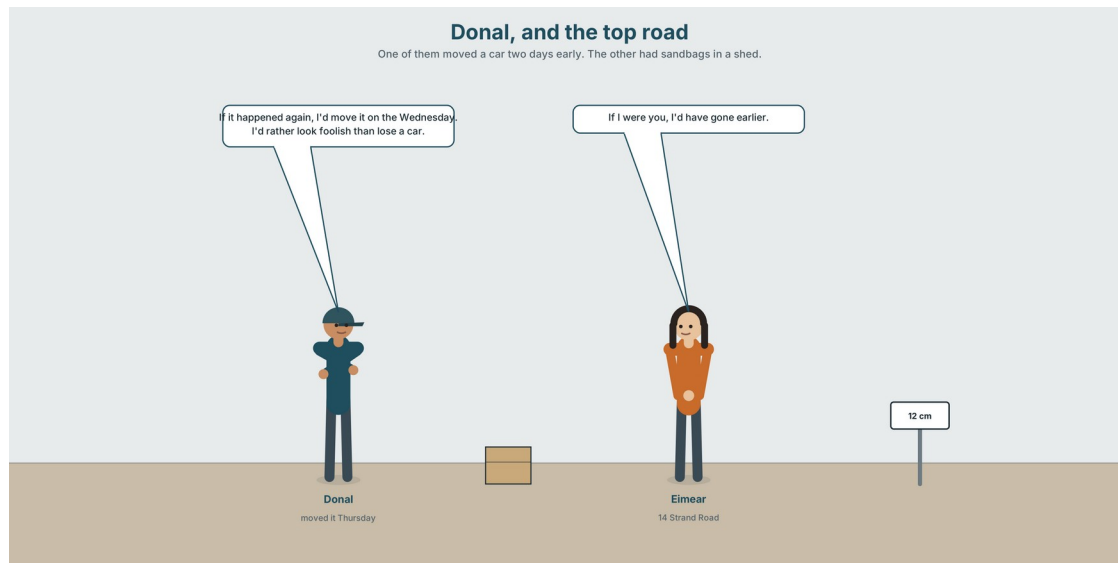

Three words that almost everybody in this town says, including the ones who lost most.

Why? Write two reasons. One of them should be uncomfortable.

1F • Own it

Think of a time something went wrong where you live. Tell a partner **three sentences**: what happened, what you did, and one thing you would do differently.

Part 2 • Listening ♦ A • THE WORLD

{width=6.

6in}

Donal, and the top road — One of them moved a car two days early. The other had sandbags in a shed.

2A • Thursday, and the top road 🎧 Track 1.1

Before you listen. Donal moved his car to the top road on the Thursday, two days early, and people laughed. **Guess: does he bring it up himself?**

Listen once. One question. How many cars were lost on this street?

Listen again. Complete the table.

	What they did on the Thursday	What they would do now
Donal		
Eimear		
Sinéad		

Listen again. True or false?

- Donal moved his car because of the forecast. ☐ T ☐ F
- Eimear had sandbags but did not use them. ☐ T ☐ F
- Sinéad opened the hall on the Saturday. ☐ T ☐ F
- Donal says he would do the same again. ☐ T ☐ F

Noticing. Four sentences from the recording.

- If it happened again, I'd move it on the Wednesday.*
- If I were you, I'd have gone earlier.*
- I'd rather look foolish than lose a car.*
- I wouldn't do anything differently, honestly.*

All four use *would*. Two are about the future. Two are about the past. Which are which?

2B • Decoding clinic 📻 Track 1.2

Twenty-five seconds of Donal. Four jobs.

1. How many times does he say 'd?
2. In *I'd rather*, can you hear the *would* at all?
3. Catch the two days he names.
4. He says one thing and then takes half of it back. Which?

Transcripts, page 150.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

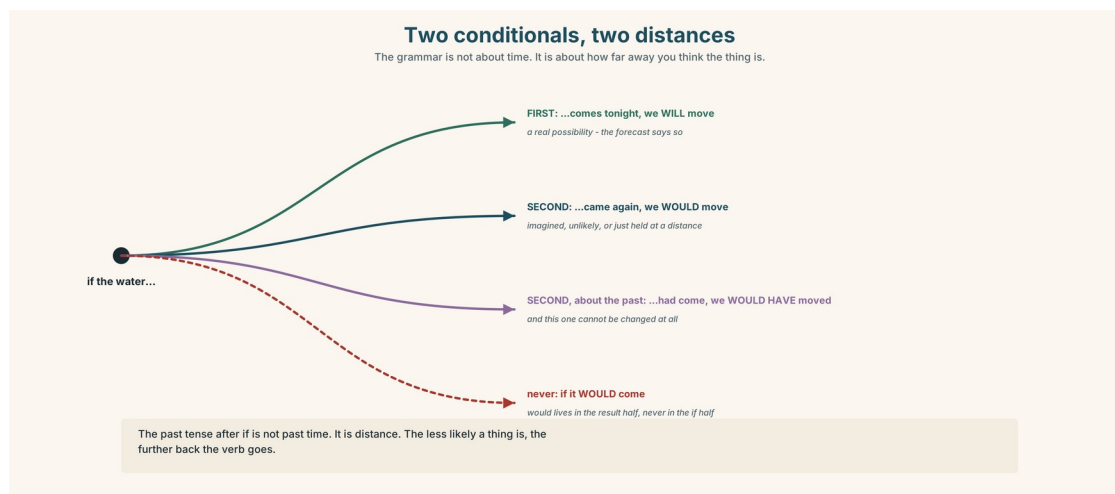

If it happened again

3A • Notice

Look at the four sentences in Part 2.

1. In sentence 1, has it happened again? **So why is the verb in the past?**
2. Sentence 2 says *if I were you*. **Not was. Why?**
3. Sentence 3 compares two bad outcomes. **Which does he prefer, and is that a fact or a value?**
4. **First conditional or second?** *If it rains, we'll move the car. / If it flooded again, we'd move it.* What is the difference in how likely each one is?
5. Try "*If it would happen again, I'd move it.*" **What is wrong?**

3B • See

{width=6.

6in}

Two conditionals, two distances — The grammar is not about time. It is about how far away you think the thing is.

Now look at the second picture. **The ladder runs from certain to impossible. Where does the second conditional sit?**

5. I'm not you, so I can't decide.

3F • Use — open

Ask three people: *If you had to leave your home in an hour, what three things would you take? Then ask them why the third one.*

3G • Check — six items

1. If it _____ (happen) again, I _____ (move) it earlier.
2. If I _____ you, I _____ (not wait).
3. We _____ (be) safe if the wall _____ (be) higher.
4. I _____ rather look foolish than lose a car.
5. What _____ you do if the water _____ (come) tonight?
6. If she _____ (have) insurance, she _____ (not be) in that house now.

0-3 → Workbook pp. 4-6. 4-5 → Part 6. 6 → page 19.

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency starter — one hour

Your teacher says: **"You have one hour and a car."** Each learner names one thing they would take and one they would leave. **No repeating an object.**

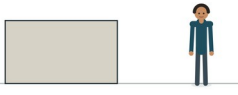

Three rounds. Each round, the hour gets shorter.

4B • The functional core — saying what you would do

Thursday, and Saturday
Learner A has the Thursday. Learner B has the Saturday. The same street.

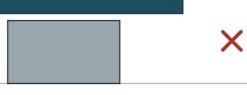

Thursday

one car moved, and people laughing

Saturday, 02.00

twelve centimetres, fourteen houses

Which two differences were decisions, and which five were weather?
7 differences — find them all

6in}

{width=6.

Thursday, and Saturday — Learner A has the Thursday. Learner B has the Saturday. The same street.

Language Bank

the imagined

If it happened again, I'd... · I'd

the preference

the advice

the honest limit

probably... · I'd certainly...

I'd rather... than... · I'd sooner...

If I were you... · In your place, I'd...

Honestly, I'd do the same. · I'd like to say I would, but...

Role play. Learner A lost something in the flood. Learner B did not and was lucky. **Six minutes.** Neither of you may use the word *should*.

4C • The performance — ninety seconds

Describe **one thing you would do differently** and **one you would not**. **Ninety seconds.** You must give:

what happened · what you would change · what you would keep the same · why that one

Record it.

4D • Observer

One person listens for **one thing**: was there something the speaker would **not** change?

4E • Two criteria

☐ Did I use *if* + past + *would* at least three times? ☐ Is there one thing I would keep exactly as it was?

Part 5 • Reading A • THE WORLD

5A • Predict

An interview transcript with a resident. The title is "**I had sandbags in the shed since 2019.**" **What do you expect her to say about them?** One sentence.

5B • Read — one hundred seconds

"I had sandbags in the shed since 2019" Eimear Nolan, 14 Strand Road

When did you know it was coming in? About ten. The drain in the yard started going the wrong way. That is the thing nobody tells you. It does not come in the door first.

You had sandbags. I had sandbags. I had had them in the shed since 2019, when there was a warning that came to nothing, and on the Thursday I thought about putting them out and I did not, because Donal had moved his car and everyone was being funny about it and I did not want to be the second one.

Would you do it differently? I would put them out. But I want to be careful here, because that is easy to say in September. If you asked me in January, with a forecast and a shed and everybody watching, I honestly do not know that I would.

What would you change, then? I would not wait to see what anybody else did. That is the one. Not the sandbags — the waiting.

5C • Answer

- ## 5D • Vocabulary in context

5E • The counter-text

6in}

Read the insurance policy summary and answer.

1. What is the excess for flood, and how does it compare with the excess for storm damage?
2. **What exactly is not covered, and which of those three things did Eimear lose?**
3. How long does the insurer have to respond to a claim?
4. One line is printed in bold. What does it say, and why that line?

5F • Two texts

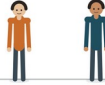

The interview says the floor took **eight months** to dry. The policy covers **alternative accommodation for up to 90 days**.

Put those two facts together. What happened for the other five months? Two sentences.

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Saying it a different way

Four ways of putting it differently
The same decision, offered at four distances.

1	2	3	4
nothing to refuse	two options, one preferred	in your place, I would	and you will be doing it in the dark
			
MOVE IT - a plain instruction	I'D RATHER - a preference, not advice	IF I WERE YOU - advice at one remove	OTHERWISE - the thing you do not say
plain			at a distance

6in}

Four ways of putting it differently — The same decision, offered at four distances.

6A • Sort — how sure, and how honest?

Put these on a line from most certain to least.

honestly • otherwise • probably • certainly • maybe • supposing

Two of them are not about certainty at all. Which, and what are they doing?

6B • Chunk completion

1. **If I _____ you** , I'd ask for it in writing.
2. **In your _____** , I would have done exactly the same.
3. I **would** _____ gone, but the road was closed.
4. I'd _____ wait than guess.
5. Move it now — _____ **you'll be doing it in the dark.**
6. He _____ **twice** before he said anything in the hall.

6C • Three words that change the whole sentence

instead • otherwise • differently

Put one in each, and then say what each one assumes the listener already knows.

1. I didn't wait. I phoned the council _____ .
2. Put them out tonight. _____ you'll be carrying sand at midnight.
3. If it happened now, I'd do it _____ .

Will, and would

Both are about the future. One of them expects to be right.

IF IT FLOODS, WE WILL MOVE

a real possibility, this winter

IF IT FLOODED, WE WOULD MOVE

imagined, or held at arm's length

Which one would a weather forecast use?

6 differences — find them all

{width=6.

6in}

Will, and would — Both are about the future. One of them expects to be right.

Six differences. Find them, then answer the question under the picture.

6D • Contrast Clinic — first or second conditional

Six items. Choose the form, and say why that one.

1. If it ____ (rain) tomorrow, we ____ (cancel). *(the forecast says it will)*

2. If I ____ (see) him, I ____ (tell) him. *(I probably will see him)*

3. If it ____ (rain) every day for a month, the wall ____ (not hold). *(it never has)*

4. If you ____ (leave) now, you ____ (catch) the four o'clock.

5. If the hall ____ (not be) there, where ____ people ____ (go) ?

6. If I ____ (be) you, I ____ (go) now.

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

The word that becomes a letter

The word that becomes a letter

Would is almost never said in full. It survives as a d.

I would	→	aɪd	one letter is all that is left
would you	→	wədʒə	would + you run together
I would have	→	aɪdəv	never "would of" in writing
if I were you	→	ɪfaɪwəjə	were /wə/, you /jə/
I WOULD do it	→	aɪ'wʊdduːɪt	full only when a but is coming

{width=6.

6in}

The word that becomes a letter — Would is almost never said in full. It survives as a d.

7A • Hear 🎧 Track 1.3

I would → /d/ → /aɪd/ would you → /wədʒə/ I would have → /d've → /aɪdəv/ if I were you → /ɪfaɪwəjə/

7B • Say

Say each one. Then say the sentence three times, faster:

If I were you, I'd have moved it on the Wednesday.

7C • Make it mean something

Say these two:

I WOULD do it. (and something is stopping me) I'd do it. (plain — this is what I would do)

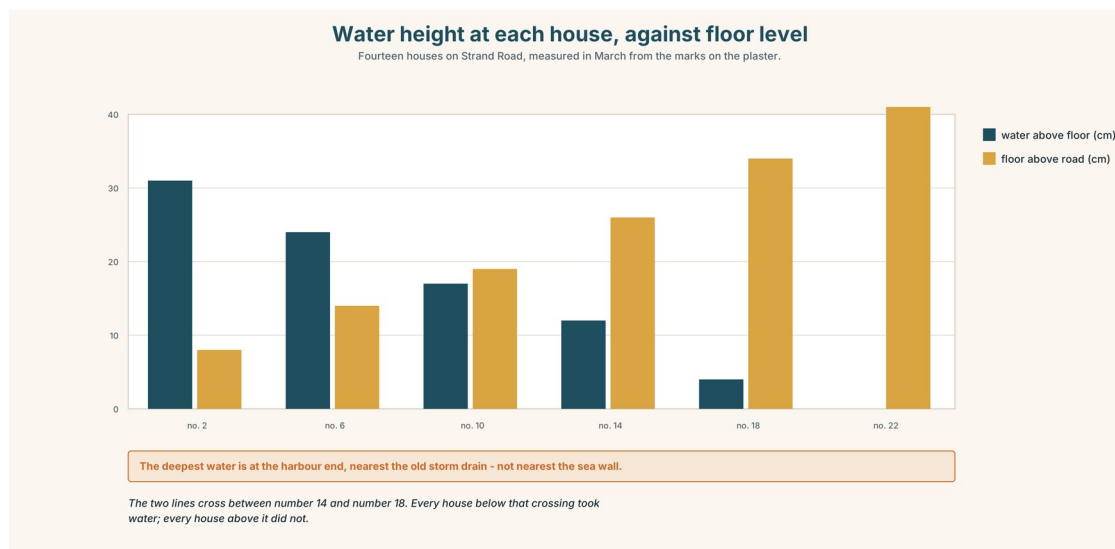

The first one has a *but* coming. Say the whole sentence.

7D • Fluency 20 🟡

Twenty seconds: **three things you would do and one you would not.** Three times, faster, with 'd every time.

Part 8 • Writing ♦ C • THE PERFORMANCE

What I would do differently • 90 words

{width=6.

6in}

Water height at each house, against floor level — Fourteen houses on Strand Road, measured in March from the marks on the plaster.

8A • Read the model

If it happened again I would not wait to see what the neighbours did. That is the only thing I would change and it is not the thing people expect me to say. [the change, named, and the surprise acknowledged]

I would still keep the sandbags in the shed rather than by the door, because the shed is dry and the door is not, and a wet sandbag is a bag of mud. [something kept, with a technical reason, which proves she has thought about it]

I would not promise to be braver. I would promise to be two hours earlier. [the honest limit – and it is specific and achievable]

Questions about the writer's choices:

1. The second paragraph defends something she did **right**. **Why include it?**
2. The last line refuses to promise courage. **Is that weakness or precision?**

8B • The anti-model

If it happened again I would be much more prepared. I would act faster and I would not make the same mistakes. We have all learned a lot from this experience and we would all do things differently next time.

Correct English, and there is nothing in it. **Name two things it does not say.**

8C • Plan

what happened, in one line → the one thing you would change → one thing you would keep, with a reason → what you will not promise

8D • Write — 90 words

8E • Peer review — two criteria

☐ Is there one thing kept as well as one thing changed? ☐ Is the change specific enough to do?

8F • Write it again • 8G • Publish

On the wall, with the policy summary from Part 5E beside it.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

WORK FILE • The Pitch

Four minutes, four moves
A short pitch has one number people remember. Choose it before you start.

1 the problem, in one sentence  minute 0	2 the number, said early 1.8 m minute 2	3 what it buys  minute 3	4 the consequence  minute 4
---	--	---	--

"Twelve centimetres got into fourteen houses."
"We're asking for 1.8 million."
"The wall, the survey, three years of upkeep."
"Without it we will be back, and it will be more than fourteen."

{width=6.

6in}

Four minutes, four moves — A short pitch has one number people remember. Choose it before you start.

9A • Four minutes and a committee Track 1.4

Tomás has four minutes to ask the county for the sea wall money. **Listen.**

1. How does he open, and how long before he says a number?
2. What does he ask for, and what does he offer in return?
3. **One question from the committee catches him out. Which?**

9B • The four moves in a short pitch

the problem in one sentence · what you want · what it costs · what happens if you do not get it

Match each to one phrase.

"Twelve centimetres got into fourteen houses." · "We're asking for 1.8 million." · "That's the wall, the survey and three years of maintenance." · "Without it we will be back here, and it will be more than fourteen."

9C • The number you lead with

A pitch has one number people remember. **Which of these would you lead with, and why?**

1.8 million · fourteen houses · twelve centimetres · eight months · three years

9D • Your turn

In pairs. **Four minutes each.** Pitch for something real — a change at work, at home, anywhere. **One sentence of problem, one number, one cost, one consequence.**

9E • Transfer

Find one pitch this week — an advertisement, a request, a politician. Write down the number they led with and ask yourself why that one.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

One night, and the eight months after it — Half the class sees the night. Half sees the recovery. Rebuild the year by speaking.

10A • Relay

Half the class sees the night of the storm. Half sees the eight months since. **Rebuild the whole year by speaking.** Ten minutes.

10B • Simplify

Explain the policy summary from Part 5E to somebody who has just been flooded. **Four sentences only.**

Plan: what you get → what you pay first → what is not covered → what to do today

10C • Compress

The interview in Part 5 into **thirty words**, for a county report.

10D • Online

Write **one message** to the town group: the council survey is open for two weeks, you think fourteen households should answer it, and here is the one question that matters.

10E • Your language

How does your language say *if I were you*? **Does it use a past tense for an imagined thing, the way English does?** Show a partner both.

Part 11 • The Decision ♦ C • THE PERFORMANCE

The wall, or the three houses

There is 1.8 million. It is enough to build the sea wall badly along its whole length, or to move the three nearest houses and do nothing else.

- **The wall.** Protects fourteen houses to the standard that failed in January, plus about thirty centimetres.
- **The three houses.** Buys and demolishes them. The three families are rehoused and the gap becomes a flood meadow. The other eleven houses are no safer than they were.
- **Neither, yet.** Spend 90,000 on a proper survey and come back in a year with a number that means something.

11A • The evidence

1. **The policy summary** from Part 5E — and what is not covered.
2. **The chart** — water height at each house on the night, against floor level.
3. **The voice.** One of the three, twenty seconds: *"I would take the money. I want to be clear that I would take it, because I think people will say afterwards that we were pushed out, and we would not be. We would be glad."*

11B • Talk about it

In threes. Everybody says one. Use the frame.

If they built _____, then _____. So I think they should _____.

Words you can use: *risk · at risk · damage · protect · recover · cost · safe · in time*

11C • Decide

Write **two sentences**. Choose, and say why.

I think they should _____, because _____.

11D • Model decision

They should do the survey. Both of the other options are being chosen on the basis of one night's water, measured afterwards by people wading through it, and a wall built to the wrong height is worse than no wall because it is believed. Ninety thousand to find out is cheap against 1.8 million to find out you were wrong.

11E • The Reveal

What happened. They did the survey. It took fourteen months rather than twelve and cost 118,000.

It found that the water in January had not come over the wall at all. It had come **up through the old storm drain**, which was built in 1961 and connects to the harbour below the wall line. A higher wall would have made no difference to eleven of the fourteen houses.

Fixing the drain is costed at 340,000. There is now an argument about what to do with the rest of the money, and two of the three families have said they no longer want to move.

The survey was right. And it cost fourteen months, during which nothing was built.

Was it the right decision? Say why — and say what you would do with the remaining 1.34 million.

Part 12 • Landing ♦ all three lines

12A • Recycle — ten items

1. If it _____ (happen) again, I _____ (move) it earlier.
2. If I _____ you, I wouldn't wait.
3. I'd _____ look foolish than lose a car.
4. Three houses are **at** _____ every winter.
5. **The worst** _____ **it** was over by two.
6. (A2.1 U5) If it _____ (rain), we'll stay in.
7. (A2.1 U8) You _____ (not / allowed) park here.
8. (A2.1 U7) The house _____ (build) in 1961.
9. (A2.1 U2) It was raining _____ he left.
10. (A2.1 U1) I've lived here _____ 2019.

12B • Consolidate

Ninety words, one paragraph. One thing you would do differently and one you would keep. Three second conditionals, one *I'd rather*, one *if I were you*.

12C • Can-do, with evidence

I can...	My evidence	Sure?
talk about an imagined situation and its result	Part 3G score	☐ ☒ ☒
say what I would and would not change, in ninety seconds	Part 4C recording	☐ ☒ ☒
write ninety words that keep something as well as change something	Part 8 draft 2	☐ ☒ ☒
make a four-minute pitch with one number	Part 9D pair work	☐ ☒ ☒

12D • Replay 🟡

Find your thirty seconds from Part 0C. Listen. **Record it again.** One sentence: what is different?

12E • Glossary — forty items, as a map

BEFORE • warning • prepare • protect • ready • at risk • take a risk • in time **THE NIGHT** • storm • flood • wall • shelter • damage • rubble • the worst of it **AFTER** • recover • cost • cover • safe • lucky • foolish • put up with • we were lucky **THE IMAGINED** • would • would have • supposing • maybe • unless • otherwise • instead **THE PREFERENCE** • rather • I'd rather • if I were you • in your place • think twice **HOW SURE** • honestly • probably • certainly • differently • what would you do

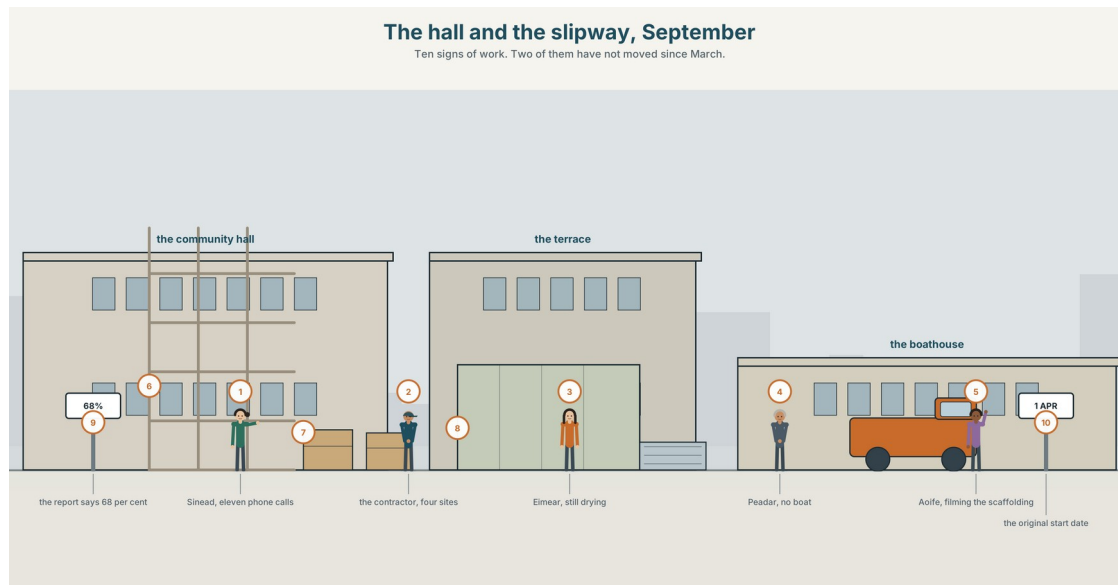

12F • Next

Unit 2 • What has been happening?

A2.2 • Unit 2 • Nowhere Near Finished

English Animated • *Telling the Story* • Ballinmore, west coast of Ireland Student's Book pages 28–49 • 22 pp • ~10 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

The hall and the slipway, September — Ten signs of work. Two of them have not moved since March.

What has been happening?

By the end of this unit you can report eight months of work: what is finished, what is still going on, and what has not started. One hundred words.

◆ A • THE WORLD

A town in the middle of a repair,
which is a longer place than people
think

◆ B • THE SYSTEM

have been doing and *have done* ·
duration adverbs · 23 words for
repair and progress · 17 words for
how long and how often · *been as*
/bin/

◆ C • THE PERFORMANCE

A hundred words of honest progress
reporting

0A • Find it

Find ten signs of work in this picture. Two of them have not moved since March.

scaffolding · a skip · a contractor's board · a temporary road surface · a generator · a
portable toilet · a stack of plasterboard · a dehumidifier cable · a site fence · a planning notice

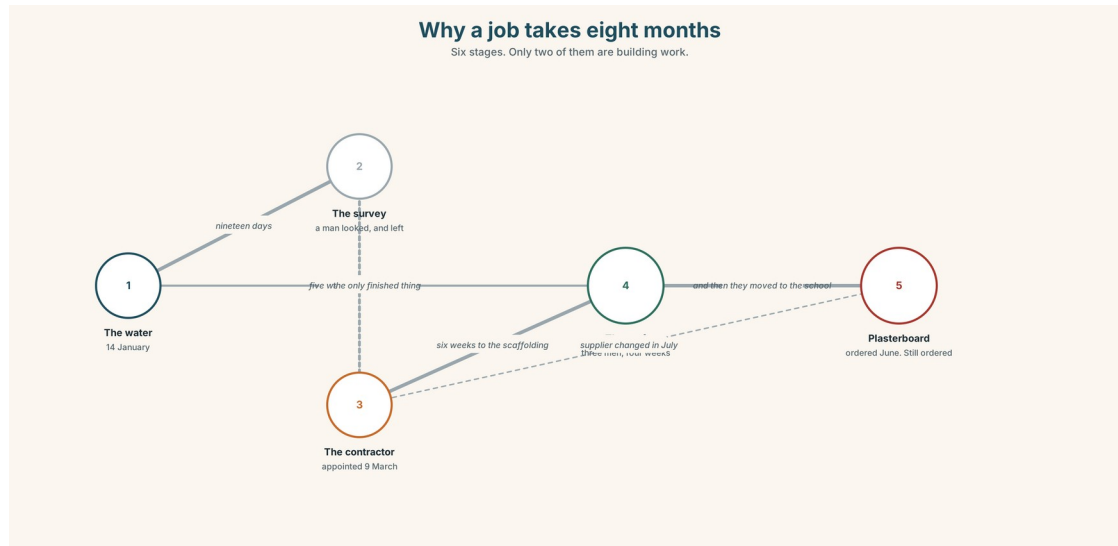

0B • Guess it

Three of these jobs have been going on longer than the others. Which, and what tells you?

0C • Say it

Record thirty seconds. What have you been working on for a long time, and is it nearly finished?
You will record it again at the end of this unit.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

{width=6.

6in}

Why a job takes eight months — Six stages. Only two of them are building work.

1A • Meet — the words of a long job

Match each word to one place on the map.

repair • rebuild • clear • fix • finish • progress • site • scaffolding • contractor • delay

1B • Sort — finished, going on, or not started?

Three columns, from the picture in Part 0.

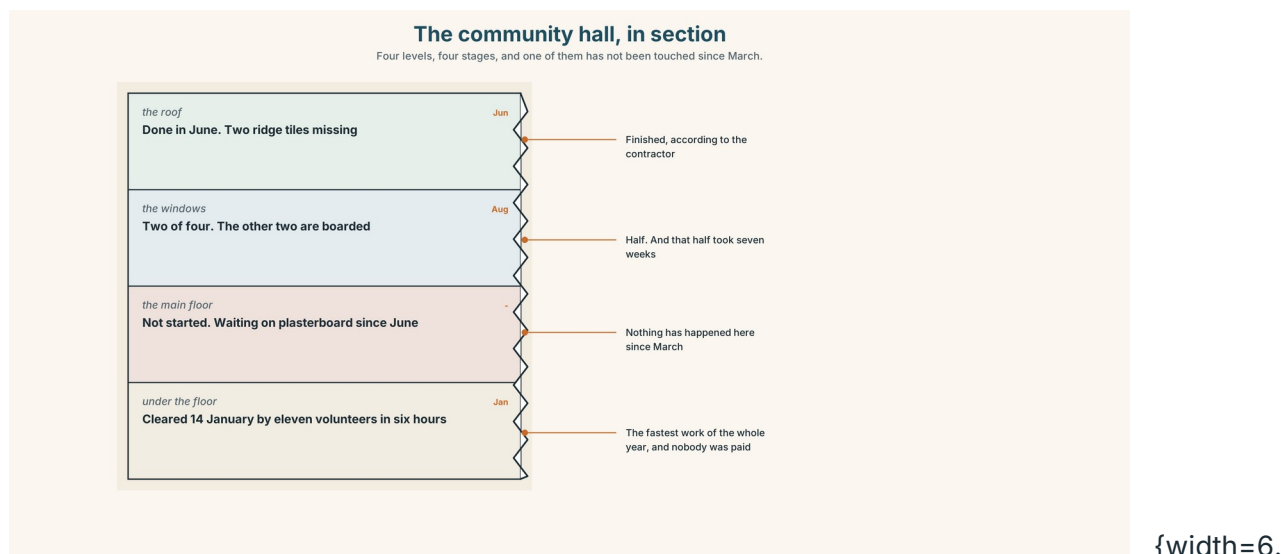

the temporary road • the hall windows • the kitchen floor • the plasterboard • the sea wall
survey • the slipway • the drain • the roof

One of them is in two columns depending on who you ask. Which?

1C • Meet — three words for how it is going

ongoing • slow • steady

Slow is a complaint. **Steady** is a defence. **Ongoing** avoids the question. **Which would a contractor use, and which would a resident?**

6in}

The community hall, in section — Four levels, four stages, and one of them has not been touched since March.

Look at the community hall in section. Four levels, four stages of repair. **Which level is finished, and which one has not been touched since March?**

1D • Stretch — the phrases

Complete each one with one word.

1. They've been **getting** _____ **with** the back wall since June.
2. It's coming along **bit by** _____ .
3. The slipway is **nowhere** _____ finished.
4. The hall is four months **behind** _____ .
5. The plasterboard has **held them** _____ since the supplier changed.

1E • The saying

f It's getting there.

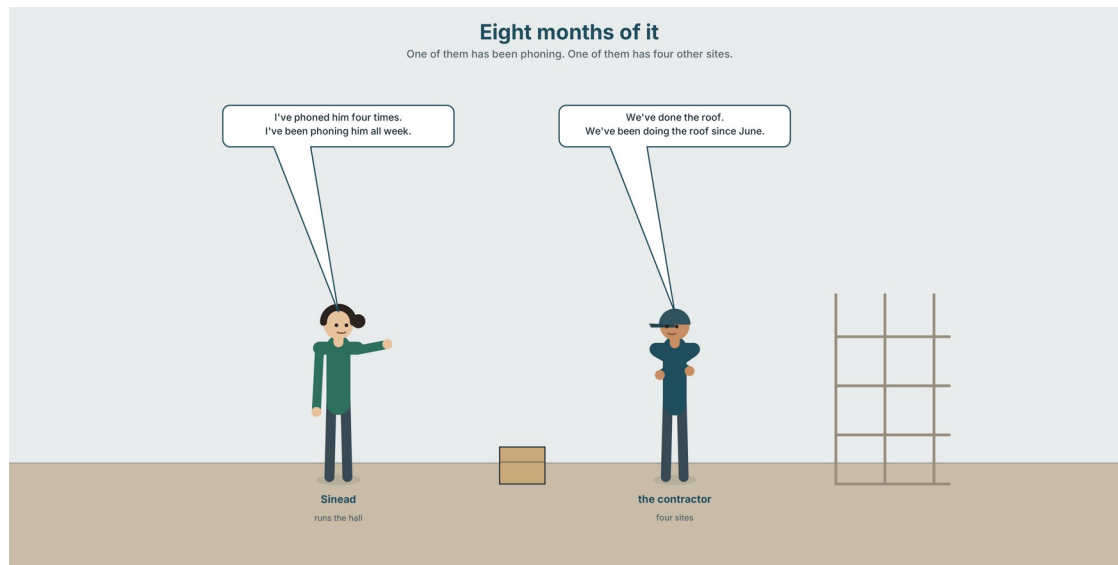

Three words you will hear forty times in this town.

Say it three times: cheerfully, wearily, and to somebody you do not want to talk to. **Which one is true?**

1F • Own it

Think of something near you that has been under repair for a long time. Tell a partner **three sentences:** what it is, how long, and what is actually holding it up.

Part 2 • Listening ♦ A • THE WORLD

6in}

{width=6.

Eight months of it — One of them has been phoning. One of them has four other sites.

2A • Eight months of it 📞 Track 2.1

Before you listen. Sinéad runs the hall. The contractor is four months late. **Guess: who is more frustrated, and who sounds it?**

Listen once. One question. How many of the six jobs are finished?

Listen again. Complete the table.

Job	Started	Finished?	What is holding it up
the roof			
the windows			
the floor			

Listen again. Choose.

- The roof took **it is not done / three weeks / three months**.
- They have been waiting for plasterboard **since June / all year / since August**.
- The contractor has **two / three / four** other sites.
- Sinéad has been phoning **daily / on and off / weekly**.

Noticing. Four sentences from the recording.

- We've done the roof.*
- We've been doing the roof since June.*
- I've phoned him four times.*
- I've been phoning him all week.*

Two of these are about a result. Two are about the activity. Which are which?

2B • Decoding clinic 🎧 Track 2.2

Twenty-five seconds of Sinéad. Four jobs.

1. How many times does she say *been*?
2. Is *been* loud or quiet? What vowel is in it?
3. Catch the two time expressions she uses.
4. She says one number twice. Which, and why?

Transcripts, page 151.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

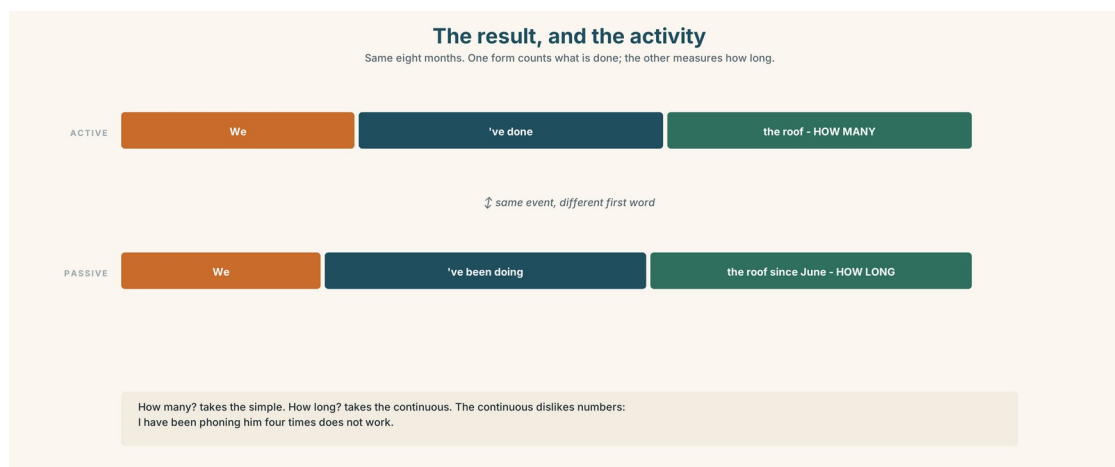

The result, and the activity

3A • Notice

Look at the four sentences in Part 2.

1. In sentence 1, is the roof finished? In sentence 2?
2. Sentence 3 gives a number. Sentence 4 does not. **Which form likes numbers?**
3. **Which pair would you use to complain, and which to report?**
4. Try "I've been phoning him four times." **Why does it sound wrong?**
5. Try "I've known him since June" and "I've been knowing him since June." **Why does one of these not exist?**

3B • See

{width=6.

6in}

The result, and the activity — Same eight months. One form counts what is done; the other measures how long.

Now look at the second picture. **The ladder runs from a finished result to an activity with no end in sight. Where does *for eight months* sit?**

Five sentences about the same hall. Only two of them say anything is finished.

— We've been waiting since ~~June~~ ^{July} 1961, and it is still going

— We've been doing the roof for eight months

— We've finished two of the four windows as a job

We've phoned him eleven times any - and it is a complaint

— We've done the roof a result. It is finished and you can see it

 $\{\text{width}=6.$

From a finished result to no end in sight — Five sentences about the same hall. Only two of them say anything is finished.

	Shape	Use it for
present perfect simple	<i>have + past participle</i>	the result , and how many · We' ve done the roof. I' ve phoned four times.
present perfect continuous	<i>have been + -ing</i>	the activity , and how long · We' ve been doing the roof since June.

Some verbs have no continuous. *know, believe, own, belong, cost, mean.* ✓ *I've known him for years.* × *I've been knowing him.*

Watch out. The continuous dislikes numbers. $\times$ *I've been phoning him four times.* $\checkmark$ *I've phoned him four times.* $\cdot$ $\checkmark$ *I've been phoning him all week.*

They (1) _____ (work) on the hall since January. They (2) _____ (finish) the roof and two of the four windows. The floor (3) _____ (not start) yet, because they (4) _____ (wait) for plasterboard since June. Sinéad (5) _____ (phone) the contractor eleven times. She (6) _____ (phone) him constantly all week, and he (7) _____ (not answer) once.

Choose the form. **One of them could be either** — say why.

1. I _____ (write) three emails this morning.
2. I _____ (write) emails all morning.
3. She _____ (live) here since 2011.

4. They _____ (fix) the roof. It's finished.
5. They _____ (fix) the roof since June.
6. We _____ (know) each other for years.

3F • Use — open

Ask three people: *What have you been doing lately that you haven't finished?* **Then ask:** *how much of it have you actually done?*

3G • Check — six items

1. We _____ (wait) since June.
2. I _____ (phone) him four times.
3. She _____ (work) here all week.
4. They _____ (finish) two of the four windows.
5. I _____ (know) him for years.
6. How long _____ you _____ (live) here?

0-3 → Workbook pp. 10-12. **4-5** → Part 6. **6** → page 41.

Part 4 • Speaking ◆ C • THE PERFORMANCE

4A • Fluency starter — how long, how many

In pairs. One asks **How long?**, the other answers. Then one asks **How many?** **Thirty seconds each, six rounds.** The forms must change with the question.

4B • The functional core — reporting progress

The door log, and the progress report
Learner A has the log. Learner B has the report. They describe the same building.

the door log

four hands, fifteen entries, no percentages

the progress report

one hand, one page, one number

68%

Which three items do the two documents disagree about?
7 differences — find them all

{width=6.

6in}

The door log, and the progress report — Learner A has the log. Learner B has the report. They describe the same building.

Language Bank

finished

We've done... • That's completed. •

going on

Two of the four are in.

We've been working on... · That's ongoing. · It's coming along, bit by bit.

not started

We haven't started the... · That's waiting on...

the honest line

It's nowhere near finished. · We're four months behind schedule.

Role play. Learner A runs a building. Learner B is the contractor. **Six minutes.** Learner A must get one date. Learner B must not give a date they cannot keep.

4C • The performance — one hundred seconds

Report **eight months of work** on something. **One hundred seconds.** You must give:

what is finished, with a number · what is still going on, with a length · what has not started · what is actually holding it up

Record it.

4D • Observer

One person listens for **one thing**: was there a number **and** a length?

4E • Two criteria

☐ Did I use both forms, each for its own job? ☐ Did I name what is holding it up, not just that it is late?

Part 5 • Reading A • THE WORLD

5A • Predict

An archive document: the hall's own repair log, kept by hand on the back of the door. The title is "**Hall — January to September.**" **What do you expect the handwriting to show?** One sentence.

5B • Read — one hundred seconds

HALL — JANUARY TO SEPTEMBER (*kept on the back of the kitchen door, in four different hands*)

14 Jan Water out. Floor up. 11 volunteers, 6 hrs. **19 Jan** Electrics isolated. Can't use the kitchen. S.
2 Feb Council survey. Man came, looked, left. No paper yet. **27 Feb** Still no paper. **9 Mar**
Contractor appointed. Start date 1 April. Scaffolding to go up w/c 25 Mar. **25 Mar** No scaffolding. **1 Apr** No contractor. **14 Apr** Scaffolding up. Nobody on it. **6 May** Roof started. Three men. Good. **2 Jun** Roof done. They have moved to the school. **2 Jun** (*different hand*) Roof is NOT done. Two ridge tiles missing, you can see daylight. **11 Jun** Plasterboard ordered. **3 Jul** Plasterboard not delivered. Supplier changed. **1 Aug** Plasterboard not delivered. **1 Sep** Plasterboard not delivered. Windows 2 of 4. Floor not started. **1 Sep** (*different hand again*) We have been at this for eight months and the only thing that is finished is the roof, and the roof is not finished.

5C • Answer

1. How many volunteers worked on the first day, and for how long?
2. How long was it between the survey and the contractor being appointed?
3. **What happened on 2 June, twice?**
4. How long have they been waiting for plasterboard?
5. What is the state of the windows and the floor on 1 September?
6. **Why is the log in four different hands, and what does that tell you?**

5D • Vocabulary in context

Guess from the text. Then check.

isolated · w/c · appointed · ridge tiles · 2 of 4

5E • The counter-text

The contractor's progress report
One page, one percentage, and a completion date that has moved four times.

CONLON BUILDING LTD - PROGRESS REPORT 6		
Site	Ballinmore Community Hall	
Period	1 August - 31 August	
Overall complete	68 %	
WORK PACKAGES		
PACKAGE	STATUS	%
Strip out and clear	complete	100
Roof	complete	100
Windows	in progress	50
Electrical first fix	complete	100
Plasterboard and skin	awaiting materials	0
Floor	not commenced	0
DELAYS		
Plasterboard delivery has been delayed by a change of supplier. This is outside the contractor's control. No extension of time is claimed at this stage.		
COMPLETION		
Original	30 June	
Revision 1	31 July	
Revision 2	30 September	
Revision 3 (this report)	30 November	

FOOTER, IN SIX POINT TYPE:
"Percentages are by value of work, not by number of packages."

Sixty-eight per cent, and two of six packages at zero

Complete - and the door log says daylight through the ridge

Fifty per cent is two windows of four

Complete, and the kitchen still has no power

Outside our control, and no extension claimed - read that twice

By value. The roof was the expensive bit

{width=6.

6in}

The contractor's progress report — One page, one percentage, and a completion date that has moved four times.

Read the contractor's progress report and answer.

1. What percentage complete does the report claim?
2. **How does it describe the plasterboard delay, and whose fault does it say it is?**
3. Which three items does it mark as "complete" that the door log disputes?
4. One line gives a new completion date. What is it, and how many times has it moved?

5F • Two texts

The door log says **the only thing finished is the roof, and the roof is not finished**. The progress report says **68 per cent complete**.

Put those two facts together. How could both be honest? Two sentences.

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

How long, and how often

A point, a length, a frequency
Three different questions, and English answers each with its own word.

1	2	3	4
since June / since the flood	for eight months / all this time	constantly / day after day	still waiting / not yet
			
SINCE - a point you can name	FOR - a length you can measure	ON AND OFF - how often, not how long	YET - and has it happened?
January			September

{width=6.

6in}

A point, a length, a frequency — Three different questions, and English answers each with its own word.

6A • Sort — a point, a length, or a frequency?

Three columns.

non-stop • lately • yet • on and off • constantly • recently • all week • since • for • throughout •
day after day • still

A POINT

A LENGTH

HOW OFTEN

6B • Chunk completion

1. We've been at it **all this** ____ .
2. He's been on the phone ____ **and off** since Tuesday.
3. They've been promising it **day** ____ **day** .
4. It's rained ____ **the whole month** .
5. She's ____ **waiting** — nothing has arrived.
6. Has it come ____ ?

6C • Three that are nearly the same

lately • recently • still

Two of these go with the perfect. One of them means something else entirely.

Put one in each, and say why the other two would be wrong.

1. Have you seen him ____ ?
2. I've been very tired ____ .
3. They're ____ waiting for the plasterboard.

Four times, and all week

Two complaints about the same contractor. Only one of them has a number in it.

I'VE PHONED HIM FOUR TIMES

countable. A record

I'VE BEEN PHONING HIM ALL WEEK

unbroken. A feeling

Which one would you put in a letter, and which would you say out loud?

6 differences — find them all

6in}

Four times, and all week — Two complaints about the same contractor. Only one of them has a number in it.

Six differences. Find them, then answer the question under the picture.

6D • Contrast Clinic — simple or continuous

Six items.

1. We _____ (own) this house for twenty years.
2. I _____ (read) that book three times.
3. How many times _____ you _____ (phone) him?
4. They _____ (build) it since January.
5. They _____ (build) four of the six.
6. I _____ (read) that book all week.

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

The word in the middle

The word in the middle		
Been is the quietest word in a perfect continuous, and it is not pronounced bean.		
I have been waiting	→	 b i v b i n ' w e i t i ŋ <i>been is /bɪn/, never /bi:n/</i>
we have been at it	→	 w i : v b i n ' æ t i t <i>four words, two beats</i>
they have been doing it	→	 ð e i v b i n ' d u : i ŋ i t <i>have survives as a v</i>
how long have you been	→	 h a u l ŋ ə v j ə b i n <i>three weak syllables in a row</i>
we've BEEN waiting	→	 w i : v ' b i : n ' w e i t i ŋ <i>full only when you are arguing</i>

The word in the middle — *Been* is the quietest word in a perfect continuous, and it is not pronounced *bean*.

7A • Hear Track 2.3

I have been waiting → *I've been waiting* → /aɪvbiːn'weɪtɪŋ/ we have been at it → /wiːvbiːn'ætɪt/
they have been doing it → /ðeɪvbiːn'duːɪŋɪt/

been is /bɪn/, not /biːn/. It is the quietest word in the sentence.

7B • Say

Say each one. Then say the sentence three times, faster:

We've been waiting for that plasterboard since June.

7C • Make it mean something

Say these two:

*We've BEEN waiting. (and we are still waiting — you are arguing) We've been WAITING.
(and that is all we have done)*

Which one is a complaint about the other person, and which about the situation?

7D • Fluency 20

Twenty seconds: **three things you have been doing and three you have finished.** Three times, faster.

Part 8 • Writing C • THE PERFORMANCE

Eight months, honestly • 100 words

{width=6.

6in}

Eight months, package by package — Weeks spent working, against weeks spent waiting, on each part of the job.

8A • Read the model

The roof is finished. Two of the four windows are in. [what is done, with numbers – and this comes first, because it is the only part the reader can rely on]

We have been waiting for plasterboard since June, which is twelve weeks. The supplier changed in July and the order has been re-placed twice. [what is ongoing, with a length and the actual cause]

The floor has not started and will not start until the plasterboard arrives, so any date I give you for the floor is a date for the plasterboard. [what has not started, and an unusually honest sentence about estimates]

Questions about the writer's choices:

1. The numbers are in the first paragraph and the lengths are in the second. **Why that way?**
2. The last sentence refuses to give a date. **Is that unhelpful?**

8B • The anti-model

Work is progressing well and we are pleased with how things are going. There have been some delays due to circumstances beyond our control but we are working hard to get back on track and hope to be finished soon.

Correct English, and a reader learns nothing. **Name three things it does not say.**

8C • Plan

what is finished, with numbers → what is ongoing, with a length and a cause → what has not started → what any date actually depends on

8D • Write — 100 words

8E • Peer review — two criteria

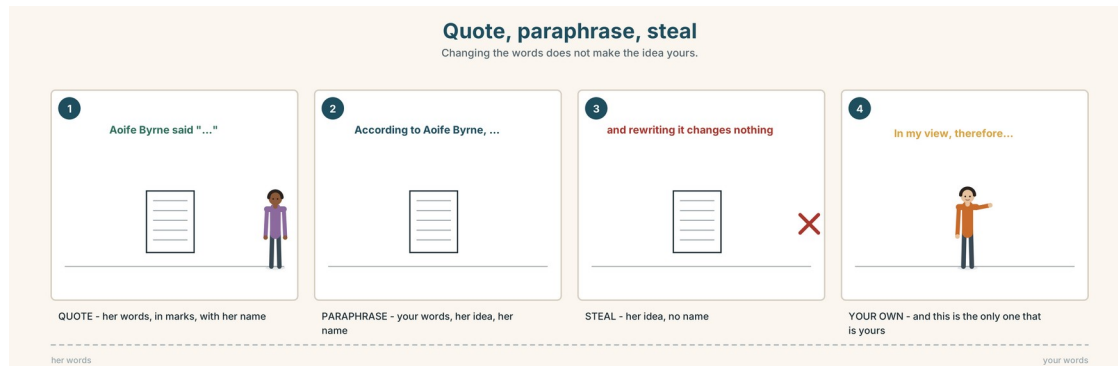

☐ Is there at least one number and one length? ☐ Is the cause of the delay named, not just the delay?

8F • Write it again • 8G • Publish

On the wall, with the door log from Part 5B beside it.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

STUDY FILE • Paraphrase & Citation

{width=6.

6in}

Quote, paraphrase, steal — Changing the words does not make the idea yours.

9A • The same sentence, four ways 🎧 Track 2.4

A national news channel has used Aoife's footage. **Listen to four people describe what happened.**

1. Which one quotes her exactly?
2. Which one changes the meaning while using her words?
3. **Which one is an honest paraphrase, and how can you tell?**

9B • Quote, paraphrase, or steal

quoting — her words, in quotation marks, with her name **paraphrasing** — your words, her idea, with her name **stealing** — her words or her idea, without her name

Match each to one of these.

Aoife Byrne said the water "came up out of the drain, not over the wall". · According to Aoife Byrne, the water rose from the drain rather than coming over the wall. · The water came up out of the drain, not over the wall.

9C • Changing the words is not enough

Rewriting a sentence does not make the idea yours.

Which of these three still needs a name attached?

1. The water rose from below rather than over the wall.
2. Water entered the houses through the old storm drain.
3. In my view, a higher wall would therefore have changed nothing.

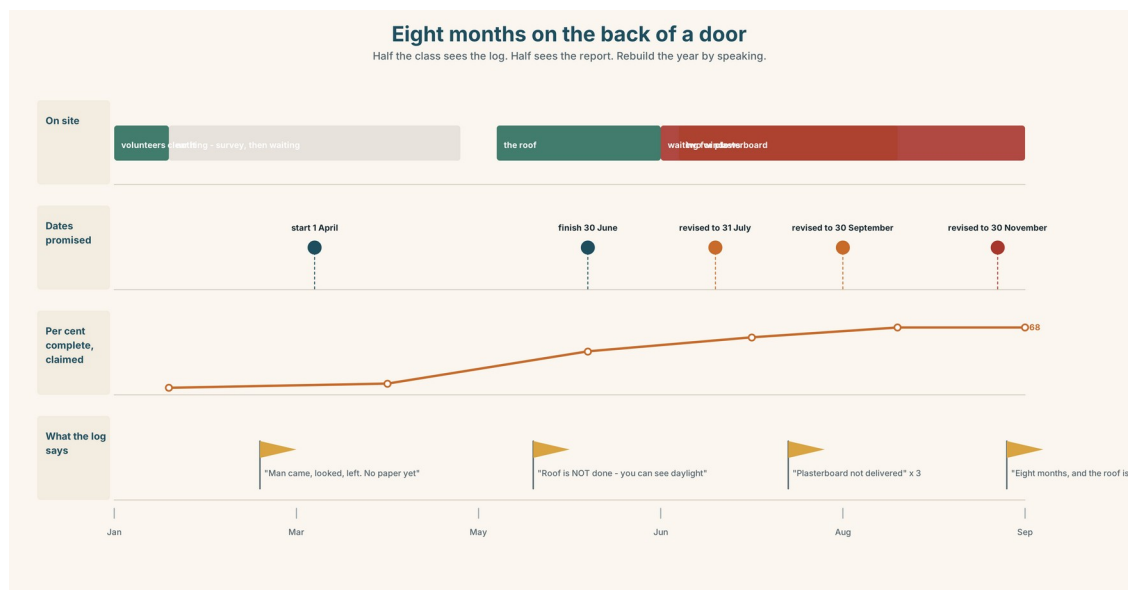

9D • Your turn

Take the door log from Part 5B. **Write three sentences about it:** one quoting, one paraphrasing, one giving your own conclusion. **Label each.**

9E • Transfer

Find one news story this week that uses somebody's photograph or video. Is the person named? Bring the story.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

Eight months on the back of a door — Half the class sees the log. Half sees the report. Rebuild the year by speaking.

10A • Relay

Half the class sees the door log. Half sees the progress report. **Rebuild eight months by speaking.** Ten minutes.

10B • Simplify

Explain the contractor's progress report from Part 5E to a volunteer who has been doing the work. **Four sentences only.**

Plan: what it claims → what is actually done → where the two disagree → what to ask next

10C • Compress

The door log into **thirty-five words**, for the council.

10D • Online

Write **one message** to the hall committee: here is what is finished, here is what is waiting on one supplier, and here is the one date you want from the contractor by Friday.

10E • Your language

How does your language distinguish *I have done it* from *I have been doing it*? **Does it, at all?** Show a partner both in your language.

Part 11 • The Decision ◆ C • THE PERFORMANCE

Her footage, their broadcast

A national news channel has been using Aoife's phone footage of the flood for eight months. Nobody asked her. The coverage has brought in about 90,000 in donations to the town.

- **Say nothing.** The money is real. She is eighteen and does not want a fight.
- **Ask for a credit.** Her name on the footage. No money. It is still her work.
- **Ask to be paid.** The channel has a rate card for user footage. It is about 250 a clip, and they have used four.

11A • The evidence

1. **The progress report** from Part 5E — what the donations have actually paid for.
2. **The chart** — donations over the eight months, against each broadcast.
3. **The voice.** Aoife, twenty seconds: *"I've been watching it on the television since January. I don't mind. What I mind is that my mother is in one of those clips and nobody asked her either, and she is not eighteen and she did not film anything."*

11B • Talk about it

In threes. Everybody says one. Use the frame.

I think Aoife should _____, because _____.

Words you can use: *fair · her work · donations · credit · ask · permission · progress · funding*

11C • Decide

Write **two sentences**. Choose, and say why.

I think Aoife should _____, because _____.

11D • Model decision

She should ask for the credit and raise her mother separately, in writing, as a different question. Mixing the two makes both easy to refuse: the credit is a small thing a producer can grant in an afternoon, and the consent is a thing a lawyer has to look at. Asked together they will be answered together, which means slowly.

11E • The Reveal

What happened. She asked for the credit by email on a Tuesday and had it by Friday. Her name has been on the footage since.

She raised her mother in a separate letter. That took eleven weeks and three people, and ended with the clip being edited rather than removed, which her mother says she is fine with and Aoife is not sure about.

She has not asked to be paid. She says that if she had asked for money first, she does not think she would have got the credit.

The small ask worked in three days. The important one took eleven weeks and was half met.

Was it the right decision? Say why — and say whether she should ask for the money now.

Part 12 • Landing ♦ all three lines

12A • Recycle — ten items

1. We _____ (wait) since June.
2. I _____ (phone) him four times.
3. It's **nowhere** _____ finished.
4. We're four months **behind** _____ .
5. They've been at it **day** _____ **day** .
6. (Unit 1) If I _____ you, I wouldn't wait.
7. (Unit 1) I'd _____ look foolish than lose a car.
8. (A2.1 U1) I've worked here _____ three years.
9. (A2.1 U4) The person _____ has the key is the caretaker.
10. (A2.1 U7) The hall _____ (build) in 1961.

12B • Consolidate

One hundred words. A long job you know about. What is finished, with numbers; what is ongoing, with a length; what has not started; and what is holding it up.

12C • Can-do, with evidence

I can...	My evidence	Sure?
use the right perfect form for results and for activity	Part 3G score	☐ ☒ ☒
report eight months of work in a hundred seconds	Part 4C recording	☐ ☒ ☒
write a hundred words a committee could act on	Part 8 draft 2	☐ ☒ ☒
quote, paraphrase and tell the difference	Part 9D sentences	☐ ☒ ☒

12D • Replay 🟡

Find your thirty seconds from Part 0C. Listen. **Record it again.** One sentence: what is different?

12E • Glossary — forty items, as a map

THE JOB • repair • rebuild • clear • fix • finish • site • scaffolding • contractor • council • funding • volunteer **HOW IT IS GOING** • progress • ongoing • slow • steady • temporary • get on with • bit by bit • it's getting there **WHEN IT IS NOT** • delay • nowhere near • behind schedule • hold up **HOW LONG** • since • for • throughout • all this time • all week • we've been at it **HOW OFTEN** • constantly • non-stop • on and off • day after day • ever • carry on **WHERE IT STANDS** • lately • recently • still • finally • yet

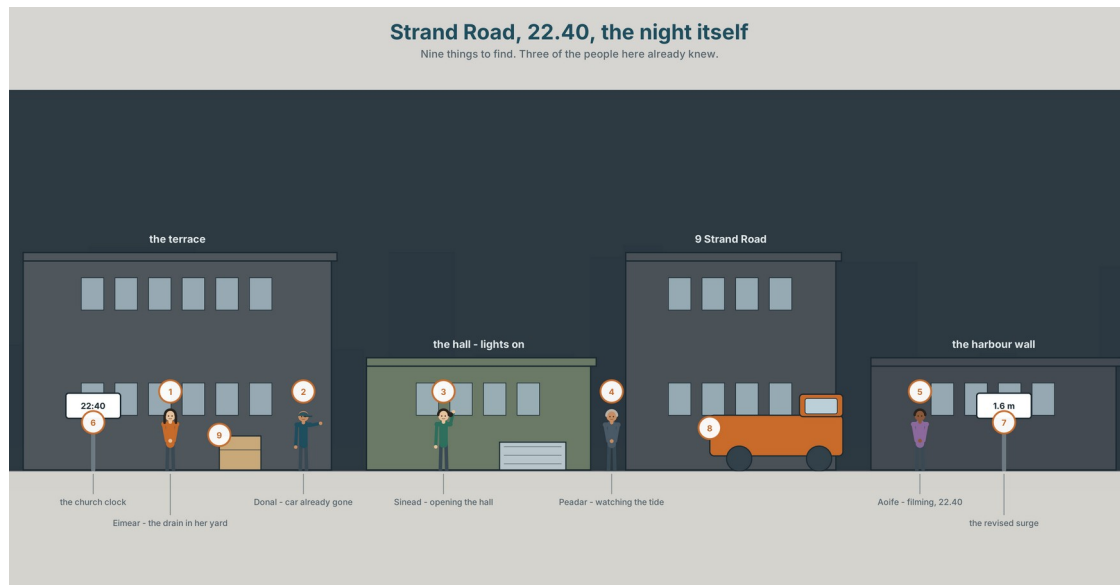

12F • Next

Unit 3 • What happened before that?

A2.2 • Unit 3 • Who Was Warned, and When

English Animated • *Telling the Story* • Ballinmore, west coast of Ireland Student's Book pages 50–71 • 22 pp • ~10 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

Strand Road, 22.40, the night itself — Nine things to find. Three of the people here already knew.

What happened before that?

By the end of this unit you can give a clear account of one night, with the events in the right order. One hundred words.

◆ A · THE WORLD

An inquiry, and the difference between what happened and what was known

◆ B · THE SYSTEM

the past perfect · *by the time, already, before* · 23 words for cause and blame · 17 words for putting things in order · *had* as /həd/ and /əd/

◆ C · THE PERFORMANCE

A hundred words that put one night in the right order

0A · Find it

Find nine things in this picture. It is the night, not the morning.

the top road · a car being moved · the drain in the yard · the hall lights on · a phone screen · a torch · the harbour wall · the tide line · the church clock

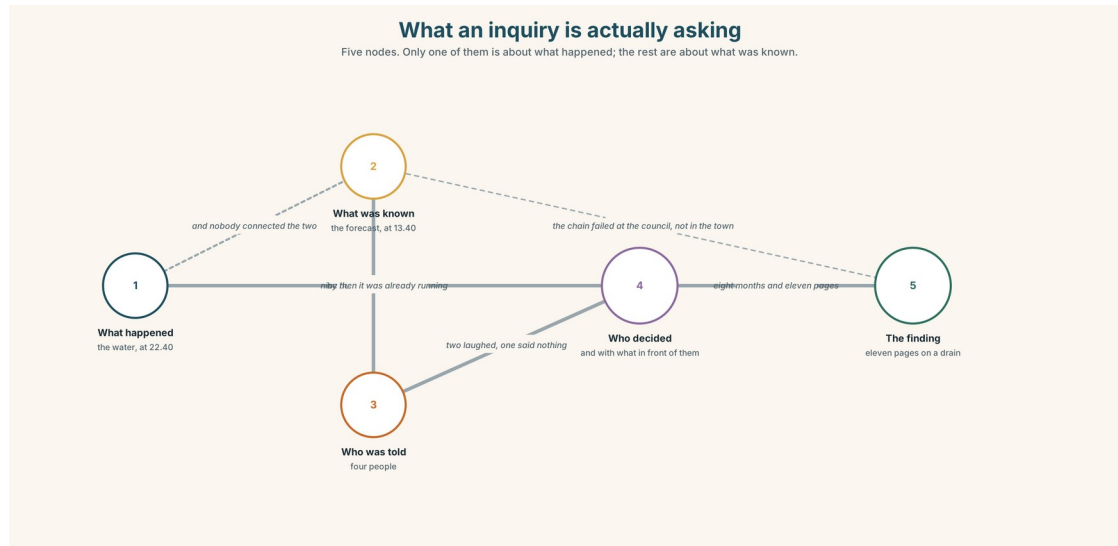

0B · Guess it

Three of the people in this picture already knew. Which three, and how?

0C · Say it

Record thirty seconds. Think of something that went wrong. What had happened before it, that nobody connected at the time? You will record it again at the end of this unit.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

{width=6.

6in}

What an inquiry is actually asking — Five nodes. Only one of them is about what happened; the rest are about what was known.

1A • Meet — the words of an inquiry

Match each word to one place on the map.

cause • blame • fault • inquiry • evidence • witness • report • record • official • responsible

1B • Sort — a fact, a judgement, or a procedure?

Three columns.

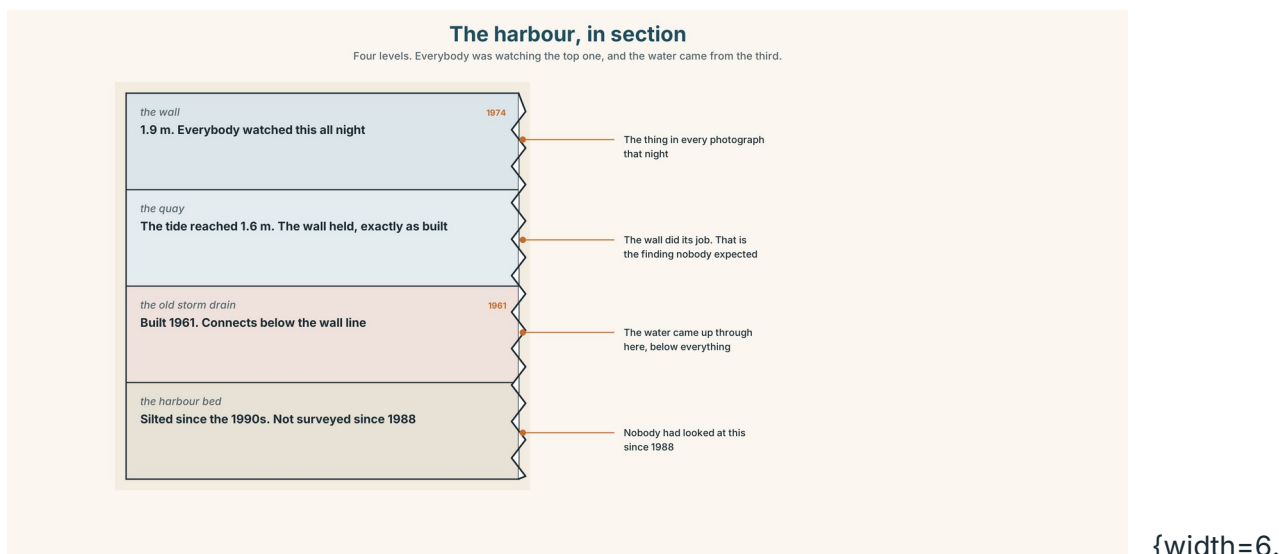

responsible • witness • evidence • record • blame • inquiry • report • minute • cause • fault

One of them moves column the moment somebody writes it down. Which?

1C • Meet — what people did and did not do

warn • ignore • decide • mistake

Warning somebody is not the same as being believed. Which of the four is about the speaker, and which about the listener?

6in}

The harbour, in section — Four levels. Everybody was watching the top one, and the water came from the third.

Look at the harbour, in section. Four levels, and the water came from one of them. **Which one, and which level was everybody watching?**

1D • Stretch — the phrases

Complete each one with one word.

1. The council has agreed to **look** ____ it.
2. They **put it** ____ **to** bad luck, because nobody wanted to say the word *drain*.
3. **At the** ____, it looked like an ordinary high tide.
4. **In** ____, the Thursday forecast was the whole story.
5. It took eleven months to **find** ____ what had actually happened.

1E • The saying

f Nobody saw it coming.

Four words that are almost always false, and almost always said in good faith.

Donal saw it coming. Write the sentence he could say at the inquiry — and then write the reason he might not.

1F • Own it

Think of something that was predicted and ignored where you live. Tell a partner **three sentences**: who said it, who did not listen, and what happened.

Part 2 • Listening ♦ A • THE WORLD

6in}

The order of the night — Two witnesses who agree about every fact and disagree about the order.

2A • The order of the night 🎧 Track 3.1

Before you listen. The inquiry wants to know who was warned and when. **Guess: is the disagreement about the facts or about the order?**

Listen once. One question. What time did the drain reverse?

Listen again. Put these in order. Write 1 to 6.

- ☐ the hall opened · ☐ the drain reversed · ☐ Donal moved his car · ☐ the forecast changed ·
☐ the water reached the doors · ☐ Eimear decided not to use the sandbags

Listen again. True or false?

1. The forecast had already changed when Donal moved his car. ☐ T ☐ F
2. The hall had opened before the water reached the doors. ☐ T ☐ F
3. Eimear decided about the sandbags after Donal moved his car. ☐ T ☐ F
4. The drain reversed before anybody noticed the tide. ☐ T ☐ F

Noticing. Four sentences from the recording.

1. *The forecast changed on the Thursday.*
2. *The forecast had changed before he moved the car.*
3. *By the time we got there, it had already started.*
4. *She decided about the sandbags after he had moved it.*

One of these is a plain past. Three put one past event before another. Which is which?

2B • Decoding clinic 🎧 Track 3.2

Twenty-five seconds. Four jobs.

1. How many times can you hear *had*?
2. In *it had already started*, is *had* a full word or a sound on the end of *it*?
3. Catch the two times given.
4. One speaker corrects their own order. Where?

Transcripts, page 152.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

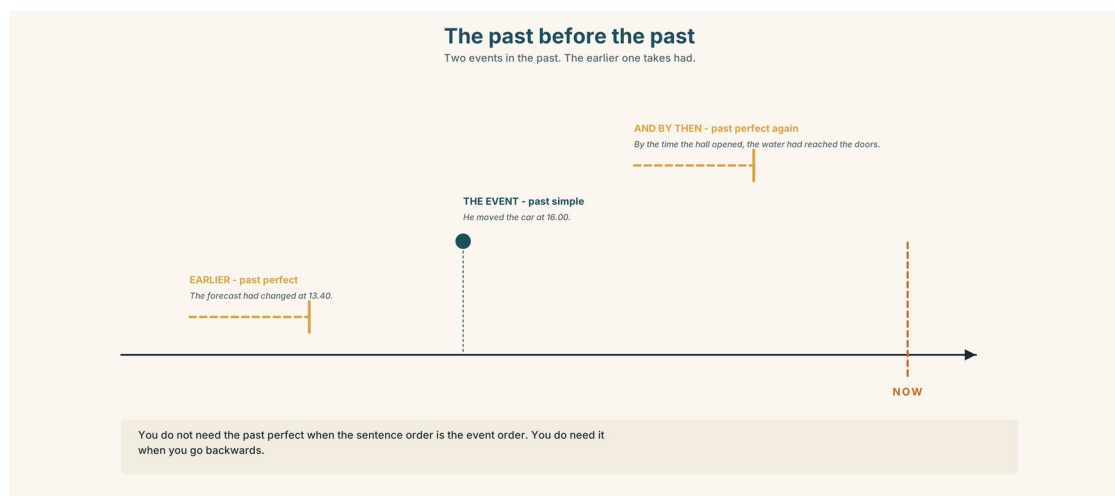

The past before the past

3A • Notice

Look at the four sentences in Part 2.

1. Sentence 1 and sentence 2 are about the same forecast. **What does sentence 2 add?**
2. In sentence 3, which happened first — arriving, or starting?
3. In sentence 4, could you use a plain past? **Would anything be lost?**
4. **When do you actually need the past perfect?** Try: *First he moved the car. Then it flooded.*
5. Try "*By the time we got there, it already started.*" **What is missing?**

3B • See

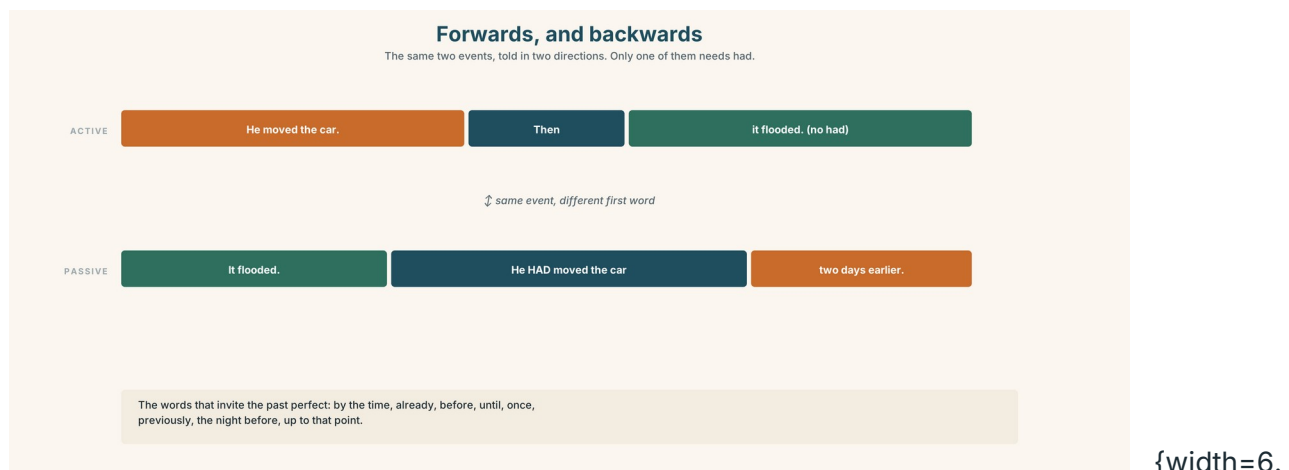

{width=6.

6in}

*The past before the past — Two events in the past. The earlier one takes *had*.*

Now look at the second picture. **Two events, one line. Which one gets the *had*?**

6in}

Forwards, and backwards — The same two events, told in two directions. Only one of them needs had.

3C • Know

	Shape	Use it for
past simple	<i>moved, changed, decided</i>	events in the order they happened
past perfect	<i>had + past participle</i>	an event before the one you are already talking about

You do not need it when the order is already clear. ✓ *He moved the car. Then it flooded.* — the order is the sentence order. **You do need it when you go backwards.** ✓ *It flooded. He **had moved** the car two days earlier.*

The words that invite it: *by the time · already · before · until · once · previously · the night before · up to that point*

Watch out. *had* is the auxiliary for everybody. × *he hadded* ✓ *he had moved* And in speech it is almost never a full word: *it'd already started*.

Why it matters. An inquiry is not asking what happened. It is asking **what had already happened when each person decided.**

3D • Use — controlled

By the time the hall opened, the water (1) _____ (already / reach) the doors. Donal (2) _____ (move) his car on the Thursday, two days before, because the forecast (3) _____ (change) that morning. Eimear (4) _____ (decide) against the sandbags after he (5) _____ (move) it, and she says now that she (6) _____ (not know) the forecast (7) _____ (change) at all.

3E • Use — guided

Join each pair, putting the **earlier** event in the past perfect.

1. The forecast changed. / He moved the car.
2. The drain reversed. / Anybody noticed the tide.
3. She put the sandbags in the shed in 2019. / The water came in January.
4. The hall opened. / The first family arrived.

5. He warned four people. / Nobody acted.

3F • Use — open

Tell a partner about something that went wrong — anywhere, any time. Give the event first, then go **backwards** to what had already happened. **Use *had* three times.**

3G • Check — six items

1. By the time we arrived, it _____ (already / start).
2. He moved the car because the forecast _____ (change).
3. She _____ (keep) the sandbags since 2019.
4. Up to that point nobody _____ (say) anything.
5. Once the drain _____ (reverse), there was nothing to be done.
6. The night _____, he _____ (warn) four people.

0-3 → Workbook pp. 16-18. 4-5 → Part 6. 6 → page 63.

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency starter — backwards

One learner names an event. The next must say what **had** happened before it. The next goes one step further back. **Five steps, then stop.**

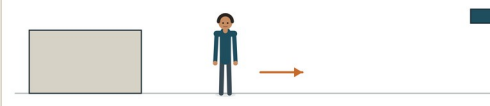

"The hall opened." → "The water had already reached the doors." → "The drain had reversed." → ...

4B • The functional core — giving an account

Thursday afternoon, and Saturday night
Learner A has the Thursday. Learner B has the night. Both are the same street.

Thursday, 16.00

one car going up the hill

Saturday, 22.40

the hall lit, the drain already running

Which three differences had already happened by the time of panel two?
7 differences — find them all

{width=6.

6in}

Thursday afternoon, and Saturday night — Learner A has the Thursday. Learner B has the night. Both are the same street.

Language Bank

the event	<i>At about ten... · That was when...</i>
before it	<i>By then... · It had already... · The night before...</i>
the order	<i>Before that... · Afterwards... · Up to that point...</i>
the honest gap	<i>I don't know what had happened by then. · I only found out later.</i>

Role play. Learner A is giving evidence. Learner B is asking the questions. **Six minutes.** Learner B may only ask **when** and **what had happened by then**.

4C • The performance — one hundred seconds

Give an account of **one night** — real or from the unit. **One hundred seconds.** You must give:

six events, in order · at least three things that had already happened · one thing you did not know at the time

Record it.

4D • Observer

One person listens for **one thing**: could they draw the timeline from what they heard?

4E • Two criteria

☐ Did I use the past perfect at least three times? ☐ Is there one thing I did not know at the time, marked as such?

Part 5 • Reading A • THE WORLD

5A • Predict

Two letters to the inquiry. The title is "**Submissions 14 and 15.**" **What do you expect two neighbours to disagree about?** One sentence.

5B • Read — one hundred and ten seconds

SUBMISSION 14 — D. Hegarty, 9 Strand Road

I moved my car to the top road at about four on the Thursday afternoon. I did it because the forecast had changed that morning — the surge had gone from 1.1 metres to 1.6 — and because the yard drain had backed up twice in November.

I told four people. I am not going to say which four. Two of them laughed, and I want to be clear that they laughed kindly and that I would have laughed too.

I am not submitting this to blame anybody. I am submitting it because the inquiry has asked whether anybody was warned, and the honest answer is that four people were warned by me and at least eleven were not warned by anybody, and the reason is that I did not want to be the man knocking on doors about a forecast.

SUBMISSION 15 — E. Nolan, 14 Strand Road

I was one of the four.

I did not laugh. I thought about the sandbags and decided against them, and I decided against them partly because of how the other two had reacted.

I want to record that Donal Hegarty was right and was treated as though he were being silly, and that I joined in by saying nothing. That is the part I would like in the record, and I understand that it is not evidence of anything.

I would also like to say that if he had knocked on eleven doors, I do not think it would have made any difference, and I am saying that because I do not want this to become a story about one man who should have done more.

5C • Answer

1. Why did Donal move his car? Give both reasons.
2. How many people did he tell, and how did two of them react?
3. **Why does he say he did not knock on more doors?**
4. What does Eimear say she did, and what does she say she did not do?
5. **What does she ask to have put in the record, and why does she say it is not evidence?**
6. What is her last point, and who is it protecting?

5D • Vocabulary in context

Guess from the text. Then check.

surge · backed up · laughed kindly · joined in by saying nothing · would have made any difference

5E • The counter-text

The inquiry's timeline of the night

Eighteen entries. Two of them say NO RECORD, and one time is disputed by forty minutes.

INDEPENDENT INQUIRY - AGREED TIMELINE, ANNEX B		
TIME	EVENT	SOURCE
08.15	Forecast issued - surge 1.1 m	met service log
13.40	Forecast revised - surge 1.6 m	met service log
13.40	Revision sent to council duty phone	met service log
---	Council duty officer reads revision	NO RECORD
16.00	Vehicle moved to upper road	submission 14
16.00-18.00	Four residents informed	submission 14
---	Any council warning to residents	NO RECORD
21.50 *	Yard drain reverses, 14 Strand Rd	submission 15
22.40	Hall opened	hall log
23.30	First water at door level	photographs

NOTE *		
The 21.50 entry is disputed. The resident states "about ten". Photographic metadata gives 21.50. The difference is forty minutes and the inquiry has adopted the metadata.		

THE GAP		
Forecast revised	13.40	
First water	23.30	
Hours available	9 h 50 m	
No official warning was issued to residents at any point in that period.		

```
{width=6.
```

6in}

The inquiry's timeline of the night — Eighteen entries. Two of them say NO RECORD, and one time is disputed by forty minutes.

Read the inquiry's timeline of the night and answer.

1. What time did the forecast change, and what time did the drain reverse?
2. **How many hours were there between the forecast change and the first water?**
3. Which two entries are marked "no record"?
4. One entry has a footnote saying the time is disputed. Which, and by how much?

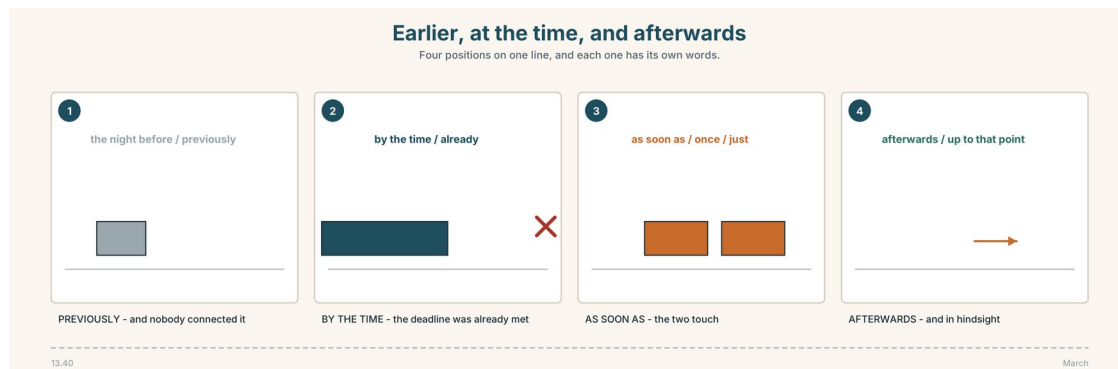

5F • Two texts

Donal's submission says the forecast changed **that morning**. The inquiry timeline records the forecast change at **13.40**.

Put those two facts together. Does it matter? Two sentences.

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Putting things in order

{width=6.

6in}

Earlier, at the time, and afterwards — Four positions on one line, and each one has its own words.

6A • Sort — earlier, same time, or later?

Three columns.

up to that point • the night before • before • just • after • already • by the time • once • afterwards • previously • then • until

6B • Chunk completion

1. **By the** _____ we got there, it had started.
2. **As** _____ **as** the drain reversed, he knew.
3. He had moved it **the night** _____ .
4. **Up to that** _____ , nobody had said anything.
5. They **went back** _____ the forecasts for the whole week.
6. **It had** _____ **started** when the hall opened.

6C • Two that look the same

before and **by the time** both put one thing earlier. They are not interchangeable.

*He moved it **before** the forecast changed. — one thing, then the other. **By the time** the forecast changed, he had moved it. — the deadline, and it was already met.*

Rewrite these three with *by the time*.

1. He had already left when she phoned.
2. The hall was full when the last family arrived.
3. Nobody had read the notice when the vote was taken.

BEFORE, and BY THE TIME

Both put one thing earlier. One of them is a sequence; the other is a deadline.

BEFORE - one, then the other

he moved it before the forecast changed

BY THE TIME - a deadline, already met

by the time it changed, he HAD moved it

✓

Which one tells you the first thing was finished?

6 differences — find them all

{width=6.

6in}

BEFORE, and BY THE TIME — Both put one thing earlier. One of them is a sequence; the other is a deadline.

Six differences. Find them, then answer the question under the picture.

6D • Contrast Clinic — past simple or past perfect

Six items. Choose, and say why.

1.

He ____ (move) the car on Thursday. Then it ____ (flood).
2.

Once the drain ____ (reverse), it ____ (be) too late.
3.

She ____ (keep) the sandbags since 2019 and never ____ (use) them.
4.

By the time we ____ (arrive), they ____ (go).
5.

It ____ (flood) on Saturday. He ____ (move) the car two days earlier.
6.

I ____ (not know) the forecast ____ (change).

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

The word that attaches itself

The word that attaches itself

Had almost never stands alone. It becomes a d on the end of the word before it.

it had already started

→

ɪ t ə d ɔː l ' r e d ɪ d

it'd - and most people do not hear

he had moved it

→

h iː d ' m uː v d ɪ t

he'd, one syllable

they had gone

→

ð eɪ d ' g o n

they'd

I had known

→

aɪ d ' n əʊ n

I'd - and never I would

he HAD moved it

→

h iː ' h æ d ' m uː v d ɪ t

full only when somebody has said

{width=6.

6in}

The word that attaches itself — Had almost never stands alone. It becomes a d on the end of the word before it.

7A • Hear Track 3.3

it had already started → *it'd already started* → /ɪtəðɔ:l'redi/ he had moved it → *he'd moved it* → /hi:d'mu:vdi/ they had gone → *they'd gone* → /ðeɪd'gɒn/ I had known → *I'd known* → /aɪd'nəʊn/

7B • Say

Say each one. Then say the sentence three times, faster:

By the time we got there, it had already started.

7C • Make it mean something

Say these two:

He HAD moved it. (somebody has just said he did not) He'd moved it. (plain — this is just the order of events)

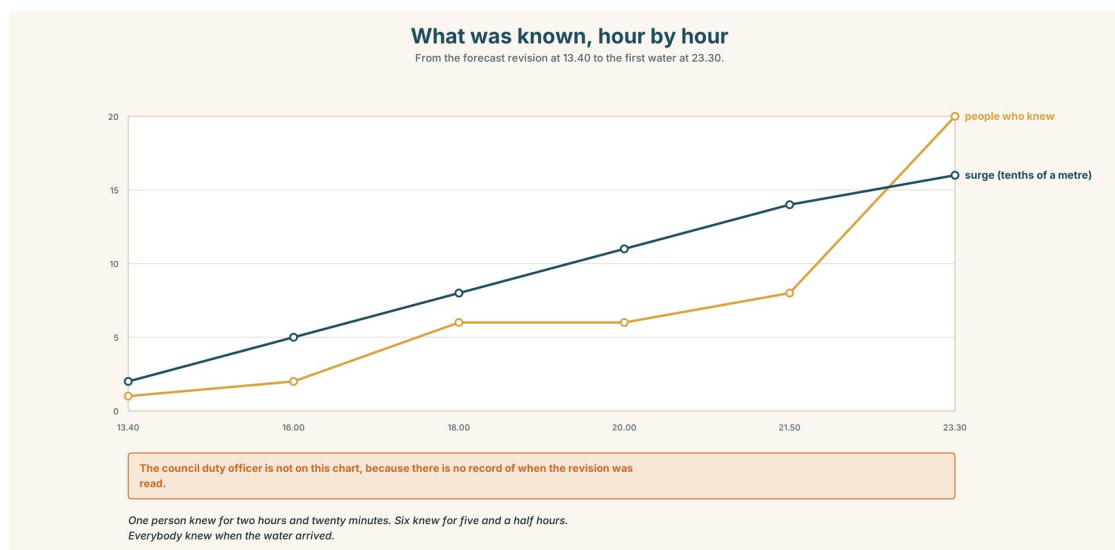

The first one is an argument. Who is it with?

7D • Fluency 20

Twenty seconds: **three things that had already happened before you got up this morning.** Three times, faster.

Part 8 • Writing C • THE PERFORMANCE

An account of one night • 100 words

{width=6.

6in}

What was known, hour by hour — From the forecast revision at 13.40 to the first water at 23.30.

8A • Read the model

At about ten the drain in my yard started running the wrong way. By then the tide had been rising for two hours and the forecast had been revised twice, though I did not know that until March. [the event, then straight backwards – and one thing marked as learned afterwards]

I had kept sandbags in the shed since 2019. I did not put them out. Donal had moved his car two days earlier and two people had laughed, and I had said nothing. [three past perfects in a row, and they are doing the real work of the paragraph]

The water reached the floor at about half past eleven. Everything after that is in the record. [the plain past returns for the main line, and the writer stops]

Questions about the writer's choices:

1. The second paragraph is entirely past perfect. **What is it for?**
2. The last line hands the rest over to the record. **Why end there?**

8B • The anti-model

It was a terrible night. The water came in very quickly and everybody was shocked. We did what we could but there was nothing anybody could have done. Nobody saw it coming.

Correct English. **Name two things it does not tell an inquiry** — and one thing it quietly claims.

8C • Plan

the event, with a time → what had already happened by then → what you had and had not done → back to the plain past for the end

8D • Write — 100 words

8E • Peer review — two criteria

☐ Could a reader draw the timeline? ☐ Is there one thing the writer learned afterwards, marked as such?

8F • Write it again • 8G • Publish

On the wall, with the inquiry timeline from Part 5E beside it.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

CULTURE FILE • Hospitality and Obligation

A favour, and what it leaves behind
Four doors, four answers, and only one of them creates a debt.

1 dismissed - and that is the gift  "You'd have done the same." the night	2 a debt, named, and in some places an insult  "I'll pay you back."	3 closed. Do not raise it again  "Say nothing about it."	4 deferred - and eight months later, still owed  "We'll have you over when the kitchen's done." eight months on
--	---	--	--

{width=6.

6in}

A favour, and what it leaves behind — Four doors, four answers, and only one of them creates a debt.

9A • Four doors 📻 Track 3.4

On the night, four families took other families in. **Listen to four of them, eight months later.**

1. Which one says it was nothing?
2. Which one is still slightly uncomfortable?
3. **Which one has been thanked too much, and what has that done?**

9B • What is owed, and when

In some places a favour creates a debt that must be returned. In others, saying so is the insult.

Where do these four sit?

"You'd have done the same." · "I'll pay you back." · "Say nothing about it." · "We'll have you over when the kitchen's done."

9C • Refusing help

Refusing help is also a social act, and it is read.

What does each of these say?

1. *"We're grand, honestly."*
2. *"There's people worse off."*
3. *"I'd rather not, if you don't mind."*
4. *"Ask Peadar first."*

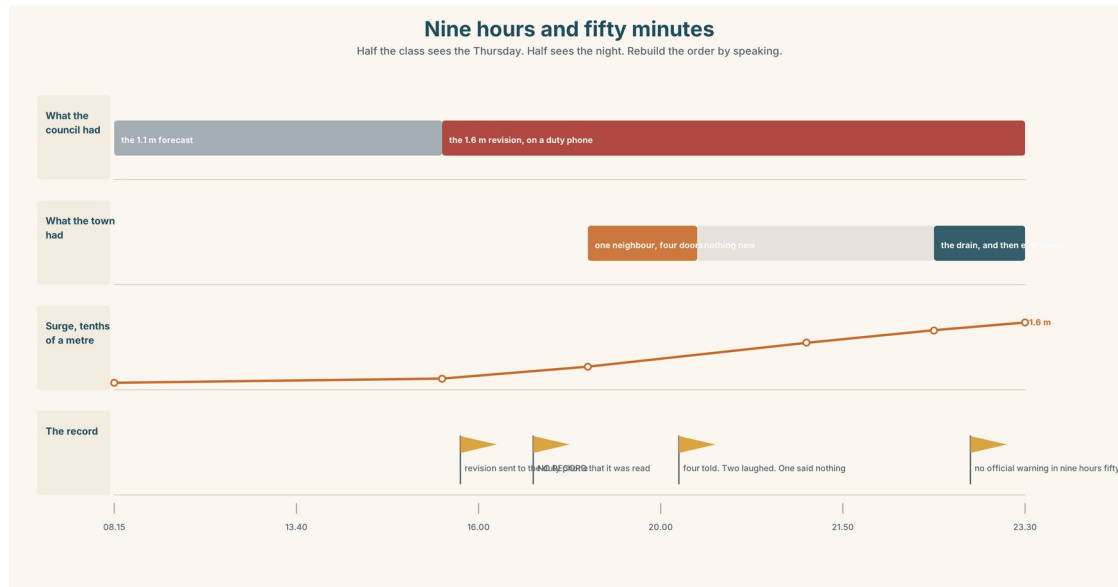

9D • Your turn

In pairs. **One of you offers help. The other does not want it but does need it. Four minutes.** Neither of you may use the word *no*. **Then swap.**

9E • Transfer

In your own culture: how do you thank somebody for something too large to thank them for?
Write one sentence. Bring it.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

Nine hours and fifty minutes — Half the class sees the Thursday. Half sees the night. Rebuild the order by speaking.

10A • Relay

Half the class sees the Thursday. Half sees the Saturday night. **Rebuild the order by speaking.**
Ten minutes.

10B • Simplify

Explain the inquiry timeline from Part 5E to somebody who was not in the town. **Four sentences only.**

Plan: what changed first → what nobody noticed → when the water came → what is disputed

10C • Compress

Donal's submission into **thirty words**, without losing the reason he gives.

10D • Online

Write **one message** to the inquiry's public inbox: you were told, you did nothing, and you want that on the record without it becoming a story about one person.

10E • Your language

How does your language go backwards in time? **Is there a tense like the past perfect, or do you use words like *before* and *already*?** Show a partner both.

Part 11 • The Decision ◆ C • THE PERFORMANCE

Saying it in that room

The inquiry asks: was anybody warned? Donal warned four people. Two of them laughed. The inquiry sits in the community hall, and those two will be in it.

- **Say it all.** Who he told, and who laughed. It is true and it is what was asked.
- **Say he told people.** No names, no laughing. The answer is still honest.
- **Say nothing.** Let the official record say nobody was warned. He has to live here.

11A • The evidence

1. **The inquiry timeline** from Part 5E — and the two entries marked "no record".
2. **The chart** — what was known, by whom, hour by hour.
3. **The voice.** Eimear, twenty seconds: *"If he names them, this becomes a story about two people who laughed, and it is not that story. If he names nobody, it becomes a story about nobody knowing, and it is not that either."*

11B • Talk about it

In threes. Everybody says one. Use the frame.

I think Donal should _____, because _____.

Words you can use: *evidence · witness · blame · fault · responsible · record · official · in hindsight*

11C • Decide

Write **two sentences**. Choose, and say why.

I think Donal should _____, because _____.

11D • Model decision

He should say that four people were told and that he will not name them, and say out loud, in the room, that he is not naming them because the question the inquiry is really asking is not about four people. Refusing in public is not the same as hiding. It puts the warning in the record and keeps the inquiry pointed at the drain.

11E • The Reveal

What happened. He said four people were told and declined to name them. The chair accepted it without comment and moved on in under a minute.

One of the two who had laughed stood up at the end and named herself, which nobody had asked for and which Donal says he wishes she had not done, because it made the hall go quiet and because it turned out to be the only part of the day anybody remembered.

The final report found that the warning chain had failed at the council, not in the town. It does not mention Donal. The eleven-page section on the storm drain does not mention anybody.

He kept the names out. Somebody put one back in. And the report was about a drain.

Was it the right decision? Say why — and say what you think of what she did.

Part 12 • Landing ♦ all three lines

12A • Recycle — ten items

1. By the time we arrived, it _____ (already / start).
2. He moved it because the forecast _____ (change).
3. They agreed to **look** _____ it .
4. **In** _____ , the Thursday forecast was the whole story.
5. It took eleven months to **find** _____ .
6. (Unit 2) We _____ (wait) since June.
7. (Unit 2) I _____ (phone) him four times.
8. (Unit 1) If I _____ you, I wouldn't wait.
9. (A2.1 U2) It was raining _____ he left the farm.
10. (A2.1 U3) I _____ (use) to live on this road.

12B • Consolidate

One hundred words. One night, in order. Six events, three past perfects, and one thing you only found out afterwards.

12C • Can-do, with evidence

I can...	My evidence	Sure?
put one past event before another	Part 3G score	☐ ☒ ☒
give a clear account of a night in a hundred seconds	Part 4C recording	☐ ☒ ☒
write a hundred words a reader could draw	Part 8 draft 2	☐ ☒ ☒
offer and refuse help without saying no	Part 9D role play	☐ ☒ ☒

12D • Replay 🟡

Find your thirty seconds from Part 0C. Listen. **Record it again.** One sentence: what is different?

12E • Glossary — forty items, as a map

THE QUESTION • cause • blame • fault • responsible • mistake • in hindsight **THE PROCESS** • inquiry • evidence • witness • report • record • minute • official • look into • find out **WHAT PEOPLE DID** • warn • ignore • decide • at the time • put down to • nobody saw it coming **EARLIER** • earlier • previous • previously • before • the night before • already • had • it had already started **THE MOMENT** • by • by the time • as soon as • once • just • until • up to that point **AFTER** • after • then • afterwards • go back over

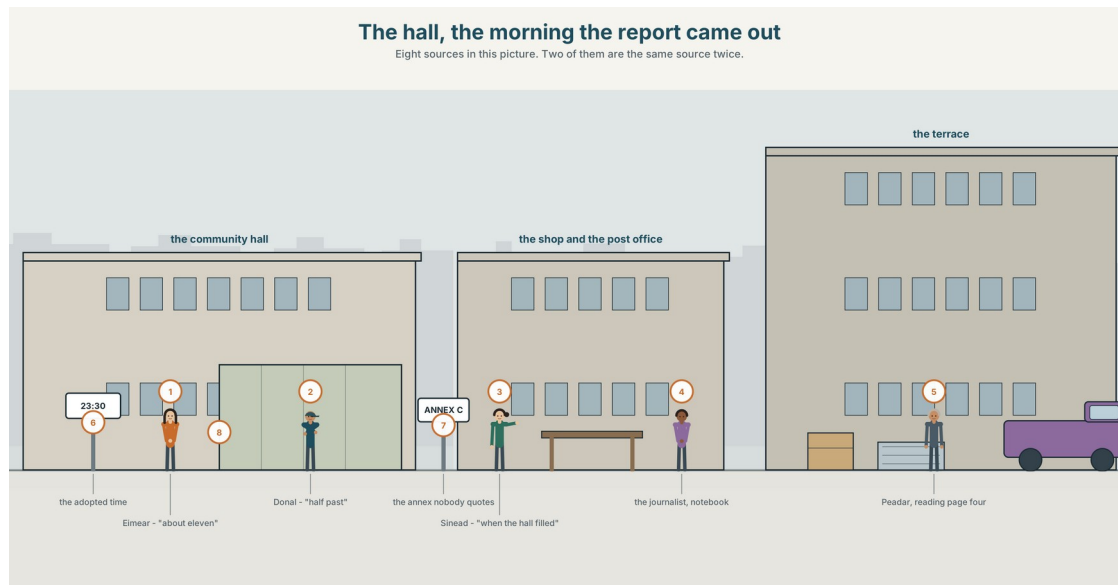

12F • Next

Unit 4 • What did they actually say?

A2.2 • Unit 4 • Forty Minutes Apart

English Animated • *Telling the Story* • Ballinmore, west coast of Ireland Student's Book pages 72–93 • 22 pp • ~10 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

The hall, the morning the report came out — Eight sources in this picture. Two of them are the same source twice.

What did they actually say?

By the end of this unit you can report three people's accounts of the same event, accurately and without judging any of them.

◆ A · THE WORLD

Three honest people, one event, and forty minutes between them

◆ B · THE SYSTEM

reported statements · reporting verbs · 23 words for claims and sources · 17 verbs for saying things · where the stress falls when you report

◆ C · THE PERFORMANCE

Three accounts, relayed fairly, in writing

0A · Find it

Find eight sources in this picture. Two of them are the same source twice.

a notebook · a phone recording · a photograph · a printed statement · a letter · a noticeboard · a person talking · a screen showing a broadcast

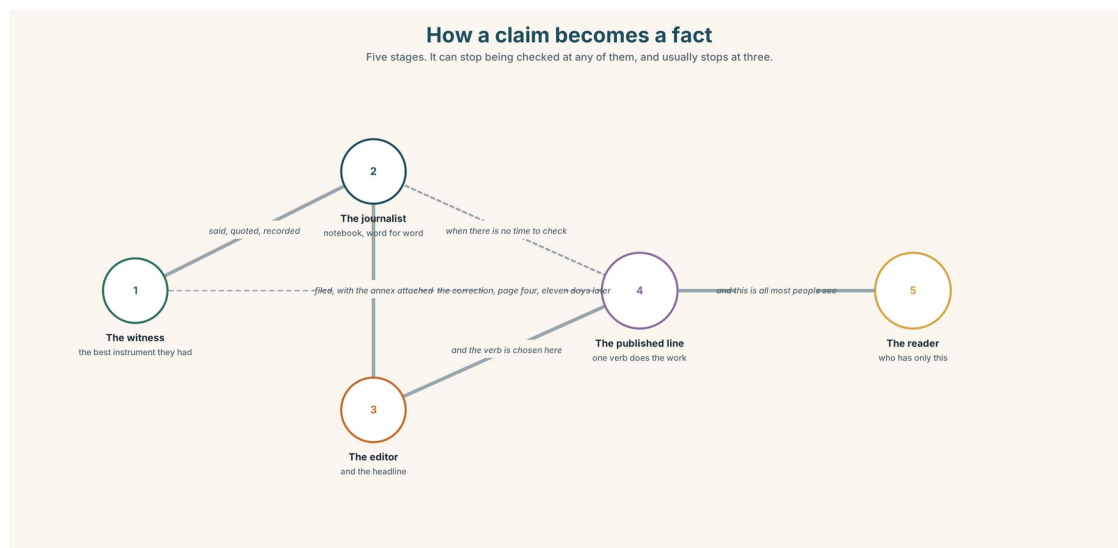

0B · Guess it

Two of these sources will agree with each other and still both be wrong. Which two, and why?

0C · Say it

Record thirty seconds. Think of something you were told recently. Who told you, and how do you know they knew? You will record it again at the end of this unit.

Part 1 · Vocabulary Lab 1 ◆ B · THE SYSTEM

{width=6.

6in}

How a claim becomes a fact — Five stages. It can stop being checked at any of them, and usually stops at three.

1A • Meet — the words of a claim

Match each word to one place on the map.

claim · source · quote · statement · account · version · evidence · footage · journalist · editor

1B • Sort — the thing said, the person, or the test?

Three columns.

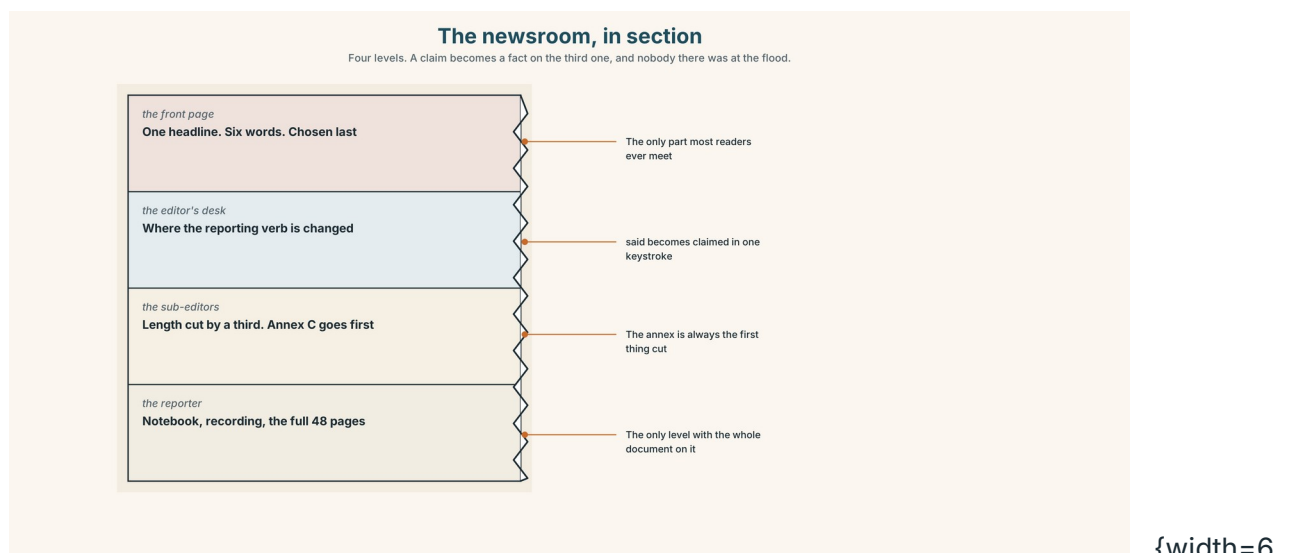

accurate · doubt · claim · source · version · account · exact · editor · trust · journalist

One of them is in two columns at once. Which?

1C • Meet — three things you do to a claim

deny · confirm · doubt

Denying is not the same as disproving. Which of the three can be done without any information at all?

6in}

The newsroom, in section — Four levels. A claim becomes a fact on the third one, and nobody there was at the flood.

Look at the newsroom, in section. Four levels, four decisions. **At which level does a claim become a fact, and who is standing there?**

1D • Stretch — the phrases

Complete each one with one word.

1. **According** _____ the inquiry, the surge peaked at 1.6 metres.
2. He said it **off the** _____, which means you cannot print it.
3. She wrote it down **word for** _____, and that is why it is useful.
4. Nobody has **the full** _____, and nobody ever will.

5. The paper has printed a _____ and the editor has apologised.

1E • The saying

f That's what she said.

Five words that pass responsibility along. **Say them twice:** once as an honest report, once as a way of not being blamed. **What changes?**

1F • Own it

Think of something you believe that you have never checked. Tell a partner **three sentences:** what it is, who told you, and how you would find out.

Part 2 • Listening ♦ A • THE WORLD

Three times, one night
Two of them are certain. Neither of them checked the same thing.

"The water was at the door at eleven."

Eimear
checked the clock

She said the water was at the door at eleven.
He insisted it was half past.

Donal
heard the radio

6in}

Three times, one night — Two of them are certain. Neither of them checked the same thing.

2A • Three times, one night 📻 Track 4.1

Before you listen. Three people say when the water reached the doors. They are forty minutes apart. **Guess: does any of them sound uncertain?**

Listen once. One question. What three times are given?

Listen again. Complete the table.

	Time they give	What they were doing	How sure they sound
Eimear			
Donal			
Sinéad			

Listen again. True or false?

1. All three were in different places. ☐ T ☐ F
2. One of them checked a clock. ☐ T ☐ F
3. One of them is reporting what somebody else said. ☐ T ☐ F
4. All three are equally confident. ☐ T ☐ F

Noticing. Four sentences from the recording.

1. *"The water was at the door at eleven."*
2. *She said the water was at the door at eleven.*
3. *She said that she had checked the clock.*
4. *He insisted it was half past.*

Two are the words themselves. Two are somebody reporting them. And one of the reporting verbs is not neutral. Which?

2B • Decoding clinic Track 4.2

Twenty-five seconds. Four jobs.

1. How many reporting verbs can you hear?
2. In *she SAID that*, which word is stressed?
3. Catch the three times.
4. One speaker changes a reporting verb halfway through. Which, and to what?

Transcripts, page 153.

Part 3 • Grammar Lab 1 B • THE SYSTEM

Moving somebody's words

3A • Notice

Look at the four sentences in Part 2.

1. In sentence 1, what tense is *was*? In sentence 2?
2. Sentence 3 has *had checked*. **What did she actually say?**
3. *said* and *insisted* both report. **What does *insisted* add that *said* does not?**
4. **When does the tense not need to move back?** Try: *She said the drain is still blocked.*
5. Try *"She said me that she had checked."* **What is wrong?**

3B • See

The words, and the report of them

Everything steps one back: the tense, the pronoun, and the time word.

ACTIVE

"I

HAVE checked

it NOW."

↕ same event, different first word

PASSIVE

She said

SHE HAD checked

it THEN.

say that - never say somebody that. tell somebody that - never tell that. And no shift is needed when the thing is still true: she said the drain IS still blocked.

{width=6.

6in}

The words, and the report of them — Everything steps one back: the tense, the pronoun, and the time word.

Now look at the second picture. The ladder runs from neutral to loaded. Where would you put claimed?

From flat to loaded

Five reporting verbs. Only the bottom one leaves the reader free.

the reader has been told what to think

She CLAIMED she had checked I do not believe her

She ADMITTED she had checked it was somehow against her interest

She INSISTED she had checked somebody had pushed back

She ADDED that she had checked me after something else

She SAID she had checked and nothing else at all

The reporting verb is the cheapest place in a sentence to hide an opinion, which is why it is the first thing an editor changes.

{width=6.

6in}

From flat to loaded — Five reporting verbs. Only the bottom one leaves the reader free.

3C • Know

Direct	Reported
"The water is at the door."	She said the water was at the door.
"I checked the clock."	She said she had checked the clock.
"I will phone you."	She said she would phone me.
"I can see it."	She said she could see it.

Everything shifts one step back, and so do I/you, here/there, now/then, today/that day.

say and tell are not the same shape. ✓ She **said that** she had checked. ✓ She **told me that** she had checked. × She said me... × She told that...

You do not have to shift if the thing is still true. ✓ *She said the drain **is** still blocked.* — because it is.

The reporting verb is never neutral for long. *said* is the flat one. *insisted, claimed, admitted* and *revealed* all add a judgement, and a reader hears it.

3D • Use — controlled

Eimear said the water (1) _____ (be) at the door at eleven and that she (2) _____ (check) the clock. Donal insisted it (3) _____ (be) half past. Sinéad told the inquiry that she (4) _____ (not look) at a clock at all and that she (5) _____ (go) by when the hall filled. The report added that the photographs (6) _____ (show) 23.30, and went on to say that it (7) _____ (adopt) that time.

3E • Use — guided

Report each one. **Use a different reporting verb each time.**

1. *"I checked the clock."* — Eimear
2. *"It was half past, not eleven."* — Donal
3. *"I didn't look at a clock."* — Sinéad
4. *"We have adopted the photographic time."* — the inquiry
5. *"I'm not going to comment on that."* — the council

3F • Use — open

Interview a partner for two minutes about something they did last week. **Then report three things they said to a third person**, who checks your report with them.

3G • Check — six items

1. *"I am tired."* → She said she _____ tired.
2. *"I checked it."* → He said he _____ it.
3. *"I will phone."* → She said she _____ phone.
4. She _____ me that she had seen it. (*said / told*)
5. *"The drain is still blocked."* → He said the drain _____ still blocked.
6. *"I didn't say that."* → She _____ saying it. (*use deny*)

0-3 → Workbook pp. 22-24. **4-5** → Part 6. **6** → page 85.

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency starter — the relay

Three learners. A tells B something. B reports it to C. C reports it back to A. **Thirty seconds each.** A says what changed.

Four rounds, and after each one the group names the verb that did the damage.

4B • The functional core — relaying fairly

The report, and the article
Learner A has section 4. Learner B has the newspaper. Same night, same three people.

the report, section 4

six paragraphs, one verb: said

4.1 - 4.6

the article

one headline, three different verbs

Which three of the differences are verbs?
7 differences — find them all

{width=6.6in}

The report, and the article — Learner A has section 4. Learner B has the newspaper. Same night, same three people.

Language Bank

flat reporting

She said that... · He told me that... · According to...

marking certainty

She was sure that... · He thought, but wasn't certain, that...

marking the source

She had checked a clock. · He was going by the hall filling up.

refusing to judge

Both of them are honest about this. · I can't reconcile the two.

Role play. Learner A interviews. Learner B is a witness who is confident and wrong. **Six minutes.** Learner A must not say *are you sure?*

4C • The performance — one hundred seconds ●

Report **three accounts of one event. One hundred seconds.** You must give:

what each person said · how each one knew · where they disagree · which you would put in a report, and why

Record it.

4D • Observer

One person listens for **one thing**: did any reporting verb take a side?

4E • Two criteria

☐ Did I shift the tenses where I needed to? ☐ Did I report how each person knew, not just what they said?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

An extract from the inquiry's report. The title is "**Section 4: reconciling the accounts.**" **What do you expect an official report to do with three different times?** One sentence.

5B • Read — one hundred and ten seconds

SECTION 4: RECONCILING THE ACCOUNTS

4.1 Three residents gave times for the first water at door level. The times differ by forty minutes. All three accounts are accepted as honest.

4.2 Resident A stated that the water was at her door at eleven. She told the inquiry that she had checked the kitchen clock. The inquiry notes that this clock was later found to be eleven minutes fast.

4.3 Resident B insisted that it was half past eleven. He said that he had not looked at a clock but that he had been listening to a radio programme which he knew ended at half past. The programme in fact ended at 23.15.

4.4 Resident C said that she had not checked the time at all and went by the point at which the hall was full. Hall records show the hall reached capacity at 23.25.

4.5 Photographic metadata gives 23.30. The inquiry has adopted this time.

4.6 The inquiry wishes to record that it does not regard any of the three accounts as unreliable. Each witness used the best instrument available to them, and in each case the instrument was wrong by between five and twenty minutes. This is normal. An account that matched the metadata exactly would be more unusual than these three, and would deserve more scrutiny, not less.

5C • Answer

1. How far apart are the three times?
2. **What was wrong with Resident A's clock, and by how much?**
3. How did Resident B know the time, and what was the error there?
4. What did Resident C use instead of a clock?
5. What time has the inquiry adopted, and from what source?
6. **What is the point of paragraph 4.6?** Put it in your own words.

5D • Vocabulary in context

Guess from the text. Then check.

reconciling • capacity • metadata • the best instrument available • deserve more scrutiny

5E • The counter-text

The newspaper article

Four hundred words about a six-paragraph section, and paragraph 4.6 is not in it.

THE WESTERN HERALD - PAGE 1

HEADLINE

"WITNESSES CONTRADICT EACH OTHER OVER FLOOD TIMING"

WHAT IT QUOTES

PARAGRAPH	QUOTED?	VERB USED
4.1 - times differ by 40 min	yes	the report states
4.2 - Resident A, clock	yes	A claims
4.3 - Resident B, radio	yes	B insists
4.4 - Resident C, the hall	yes	C admits
4.5 - metadata adopted	yes	the inquiry has settled on
4.6 - all accounts honest	NO	-

ONE SENTENCE WITH NO SOURCE

"The inquiry is understood to have found the residents' evidence of limited value." No paragraph of the report says this.

THE CORRECTION, ELEVEN DAYS LATER

Page	4, foot
Words	31

THE CORRECTION, IN FULL:

"Our report of the 14th stated that the inquiry had found residents' evidence to be of limited value. The inquiry made no such finding. We apologise."

Six words, and all of them are true

claims, insists, admits - three people, three verdicts

The one paragraph that defends them is the one left out

"is understood to have" - the phrase with no source behind it

Thirty-one words, page four, eleven days

Accurate, complete, and read by almost nobody

{width=6.

6in}

The newspaper article — Four hundred words about a six-paragraph section, and paragraph 4.6 is not in it.

Read the newspaper article about the same section and answer.

1. What is the headline, and what does it imply?
2. **Which paragraph of the report is quoted, and which is left out?**
3. Which reporting verb does the article use for each resident?
4. One sentence attributes a view to "the inquiry" that the report does not contain. Find it.

5F • Two texts

The report says all three accounts are **accepted as honest**. The article's headline says **"Witnesses contradict each other."**

Put those two facts together. Is the headline false? Two sentences.

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Verbs that report, and what they smuggle in

The same claim, four verbs
Nothing else changes. The reader ends up in four different places.

1	2	3	4
say / tell / state	add / go on to say / mention	insist / repeat	claim / admit / reveal
			
SHE SAID - nothing added	SHE ADDED - and something came first	SHE INSISTED - and somebody pushed back	SHE CLAIMED - and you now doubt her
flat			loaded

6in}

{width=6.

The same claim, four verbs — Nothing else changes. The reader ends up in four different places.

6A • Sort — neutral, or loaded?

Two columns.

reveal • insist • repeat • add • reply • mention • tell • admit • state • say • announce

One of them is neutral in a report and loaded in a newspaper. Which?

6B • Chunk completion

1. She **told me** _____ she had checked it.
2. He **said** _____ he had not looked at a clock.
3. The inquiry **went on** _____ **say** that it had adopted the metadata.
4. The council **refused to** _____ .
5. He **pointed** _____ that the programme ended at 23.15.
6. She said it was about eleven, **or words to that** _____ .

6C • Three that change the reader's mind

admitted • revealed • claimed

Each one tells the reader what to think before they have read the content.

Rewrite each of these three with a neutral verb, and say what is lost — and what is gained.

1. She admitted that she had checked a clock.
2. He revealed that the programme ended at 23.15.
3. She claimed that the hall was full by then.

SAY, and TELL

Two verbs that mean nearly the same and take completely different shapes.

SAY (that)

she said that... - never she said me

TELL somebody (that)

she told me that... - never she told that

Which one needs a person after it, always?

6 differences — find them all

{width=6.

6in}

SAY, and TELL — Two verbs that mean nearly the same and take completely different shapes.

Six differences. Find them, then answer the question under the picture.

6D • Contrast Clinic — report it

Six items. Report each one, shifting what needs to shift.

1.

"I checked it twice."

2.

"I will send it tomorrow."

3.

"I am at the door."

4.

"I didn't say that."

5.

"The drain is still blocked." (and it is)

6.

"I can't remember."

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

Where the stress goes when you report

Where the stress goes when you report

A flat report leaves the reporting verb alone. Stress it and you have taken a side.

she

said

she'd

CHECKED

it

she

SAID

told

me

she

had

CHECKED

flat - the content is the news

loaded - and I am not sure I believe her

the verb already carries it; stress adds more past

the source, named and stressed

told me, unstressed, and the fact arrives last

{width=6.

6in}

Where the stress goes when you report — A flat report leaves the reporting verb alone. Stress it and you have taken a side.

7A • Hear 🎧 Track 4.3

She **said** she'd checked it. — flat: this is just a report She **SAID** she'd checked it. — loaded: and I am not sure I believe her She said she'd **CHECKED** it. — the content is the news

7B • Say

Say all three. Then say this one with the stress in three different places:

He insisted it was half past.

7C • Make it mean something

Say these two:

He SAID it was half past. (and we now know it was not) He said it was HALF PAST. (and that is the fact I am passing on)

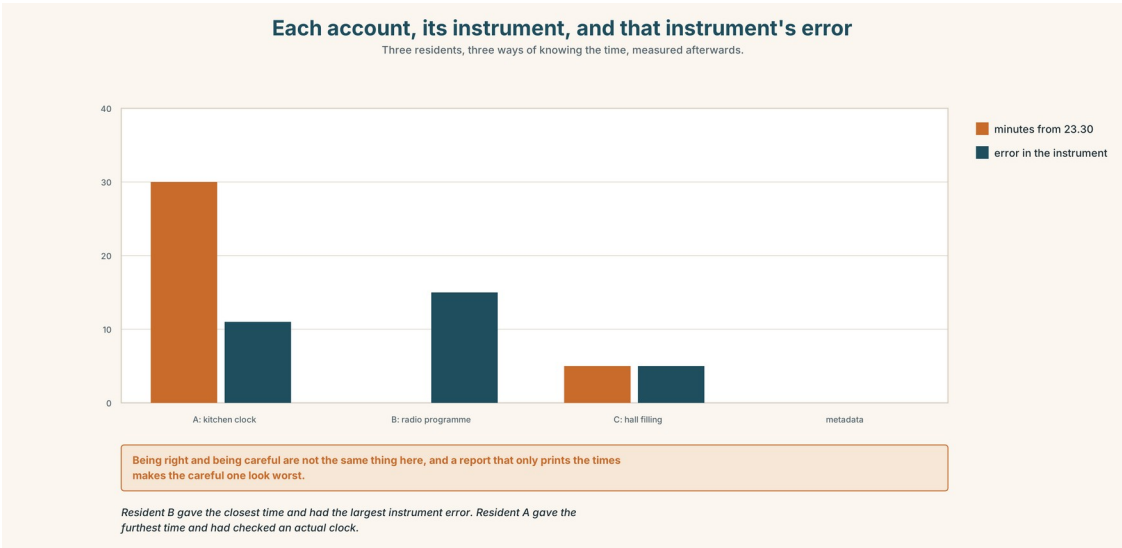

Which one would you use in a report, and which in a conversation afterwards?

7D • Fluency 20 🟡

Twenty seconds: **three things somebody told you this week, reported flatly**. Three times, faster, with no stress on the reporting verb.

Part 8 • Writing ♦ C • THE PERFORMANCE

Three accounts • 100 words

6in}

Each account, its instrument, and that instrument's error — Three residents, three ways of knowing the time, measured afterwards.

8A • Read the model

Three residents gave times for the first water. They differ by forty minutes. [the disagreement is stated first, flatly, before any of the accounts]

Resident A said she had checked her kitchen clock. Resident B said he had been listening to a programme he knew ended at half past. Resident C said she had gone by the hall filling up. [three identical reporting verbs, and the difference is in how each one knew]

The clock was eleven minutes fast, the programme ended at 23.15, and the hall filled at 23.25. All three were using the best instrument they had. [the corrections, and then a sentence that refuses to make any of them the liar]

Questions about the writer's choices:

1. The same verb, *said*, three times. **Is that poor writing?**
2. The last sentence is a judgement. **Is it the right kind?**

8B • The anti-model

There is a lot of confusion about what time the water arrived. One resident claims it was eleven, while another insists it was half past. A third admits she did not check. The truth is hard to establish.

Correct English, and three people have been quietly convicted. **Find the three verbs that do it, and say what each one implies.**

8C • Plan

the disagreement, in one line → each account, with the same verb → how each one knew → the corrections → one sentence that does not pick a liar

8D • Write — 100 words

8E • Peer review — two criteria

☐ Is every reporting verb carrying the same weight? ☐ Does the reader learn how each person knew?

8F • Write it again • 8G • Publish

On the wall, with the newspaper article from Part 5E beside it.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

WORK FILE • The Safety Brief

A safety brief in four moves
Four minutes before anybody picks anything up. The last move is the one that gets skipped.

1 the task, and its edge  "We're clearing the ground floor and nothing above it." minute 0	2 the hazard, with evidence  "The floor is soft at the back. Two people have gone through it."	3 the equipment "Boots, gloves, and nobody in shorts."	4 who stops it - and it is a name  "If you think it's unsafe, you say stop. Not me. You." minute 4
--	---	--	--

{width=6.

6in}

A safety brief in four moves — Four minutes before anybody picks anything up. The last move is the one that gets skipped.

9A • Four minutes before anybody moves 📞 Track 4.4

Volunteers are about to clear a flooded building. **Listen to the brief.**

1. What are the three hazards named?
2. **What is the one instruction that is not about equipment?**
3. Who is named as the person to stop the work, and why is a name given?

9B • The shape of a brief

what we are doing · what will hurt you · what to wear · who stops the work

Match each to one phrase.

"We're clearing the ground floor and nothing above it." · "The floor is soft at the back. Two people have gone through it." · "Boots, gloves, and nobody in shorts." · "If you think it's unsafe, you say stop. Not me. You."

9C • Reporting it to somebody who missed it

A volunteer arrives twenty minutes late. **Report the brief to them in four sentences**, using reported speech. **You must not leave out the hazard.**

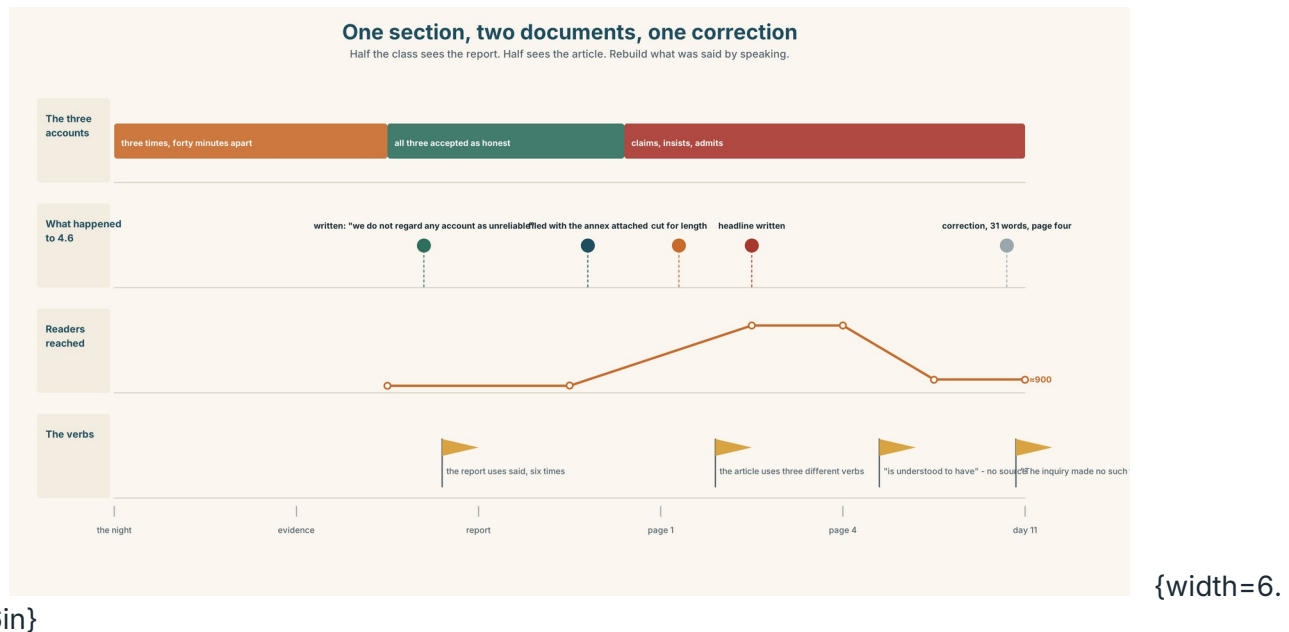

9D • Your turn

In pairs. **One of you gives a four-point brief for any task. The other arrives late and is briefed second-hand by a third person.** Then check: what was lost?

9E • Transfer

Find one set of safety instructions this week — a label, a sign, a leaflet. **Report it to somebody in three sentences.** Bring both.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

6in}

One section, two documents, one correction — Half the class sees the report. Half sees the article. Rebuild what was said by speaking.

10A • Relay

Half the class sees the report section. Half sees the newspaper article. **Rebuild what was actually said by speaking.** Ten minutes.

10B • Simplify

Explain the newspaper article from Part 5E to the three residents it is about. **Four sentences only.**

Plan: what it says → what the report says → what it left out → what you would ask for

10C • Compress

Section 4 of the report into **thirty-five words**, without taking a side.

10D • Online

Write **one message** to the newspaper: you are one of the three, the headline is misleading, and you are asking for one specific thing.

10E • Your language

How does your language report speech? **Do the tenses shift back, or do you keep the original words?** Report "*I checked the clock*" in both languages and compare.

Part 11 • The Decision ♦ C • THE PERFORMANCE

One time goes in the report

Three accounts, forty minutes apart, all honest. The report can carry one time in its summary.

- **23.30, the metadata.** The most accurate instrument. It is also the only one with no person behind it.
- **A range: 23.00 to 23.40.** Honest about the uncertainty. Harder to use, and a range in a summary tends to be read as its lowest number.
- **All three, named, with their instruments.** Six lines instead of one. Nobody is wrong, and nobody can quote it.

11A • The evidence

1. **The newspaper article** from Part 5E — and what it quoted.
2. **The chart** — each account, its instrument, and that instrument's error.
3. **The voice.** The inquiry chair, twenty seconds: *"A summary that cannot be quoted is not a summary. But a time that nobody in that town recognises is not a finding either, and I have written both and I do not like either of them."*

11B • Talk about it

In threes. Everybody says one. Use the frame.

I think the report should give _____, because _____.

Words you can use: *accurate · exact · account · version · source · evidence · trust · doubt*

11C • Decide

Write **two sentences**. Choose, and say why.

I think the report should _____, because _____.

11D • Model decision

It should give 23.30 in the summary and all three accounts in an annex, with the instruments and their errors. The summary has to be quotable or it will be replaced by whatever the newspaper writes instead, and the annex is where the town can find itself and see that it was not called unreliable. One number, and one page that explains why that number is not an accusation.

11E • The Reveal

What happened. The report gave 23.30 in the summary and the three accounts in Annex C.

Every newspaper used 23.30. Two of them also used Annex C, and one of those ran a long piece about the eleven-minute clock that Resident A says was the kindest thing written about her all year.

The third newspaper ran the headline about witnesses contradicting each other. It printed a correction eleven days later, at the foot of page four, which Resident B says he did not see and still has not read.

One number, quoted everywhere. One annex, read by two. And one correction nobody saw.

Was it the right decision? Say why — and say what a correction is for.

Part 12 • Landing ♦ all three lines

12A • Recycle — ten items

1. "I am tired." → She said she _____ tired.
2. She _____ me that she had checked it. (*said / told*)
3. **According** _____ the inquiry, the surge was 1.6 m.
4. He said it **off the** _____ .
5. The editor has printed a _____ .
6. (*Unit 3*) By the time we arrived, it _____ (already / start).
7. (*Unit 3*) He moved it because the forecast _____ (change).
8. (*Unit 2*) We _____ (wait) since June.
9. (*Unit 1*) If I _____ you, I wouldn't wait.
10. (*A2.1 U7*) The hall _____ (build) in 1961.

12B • Consolidate

One hundred words. Three people's accounts of one event. The same reporting verb for all three, how each one knew, and one sentence that does not pick a liar.

12C • Can-do, with evidence

I can...	My evidence	Sure?
move somebody's words into a report	Part 3G score	☐ ☒ ☒
relay three accounts fairly in a hundred seconds	Part 4C recording	☐ ☒ ☒
write a hundred words that judge nobody	Part 8 draft 2	☐ ☒ ☒
pass on a safety brief without losing the hazard	Part 9D pair work	☐ ☒ ☒

12D • Replay 🟡

Find your thirty seconds from Part 0C. Listen. **Record it again.** One sentence: what is different?

12E • Glossary — forty items, as a map

THE CLAIM • claim • statement • account • version • quote • word for word • the full story **THE SOURCE** • source • footage • journalist • editor • press • according to • off the record **THE TEST** • accurate • exact • trust • doubt • confirm • deny • correction • stand by **THE FLAT VERBS** • say • say that • tell • tell somebody that • state • add • mention • repeat • reply **THE LOADED ONES** • insist • admit • reveal • announce • claim **MOVING ON** • go on to say • point out • refuse to comment • or words to that effect • that's what she said

Unit 5 • Who asked the right question?

A2.2 • Unit 5 • The Wrong Question

English Animated • *Telling the Story* • Ballinmore, west coast of Ireland Student's Book pages 94–115 • 22 pp • ~10 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

The survey office, and the harbour behind it — Ten things to find. Three of them record what is said.

Who asked the right question?

By the end of this unit you can interview somebody and relay both what you asked and what they answered.

◆ A • THE WORLD

A survey that was done properly and asked the wrong thing

◆ B • THE SYSTEM

reported questions and commands · *ask / tell / want* patterns · 23 words for interviews and investigation · 17 verbs for asking · the intonation that survives being reported

◆ C • THE PERFORMANCE

An interview, relayed from both sides

0A • Find it

Find ten things in this picture. Three of them record what is said.

a notebook · a phone on a table · a recorder · a consent form · a clipboard · a survey sheet · a laptop · a cup gone cold · an empty chair · a door left open

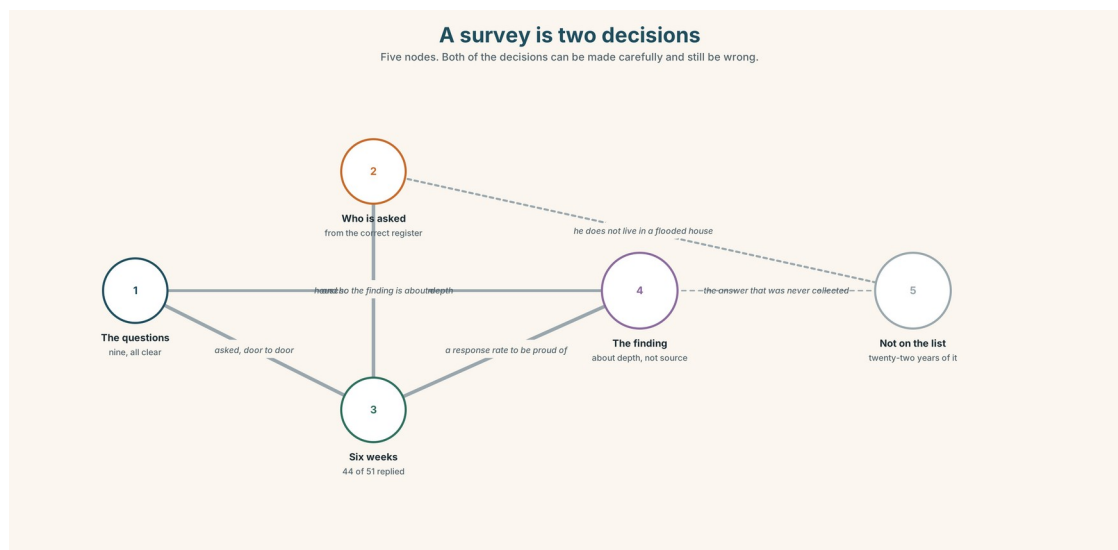

0B • Guess it

Two things in this picture make people answer differently. Which, and how?

0C • Say it

Record thirty seconds. What is the question nobody has asked you that you would like to be asked? You will record it again at the end of this unit.

Part 1 • Vocabulary Lab 1 ◆ B • THE SYSTEM

{width=6.

6in}

A survey is two decisions — Five nodes. Both of the decisions can be made carefully and still be wrong.

1A • Meet — the words of an interview

Match each word to one place on the map.

interview · question · answer · investigation · detail · follow-up · notebook · recorder · consent · permission

1B • Sort — the interviewer, the person, or the room?

Three columns.

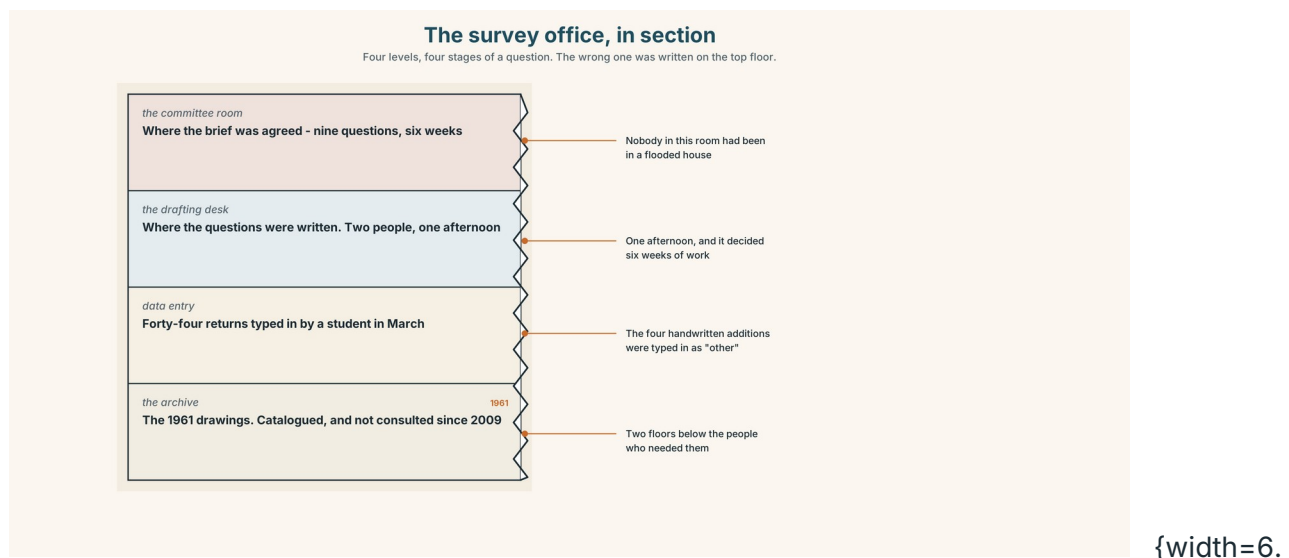

awkward · consent · notebook · pressure · honest · anonymous · direct · follow-up · silence

One of them belongs to whoever is most frightened. Which, and why?

1C • Meet — what people do instead of answering

avoid · silence · anonymous

A silence is an answer. **What does it answer, and how would you record it in a notebook?**

6in}

The survey office, in section — Four levels, four stages of a question. The wrong one was written on the top floor.

Look at the survey office, in section. Four levels, four stages of a question. **At which level was the wrong question written, and who was in the room?**

1D • Stretch — the phrases

Complete each one with one word.

1. She **put a** _____ to him three times and got three different answers.
2. He never **got an** _____ to the second one.
3. If you **press** _____ too hard, they stop telling you things.
4. This part is **on the** _____. The rest is not.

5. They have been **digging** _____ the 1961 drawings all summer.

1E • The saying

f No comment.

Two words that are never neutral.

Say them three times: from a council officer, from a neighbour, and from somebody who is frightened. **Which one makes you more curious?**

1F • Own it

Think of a time you were asked a question you did not want to answer. Tell a partner **three sentences:** what was asked, what you said, and what you did not say.

Part 2 • Listening ♦ A • THE WORLD

Fifty-one doors

One of them has done the work properly. The other has been watching the drain since 2003.

He asked how deep the water had been.
He told them not to guess.

Tomas
the survey

Nobody has ever asked me about that drain.

the harbour master
twenty-two years

{width=6.

6in}

Fifty-one doors — One of them has done the work properly. The other has been watching the drain since 2003.

2A • Fifty-one doors 📻 Track 5.1

Before you listen. Tomás surveyed fifty-one households. The survey took six weeks. **Guess: what is wrong with it?**

Listen once. One question. What did the survey ask?

Listen again. Complete the table.

	What was asked	What people answered	What nobody asked
question 1			
question 4			
question 9			

Listen again. Choose.

1. The survey asked **whether people felt safe / where the water came from / how deep it was**.
2. Fifty-one households were asked and **all / most / about half** replied.
3. The question about the drain was **asked badly / not asked / asked of the wrong people**.
4. Redoing it would take **two / six / fourteen** weeks.

Noticing. Four sentences from the recording.

1. *"How deep was the water in your house?"*
2. *He asked how deep the water had been.*
3. *"Don't guess. Measure it."*
4. *He told them not to guess.*

Two are the questions and instructions themselves. Two are reports of them. What happened to the word order in sentence 2?

2B • Decoding clinic Track 5.2

Twenty-five seconds. Four jobs.

1. How many times does he say *asked* or *told*?
2. In *he asked how deep it had been*, does his voice rise at the end?
3. Catch the two numbers.
4. He reports one question as a statement. Which?

Transcripts, page 154.

Part 3 • Grammar Lab 1 B • THE SYSTEM

Reporting a question, and an instruction

3A • Notice

Look at the four sentences in Part 2.

1. Sentence 1 is a question. Sentence 2 reports it. **What happened to *was*?**
2. Is there a question mark in sentence 2? **Why not?**
3. Sentence 3 is an instruction. Sentence 4 reports it. **What shape did it take?**
4. **How would you report a yes/no question?** Try: *"Did you measure it?"*
5. Try *"He asked how deep was the water."* **What is wrong?**

3B • See

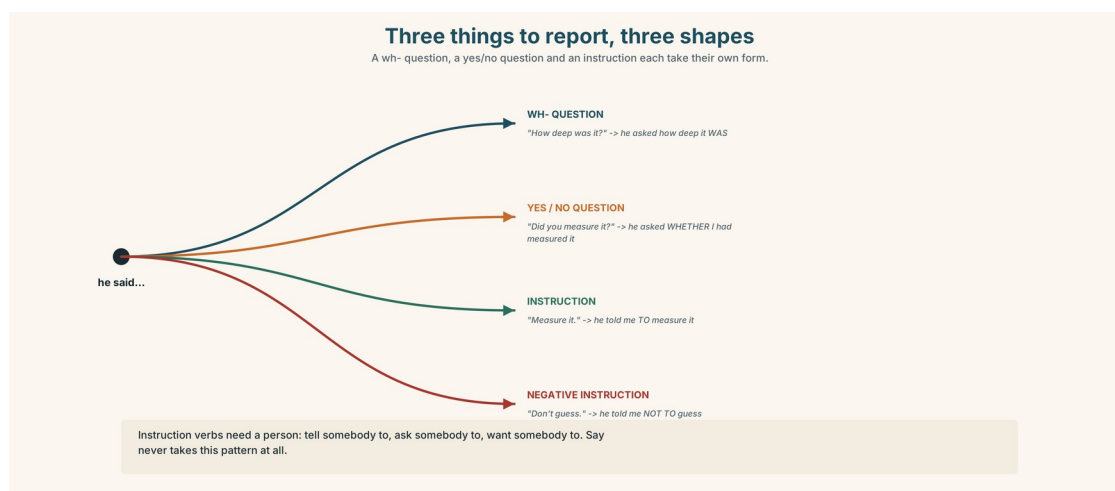

{width=6.

6in}

What happens to a reported question — The question word stays. The inversion goes, the auxiliary goes, and so does the mark.

Now look at the second picture. **Three shapes: a wh- question, a yes/no question, and an instruction. Which one needs *if* or *whether*?**

{width=6.

6in}

Three things to report, three shapes — A wh- question, a yes/no question and an instruction each take their own form.

3C • Know

Direct

"How deep was it?"

"Did you measure it?"

"Measure it."

"Don't guess."

Reported

He asked **how deep it was.**

He asked **whether / if I had measured it.**

He told me **to measure it.**

He told me **not to guess.**

Three things happen to a reported question.

1. Statement word order — no inversion.
2. No *do/did*.
3. No question mark.

Yes/no questions need *if* or *whether*. *whether* is the safer one in writing, and the only one possible before *or not*.

Instructions take *to + verb*, and the verb that reports them takes a person: *tell somebody to, ask somebody to, want somebody to, advise somebody to.* × *He said me to measure it.* — *say* does not take this pattern at all.

Why it matters. The shape of the question changes the answer. A survey is only ever as good as the shape of its questions, and nobody checks the shape afterwards.

3D • Use — controlled

He asked them how deep the water (1) _____ (be) and whether they (2) _____ (measure) it. He told them (3) _____ (not / guess). He asked (4) _____ they had seen anything unusual in the yard, and he advised them (5) _____ (keep) any photographs. Nobody asked (6) _____ the water (7) _____ (come) from.

3E • Use — guided

Report each one.

1. "Where did the water come from?"
2. "Did you look at the drain?"
3. "Keep the photographs."
4. "Don't throw anything away."
5. "Would you be willing to be named?"

3F • Use — open

Interview a partner for three minutes about something they did this year. **Then report five things to a third person: three questions you asked and two instructions you gave.**

3G • Check — six items

1. "How deep was it?" → He asked how deep _____ .
2. "Did you measure it?" → He asked _____ I _____ measured it.
3. "Measure it." → He told me _____ it.
4. "Don't guess." → He told me _____ guess.
5. "Where do you live?" → She asked me where _____ .
6. "Please wait outside." → He asked us _____ outside.

0–3 → Workbook pp. 28–30. **4–5** → Part 6. **6** → page 107.

Part 4 • Speaking ◆ C • THE PERFORMANCE

4A • Fluency starter — the question nobody asked

One learner describes something. The others may only ask **one question each**. **Then the group names the question that was not asked.**

Four rounds. Four learners.

4B • The functional core — interviewing

Who was asked, and who was not
Learner A has the register. Learner B has the harbour. Both lists are correct.

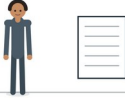

the register: 51 households

everybody on the flood plain

not on any list

twenty-two years, and a drawer of drawings

Which list would you have drawn up, and from what?

7 differences — find them all

{width=6.6in}

Who was asked, and who was not — Learner A has the register. Learner B has the harbour. Both lists are correct.

Language Bank

opening

Can I record this? · Is this on the record? · Stop me if you'd rather not.

the follow-up

How do you know that? · What happened just before? · And then?

leaving silence

(say nothing) · Mm. · Take your time.

closing

Is there anything I didn't ask? · Who else should I talk to?

Role play. Learner A interviews. Learner B is willing but cautious. **Six minutes.** Learner A must use silence twice and must ask the last question in the bank.

4C • The performance — one hundred seconds

Interview somebody, then relay it. One hundred seconds. You must give:

three questions you asked, reported · what they answered · one instruction you gave · the question you should have asked

Record it.

4D • Observer

One person listens for **one thing**: did the reported questions keep statement word order?

4E • Two criteria

☐ Did I report questions and instructions in their right shapes? ☐ Did I name a question I failed to ask?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

An explainer about survey design. The title is **"Fifty-one doors and the wrong question."** What do you think goes wrong most often in a survey? One sentence.

5B • Read — one hundred and ten seconds

Fifty-one doors and the wrong question

A survey is two things: a list of questions, and a decision about who is asked. Both can be done carefully and the result can still be useless.

The Ballinmore survey was done carefully. Fifty-one households, six weeks, forty-four responses, which is a response rate most professional surveys would envy. Every question was clear. Nobody was led.

It asked how deep the water had been, when it arrived, what was damaged, whether people had received a warning, and whether they intended to stay. It did not ask where the water came from, and that was the question the money depended on.

This is the commonest failure in survey design and it has a name: **you cannot find an answer to a question you did not ask.** The data is not wrong. It is simply about something else.

The second failure is quieter. Everybody asked was a household on the flood plain. Nobody asked the harbour master, who has watched that drain for twenty-two years, because he does not live in a flooded house and so was not on the list. The list was drawn up correctly, from the correct register, and it excluded the one person who could have answered the question that was not asked.

Redoing the survey takes six weeks. Publishing it as it stands takes an afternoon, and it will be quoted for ten years.

5C • Answer

1. What two things is a survey, according to the writer?
2. How many households, how many responses, and how long?
3. **Which five things did the survey ask, and which one did it not?**
4. What is the name the writer gives to the first failure?
5. Who was left out, and why was that technically correct?
6. **What is the choice at the end, and which part of it is the warning?**

5D • Vocabulary in context

Guess from the text. Then check.

response rate • nobody was led • the flood plain • drawn up • as it stands

5E • The counter-text

6in}

The survey form — Nine questions, two of them open, and one added by hand to four copies.

Read the survey form itself and answer.

1. How many questions are there, and how many are open?
2. **Which question comes closest to asking about the source of the water?**
3. What does the consent box at the top allow, and what does it not?
4. One question has been added by hand to some copies. What does it say?

5F • Two texts

The explainer says the survey **did not ask** where the water came from. The form has a handwritten question on some copies.

Put those two facts together. What might those copies be worth? Two sentences.

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Verbs that need a person

Four verbs that need a person
Ask, tell, want and advise all take somebody, then to. Say takes neither.

1 he asked me to wait  ASK somebody TO - a request a request	2 she advised them to keep it  ADVISE somebody TO - a recommendation	3 he told them not to guess  TELL somebody (NOT) TO - an instruction	4 he said me to wait  SAY - and this pattern does not exist an order
---	--	--	---

6in}

Four verbs that need a person — Ask, tell, want and advise all take somebody, then to. Say takes neither.

6A • Sort — does it need a person after it?

Two columns.

order • invite • want • beg • refuse • ask • advise • encourage • remind • say • tell

One of them can go in both columns and means two different things. Which?

6B • Chunk completion

1. He **asked me** _____ wait outside.
2. She **told them** _____ to throw anything away.
3. They **wanted him** _____ sign it.
4. He **asked** _____ anybody had measured it.
5. She **backed** _____ when he started writing.
6. **She wanted to** _____ who had drawn up the list.

6C • Three ways of saying no

refuse • avoid • no comment

Each one leaves a different impression. Put one in each.

1. He _____ to answer the question about the drain.
2. He _____ the question by talking about the wall for four minutes.
3. He said two words: " _____ ."

Which of the three tells you the most?

IF, and WHETHER
Both report a yes/no question. Only one of them works everywhere.

IF - spoken, and fine

he asked if I had measured it

WHETHER - written, and always safe

...whether or not I had

Which one can go directly before "or not"?

6 differences — find them all

{width=6.

6in}

IF, and WHETHER — Both report a yes/no question. Only one of them works everywhere.

Six differences. Find them, then answer the question under the picture.

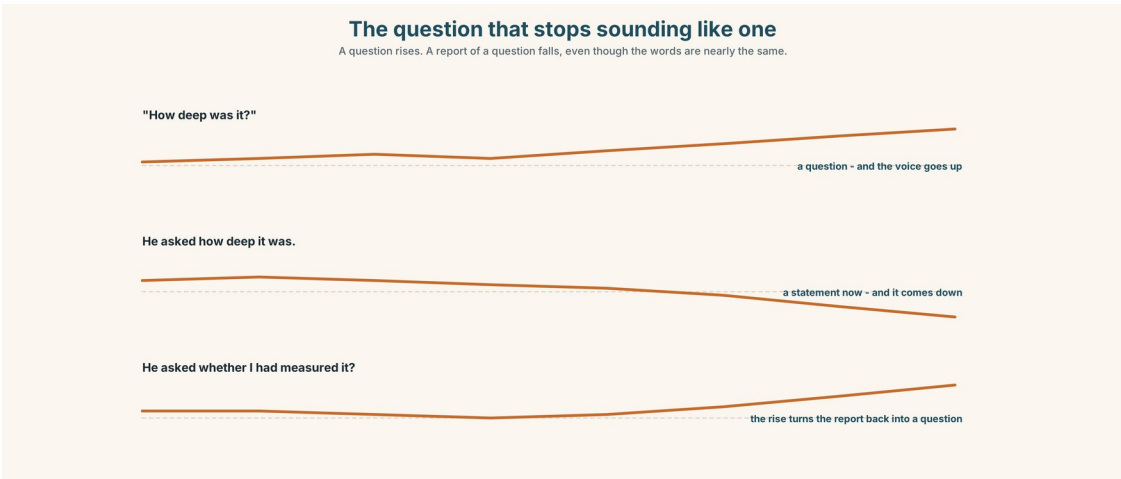

6D • Contrast Clinic — report it

Six items.

1. "Where do you live?"
2. "Have you seen it?"
3. "Don't move anything."
4. "Why didn't you ask the harbour master?"
5. "Would you mind signing this?"
6. "Wait here."

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

The question that stops sounding like one

{width=6.

6in}

The question that stops sounding like one — A question rises. A report of a question falls, even though the words are nearly the same.

7A • Hear Track 5.3

"How deep was it?" ↗ — a question, and the voice goes up *He asked how deep it was.* ↘ — a statement now, and it comes down *"Did you measure it?" ↗ He asked whether I had measured it.* ↘

7B • Say

Say all four. Then say the reported pair twice more, keeping the fall.

7C • Make it mean something

Say this one twice:

He asked whether I had measured it. ↘ (plain report) *He asked whether I had measured it.* ↗ (and now you are asking me whether he did)

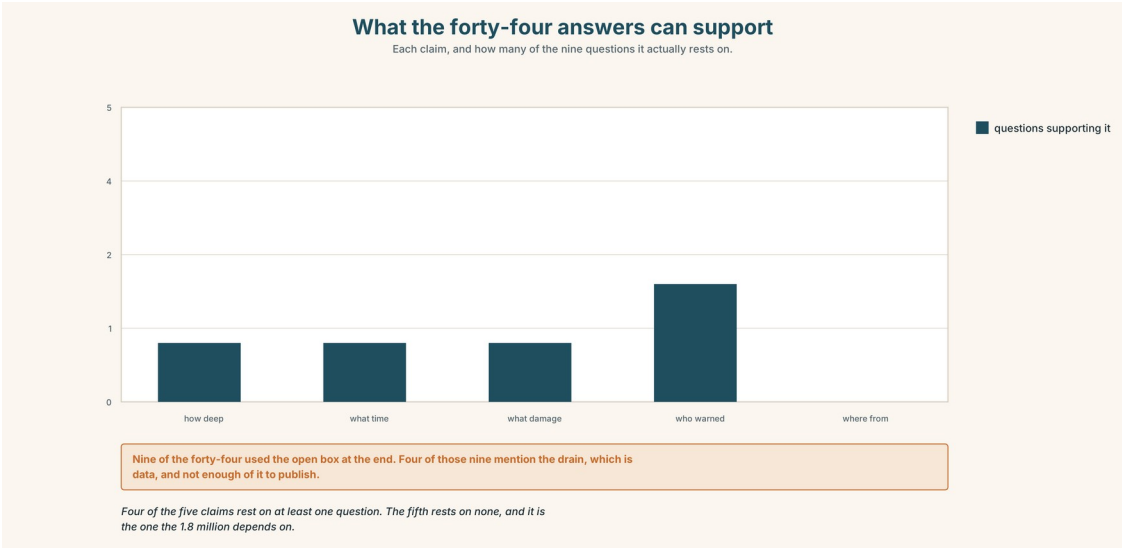

The rise turns a report back into a question. When is that useful?

7D • Fluency 20

Twenty seconds: **three questions you were asked today, reported with a falling voice.** Three times, faster.

Part 8 • Writing C • THE PERFORMANCE

An interview, both sides • 100 words

6in}

{width=6.

What the forty-four answers can support — Each claim, and how many of the nine questions it actually rests on.

8A • Read the model

I asked him how long he had watched the drain and he said twenty-two years. I asked whether anybody had ever asked him about it before and he said nobody had. [two questions, two answers, and the second question is the one that matters]

I asked him not to send me the photographs until I had checked whether I could use them. [an instruction, reported, and the reason is in the sentence]

I should have asked him who drew up the list. I did not think of it until the bus. [the question that was not asked, named, with no excuse]

Questions about the writer's choices:

1. The second question is one sentence long and changes everything. **What makes it work?**
2. Why end on a failure?

8B • The anti-model

I had a very interesting conversation with the harbour master. He has a lot of experience and told me many things about the harbour. He was very helpful and I learned a great deal.

Correct English, and the reader learns nothing. **Name three things it does not contain.**

8C • Plan

question one, reported, with the answer → the question that matters, with its answer → one instruction you gave → the question you failed to ask

8D • Write — 100 words

8E • Peer review — two criteria

☐ Is every reported question in statement order? ☐ Is there a question the writer admits they missed?

8F • Write it again • 8G • Publish

On the wall, with the survey form from Part 5E beside it.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

STUDY FILE • Data in an Argument

Four honest moves, and one that is not
The number is the same in all five. Only one of them leaves the reader worse informed.

1 true, and not yet honest 19 cm _____ "The average depth was 19 cm." the number	2 the range - now you can see the town _____ "From 4 cm to 31 cm."	3 who was asked  _____ "Fifty-one households on the flood plain."	4 and this is the honest one X _____ "We did not ask about the source." what it cannot say
--	--	---	--

{width=6.

6in}

Four honest moves, and one that is not — The number is the same in all five. Only one of them leaves the reader worse informed.

9A • The same forty-four answers Track 5.4

Three people use the survey in three arguments. **Listen.**

1. Who uses the average, and what does it hide?
2. Who uses one household, and is that cheating?
3. **Who says what the data cannot tell you, and does that weaken their case?**

9B • Four honest moves and one dishonest one

giving the number · giving the range as well · saying who was asked · saying what was not asked · giving the number without any of the above

Match each to one phrase.

"The average depth was 19 cm." · "From 4 cm to 31 cm." · "Fifty-one households on the flood plain." · "We did not ask about the source." · "Nineteen centimetres."

9C • The sentence that makes data honest

Almost every honest use of a number has one of these attached.

out of... · of the people we asked... · this does not tell us...

Add one to each of these.

1. Forty-four people said they intended to stay.
2. The average depth was 19 cm.
3. Nobody reported seeing water come over the wall.

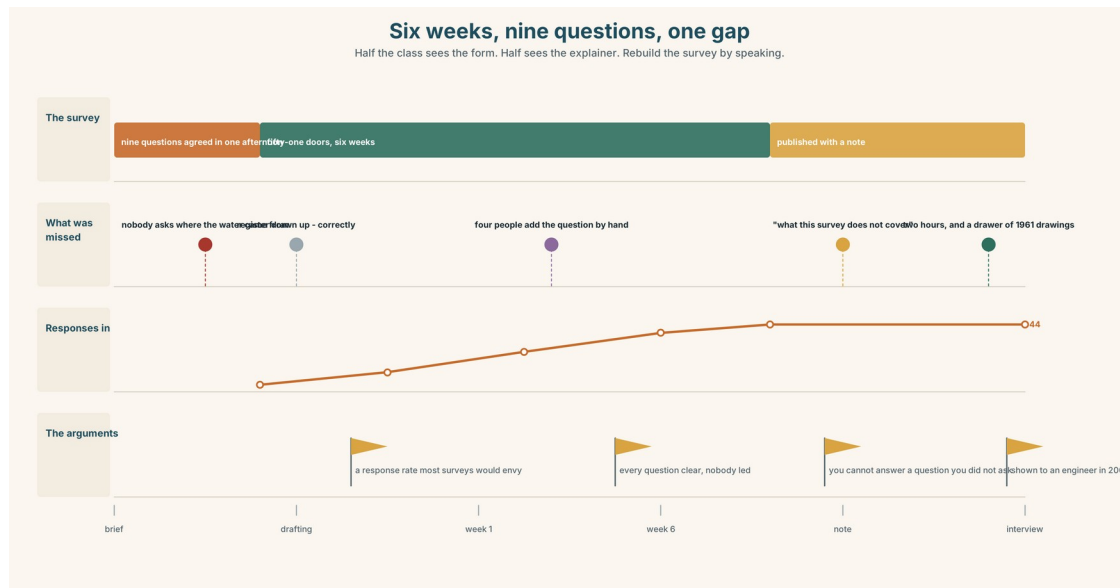

9D • Your turn

In pairs. **Take the same survey and argue opposite cases for four minutes each.** Neither of you may invent a number. **Then: which of you was more honest, and how do you know?**

9E • Transfer

Find one number in the news this week. Write down what it does **not** tell you.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

Six weeks, nine questions, one gap — Half the class sees the form. Half sees the explainer. Rebuild the survey by speaking.

10A • Relay

Half the class sees the survey form. Half sees the explainer. **Rebuild what the survey can and cannot show, by speaking.** Ten minutes.

10B • Simplify

Explain the survey form from Part 5E to somebody who is about to fill it in. **Four sentences only.**

Plan: what it is for → what the consent box means → which question to take time over → what to add if you know something it does not ask

10C • Compress

The explainer in Part 5 into **thirty-five words**, for the council's agenda.

10D • Online

Write **one message** to the harbour master: you have read the survey, he is not in it, and you want twenty minutes and his permission to record.

10E • Your language

How does your language report a yes/no question? **Is there a word like *whether*?** Report "*Did you measure it?*" in both languages.

Part 11 • The Decision ♦ C • THE PERFORMANCE

Six weeks, or an afternoon

The survey is complete, careful, and does not answer the question the money depends on.

- **Publish it as it stands.** It is good work. Add a note saying what it does not cover.
- **Redo it.** Six weeks, the right questions, and the harbour master on the list. The funding committee meets in five.
- **Add one question.** Go back to the forty-four households with a single question about the drain. Three weeks, and it is no longer one survey.

11A • The evidence

1. **The survey form** from Part 5E — and the question somebody added by hand.
2. **The chart** — what the forty-four answers can and cannot support.
3. **The voice.** Tomás, twenty seconds: *"I have been asked whether the survey is any good. It is good. It is the best thing I have done here. It answers a question nobody is asking and I did not notice for six weeks."*

11B • Talk about it

In threes. Everybody says one. Use the frame.

I think Tomás should _____, because _____.

Words you can use: *question · answer · investigation · detail · honest · pressure · consent · follow-up*

11C • Decide

Write **two sentences**. Choose, and say why.

I think Tomás should _____, because _____.

11D • Model decision

Publish it with the note, and interview the harbour master separately this week. The survey is honest work and withholding it until it is perfect means the committee decides on nothing instead of on something incomplete. One long interview with the person who has watched that drain for twenty-two years is worth more than forty-four more questionnaires, and it takes an afternoon.

11E • The Reveal

What happened. He published it with a two-paragraph note headed *what this survey does not cover*. The note is the most quoted part of the document.

He interviewed the harbour master for two hours. The harbour master had the 1961 drawings in a drawer, had shown them to a council engineer in 2009, and had been told they were superseded. They were not.

Four of the handwritten copies of the form were returned. All four mention the drain. All four were filled in by people over seventy.

The note was read. The drawings were in a drawer. And the four people who answered the question nobody asked were the four oldest.

Was it the right decision? Say why — and say what the four handwritten copies are evidence of.

Part 12 • Landing ♦ all three lines

12A • Recycle — ten items

1. "How deep was it?" → He asked how deep ____ .
2. "Measure it." → He told me ____ it.
3. He asked ____ anybody had seen it. (yes/no)
4. She **put a** ____ to him three times.
5. This part is **on the** ____ .
6. (Unit 4) She ____ me that she had checked it. (said / told)
7. (Unit 4) **According** ____ the inquiry, the surge was 1.6 m.
8. (Unit 3) By the time we arrived, it ____ (already / start).
9. (Unit 2) We ____ (wait) since June.
10. (A2.1 U10) Could you tell me where the office ____ ?

12B • Consolidate

One hundred words. An interview, real or invented. Three reported questions, one reported instruction, and the question you did not ask.

12C • Can-do, with evidence

I can...	My evidence	Sure?
report a question and an instruction correctly	Part 3G score	☐ ☒ ☒
relay an interview from both sides in a hundred seconds	Part 4C recording	☐ ☒ ☒
write a hundred words that name what I missed	Part 8 draft 2	☐ ☒ ☒
use a number honestly in an argument	Part 9D pair work	☐ ☒ ☒

12D • Replay 🟡

Find your thirty seconds from Part 0C. Listen. **Record it again.** One sentence: what is different?

12E • Glossary — forty items, as a map

THE EVENT · interview · investigation · question · answer · follow-up · detail **THE EQUIPMENT** · notebook · recorder · consent · permission · anonymous · on the record **WHAT IT FEELS LIKE** · pressure · silence · awkward · honest · direct · press somebody **ASKING** · ask · ask somebody to · ask whether · whether · if · put a question · get an answer **TELLING** · tell somebody to · want somebody to · order · advise · remind · beg · invite · encourage **NOT ANSWERING** · avoid · refuse · back off · dig into · no comment · she wanted to know

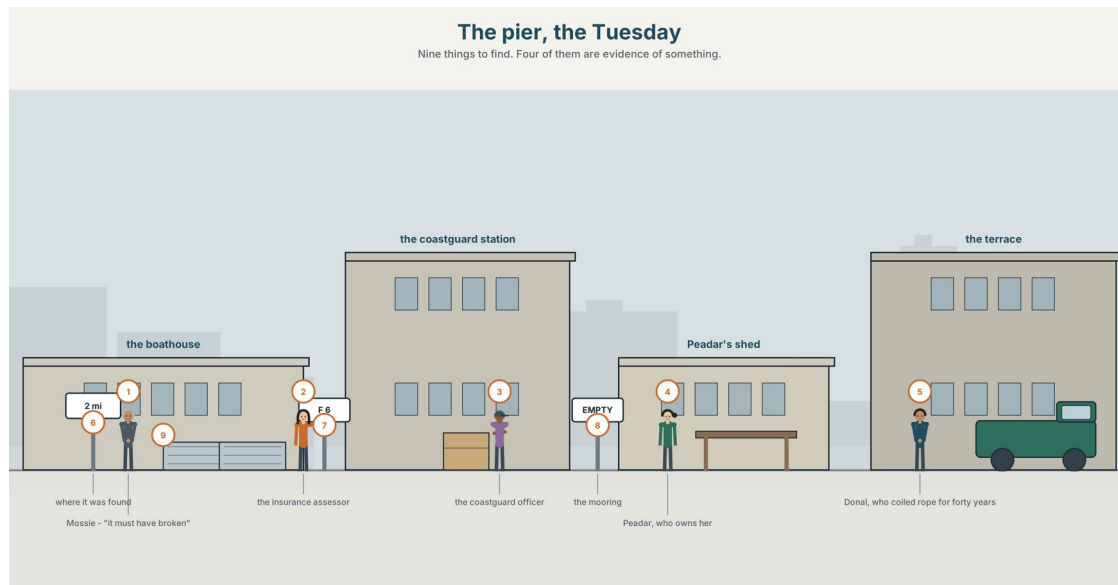

12F • Next

Unit 6 • What might have happened?

A2.2 • Unit 6 • Two Miles Out, and Empty

English Animated • *Telling the Story* • Ballinmore, west coast of Ireland Student's Book pages 116–137 • 22 pp • ~10 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

The pier, the Tuesday — Nine things to find. Four of them are evidence of something.

What might have happened?

By the end of this unit you can explain three possible causes of something, and say which you believe and why.

◆ A · THE WORLD

A boat found empty, three explanations, and a form with one box

◆ B · THE SYSTEM

must / might / can't + be and have been · certainty adverbs · 23 words for mystery and evidence · 17 ways of saying how sure you are · *must've* and *might've*

◆ C · THE PERFORMANCE

Three explanations, ranked, with reasons

0A · Find it

Find nine things in this picture. Four of them are evidence of something.

a boat on its mooring · an empty mooring · a lifejacket · a coil of rope · a fuel can · a radio · a hatch left open · a weather board · a coastguard notice

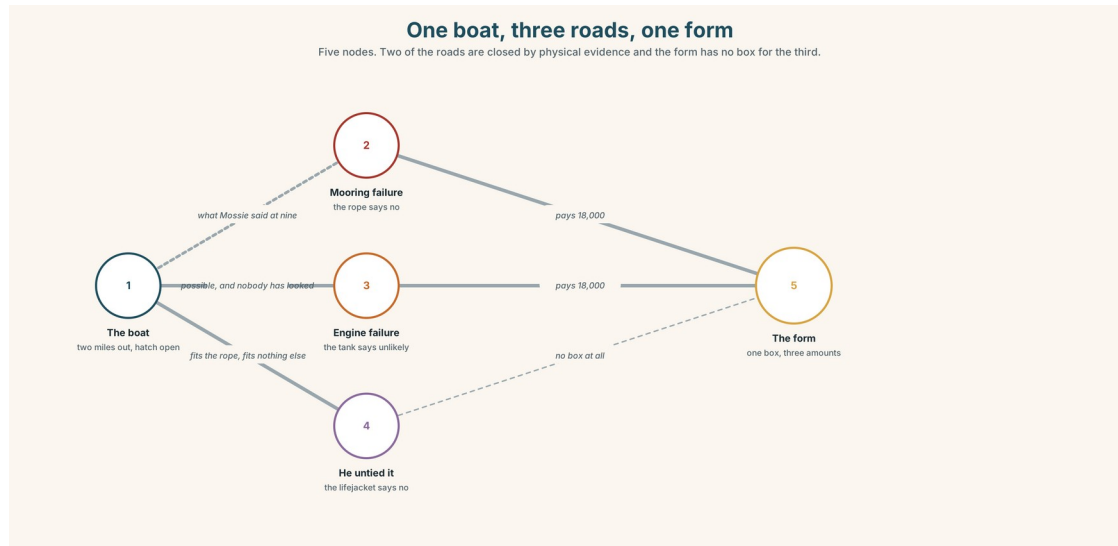

0B · Guess it

Three things in this picture do not fit together. Which three, and what would explain them?

0C · Say it

Record thirty seconds. Think of something unexplained you have seen. Give two explanations and say which you believe. You will record it again at the end of this unit.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

6in}

{width=6.

One boat, three roads, one form — Five nodes. Two of the roads are closed by physical evidence and the form has no box for the third.

1A • Meet — the words of an unexplained thing

Match each word to one place on the map.

mystery • theory • clue • guess • suspect • explain • evidence • wreck • tide • current

1B • Sort — a fact, a feeling, or a story?

Three columns.

unlikely • clue • strange • missing • suspect • empty • obvious • theory • mystery

One of them is a fact that is always described as a feeling. Which?

1C • Meet — the words of the paperwork

insurance • payout • coastguard

Three nouns that turn a mystery into a form with boxes. **Which of the three has no interest at all in what happened?**

The boat, in section

Four levels, four clues, and the one on the third level closes a road.

<i>the wheelhouse</i> Radio off at the set, not broken. Nobody called	Off at the set. That takes a hand
<i>the deck</i> A coil of rope, coiled properly, and a fuel can	Coiled by somebody who coils rope for a living
<i>the cabin</i> Hatch open. Nothing disturbed. No lifejacket	Open from the inside, and the lifejacket is in the shed
<i>the bilge</i> Dry. So she had not been taking water	Dry, which rules out the simplest story of all

{width=6.

6in}

The boat, in section — Four levels, four clues, and the one on the third level closes a road.

Look at the boat, in section. Four levels, four clues. **Which level has the clue that rules out one of the three explanations?**

1D • Stretch — the phrases

Complete each one with one word.

1. None of it **makes** _____ unless he left the mooring on purpose.
2. The coastguard has **ruled** _____ a collision.
3. If the hatch was open, **the only** _____ is that he went below.
4. A current is **more** _____ than an engine failure in that weather.
5. Nothing of his has **turned** _____ since.

1E • The saying

f We may never know.

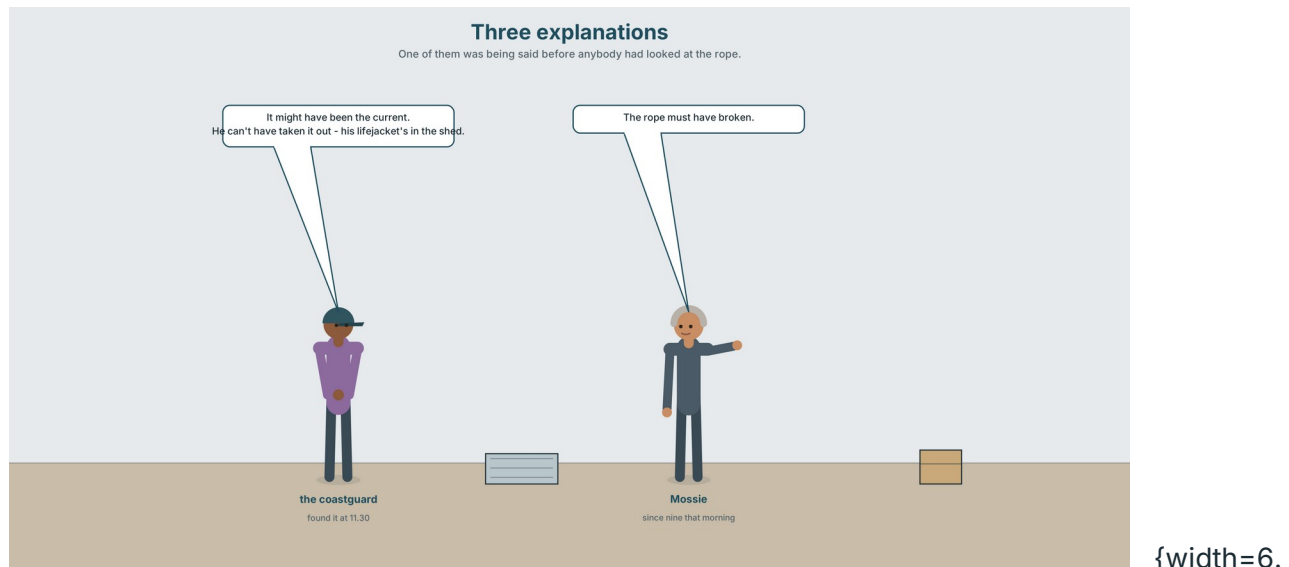

Four words that are sometimes honest and sometimes a way of stopping.

Write the sentence that should come before it — the one that makes it honest.

1F • Own it

Think of something in your own life that has never been explained. Tell a partner **three sentences**: what happened, your best theory, and what would prove it.

Part 2 • Listening ♦ A • THE WORLD

6in}

Three explanations — One of them was being said before anybody had looked at the rope.

2A • Three explanations 🎧 Track 6.1

Before you listen. Peadar's boat was found two miles out, empty, with the hatch open. **Guess: does the coastguard have a preferred theory?**

Listen once. One question. What three explanations are given?

Listen again. Complete the table.

Theory	What supports it	What is against it
it broke its mooring		
the engine failed		
he took it out		

Listen again. True or false?

- The mooring rope was found cut. ☐ T ☐ F
- The fuel tank was nearly full. ☐ T ☐ F
- His lifejacket was still in the shed. ☐ T ☐ F
- The coastguard says one theory is impossible. ☐ T ☐ F

Noticing. Four sentences from the recording.

- The rope must have broken.*
- It might have been the current.*
- He can't have taken it out — his lifejacket's in the shed.*
- It's possible that the engine failed.*

One of these is nearly certain. One is nearly impossible. Two are in between. Put them in order, most sure first.

2B • Decoding clinic 🎧 Track 6.2

Twenty-five seconds. Four jobs.

1. How many times can you hear *must've* or *might've*?
2. In *must have*, can you hear the *h*?
3. Catch the distance and the depth.
4. One speaker says *obviously* about something that is not obvious. Where?

Transcripts, page 155.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

Saying how sure you are

3A • Notice

Look at the four sentences in Part 2.

1. In sentence 1, does the speaker know the rope broke?
2. **What is the difference between *must have* and *did*?**
3. In sentence 3, *can't have* is used, not *mustn't have*. **Why?**
4. **Which is stronger: *can't have been* or *might not have been*?**
5. Try "*It must have been the current, I think.*" **Why is that odd?**

3B • See

How sure are you, and why
Five levels. Each one has to be bought with a piece of evidence.

almost certainly true

—	It MUST have been untied the turns are still in the rope
—	It COULD have been the egg is able, and nobody has looked
—	It MIGHT have been the current turned at two
—	It MIGHT NOT have been the current can't - still open
—	He CAN'T have been aboard the lifejacket is on the hook

The negative of must is can't, not mustn't. Mustn't is about rules; can't have is about evidence.

{width=6.

6in}

How sure are you, and why — Five levels. Each one has to be bought with a piece of evidence.

Now look at the second picture. **Three roads from one piece of evidence. Which road does the lifejacket close?**

6in}

Three roads from one empty boat — Each road is closed or opened by one physical thing.

3C • Know

	About now	About the past
almost certain yes	<i>It must be the current.</i>	<i>It must have been the current.</i>
possible	<i>It might / could be the engine.</i>	<i>It might / could have been the engine.</i>
almost certain no	<i>It can't be him.</i>	<i>It can't have been him.</i>

The negative of **must** is **can't**, not **mustn't**. **mustn't** is about rules. **can't have** is about evidence.

These are not about ability or permission. They are about **how much you know**. *He can't swim* is ability. *He can't have swum* is a deduction.

Adverbs do the same job and can be stacked — carefully. *definitely · surely · obviously · clearly · presumably · apparently · possibly* × *It must have been the current, possibly.* — pick one level and stay there.

Watch out. In speech these are /məstəv/ and /maɪtəv/. In writing they are **never must of** or **might of**.

3D • Use — controlled

The rope (1) _____ (must / break) at some point in the night, because it was found frayed and not cut. It (2) _____ (might / be) the current — the tide turned at two. He (3) _____ (can't / take) it out himself, because his lifejacket is still in the shed and he never went out without it. The engine (4) _____ (could / fail), though the tank was almost full, so that is (5) _____ (unlikely). Presumably we (6) _____ (never / know).

3E • Use — guided

Rewrite each one using *must have*, *might have* or *can't have*.

- I'm certain the rope broke.
- Perhaps the current took it.
- It's impossible that he was on board.
- I'm fairly sure somebody moved it.

5. It's possible that nobody noticed until morning.

3F • Use — open

In threes. One of you describes something odd. The others must give one *must have*, one *might have* and one *can't have*. **Three minutes.**

3G • Check — six items

1. The rope _____ (must / break) in the night.
2. It _____ (might / be) the current.
3. He _____ (can't / be) on board — his lifejacket is here.
4. Somebody _____ (must / move) it.
5. It _____ (could / happen) at any time after two.
6. They _____ (can't / see) it in that fog.

0–3 → Workbook pp. 34–36. **4–5** → Part 6. **6** → page 129.

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency starter — one object

Your teacher puts one object on the table. **Each learner gives one deduction**, and nobody may repeat a modal. **Thirty seconds each.**

Three objects. Three rounds.

4B • The functional core — ranking explanations

The rope that broke, and the rope that was untied
Learner A has a broken rope. Learner B has this one. They do not look alike.

BROKEN	UNTIED
frayed, uneven, no turns left ×	coiled, and the turns are still in it

Which one can be made to look like the other, and which cannot?
6 differences — find them all

{width=6.

6in}

The rope that broke, and the rope that was untied — Learner A has a broken rope. Learner B has this one. They do not look alike.

Language Bank

the strongest

It must have been... · That's the only

the possible

explanation.

It might have been... · It's possible that...

the ruled out

It can't have been..., because... · We can rule that out.

the honest end

I don't think we'll ever work it out. · We may never know.

Role play. Learner A is the boat's owner. Learner B works for the insurer. **Six minutes.** Learner B must rule one theory out and must say what would change their mind.

4C • The performance — one hundred seconds

Explain **three possible causes** of something. **One hundred seconds.** You must give:

each explanation · what supports it · what is against it · which you believe, and why

Record it.

4D • Observer

One person listens for **one thing**: did the speaker's certainty match their evidence?

4E • Two criteria

☐ Did I use *must have*, *might have* and *can't have*? ☐ Did I give a reason for ruling something out, not just an opinion?

Part 5 • Reading A • THE WORLD

5A • Predict

A short story. The title is "**The mooring.**" **What do you expect to be left unexplained at the end?** One sentence.

5B • Read — one hundred and ten seconds

The mooring

They found it at half eleven on the Tuesday, two miles out and drifting east with the hatch open and nothing aboard but a fuel can and a coil of rope that had been coiled by somebody who knew how.

Mossie Hegarty said it must have broken its mooring. He had been saying that since nine, before anybody had looked at the rope, and he kept saying it afterwards, which my father said was the only interesting thing about the whole business.

The rope had not been cut. It had not been frayed either. It had been untied, and it had been untied by somebody who tied things for a living, because the turns were still in it.

Peadar's lifejacket was on the hook in the shed where it had been on Sunday and where it is now. He had not been out without it in forty years. That is not a theory. That is a thing that everybody on

that pier would say, and the insurance man wrote it down and then asked whether anybody had actually seen him put it on, on any particular day, and nobody had, because why would you.

So there are three explanations and one of them is impossible and the other two are impossible as well, and the one they have written on the form is the cheapest of the three to be true.

5C • Answer

1. Where and when was the boat found, and what was aboard?
2. What was Mossie Hegarty's theory, and when did he start saying it?
3. **What had happened to the rope, and why does that matter?**
4. Where was the lifejacket, and what question did the insurance man ask about it?
5. Why does the narrator say "why would you"?
6. **What does the last sentence accuse the form of?**

5D • Vocabulary in context

Guess from the text. Then check.

drifting east · the turns were still in it · on the hook · that is not a theory · the cheapest of the three to be true

5E • The counter-text

The insurance claim form
Three boxes, one tick, and one box that has been ticked, crossed out and ticked again.

WESTERN MARINE - CLAIM FORM MC-3 (VESSEL, TOTAL LOSS)

Vessel Ballinmore, 7.4 m
Policy MV-2219

Tick ONE cause only. Where more than one box is ticked the claim is referred and settlement is suspended pending survey.

CAUSE OF LOSS

BOX	PAYS	EVIDENCE REQUIRED
A Mooring failure	18,000	the mooring, or a photograph of it
B Mechanical failure	18,000	engineer report on the vessel
C Cause unknown	6,000	none

Box B requires the vessel. The vessel has not been recovered.

TIME TO SETTLE

Box A	21 days
Box B	4-9 months
Box C	21 days

DECLARATION

I declare that the cause stated is true to the best of my knowledge. A false declaration voids this policy and may be a criminal offence.

BOX A: TICKED, CROSSED OUT, TICKED AGAIN, THEN CROSSED OUT:

Rope untied, not broken. Photographs attached. - A.H., assessor

One box. The whole decision is this sentence

Box A: twenty-one days, and the rope says it is not true

Box B: needs a boat that is two miles out

Box C: honest, and a third of the money

A false declaration voids the policy

Ticked twice by somebody, and crossed out by the assessor

{width=6.

6in}

The insurance claim form — Three boxes, one tick, and one box that has been ticked, crossed out and ticked again.

Read the insurance claim form and answer.

1. How many causes can be ticked, and how many may be ticked at once?
2. **What is the payout for each cause, and which is the lowest?**

- What does the form require as evidence for each cause?
- One box has been ticked, crossed out, and ticked again. Which?

5F • Two texts

The story says the rope was **untied**, by somebody who knew how. The form has a box for "mooring failure" and none for anything else that fits.

Put those two facts together. What will the form say happened? Two sentences.

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

How sure is sure

Certain, probable, possible, ruled out
Four positions, and each one is a different sentence about the same rope.

1 definitely / clearly / obviously ✓ MUST HAVE - and here is the reason	2 presumably / surely PRESUMABLY - I am filling a gap with logic	3 apparently / possibly APPARENTLY - somebody told me	4 the lifejacket, on the hook ✗ CAN'T HAVE - and here is what closes it
----- certain		----- impossible	

{width=6.

6in}

Certain, probable, possible, ruled out — Four positions, and each one is a different sentence about the same rope.

6A • Sort — how certain?

Put these on a line from certain to barely possible.

surely · clearly · obviously · presumably · possibly · apparently · definitely

Two of them are about what other people say, not about what you know. Which?

6B • Chunk completion

- It **must** _____ been the tide.
- It **might** _____ been the engine.
- He **can't** _____ been aboard.
- It's possible** _____ nobody noticed until morning.
- They never **worked** _____ what happened to the radio.
- The rope was untied. **That** _____ it.

6C • Two that sound like certainty and are not

apparently and **presumably** both look strong. Neither is.

Apparently = somebody told me. *Presumably* = I am filling a gap with logic.

Which would you use in each of these?

1. _____ the tide turned at two. (*it is in the tide table*)
2. _____ he went below for something. (*nobody saw it; the hatch was open*)
3. _____ the coastguard was there by noon. (*the harbour master said so*)

MUSTN'T, and CAN'T HAVE

One of them is a rule. The other is a conclusion from evidence.

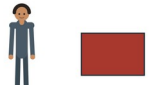

MUSTN'T - a rule

you mustn't go past the line

CAN'T HAVE - a deduction

he can't have been aboard - the lifejacket

Which one changes if you find a new piece of evidence?

6 differences — find them all

6in}

MUSTN'T, and CAN'T HAVE — One of them is a rule. The other is a conclusion from evidence.

Six differences. Find them, then answer the question under the picture.

6D • Contrast Clinic — must, might or can't

Six items.

1. The light is on. Somebody _____ be in.
 2. He's been at sea forty years. He _____ have made that mistake.
 3. Perhaps she _____ have forgotten.
 4. The light is on, but his car is gone. He _____ be in.
 5. There's no fuel in the can. It _____ have run out.
 6. The rope was untied, so it _____ have broken.
-

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

The word that disappears and leaves a mistake behind

The word that disappears and leaves a mistake behind			
All four of these sound like of. None of them is.			
must have	→	' m ʌ s t ə v	must've - never must of
might have	→	' m aɪ t ə v	might've - never might of
can't have	→	' k ɑː n t ə v	the h goes first
could have been	→	' k ʊ d ə v b ɪ n	three words, two beats
it MUST have been	→	ɪ t ' m ʌ s t ' h ə v b ɪ n	full only when you are arguing

{width=6.

6in}

The word that disappears and leaves a mistake behind — All four of these sound like of. None of them is.

7A • Hear Track 6.3

must have → *must've* → /'mʌstəv/ might have → *might've* → /'maɪtəv/ can't have → /'kɑːntəv/
could have been → /'kʊdəvbɪn/

All four sound exactly like of. None of them is.

7B • Say

Say each one. Then say the sentence three times, faster:

It must have been the current, and he can't have been aboard.

7C • Make it mean something

Say these two:

It MUST have been the current. (and I am arguing with somebody) It must've been the current. (and I am just thinking aloud)

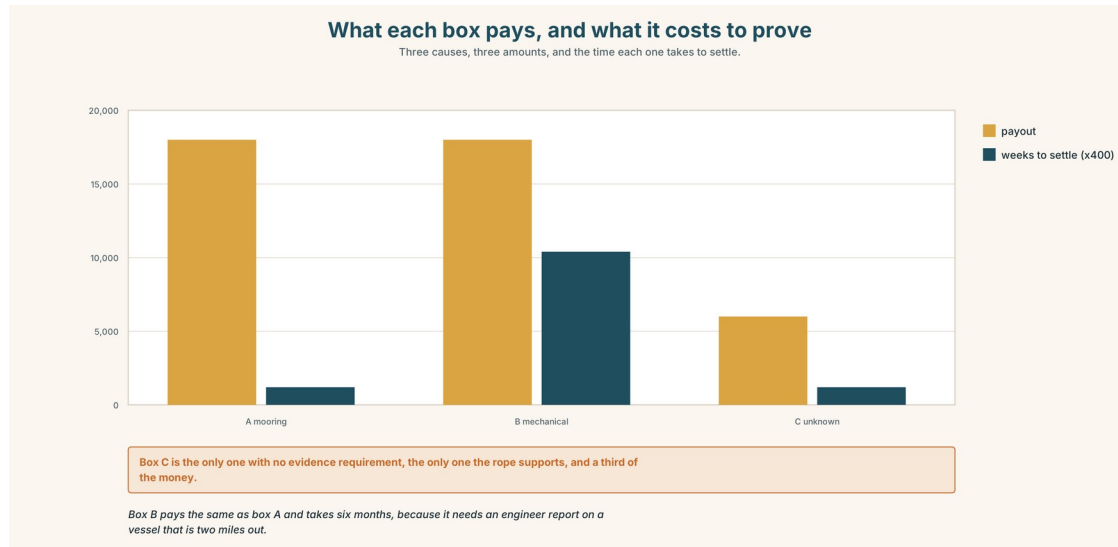

Which one has already been contradicted once?

7D • Fluency 20

Twenty seconds: **three deductions about this room.** One *must've*, one *might've*, one *can't have*. Three times, faster.

Part 8 • Writing ♦ C • THE PERFORMANCE

Three explanations • 100 words

{width=6.

6in}

What each box pays, and what it costs to prove — Three causes, three amounts, and the time each one takes to settle.

8A • Read the model

It can't have broken its mooring. The rope was untied and the turns were still in it, and rope that breaks does not look like that. [the ruled-out one first, with the physical reason]

The engine might have failed. The tank was nearly full, which makes it unlikely, but a fuel line can block with a full tank and it has happened twice on that pier in ten years. [the possible one, and the writer argues against their own point and then recovers it]

He must have untied it himself. That is the only explanation that fits the rope, and it is also the one that fits nothing else about him. [the strongest, and an admission that strongest is not the same as satisfying]

Questions about the writer's choices:

1. The impossible one comes first. **Why not last?**
2. The last line says the best theory does not fit the man. **Is that a weakness in the writing?**

8B • The anti-model

It is a real mystery and nobody knows what happened. It could have been many things. Maybe the rope broke or maybe something else happened. We will probably never find out the truth.

Correct English, and no evidence anywhere in it. **Name two things it does not do.**

8C • Plan

what you can rule out, and the physical reason → what is possible, with its weakness → what you believe → what still does not fit

8D • Write — 100 words

8E • Peer review — two criteria

☐ Is every level of certainty earned by a piece of evidence? ☐ Is there one thing that still does not fit?

8F • Write it again • 8G • Publish

On the wall, with the claim form from Part 5E beside it.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

CULTURE FILE • English as a Lingua Franca

Four speakers, no native speakers
What makes somebody easy to understand in English is almost never vocabulary.

1 and no idioms at all  SHORT SENTENCES - one idea each minute 0	2 confirming their meaning  "So you're saying it was untied, not broken."	3 numbers said twice 2 mi "Two miles. Two. Zero point... two miles."	4 repairing your own English, in advance  "Let me say that again differently." understood
---	---	--	--

{width=6.

6in}

Four speakers, no native speakers — What makes somebody easy to understand in English is almost never vocabulary.

9A • Four people, no native speakers 🎧 Track 6.4

A Spanish surveyor, a Latvian skipper, a Polish mechanic and a Brazilian insurance assessor discuss the boat. **In English. Listen.**

1. Who speaks the most, and are they the clearest?
2. **Which speaker checks that they have been understood, and how?**
3. One misunderstanding is repaired without anybody naming it. Where?

9B • What makes somebody easy to understand

Mark the three that matter most, from the recording.

a large vocabulary · short sentences · checking back · a particular accent · saying numbers twice · speaking slowly · knowing idioms

9C • The repair moves

Match each to its job.

"Sorry — the rope was what?" · "So you're saying it was untied, not broken." · "Let me say that again differently." · "Is that the right word?"

asking again · checking your own English · confirming their meaning · repairing in advance

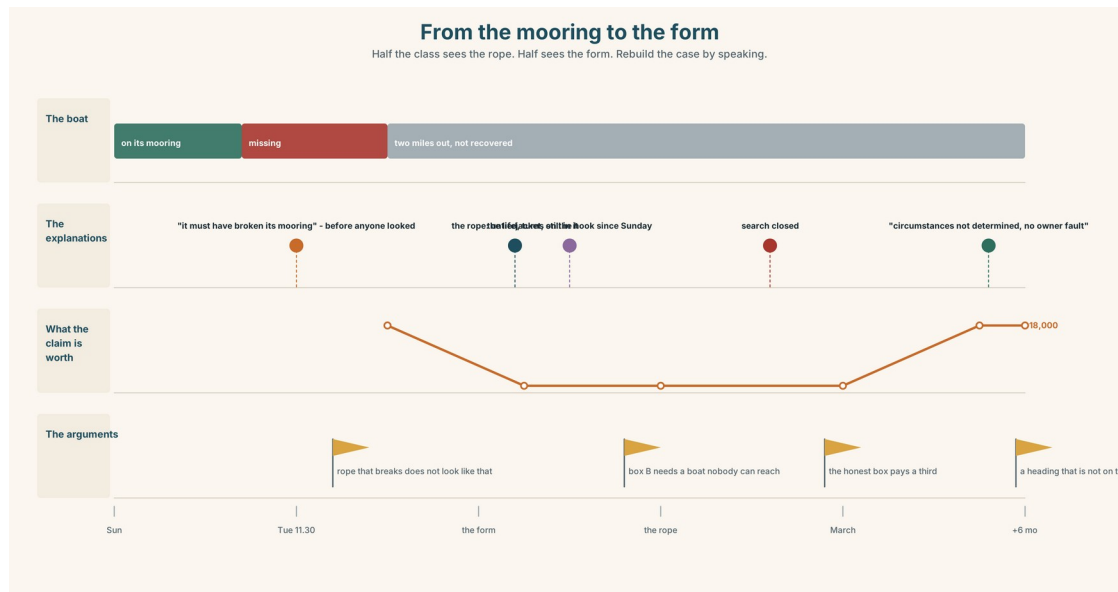

9D • Your turn

In fours. **Explain one of the three theories to the group** — but you may not use any word of more than two syllables. **Four minutes.** Then: what did you lose, and what got clearer?

9E • Transfer

Listen to one conversation in English this week where neither person is a native speaker. **Write down one thing they did that made it work.**

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

From the mooring to the form — Half the class sees the rope. Half sees the form. Rebuild the case by speaking.

10A • Relay

Half the class sees the boat and the rope. Half sees the claim form. **Rebuild the whole case by speaking.** Ten minutes.

10B • Simplify

Explain the claim form from Part 5E to Peadar, who has to sign it. **Four sentences only.**

Plan: what the boxes mean → what each one pays → what evidence each needs → which one you would not tick

10C • Compress

The story in Part 5 into **thirty-five words**, keeping the rope.

10D • Online

Write **one message** to the insurer: you are querying one box on the form, here is the physical evidence, and here is what you are asking them to do.

10E • Your language

How does your language say *it must have been*? **Is there a modal verb, or a word like surely?** Show a partner all three levels of certainty in both languages.

Part 11 • The Decision ♦ C • THE PERFORMANCE

One box on the form

The form has three boxes. Only one may be ticked. The rope was untied.

- **Mooring failure.** Pays 18,000. It is what Mossie says and what the form expects, and the rope says it is not true.
- **Mechanical failure.** Pays 18,000. Possible, unprovable, and nobody has looked at the fuel line because the boat is still out there.
- **Cause unknown.** Pays 6,000. It is the honest box, and it is the one he cannot afford.

11A • The evidence

1. **The claim form** from Part 5E — and the box that was ticked, crossed out and ticked again.
2. **The chart** — what each cause pays, what it requires, and how long each takes to settle.
3. **The voice.** Peadar, twenty seconds: *"I didn't untie her. I know what that rope looks like and I know what I am being asked to sign, and I am aware that the honest box is the one that costs me twelve thousand, and I have thought about that."*

11B • Talk about it

In threes. Everybody says one. Use the frame.

I think Peadar should tick _____, because _____.

Words you can use: *evidence · theory · suspect · clue · unlikely · obvious · payout · insurance*

11C • Decide

Write **two sentences**. Choose, and say why.

I think Peadar should tick _____, because _____.

11D • Model decision

He should tick *cause unknown* and attach the rope. The form is asking a question Peadar cannot honestly answer, and the rope is the only thing in the whole business that is certainly true. Six thousand and a clear conscience is a real cost and I would not pretend otherwise, but an eighteen-thousand payout for a cause that the physical evidence contradicts is a sentence somebody will have to repeat under oath if anybody ever looks again.

11E • The Reveal

What happened. He ticked *cause unknown* and sent the rope. The assessor asked for it to be photographed rather than posted and then came and looked at it himself.

He reopened the file. Six months later the payout was 18,000 under a heading that does not appear on the form — *circumstances not determined, no evidence of owner fault* — which he says existed all along and is simply not printed on the household version.

Nobody has found out who untied her. The coastguard closed the file in March. Mossie Hegarty has not been on the pier since the rope was photographed, and Peadar has not asked him why.

The honest box paid more, eventually, and only because somebody looked at the rope.

Was it the right decision? Say why — and say what you make of Mossie.

Part 12 • Landing ♦ all three lines

12A • Recycle — ten items

1. The rope _____ (must / break) in the night.
2. He _____ (can't / be) aboard.
3. It _____ (might / be) the current.
4. The coastguard has **ruled** _____ a collision.
5. Nothing has **turned** _____ since.
6. (Unit 5) "Measure it." → He told me _____ it.
7. (Unit 4) She _____ me that she had checked it. (said / told)
8. (Unit 3) By the time we arrived, it _____ (already / start).
9. (Unit 1) If I _____ you, I wouldn't wait.
10. (A2.1 U8) You _____ (not / allowed) go past this line.

12B • Consolidate

One hundred words. Three explanations of something unexplained. One *must have*, one *might have*, one *can't have*, and one thing that still does not fit.

12C • Can-do, with evidence

I can...	My evidence	Sure?
say how sure I am about a past event	Part 3G score	☐ ☒ ☒
explain and rank three causes in a hundred seconds	Part 4C recording	☐ ☒ ☒
write a hundred words where certainty is earned	Part 8 draft 2	☐ ☒ ☒
make myself understood without idioms	Part 9D group work	☐ ☒ ☒

12D • Replay 🟡

Find your thirty seconds from Part 0C. Listen. **Record it again.** One sentence: what is different?

12E • Glossary — forty items, as a map

THE PUZZLE · mystery · strange · empty · missing · wreck · clue · turn up · we may never know **THE THINKING** · theory · guess · suspect · explain · work out · make sense · rule out · that explains it **THE SEA** · tide · current · coastguard **THE PAPERWORK** · insurance · payout **HOW LIKELY** · obvious · unlikely · more likely · the only explanation **ALMOST CERTAIN** · must · must have · definitely · surely · obviously · clearly **POSSIBLE** · might · might have · could · possibly · it's possible that · presumably · apparently **RULED OUT** · can't · can't have

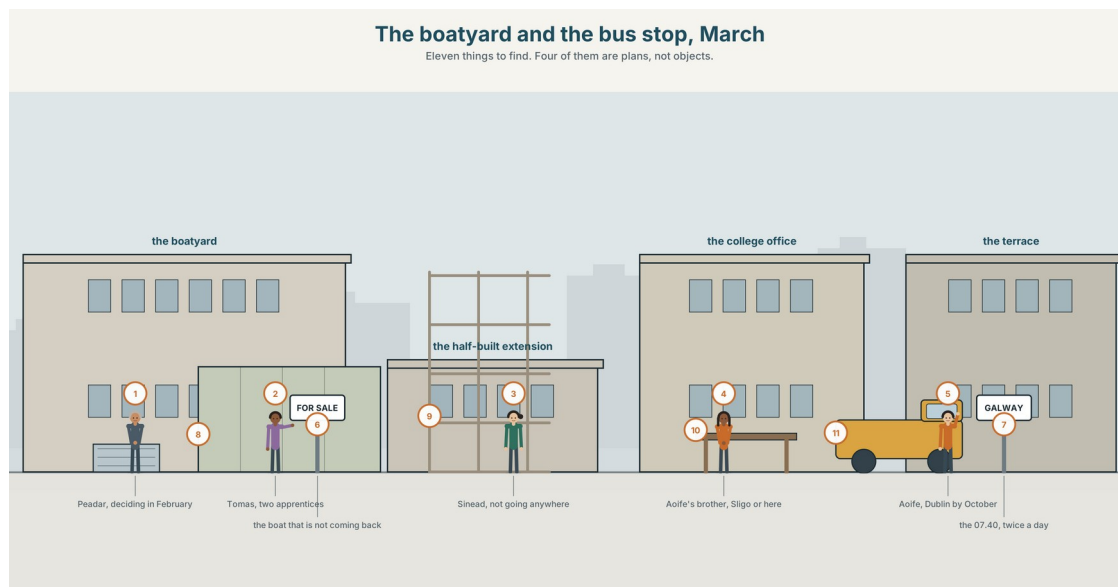

12F • Next

Unit 7 • What will you be doing in a year?

A2.2 • Unit 7 • This Time Next Year

English Animated • *Telling the Story* • Ballinmore, west coast of Ireland Student's Book pages 138–159 • 22 pp • ~10 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

The boatyard and the bus stop, March — Eleven things to find. Four of them are plans, not objects.

What will you be doing in a year?

By the end of this unit you can describe what you will be doing in a year, with real timings. One hundred words.

◆ A • THE WORLD

A town where everybody's plan depends on somebody else's

◆ B • THE SYSTEM

the future continuous · future time expressions · 23 words for work and ambition · 17 words for placing things in the future · 'I'll be as one sound

◆ C • THE PERFORMANCE

A year ahead, with dates in it

0A • Find it

Find eleven things in this picture. Four of them are plans, not objects.

a job advert · a training notice · a timetable on a wall · a boat for sale · a half-built extension · a calendar · a contract on a table · a bus to Galway · a college prospectus · a key on a hook · a van with a new name on it

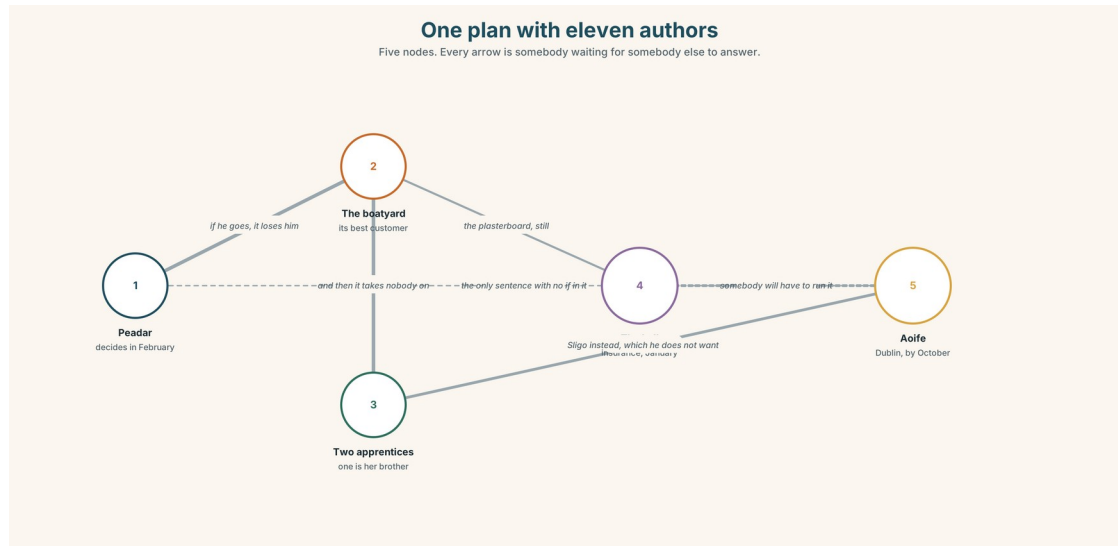

0B • Guess it

Three of the people in this picture will not be here in a year. Which three, and what is the evidence?

0C • Say it

Record thirty seconds. *This time next year, what will you be doing on a Tuesday morning?* Be specific about the Tuesday. You will record it again at the end of this unit.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

{width=6.

6in}

One plan with eleven authors — Five nodes. Every arrow is somebody waiting for somebody else to answer.

1A • Meet — the words of a working year

Match each word to one place on the map.

career • ambition • plan • apply • qualify • training • course • promotion • contract • season

1B • Sort — a thing you get, or a thing you do?

Two columns.

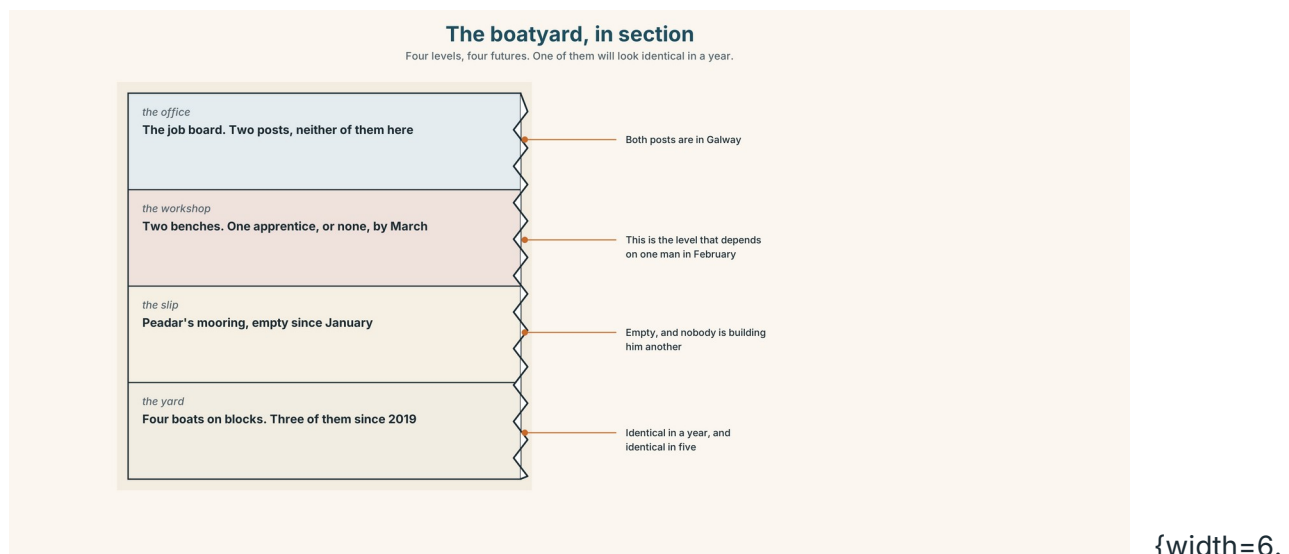

qualify • training • promotion • chance • course • contract • apply • plan

One of them is both, and that is why people confuse them. Which?

1C • Meet — the words for going and staying

leave • return • settle

Leaving is an event. Settling is a judgement, usually made by other people. After how long does somebody stop being new where you live?

6in}

The boatyard, in section — Four levels, four futures. One of them will look identical in a year.

Look at the boatyard, in section. Four levels, four futures. **Which level will have changed most in a year, and which will look identical?**

1D • Stretch — the phrases

Complete each one with one word.

1. **This time next** _____ she will be halfway through the course.
2. **By** _____, the extension will be finished or it will be abandoned.
3. He is **looking** _____ **work** on the bigger boats.
4. For some people it is **a fresh** _____. For others it is leaving.
5. The yard has **taken** _____ two apprentices for the season.

1E • The saying

f We'll see where we are.

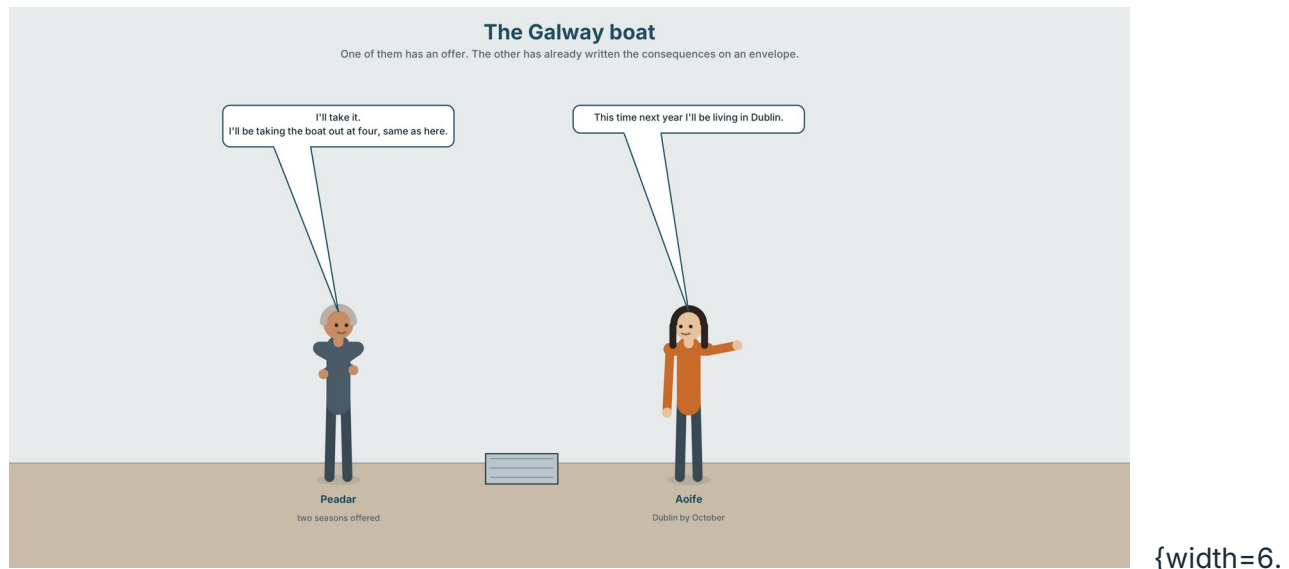

Five words that postpone a decision without refusing it.

Write what each of these people means by it: somebody who intends to go, somebody who intends to stay, and somebody who has not decided.

1F • Own it

Think about this time next year. Tell a partner **three sentences:** where you will be living, what you will be doing on a weekday morning, and one thing that will decide it.

Part 2 • Listening ♦ A • THE WORLD

6in}

The Galway boat — One of them has an offer. The other has already written the consequences on an envelope.

2A • The Galway boat 🎧 Track 7.1

Before you listen. Peadar has been offered work on a bigger boat out of Galway. **Guess: is the money the main question?**

Listen once. One question. When does the contract start?

Listen again. Complete the table.

	This time next year	What has to happen first	What they are not saying
Peadar			
Aoife			
Sinéad			

Listen again. Choose.

- The contract is for **one season / three years / two seasons**.
- Peadar will be away **four nights a week / permanently / three weeks at a time**.
- Aoife will be **working here / at college / not sure**.
- The hall will be **still waiting / finished / sold**.

Noticing. Four sentences from the recording.

- I'll take it.*
- I'll be taking the boat out at four, same as here.*
- This time next year I'll be living in Galway.*
- By then the hall will be finished.*

One of these is a decision. Three describe a future that is simply going on. Which is the decision?

2B • Decoding clinic 🎧 Track 7.2

Twenty-five seconds of Peadar. Four jobs.

1. How many times does he say *I'll be*?
2. In *I'll be taking*, how many syllables can you hear in the first two words?
3. Catch the date and the length of the contract.
4. He says one thing about a Tuesday. What?

Transcripts, page 156.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

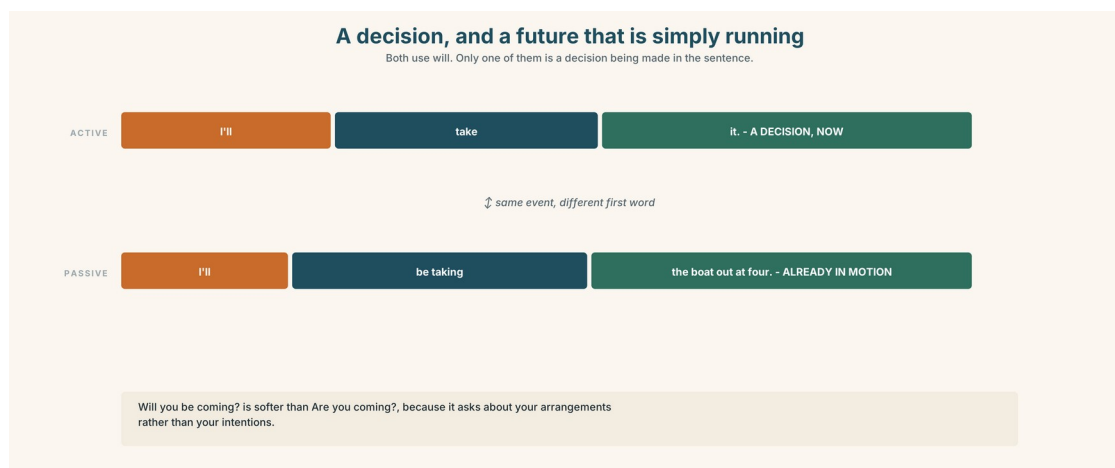

A future that is already running

3A • Notice

Look at the four sentences in Part 2.

1. Sentence 1 and sentence 2 both use *will*. **What is different about what they do?**
2. Sentence 3 names a time. **Does it name a moment or a period?**
3. **Which of the four would you use to answer "Have you decided?"**
4. *I'll phone you* and *I'll be phoning you*. **Which one sounds like a promise and which like a routine?**
5. Try "*This time next year I'll live in Galway*." **It is not wrong. What does it lose?**

3B • See

{width=6.

6in}

A decision, and a future that is simply running — Both use will. Only one of them is a decision being made in the sentence.

Now look at the second picture. **It runs from a decision made now to a year that is simply running. Where does *going to* sit?**

Five futures. The top one carries no decision at all, and that is why it is polite.

This time next year I'll be having him back .	arrangement. No decision in the sentence
Will you be coming to the meeting ?	arrangements - and therefore polite
I'm meeting him on Tuesday .	arrangement, already fixed with somebody
I'm going to apply in March .	intention you already had
I'll take it .	decided in the moment of speaking

decided in the moment of speaking

6in}

3C • Know

The future continuous is the least dramatic of the three, and that is its point. It describes a future as **ordinary**, as something already in motion, with no decision being made in the sentence.

The time expressions it likes: *this time next year · by then · by the end of · in a year's time · eventually · meanwhile*

3D • Use — controlled

3E • Use — guided

Put each one into the future continuous.

1. I start the course in September. *(and in October?)*
2. He takes the boat out at four every day. *(next year, in Galway?)*
3. We are rebuilding the hall. *(this time next year?)*
4. She works in Dublin. *(by then?)*
5. They wait for the plasterboard. *(by Christmas?)*

3F • Use — open

Ask three people: *What will you be doing at nine o'clock on a Tuesday this time next year?* **Push for a detail.** Then report the most specific answer to the class.

3G • Check — six items

1. This time next year I _____ (live) in Galway.
2. By then the hall _____ (be) finished.
3. _____ you _____ (come) to the meeting? *(polite)*
4. I _____ (take) it. *(deciding now)*
5. I _____ (apply) in March. *(I decided last week)*
6. I _____ (know) by March. *(not continuous)*

0–3 → Workbook pp. 40–42. **4–5** → Part 6. **6** → page 151.

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency starter — the Tuesday

Your teacher names a time: **nine o'clock, Tuesday, next March.** Each learner says one sentence beginning "I'll be..." **Nobody may say I don't know.**

Four rounds. Four Tuesdays, further and further away.

4B • The functional core — describing a year ahead

The town in March, and the town next March
Learner A has this year. Learner B has next year. Seven things change.

this March	next March
an empty mooring and a half-built wall 	a finished wall, and two people gone 
<i>Which of the changes depend on one person's decision?</i> 7 differences — find them all	

6in}

{width=6.

The town in March, and the town next March — Learner A has this year. Learner B has next year. Seven things change.

Language Bank

the running future	<i>I'll be... · By then I'll be... · This time next year...</i>
the decision	<i>I'm going to... · I've decided to... · I'll take it.</i>
the condition	<i>If it comes off, I'll be... · That depends on...</i>
the honest hedge	<i>Hopefully. · We'll see where we are. · Ask me in March.</i>

Role play. Learner A has been offered something far away. Learner B wants them to stay. **Six minutes.** Neither may use the word *should*.

4C • The performance — one hundred seconds

Describe **your year ahead. One hundred seconds.** You must give:

what you will be doing on an ordinary morning · one date · one thing that has to happen first · one thing you will not be doing

Record it.

4D • Observer

One person listens for **one thing**: was there a real date, or only *soon*?

4E • Two criteria

☐ Did I use the future continuous at least three times? ☐ Is there a specific date or month in it?

Part 5 • Reading A • THE WORLD

5A • Predict

A personal essay. The title is "**Everybody here is waiting for somebody else's answer.**" **What do you expect it to describe?** One sentence.

5B • Read — one hundred and ten seconds

Everybody here is waiting for somebody else's answer

I counted it out on the back of an envelope in March and it frightened me.

Peadar will decide about Galway in February. If he goes, the boatyard loses its best customer and Tomás's cousin does not take on the two apprentices, and one of those apprentices is my brother, who will then be applying to the college in Sligo instead, which he does not want and which he will probably get.

Sinéad will not leave. She has said so for eight months and I believe her. But the hall will not reopen until the plasterboard arrives, and if it is still shut in January the committee will have to

I will be at college in Dublin by October. That is the only sentence in this piece with no *if* in it, and I notice that I have put it last, and that it is also the only one that is entirely about me.

5C • Answer

1. When will Peadar decide, and what are the three consequences the writer traces?
2. Where will the writer's brother apply instead, and how does she describe his chances?
3. **What is the chain of events around the hall?**
4. What is the only sentence with no *if* in it?
5. **Why does the writer notice that she put it last?**
6. What does the last sentence claim about small towns?

Guess from the text. Then check.

5E • The counter-text

6in}

Read the job advert and the contract summary, and answer.

1. What is the post, and how long is the contract?
2. **How many nights a week is the successful applicant away, and where is that stated?**
3. What does the advert say about accommodation, and what does the contract say?
4. One clause changes the start date if something happens. Which, and what?

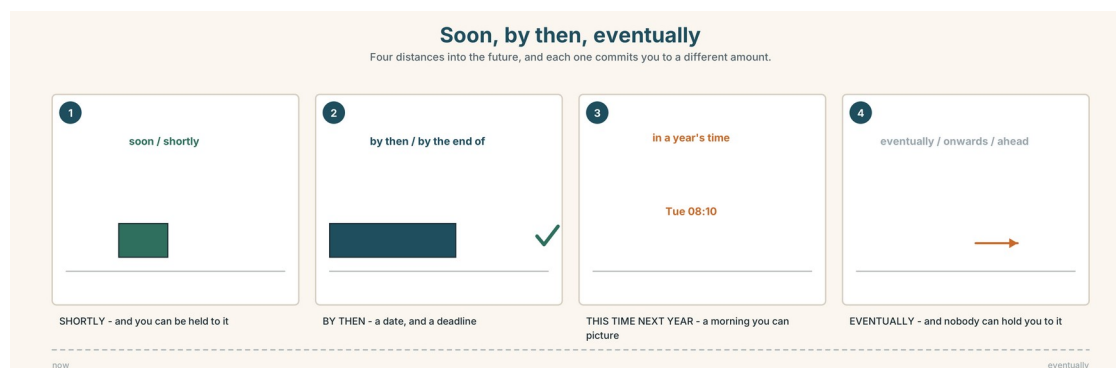

5F • Two texts

The essay says Peadar will decide **in February**. The contract requires acceptance **by 15 January**.

Put those two facts together. What has the writer got wrong, and does it matter? Two sentences.

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Putting things in the future

{width=6.

6in}

Soon, by then, eventually — Four distances into the future, and each one commits you to a different amount.

6A • Sort — soon, far off, or in between?

Three columns.

in a year's time · ahead · meanwhile · soon · onwards · this time next · by then · shortly · later · eventually

6B • Chunk completion

1. **This time** ____ year she will be qualified.
2. **By the** ____ **of** March we will know.
3. **In a year's** ____ nobody will remember this.
4. He is **looking for** ____ on the bigger boats.
5. For her it is **a fresh** ____ .
6. They always **end** ____ coming back.

6C • Three that are not as sure as they sound

hopefully · likely · eventually

Each of these looks like a prediction and is actually a hedge.

Rewrite each sentence so the hedge is honest and visible.

1. Hopefully I'll be finished by March.
2. He's likely to take it.
3. Eventually the hall will reopen.

I'LL GO, and I'LL BE GOING
The same journey. One of them is news and the other is a timetable.

I'LL GO - a decision

decided in the moment of speaking

I'LL BE GOING - an arrangement

already in motion, and nobody is deciding

Which one would be on a noticeboard?
6 differences — find them all

{width=6.

6in}

I'LL GO, and I'LL BE GOING — The same journey. One of them is news and the other is a timetable.

Six differences. Find them, then answer the question under the picture.

6D • Contrast Clinic — will, going to, or will be -ing

Six items.

1. _____ you _____ come to the meeting? (*polite enquiry*)
 2. By then we _____ wait eleven months for that plasterboard.
 3. (*the phone rings*) I _____ get it.
 4. This time next year I _____ live in Galway.
 5. I _____ apply in March. (*decided last week*)
 6. I _____ know by March. (*a state*)
-

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

Three words that become one and a half

Three words that become one and a half		
I will be is three words in writing and about one and a half in speech.		
I will be	→ aɪlbi	I'll be - one and a half
she will be working	→ ʃi:lbi'wɜ:kɪŋ	four words, two beats
we will be waiting	→ wi:lbi'weɪtɪŋ	the same shape
this time next year	→ ðɪstaɪmnekst'jɪə	four words, one stress, at the end
I WILL be there	→ aɪ'wɪlbi'ðeə	full only when somebody has doubt

{width=6.

6in}

Three words that become one and a half — I will be is three words in writing and about one and a half in speech.

7A • Hear Track 7.3

I will be → I'll be → /aɪlbi/ she will be working → /ʃi:lbi'wɜ:kɪŋ/ we will be waiting → /wi:lbi'weɪtɪŋ/ this time next year → /ðɪstaɪmnekst'jɪə/

7B • Say

Say each one. Then say the sentence three times, faster:

This time next year I'll be taking the boat out at four.

7C • Make it mean something

Say these two:

I WILL be there. (somebody has doubted it) I'll be there. (it is simply an arrangement)

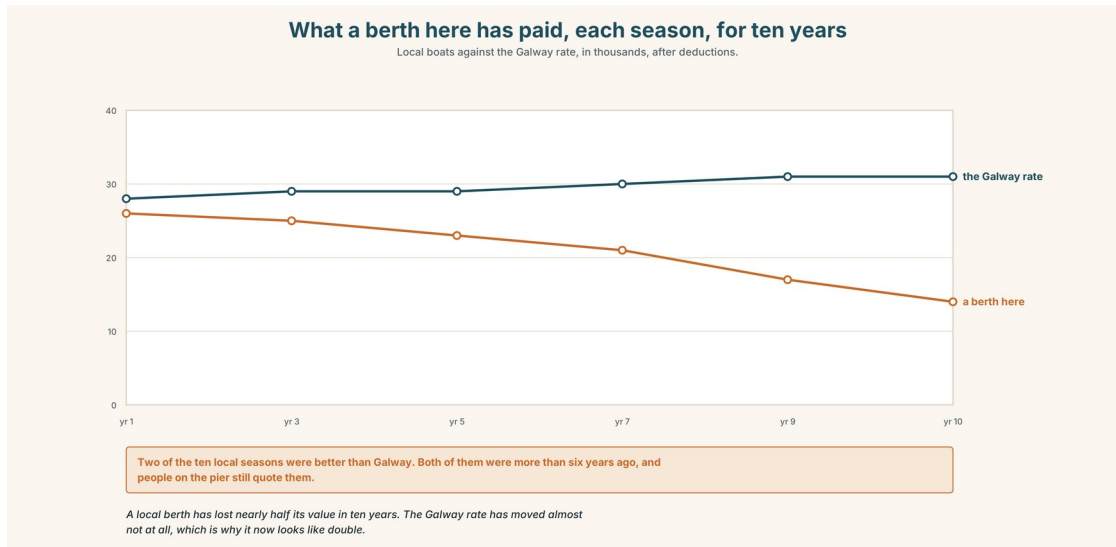

Which of the two is a promise, and which is a timetable?

7D • Fluency 20

Twenty seconds: **three things you will be doing this time next year.** Three times, faster, with 'I'll be every time.

Part 8 • Writing ♦ C • THE PERFORMANCE

A year ahead • 100 words

{width=6.

6in}

What a berth here has paid, each season, for ten years — Local boats against the Galway rate, in thousands, after deductions.

8A • Read the model

By October I'll be in Dublin, and on a Tuesday morning I'll be on the 8.10 from Drumcondra with a bag that is too heavy, because I have seen the timetable and I know what the walk is like. [a date, a specific morning, and a detail that proves the writer has actually looked]

I'll still be coming back one weekend in three. That is not sentiment; it is the cheapest train and my mother's birthday is in November. [what continues, and the reason is practical rather than emotional]

I will not be running the hall. Somebody in this town is going to have to, and it is not going to be me, and I would rather say that now than in March. [what the writer will not be doing, said plainly, which is the hardest sentence here]

Questions about the writer's choices:

1. The first paragraph names a train. **What does that do that "I'll be studying" does not?**
2. The last paragraph is a refusal. **Why put it in a piece about your own year?**

8B • The anti-model

Next year I hope to be doing something interesting. I would like to study or maybe work, and I am keeping my options open. Hopefully things will work out and I will be happy with whatever I decide to do.

Correct English, and a year of nothing. **Name three things it does not contain.**

8C • Plan

a date → an ordinary morning, with a detail → what continues, and why → one thing you will not be doing

8D • Write — 100 words

8E • Peer review — two criteria

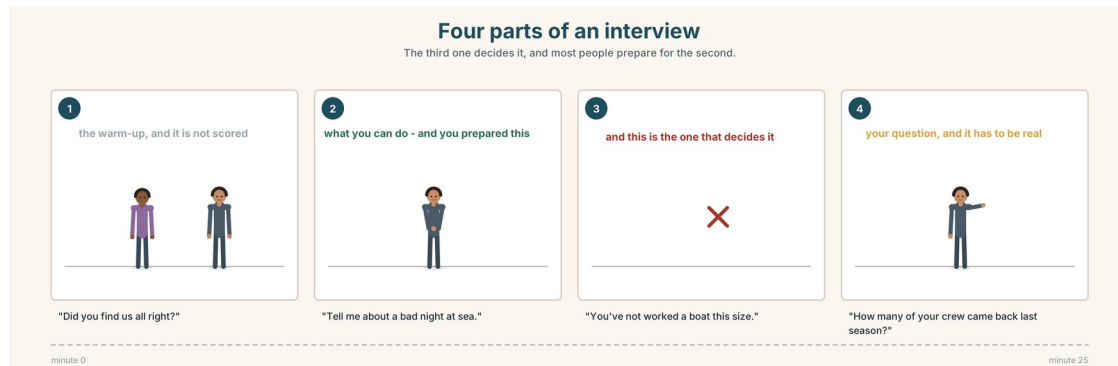

☐ Is there a real date and a real morning? ☐ Is there one thing the writer rules out?

8F • Write it again • 8G • Publish

On the wall, with the job advert from Part 5E beside it.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

WORK FILE • The Interview

{width=6.

6in}

Four parts of an interview — The third one decides it, and most people prepare for the second.

9A • Twenty-five minutes 🎧 Track 7.4

Peadar is interviewed for the Galway post. **Listen.**

1. What is the first real question, and how long does it take to arrive?
2. **Which answer does he give too quickly, and what does it cost him?**
3. What does he ask them, and when?

9B • The four parts of an interview

the warm-up · the thing you can do · the thing you have not done · the questions you ask them

Match each to one phrase.

"Did you find us all right?" · "Tell me about a bad night at sea." · "You've not worked a boat this size." · "How many of your crew came back last season?"

9C • The answer to the question about what you cannot do

The worst answer is a denial. The second worst is an apology.

Which of these four is best, and why?

1. "I'd pick it up quickly."
2. "No, I haven't. The handling's different and I'd want a fortnight alongside somebody."
3. "Size isn't really the issue."
4. "I'm sorry, I know that's a problem."

9D • Your turn

In pairs. **Ten minutes.** One interviews, one is interviewed, for anything at all. The interviewer **must** ask about something the candidate has not done. **The candidate must ask one real question back.**

9E • Transfer

Write down the question you would ask at the end of an interview this year. Not a polite one. A real one. Bring it.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

One decision, eleven plans — Half the class sees the advert. Half sees the essay. Rebuild the chain by speaking.

10A • Relay

Half the class sees the job advert. Half sees the essay. **Rebuild the chain of decisions by speaking.** Ten minutes.

10B • Simplify

Explain the contract summary from Part 5E to somebody who has never signed one. **Four sentences only.**

Plan: how long → what the hours actually are → what is not included → the one date that matters

10C • Compress

The essay in Part 5 into **thirty-five words**, keeping the last sentence's idea.

10D • Online

Write **one message** to the Galway skipper: you are interested, you have one question about the start date, and you will answer by a date you name.

10E • Your language

How does your language talk about a future that is simply running? **Is there something like *will be doing*, or do you use a present tense?** Say *this time next year I'll be living in Galway* in both.

Part 11 • The Decision ◆ C • THE PERFORMANCE

Galway, or the season after

Peadar is offered a berth on a bigger boat out of Galway. Two seasons, better money, three weeks at a time away.

- **Take it.** The money is nearly double. The boat he had is not coming back and nobody is building him another.
- **Stay.** Wait a season. The yard thinks there will be a berth here by next spring, and the yard has thought that before.
- **Take it for one season.** The contract is for two. Ask for one, and risk being turned down for something he has already decided he wants.

11A • The evidence

1. **The job advert and the contract** from Part 5E — and the clause about the start date.
2. **The chart** — what a berth here has paid, each season, for ten years.
3. **The voice.** Aoife, twenty seconds: *"Everyone keeps telling him what it would do to the town. Nobody has asked him what he will be doing at four o'clock in the morning if he stays, because the answer is nothing, and he has been doing nothing at four o'clock in the morning since January."*

11B • Talk about it

In threes. Everybody says one. Use the frame.

This time next year Peadar will be _____, because _____.

Words you can use: *career · chance · contract · season · leave · return · settle · future*

11C • Decide

Write **two sentences**. Choose, and say why.

I think Peadar should _____, because _____.

11D • Model decision

He should take it for the two seasons and say so before January, not in February. Asking for one season is asking a skipper to carry the cost of his uncertainty, and skippers remember that. Two seasons is twenty months, and a man who has been awake at four every morning since January with nothing to go out in does not need a smaller version of the thing he wants.

11E • The Reveal

What happened. He took the two seasons and started in March.

He is away three weeks at a time and says the work is easier than here and the boat is better than anything he will ever own. He has not sold the house. He is back for ten days in four, and on those ten days he is on the pier at four in the morning doing nothing, which his sister says is the only part of this that has not changed.

The yard did not take on the two apprentices. Aoife's brother went to Sligo and is, by every account including his own, doing well.

He went. The chain in the essay happened almost exactly as she wrote it. And the one person it was supposed to be worst for is doing fine.

Was it the right decision? Say why — and say what you make of the ten days in four.

Part 12 • Landing ◆ all three lines

12A • Recycle — ten items

1. This time next year I _____ (live) in Galway.
2. By then the hall _____ (be) finished.
3. _____ you _____ (come) to the meeting? (*polite*)
4. He is **looking** _____ **work** on the bigger boats.
5. They always **end** _____ coming back.
6. (*Unit 6*) The rope _____ (must / break) in the night.
7. (*Unit 5*) "Measure it." → He told me _____ it.
8. (*Unit 4*) She _____ me that she had checked it. (*said / told*)
9. (*Unit 2*) We _____ (wait) since June.
10. (*A2.1 U5*) If it _____ (rain), we'll stay.

12B • Consolidate

One hundred words. Your year ahead. Three future continuous forms, one real date, and one thing you will not be doing.

12C • Can-do, with evidence

I can...	My evidence	Sure?
describe a future that is simply running	Part 3G score	☐ ☒ ☒
describe a year ahead in a hundred seconds	Part 4C recording	☐ ☒ ☒
write a hundred words with a real date in them	Part 8 draft 2	☐ ☒ ☒
answer a question about what I have not done	Part 9D role play	☐ ☒ ☒

12D • Replay 🟡

Find your thirty seconds from Part 0C. Listen. **Record it again.** One sentence: what is different?

12E • Glossary — forty items, as a map

THE WORK · career · ambition · plan · contract · season · crew · boatyard · promotion
GETTING IN · apply · qualify · training · course · chance · look for work · take on **GOING AND STAYING** · leave · return · settle · a fresh start · end up · future **THE RUNNING FUTURE** · will · going · be doing · this time next · by then · by the end of · in a year's time **SOON, AND LATER** · soon · shortly · later · eventually · onwards · meanwhile · ahead **THE HEDGE** · hopefully · likely · we'll see where we are · I'll still be here

12F • Next

Unit 8 • What do you know about this place?

A2.2 • Unit 8 • The Only Building Above the Line

English Animated • *Telling the Story* • Ballinmore, west coast of Ireland Student's Book pages
160–181 • 22 pp • ~10 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

The lower town, from the pier — Eleven places to find. Three of them have a plaque, and one of them is above the line.

What do you know about this place?

By the end of this unit you can give a ninety-second tour of a place, adding the background a visitor would not know.

◆ A • THE WORLD

A town with eleven landmarks and one of them is worth money

◆ B • THE SYSTEM

non-defining relative clauses ·
commas and clause boundaries · 23
words for places and history · 17
words for adding things · the pause,
and the pitch reset after it

◆ C • THE PERFORMANCE

Ninety seconds that give a visitor
what a sign cannot

0A • Find it

Find eleven places in this picture. Three of them have a plaque.

the harbour · the pier · the headland · the cliff path · the bay · the lighthouse · the hall · the church · the ruin · the old school · the war memorial

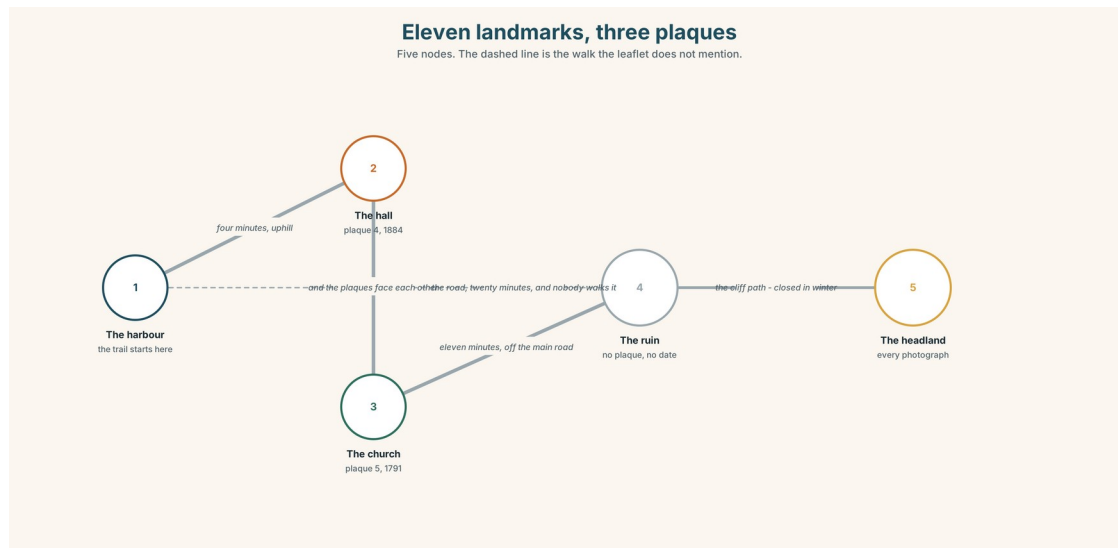

0B • Guess it

One building in this picture is above the flood line and one is barely below it. Which, and how can you tell from the drawing?

0C • Say it

Record thirty seconds. Describe one place near you to somebody who has never been. Give one fact a sign would not tell them. You will record it again at the end of this unit.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

{width=6.

6in}

Eleven landmarks, three plaques — Five nodes. The dashed line is the walk the leaflet does not mention.

1A • Meet — the shape of a coast

Match each word to one place on the map.

harbour • pier • headland • cliff • bay • lighthouse • ruin • church • hall • landmark

1B • Sort — natural, built, or ruined?

Three columns.

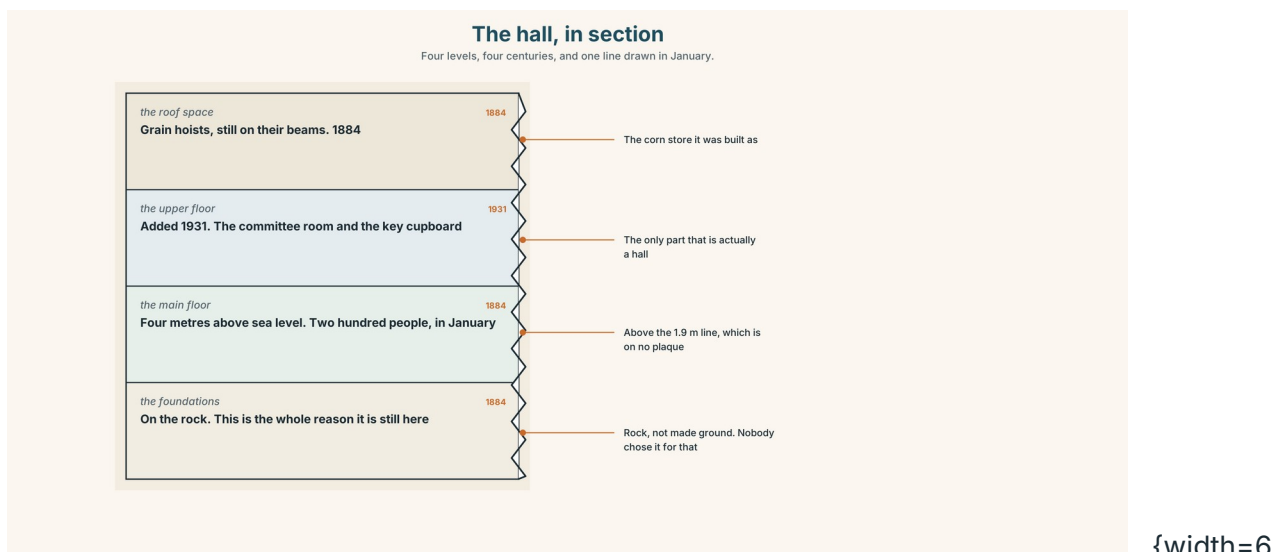

bay • ruin • hall • cliff • church • headland • lighthouse • harbour • pier

One of them is in two columns, and the argument about which is three hundred years old. Which?

1C • Meet — what happened to it

founded • destroyed • restored

A building can be restored to a date that it never actually looked like. **Which date would you restore the hall to, and who decides?**

6in}

The hall, in section — Four levels, four centuries, and one line drawn in January.

Look at the hall, in section. Four levels, four centuries. **Which level is the oldest, and which is the only one above the flood line?**

1D • Stretch — the phrases

Complete each one with one word.

1. The pier **dates** _____ 1886.
2. The headland is **named** _____ a family that left in 1912.
3. The ruin is **worth** _____ , though there is nothing to read there.
4. It is **off the main** _____ , which is why it is still standing.
5. The old school **looks** _____ **over** the whole bay.

1E • The saying

f You'd never know.

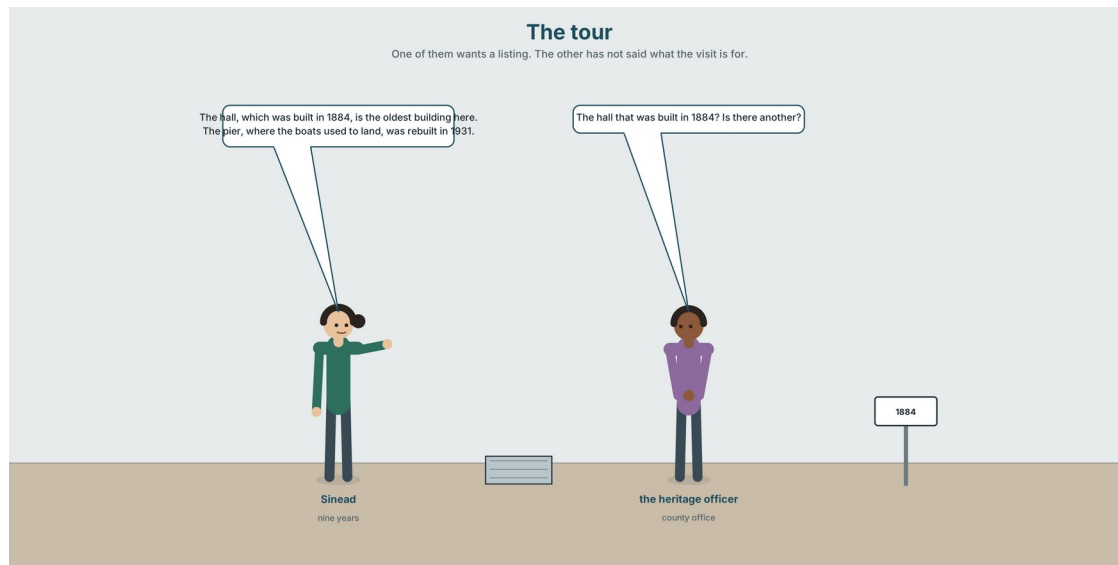

Three words that a local says and a visitor cannot.

Write three facts about a place you know that a visitor would never know. One of them should be slightly uncomfortable.

1F • Own it

Think of one building near you. Tell a partner **three sentences**: what it is, what it was, and one thing that is not on any sign.

Part 2 • Listening ♦ A • THE WORLD

6in}

{width=6.

The tour — One of them wants a listing. The other has not said what the visit is for.

2A • The tour 🎧 Track 8.1

Before you listen. Sinéad is showing a heritage officer round. There is a reason. **Guess what she wants.**

Listen once. One question. How old is the hall?

Listen again. Complete the table.

Building	Date	What it was	What is not on the plaque
the hall			
the pier			
the ruin			

Listen again. True or false?

- The hall was built as a church. ☐ T ☐ F
- The pier was destroyed twice. ☐ T ☐ F
- The ruin has a plaque. ☐ T ☐ F
- The hall is the only building above the flood line. ☐ T ☐ F

Noticing. Four sentences from the recording.

- The hall, which was built in 1884, is the oldest building here.*
- The hall that was built in 1884 is the oldest building here.*
- Sinéad, who has run it for nine years, says it should stay.*
- The pier, where the boats used to land, was rebuilt in 1931.*

Sentences 1 and 2 look nearly identical. One of them implies there is another hall. Which one, and what does the comma do?

2B • Decoding clinic 🎧 Track 8.2

Twenty-five seconds of Sinéad. Four jobs.

1. How many times does she pause in the middle of a sentence?
2. After a pause, does her voice start higher or lower?
3. Catch the three dates.
4. One clause is added as an afterthought. Which, and how do you know?

Transcripts, page 157.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

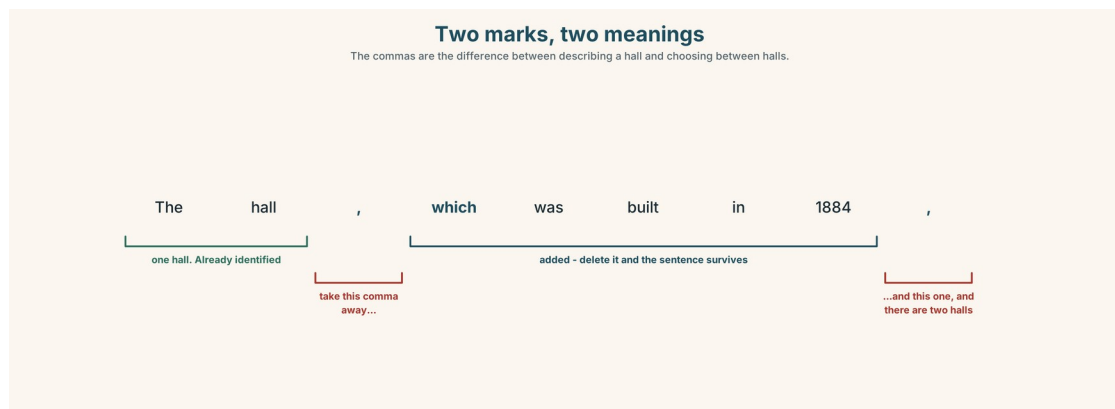

Adding something, rather than narrowing it

3A • Notice

Look at the four sentences in Part 2.

1. In sentence 2, how many halls are there?
2. In sentence 1, how many?
3. **Take *which was built in 1884* out of sentence 1. Does the sentence still work?**
4. Now take *that was built in 1884* out of sentence 2. **Does it?**
5. Try "*Sinéad, that has run it for nine years, says it should stay.*" **What is wrong?**

3B • See

6in}

{width=6.

Two marks, two meanings — The commas are the difference between describing a hall and choosing between halls.

Now look at the second picture. **One sentence, two readings, and the only difference is two marks.**

Defining, and non-defining

The same words. One of them tells you there is another hall.

ACTIVE

The hall

THAT was built in 1884

(so there is another)

PASSIVE

The hall,

WHICH was built in 1884,

(there is one hall)

↕ same event, different first word

Three rules for non-defining clauses: always commas, never that, and you can always delete the whole clause and the sentence survives.

6in}

Defining, and non-defining — The same words. One of them tells you there is another hall.

3C • Know

defining	no commas · tells you which one	<i>The hall that was built in 1884 (so there is another hall)</i>
non-defining	commas · adds information	<i>The hall, which was built in 1884, (there is one hall)</i>

Three rules for non-defining clauses.

1. Always commas — one before and one after, unless the sentence ends.
2. Never **that**. Use *which, who, whose, where, when*.
3. You can always delete the whole clause and the sentence survives.

With a proper name it is almost always non-defining, because a name already identifies. ✓
Sinéad, who has run it for nine years, ... × *Sinéad who has run it for nine years ...*

Quantity phrases take **of which** and **of whom**. *eleven buildings, most of which are below the line · forty-one traders, all of whom were asked*

Why it matters. The comma is the difference between describing a place and distinguishing it from another one. On a plaque, that is the whole job.

3D • Use — controlled

The hall, (1) _____ was built in 1884, is the oldest building in the town. Sinéad, (2) _____ has run it for nine years, says it should stay. The pier, (3) _____ the boats used to land, was rebuilt in 1931. There are eleven listed buildings, most (4) _____ are below the flood line. The ruin, the date (5) _____ nobody knows, has no plaque. And the headland, (6) _____ is named after a family that left in 1912, is where every photograph is taken.

3E • Use — guided

Add the information as a non-defining clause. **Remember the commas.**

1. The lighthouse is still working. (*It was built in 1902.*)

2. Tomás has been here four years. *(He wrote the survey.)*
3. The bay fills in forty minutes. *(The tide comes in there fastest.)*
4. There are eleven landmarks. *(Three of them have plaques.)*
5. The old school is empty. *(Its roof was replaced last year.)*

3F • Use — open

Describe four places near you to a partner, each with one non-defining clause. **Your partner must spot the one that is actually defining.**

3G • Check — six items

1. The hall, _____ was built in 1884, is the oldest.
2. Sinéad, _____ runs it, says it should stay.
3. The pier, _____ the boats landed, was rebuilt.
4. Eleven buildings, most _____ are below the line.
5. The ruin, the date _____ nobody knows, has no plaque.
6. The hall _____ was built in 1884 is the oldest. *(is this right? why / why not)*

0–3 → Workbook pp. 46–48. **4–5** → Part 6. **6** → page 173.

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency starter — add one thing

One learner names a place. The next adds a non-defining clause. The next adds another to the new sentence. **The sentence breaks when somebody uses *that*.**

Four rounds.

4B • The functional core — giving a tour

The plaque, and the valuation

Learner A has plaque 4. Learner B has the valuation. They are about the same building.

plaque 4, brass

two dates and a merchant

1884 / 1931

the valuation, A4

one figure and one height

410,000

Which document mentions the height, and which mentions the people?

7 differences — find them all

{width=6.

6in}

The plaque, and the valuation — Learner A has plaque 4. Learner B has the valuation. They are about the same building.

Language Bank

the fact	<i>This is the... · It dates from... · It was founded in...</i>
the addition	<i>..., which was... · ..., where they used to... · ..., who built it.</i>
the aside	<i>By the way... · Which is why... · Actually...</i>
the thing no sign says	<i>And that's the part nobody mentions. · You'd never know.</i>

Role play. Learner A is showing somebody round. Learner B is a visitor who asks "**why?**" after every fact. **Six minutes.**

4C • The performance — ninety seconds

Give a **ninety-second tour** of a place you know. You must give:

three landmarks · one non-defining clause for each · one date · one thing not on any sign

Record it.

4D • Observer

One person listens for **one thing**: was every added clause separated by a real pause?

4E • Two criteria

☐ Did I use three non-defining clauses, none of them with *that*? ☐ Is there one fact a visitor could not have found alone?

Part 5 • Reading A • THE WORLD

5A • Predict

A review of the town's new heritage trail. The title is "**Eleven plaques and one missing sentence.**" **What do you expect the reviewer to object to?** One sentence.

5B • Read — one hundred and ten seconds

Eleven plaques and one missing sentence ★★★★★

Ballinmore's heritage trail, which opened in June, is an hour long, properly signposted, and better than most things of its kind. The plaques are brass, which will outlast the funding, and the text on them was written by somebody who has read the parish records rather than the tourist board's previous leaflet.

It is also, in one respect, a lie by omission, and I want to be careful about how I say that, because the omission is not the trail's fault.

Plaque 4 is on the hall, which was built in 1884 as a corn store and became a hall in 1931. The plaque gives both dates and the name of the merchant who paid for it. What it does not say — and what every person in this town knows — is that the hall is the only building in the lower town

above the 1.9 metre line, that two hundred people were in it on the night of the storm, and that there is a proposal to sell it.

A heritage plaque is not a news bulletin and nobody expects it to be. But the trail is the only written account of this place that a visitor will ever read, and it stops in 1931.

Three stars, and the third one is for the brass.

5C • Answer

- 1. How long is the trail, and when did it open?
- 2. **What two things does the reviewer praise about the plaques?**
- 3. What does plaque 4 say about the hall, and what does it leave out?
- 4. How many people were in the hall on the night?
- 5. **Why does the reviewer say the omission is not the trail's fault?**
- 6. What is the third star for?

5D • Vocabulary in context

Guess from the text. Then check.

signposted · a lie by omission · the parish records · a news bulletin · it stops in 1931

5E • The counter-text

Plaque 4, and the valuation beside it

Fifty-one words in brass, and four pages that mention something the brass does not.

VALUATION - SAME BUILDING, 4 PAGES

ITEM	DETAIL
town. Converted to a public hall in 1931 following the rebuilding of the pier. The hoists remain in the roof space.	corn store, converted, in community use
Presented to the people of Ballinmore by the Dolan family.	
Value as is	410,000
Dates given	1884, 1931
Value, 2 units + upper floor	198,000 + retained
Last date mentioned	1931
Basis	vacant possession

"Vacant possession" means the figure assumes the community use ends. There is no valuation in this document of the building in continued community use.

PAGE 3, UNDER SITE

Height above sea level 4.1 m

Jan flood level 1.9 m

"The site is not within the flood envelope and no flood resilience works are required."

THE LINE THAT WOULD CHANGE THE PLAQUE:

"Not within the flood envelope" - the only building in the lower town of which that is true.

Fifty-one words, and the last date in them is 1931

Presented to the people of this town - and now valued for sale

410,000, and the figure assumes the hall stops being a hall

Nobody has valued it as what it is

4.1 metres against 1.9. Two numbers, on page three

A surveyor wrote the most important sentence about this building

6in}

Plaque 4, and the valuation beside it — Fifty-one words in brass, and four pages that mention something the brass does not.

Read plaque 4 and the valuation beside it, and answer.

- 1. What two dates does the plaque give, and whose name is on it?

2. What is the building valued at, and on what basis?
3. What does the valuation say about the building's height above sea level?
4. One line of the valuation would change the plaque if it were on it. Which?

5F • Two texts

The plaque says the hall **became a hall in 1931**. The valuation describes it as **"a corn store, converted, in community use"**.

Put those two facts together. Which document is a sales document? Two sentences.

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Adding, and adding carefully

Adding, contrasting, correcting
Four ways of putting a second thing next to a first.

1 also / besides / moreover 	2 however / although 	3 actually 	4 by the way / which is why 
ALSO / MOREOVER - and here is more	HOWEVER - and here is the other side	ACTUALLY - and that was not quite right	BY THE WAY - and this is not the point

the fact the aside

{width=6.

6in}

Adding, contrasting, correcting — Four ways of putting a second thing next to a first.

6A • Sort — adds, contrasts, or changes the subject?

Three columns.

which is why · moreover · actually · although · besides · also · however · by the way

One of them can do two of the three jobs. Which?

6B • Chunk completion

1. Eleven buildings, most _____ **which** are below the line.
2. Forty-one people, all _____ **whom** were asked.
3. **By the** _____ , the ruin has no plaque at all.
4. The tide comes in fastest there, **which is** _____ nobody swims in that bay.
5. I **came** _____ the parish records in a drawer in the vestry.
6. **And that's the part nobody** _____ .

6C • Three that are not interchangeable

however · although · actually

however joins two sentences. *although* joins two clauses. *actually* corrects something.

Put one in each, and say what the other two would do to the sentence.

1. The plaque is accurate. _____ , it stops in 1931.
2. _____ the plaque is accurate, it stops in 1931.
3. It stops in 1931 — _____ , in 1931 and not in 1884.

One brother, or three

The same sentence, said twice, and the only difference is a pause.

My brother, who lives in Galway, is coming.

one brother. The clause is extra

My brother who lives in Galway is coming.

at least two. The clause chooses one

How many brothers, in each?

6 differences — find them all

{width=6.

6in}

One brother, or three — The same sentence, said twice, and the only difference is a pause.

Six differences. Find them, then answer the question under the picture.

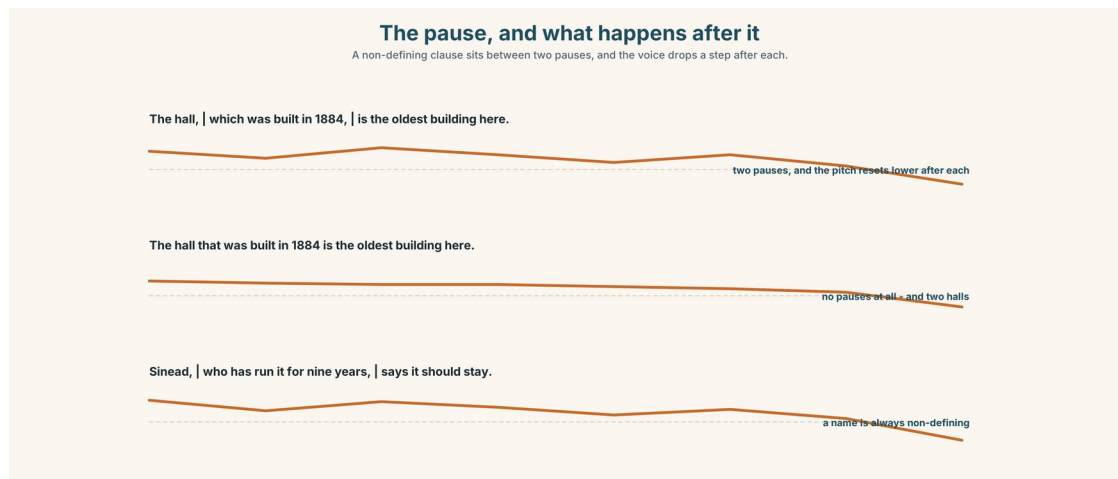

6D • Contrast Clinic — commas or no commas

Six items. **Add commas where the clause is non-defining, and say what changes.**

1. The hall which was built in 1884 is the oldest.
 2. The pier which was rebuilt in 1931 is closed again.
 3. The woman who runs the hall is called Sinéad.
 4. Sinéad who runs the hall has been here nine years.
 5. The building where the meeting was held has been sold.
 6. The only building that is above the line is the hall.
-

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

The pause, and what happens after it

6in}

{width=6.

The pause, and what happens after it — A non-defining clause sits between two pauses, and the voice drops a step after each.

7A • Hear 🎧 Track 8.3

The hall | which was built in 1884 | is the oldest building here. **Two pauses. And after each one the voice starts a little lower.**

Now hear the defining version, with **no pauses at all**:

The hall that was built in 1884 is the oldest building here.

7B • Say

Say both. Then say this one with the pauses and without:

Sinéad, who has run it for nine years, says it should stay.

7C • Make it mean something

Say these two:

My brother, who lives in Galway, is coming. (how many brothers?) My brother who lives in Galway is coming. (how many brothers?)

Say both to a partner and have them hold up fingers. Did they get it from the pause alone?

7D • Fluency 20 🟡

Twenty seconds: **three places, each with a clause between two pauses.** Three times, faster, keeping the pauses.

Part 8 • Writing ♦ C • THE PERFORMANCE

A place, with what the sign leaves out • 100 words

6in}

Height above sea level, lower town — Every public building in the lower town, measured at the threshold.

8A • Read the model

The hall, which was built as a corn store in 1884, stands eleven metres back from the sea and four metres above it. [the added clause, and then the two numbers that turn out to be the point]

It became a hall in 1931, when the pier was rebuilt and the town briefly had money. The plaque gives both dates and the merchant's name, which was Dolan. [a second clause, and one fact that the plaque does have]

It is also the only building in the lower town that the water did not reach, which is why two hundred people were in it in January, and which is not on the plaque. [the defining clause is deliberate here – there is only one such building, and the sentence is about which one]

Questions about the writer's choices:

1. The first paragraph gives two measurements before any history. **Why that order?**
2. The last sentence uses *that*, not *which*, and no comma. **Is that a mistake?**

8B • The anti-model

The hall is a lovely old building with a great deal of history. It has been at the centre of the community for many years and holds a special place in the hearts of local people. It is well worth a visit.

Correct English, and there is no building in it. **Name three things it does not contain.**

8C • Plan

the place, with one added clause → a date and what it was → one number → one thing no sign says

8D • Write — 100 words

8E • Peer review — two criteria

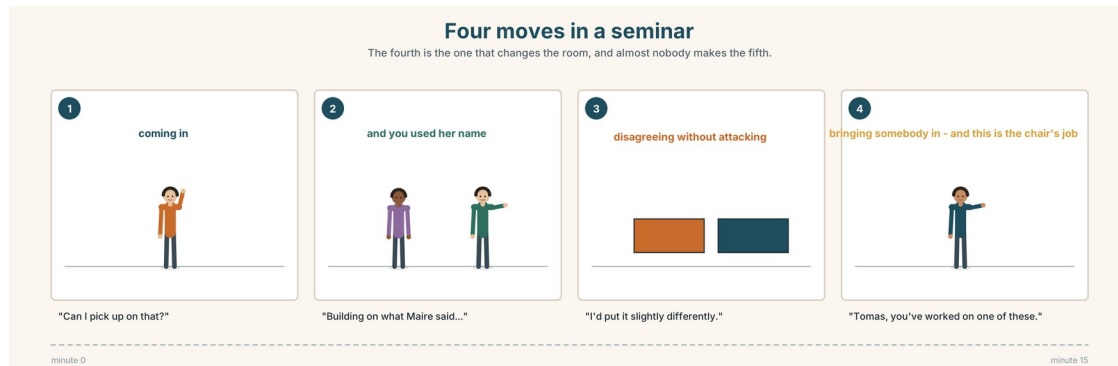

☐ Are the non-defining clauses punctuated on both sides? ☐ Is there one fact a visitor could not get from a sign?

8F • Write it again • 8G • Publish

On the wall, with plaque 4 from Part 5E beside it.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

STUDY FILE • The Seminar

{width=6.

6in}

Four moves in a seminar — The fourth is the one that changes the room, and almost nobody makes the fifth.

9A • Eight people and one question 📞 Track 8.4

A seminar at the county heritage office: *should a building in use be listed?* **Listen to the first six minutes.**

1. Who speaks first, and does that help them?
2. **What does the chair do when two people start at once?**
3. Which contribution actually changes somebody's mind, and why?

9B • Four moves in a seminar

coming in · building on somebody · disagreeing without attacking · bringing somebody in

Match each to one phrase.

"Can I pick up on that?" · "Building on what Máire said..." · "I'd put it slightly differently." · "Tomás, you've worked on one of these."

9C • The move that is almost never made

In most seminars nobody ever says: **"I've changed my mind."**

Write the sentence that would come before it, and the sentence that would come after.

9D • Your turn

Groups of six. **Fifteen minutes, one question,** from this unit or your own. **Rule: you must refer to somebody else by name before you make your own point.** At the end, each person says one thing they heard that they had not thought of.

9E • Transfer

In your next class or meeting, use one of the four moves. Write down which, and what happened.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

One building, four dates and a figure — Half the class sees the trail. Half sees the valuation. Rebuild the case by speaking.

10A • Relay

Half the class sees the heritage trail. Half sees the valuation. **Rebuild the whole case for and against selling the hall, by speaking.** Ten minutes.

10B • Simplify

Explain the valuation from Part 5E to somebody who has only read the plaque. **Four sentences only.**

Plan: what the building is → what it is worth → on what basis → what that basis assumes

10C • Compress

The review in Part 5 into **thirty-five words**, as a line for the trail's leaflet.

10D • Online

Write **one message** to the heritage office: the trail is good, plaque 4 stops in 1931, and here is the one sentence you want added.

10E • Your language

How does your language add information to a noun? **Is there a comma, a pause, or a different word order?** Say *the hall, which was built in 1884*, in both languages.

Part 11 • The Decision ♦ C • THE PERFORMANCE

The hall, or the wall

The hall is the only building in the lower town above the 1.9 metre line. It is valued at 410,000. The sea wall needs 340,000 that nobody has.

- **Keep it.** It is where two hundred people went in January and the only place they could have gone.
- **Sell it.** The wall gets built, and the hall committee gets a room in the new school, which is further away and below the line.
- **Sell half.** Split the building: the upper floor stays community, the ground floor is sold as two units. It raises about 180,000 and complicates everything.

11A • The evidence

1. **Plaque 4 and the valuation** from Part 5E — and the line that would change the plaque.
2. **The chart** — height above sea level of every building in the lower town.
3. **The voice.** Sinéad, twenty seconds: *"I opened it at ten on the Sunday because I had the key and it was dry. Nobody asked me to and nobody has thanked me, which is right, because anybody with the key would have done it. What I want to know is who will have the key."*

11B • Talk about it

In threes. Everybody says one. Use the frame.

I think they should _____, because _____.

Words you can use: *landmark · heritage · restored · destroyed · visitor · view · community · worth seeing*

11C • Decide

Write **two sentences**. Choose, and say why.

I think they should _____, because _____.

11D • Model decision

They should keep it and find the 340,000 somewhere else, and they should say in public why: that the hall is not being kept because it is old but because it is four metres up. The heritage argument is the weaker one and it is the one everybody is making, and if the hall is ever sold it will be sold by somebody who has only heard the heritage argument and has correctly decided that it is sentimental.

11E • The Reveal

What happened. They kept it. The decision went 9–2 and took forty minutes, which Sinéad says is the fastest the committee has ever done anything.

The argument that was made in the room was about 1884, the corn store and the Dolan family. Nobody mentioned the four metres until the vote was over, when Tomás said it on the way out and four people stopped walking.

Plaque 4 now has a second brass panel underneath it, added in September. It is nineteen words long and it is about the height.

They made the right decision for the wrong reason, and then somebody fixed the reason.

Was it the right decision? Say why — and say what the nineteen words should be.

Part 12 • Landing ♦ all three lines

12A • Recycle — ten items

1. The hall, _____ was built in 1884, is the oldest.
2. Sinéad, _____ runs it, says it should stay.
3. Eleven buildings, most _____ are below the line.
4. The pier **dates** _____ 1886.
5. The headland is **named** _____ a family that left.
6. (Unit 7) This time next year I _____ (live) in Galway.
7. (Unit 6) The rope _____ (must / break) in the night.
8. (Unit 4) She _____ me that she had checked it. (said / told)
9. (Unit 3) By the time we arrived, it _____ (already / start).
10. (A2.1 U4) The person _____ has the key is the caretaker.

12B • Consolidate

One hundred words. One place. Three non-defining clauses, one date, one number, and one thing no sign says.

12C • Can-do, with evidence

12D • Replay 🟡

Find your thirty seconds from Part 0C. Listen. **Record it again.** One sentence: what is different?

12E • Glossary — forty items, as a map

THE COAST · harbour · pier · headland · cliff · bay · lighthouse · view · look out over **THE BUILDINGS** · hall · church · ruin · landmark · plaque · heritage **WHAT HAPPENED TO IT** · founded · destroyed · restored · dates from · named after **FOR A VISITOR** · visitor · worth seeing · off the main road · come across · you'd never know **ADDING** · which · who · where · whose · when · most of which · all of whom · also · besides · moreover **CHANGING TACK** · however · although · actually · by the way · which is why · and that's the part nobody mentions

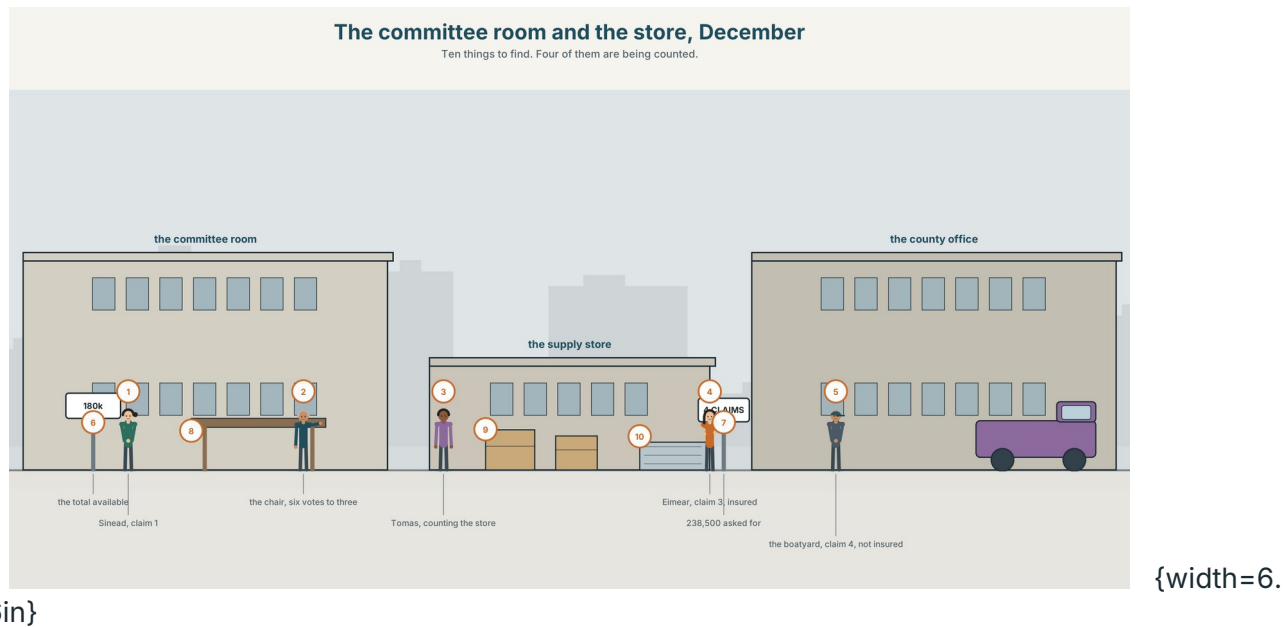

12F • Next

Unit 9 • How much is left?

A2.2 • Unit 9 • Four Claims, Enough for Three

English Animated • *Telling the Story* • Ballinmore, west coast of Ireland Student's Book pages 182–203 • 22 pp • ~10 hours

Part 0 • The Big Picture ♦ A • THE WORLD

The committee room and the store, December — Ten things to find. Four of them are being counted.

How much is left?

By the end of this unit you can report how a limited resource was shared out, precisely. One hundred words.

◆ A • THE WORLD

A room with four honest claims in it and money for three

◆ B • THE SYSTEM

all · most · both · neither · either · none · of structures · 23 words for resources and fairness · 17 words for quantity · stress used for contrast

◆ C • THE PERFORMANCE

An exact account of who got what, and what was left

0A • Find it

Find ten things in this picture. Four of them are being counted.

a cheque · a list on a wall · a cash box · a stack of forms · a calculator · a half-empty store room · a queue · a committee table · a locked cupboard · a sign-up sheet

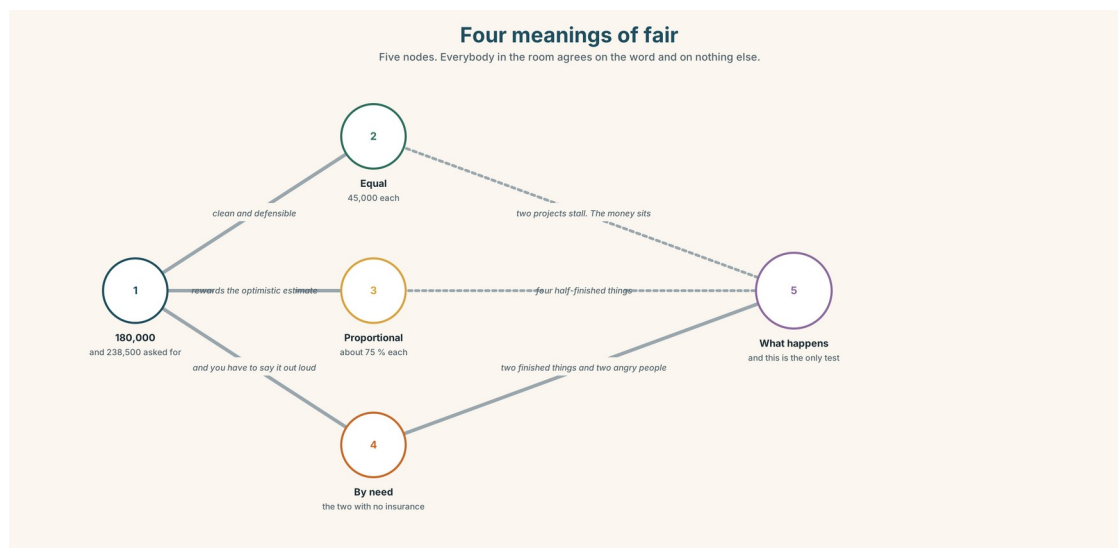

0B • Guess it

Two people in this picture will not ask for anything. Which two, and why not?

0C • Say it

Record thirty seconds. Think of something limited that you have had to share out. How did you decide? You will record it again at the end of this unit.

Part 1 • Vocabulary Lab 1 ◆ B • THE SYSTEM

{width=6.

6in}

Four meanings of fair — Five nodes. Everybody in the room agrees on the word and on nothing else.

1A • Meet — the words of a limited fund

Match each word to one place on the map.

fund · relief · grant · request · allocate · share · priority · shortage · supply · total

1B • Sort — the money, the process, or the judgement?

Three columns.

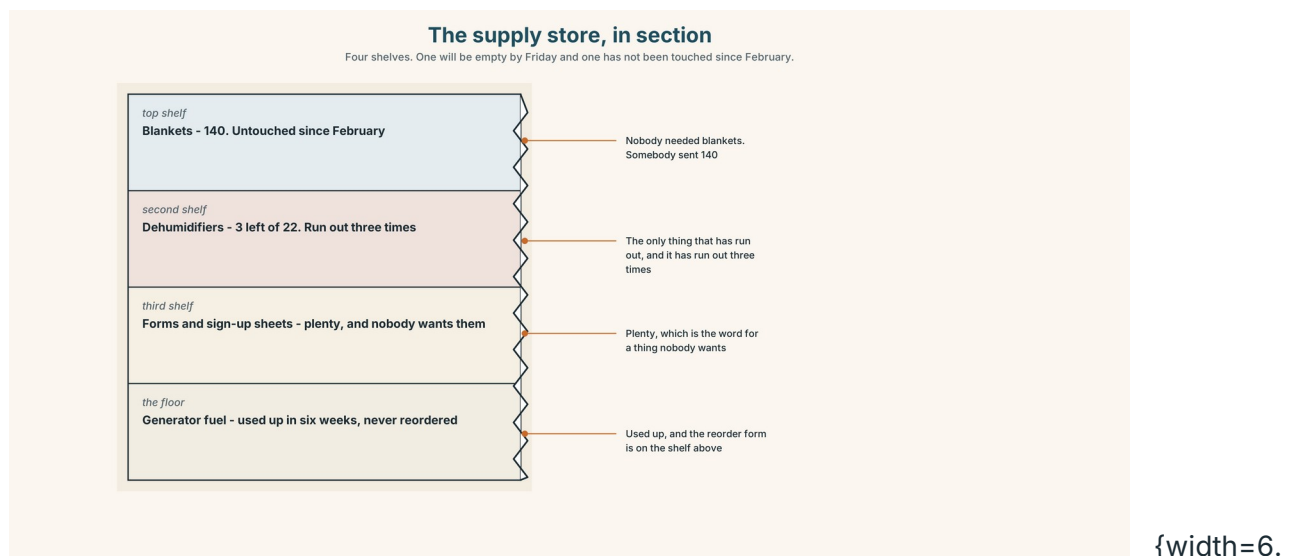

allocate · equal · priority · grant · fair · request · fund · limited · relief

One of them only becomes a judgement when there is not enough. Which?

1C • Meet — three words for what is left

remaining · spare · enough

Spare implies nobody needs it. **Remaining** implies somebody might. **Which word would a committee use, and which would a claimant?**

6in}

The supply store, in section — Four shelves. One will be empty by Friday and one has not been touched since February.

Look at the store room, in section. Four shelves, four supplies. **Which shelf will run out first, and which has been untouched since February?**

1D • Stretch — the phrases

Complete each one with one word.

1. They have **run** _____ **of** dehumidifiers for the third time.
2. There are forty and sixty people, so it will not **go** _____ .
3. Eight thousand has been **set** _____ for emergencies and nobody has touched it.
4. Everybody keeps saying they want **a fair** _____ and meaning a different thing by it.

5. The fuel for the generators was **used** _____ in six weeks.

1E • The saying

f There isn't enough to go round.

Seven words that end most conversations about money.

They are almost always true. Write the sentence that should come after them — the one that actually decides something.

1F • Own it

Think of something limited where you live — parking, time, water, money. Tell a partner **three sentences**: what is short, who decides, and whether you think it is fair.

Part 2 • Listening ♦ A • THE WORLD

One hundred and eighty thousand
One of them has to say no out loud. The other has one of the four claims.

All of them are honest.
Neither of the last two has any insurance at all.

the chair
six to three

None of it can be carried over.

Eimear
claim 3

{width=6.

6in}

One hundred and eighty thousand — One of them has to say no out loud. The other has one of the four claims.

2A • One hundred and eighty thousand 🎧 Track 9.1

Before you listen. There is €180,000 of relief money and four claims. **Guess: are any of the claims dishonest?**

Listen once. One question. How much is each claim for?

Listen again. Complete the table.

Claim	Amount	For what	Why it is strong
1			
2			
3			
4			

Listen again. Choose.

1. The four claims total **180,000 / 214,000 / 246,000**.
2. **All / Most / None** of the claimants have insurance.
3. **Both / Neither / Either** of the last two claims is for a business.
4. The committee can award **all four partly / three fully / one fully**.

Noticing. Four sentences from the recording.

1. *All of them are honest.*
2. *Most of them have been waiting since March.*
3. *Neither of the last two has any insurance at all.*
4. *None of it can be carried over to next year.*

Three of these are about people. One is about money. Which, and how can you tell from the verb?

2B • Decoding clinic Track 9.2

Twenty-five seconds. Four jobs.

1. How many times does the speaker say *of*?
2. In *all of them*, is *of* loud or quiet?
3. Catch the total and the shortfall.
4. One word is said with heavy stress to contrast it with another. Which?

Transcripts, page 158.

Part 3 • Grammar Lab 1 B • THE SYSTEM

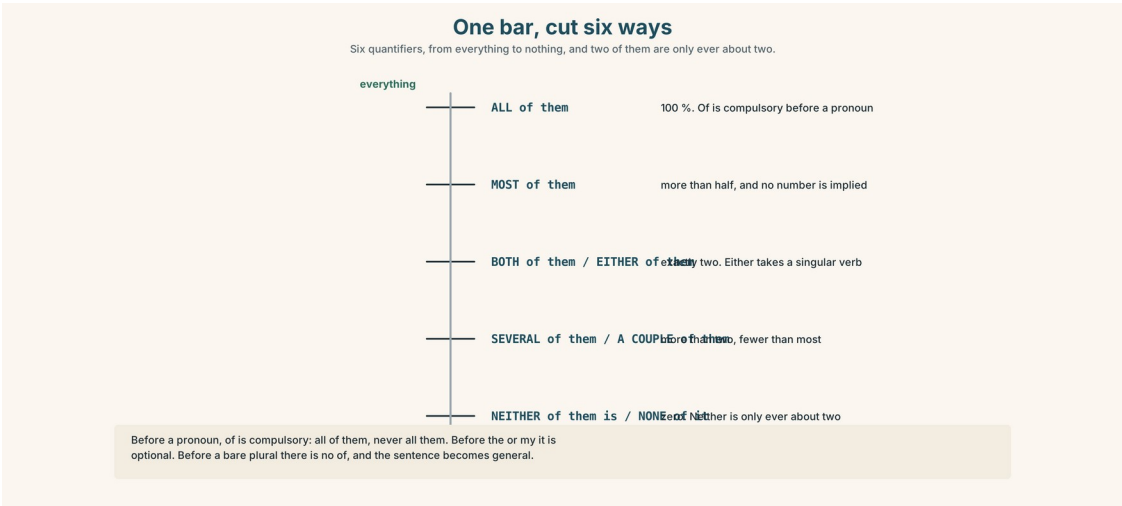

Saying how many, exactly

3A • Notice

Look at the four sentences in Part 2.

1. In sentence 1, could you say *All them are honest*? **Why not?**
2. In sentence 3, *neither* is followed by a singular verb. **Why?**
3. In sentence 4, *none of it* — not *none of them*. **What does that tell you about the money?**
4. **What is the difference between *all the claims* and *all of the claims*?**
5. Try "*Both of the four claims are for businesses.*" **What is wrong?**

3B • See

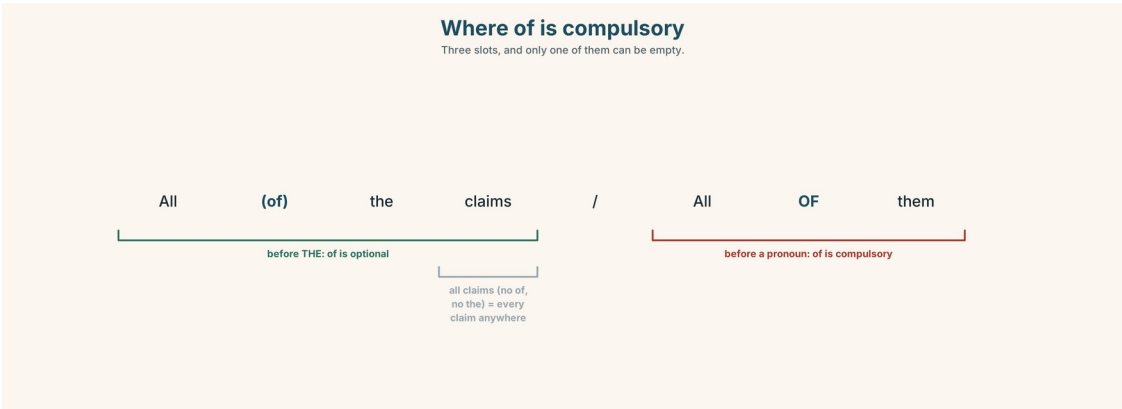

{width=6.

6in}

One bar, cut six ways — Six quantifiers, from everything to nothing, and two of them are only ever about two.

Now look at the second picture. **One bar, cut six ways. Which cut is *most*, and which is *several*?**

{width=6.

6in}

Where of is compulsory — Three slots, and only one of them can be empty.

3C • Know

	How many	Shape
all	100 %	all the claims · all of them
most	more than half	most of them
half / several / a couple of	in between	half of it · several of them
both	exactly 2	both of them — only two
either	one of 2	either of them, singular verb
neither	0 of 2	neither of them is —

	How many	Shape
		singular verb
none	0 of any number	<i>none of it / none of them</i>

The of rule. Before a pronoun, *of* is compulsory: *all of them*, never *all them*. Before *the* or *my*, *of* is optional: *all (of) the claims*. Before a bare plural, there is no *of*: *all claims are honest* — and that is a general statement about every claim in the world.

Countable or not. *none of them* (the claims) · *none of it* (the money). *few* and *several* go with countables. *little* and *much* go with uncountables.

Watch out. *both*, *either* and *neither* are only ever about **two**. × *both of the four claims* ✓ *all four claims*

3D • Use — controlled

(1) _____ of the four claims is dishonest. (2) _____ of them have been waiting since March, and (3) _____ of the last two has any insurance. (4) _____ of the money can be carried over to next year, so the committee must spend (5) _____ of it by December. They can fund three fully and (6) _____ of the remaining claim, or (7) _____ four partly.

3E • Use — guided

Choose the right word, and say why the others fail.

- _____ of the four claimants is lying. (*zero out of four*)
- _____ of the last two has insurance. (*zero out of two*)
- _____ of them have been waiting since March. (*more than half*)
- _____ of the money is left. (*a bit, but not much*)
- _____ of the two is acceptable to the committee. (*one or the other*)

3F • Use — open

Count something in this room. Tell a partner five facts about it using *all*, *most*, *both*, *none* and *several*. **One of them must be about something uncountable.**

3G • Check — six items

- _____ of them are honest. (*every one*)
- _____ of the last two has insurance. (*zero of two*)
- _____ of it can be carried over. (*zero, uncountable*)
- _____ of them have waited since March. (*more than half*)
- _____ of the two is acceptable. (*one or the other*)
- We spoke to all _____ the claimants.

0–3 → Workbook pp. 52–54. **4–5** → Part 6. **6** → page 195.

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency starter — the exact fraction

Your teacher makes a statement: **"Everybody here has a phone."** Each learner must make it more exact: *most of us · about half of us · several of us · none of us*. **Nobody may repeat a quantifier.**

Five rounds, five statements.

4B • The functional core — reporting an allocation

Equal shares, and shares by need

Learner A has the equal split. Learner B has the need split. Same total.

EQUAL - 45,000 each

four started, none finished

BY NEED - two funded

two finished, two angry

Which split finishes something?

6 differences — find them all

{width=6.

6in}

Equal shares, and shares by need — Learner A has the equal split. Learner B has the need split. Same total.

Language Bank

the total	There was a total of... · Of that, ...
who got what	Three of the four received... · Neither of the last two...
what is left	None of it can be carried over. · The remaining 14,000...
the honest line	It was not enough and we knew that in March.

Role play. Learner A chairs the committee. Learner B has the fourth claim. **Six minutes.** Learner A must say the word *no* once, out loud, early.

4C • The performance — one hundred seconds 🟡

Report **how something limited was shared out**. **One hundred seconds.** You must give:

the total · who asked for what · who got what · what was left, and what happened to it

Record it.

4D • Observer

One person listens for **one thing**: did every quantity have a number or a fraction behind it?

4E • Two criteria

☐ Did I use *of* correctly every time? ☐ Could a listener reconstruct the arithmetic?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

An opinion column. The title is "**Everybody wants a fair share and nobody means the same thing.**" **What three meanings of *fair* can you think of before you read?**

5B • Read — one hundred and ten seconds

Everybody wants a fair share and nobody means the same thing

There is €180,000. There are four claims, totalling €246,000. All four are honest. That is the whole situation and it has no solution, only decisions.

When people in that room say *fair*, they mean one of four things, and the argument is not about the money. It is about which of the four they are using, and almost nobody says which.

Equal. Forty-five thousand each. Clean, defensible, and it leaves two of them with less than half of what they need, which means neither of those two can start work at all. Equal shares of an insufficient sum can be the least useful way of spending it.

Proportional. Each gets 73 per cent of what they asked for. Slightly worse than equal for the small claims and slightly better for the large ones, and it rewards whoever estimated most optimistically in March.

By need. The two with no insurance get everything. This is the one most people privately believe in and the one nobody proposes out loud, because it requires saying that the other two matter less.

First come. It has already partly happened. Two of the four submitted in March and have been quietly assumed into the budget ever since.

Pick one and defend it. Picking none of them and splitting the difference is also a choice, and it is the only one that nobody will later be able to explain.

5C • Answer

1. How much is there, how much was asked for, and how many claims?
2. **What is the writer's objection to equal shares?**
3. What does the proportional method reward?
4. Why does the writer say nobody proposes "by need" out loud?
5. **What has already partly happened, and how?**
6. What does the writer say about splitting the difference?

5D • Vocabulary in context

Guess from the text. Then check.

defensible • an insufficient sum • optimistically • privately believe in • splitting the difference

5E • The counter-text

The allocation sheet

Four claims, one of them quietly reduced in April, and a contingency nobody has touched.

BALLINMORE RELIEF FUND - ALLOCATION SHEET, DECEMBER		
Available	180,000	
Claims received	4	
THE CLAIMS		
CLAIM	ASKED	INSURED?
1 Hall - floor and wiring	52,000	yes, partly
2 Terrace - 4 households	61,500	yes
3 Guest house	58,000	no
4 Boatyard - slip and shed	67,000	no
Total asked	238,500	
Shortfall	58,500	
Claim 2 was submitted in March at 69,000 and reduced by the claimant in April. The reduction is not minuted.		
THE RULES		
Contingency held	8,000	
Contingency spent	0	
Carry over to next year	not permitted	
Any sum unspent at 31 December returns to the county.		
PENCILLED IN THE MARGIN BESIDE CLAIM 2: "Reduced. Says he found a cheaper contractor. Nobody asked him to."		

One hundred and eighty, and that is the whole room

Two insured, two not. This column is the argument

Fifty-eight and a half thousand short, whatever you do

Reduced by seven and a half thousand, and not minuted

Eight thousand held back, and never used

Nobody asked him to - and nobody thanked him either

{width=6.6in}

The allocation sheet — Four claims, one of them quietly reduced in April, and a contingency nobody has touched.

Read the allocation sheet and answer.

1. What are the four claims for, and how much is each?
2. **Which claim has been reduced by the committee before the meeting, and by how much?**
3. What is the contingency, and what is the rule on carrying money over?
4. One column is headed "insurance". What does it show?

5F • Two texts

The column says the four claims total **€246,000**. The allocation sheet totals **€238,500**.

Put those two facts together. What has happened, and who knows? Two sentences.

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Counting what cannot be counted

Countable, uncountable, and what goes with each
Four pairs. The quantifier changes and the noun stays where it is.

1 few claims / several forms  FEW / SEVERAL - things you can count countable	2 little money / much relief  LITTLE / MUCH - things you cannot uncountable	3 plural, and you could count them  NONE OF THEM - the claims	4 singular, and you cannot  NONE OF IT - the money
---	---	---	--

6in}

{width=6.

Countable, uncountable, and what goes with each — Four pairs. The quantifier changes and the noun stays where it is.

6A • Sort — countable or uncountable?

Two columns, and write the right quantifier beside each.

requests • claims • supply • fuel • funding • dehumidifiers • money • relief • forms • people

6B • Chunk completion

1. **Most** _____ **them** have been waiting since March.
2. **None** _____ **it** can be carried over.
3. **A couple** _____ claims came in late.
4. **The rest** _____ the money goes to the contingency.
5. The committee **split** _____ into two groups to decide.
6. **Some of us,** _____ **all,** think it should go by need.

6C • Three that are only ever about two

both • either • neither

Correct these four sentences. One of them is already correct.

1. Both of the four claims are from businesses.
2. Neither of the three has insurance.
3. Either of the two options is acceptable.
4. Neither of them have replied.

NEITHER, and NONE

Both mean zero. One of them insists there were exactly two.

NEITHER of them is...

exactly two, and a singular verb

✗

NONE of them are...

any number at all

Which one can you use about four claims?

6 differences — find them all

{width=6.

6in}

NEITHER, and NONE — Both mean zero. One of them insists there were exactly two.

Six differences. Find them, then answer the question under the picture.

6D • Contrast Clinic — which quantifier

Six items.

1.

_____ of the two will do. *(one or the other)*
2.

We funded _____ four, partly.
3.

_____ of them have been waiting. *(more than half)*
4.

_____ of the last two has insurance. *(zero of two)*
5.

_____ of the money is left. *(zero)*
6.

_____ of the claimants is lying. *(zero of four)*

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

Stress as an argument

Stress as an argument

The words do not change. The stressed one tells you what has just been denied.

not of somebody else

{width=6.

6in}

Stress as an argument — The words do not change. The stressed one tells you what has just been denied.

7A • Hear 🎧 Track 9.3

ALL of them are honest. — and you had suggested some were not All of THEM are honest. — and somebody else is not All of them ARE honest. — and you had just denied it

7B • Say

Say all three. Then do the same with:

Neither of the last two has insurance.

7C • Make it mean something

Say these two:

We funded THREE of them. (not four) We funded three of THEM. (not of somebody else)

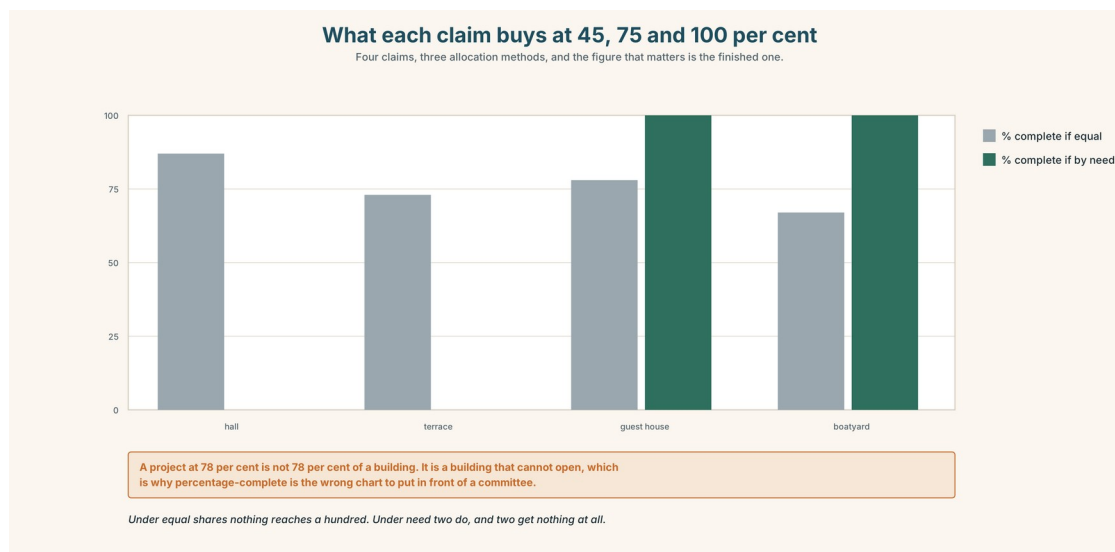

Which one is answering an accusation?

7D • Fluency 20 🟡

Twenty seconds: **three facts about this room, each with a different quantifier and a contrastive stress.** Three times, faster.

Part 8 • Writing ♦ C • THE PERFORMANCE

Who got what • 100 words

{width=6.

6in}

What each claim buys at 45, 75 and 100 per cent — Four claims, three allocation methods, and the figure that matters is the finished one.

8A • Read the model

There was €180,000. Four claims were received, totalling €238,500 after one was reduced by the claimant in April. [the total first, and the reduction is named so the arithmetic works]

Three were funded in full. Neither of the remaining two — the guest house and the boatyard — had any insurance, and the committee funded 61 per cent of the boatyard's claim and none of the guest house's. [exactly who got what, and one fact that explains why it was hard]

€4,100 is unspent. It cannot be carried over and will return to the county in December. [what is left, and where it goes, which almost every report leaves out]

Questions about the writer's choices:

1. The second paragraph says *none of the guest house's* rather than *the guest house got nothing*. **Is that cowardly?**
2. The last paragraph is about €4,100 out of €180,000. **Why is it here at all?**

8B • The anti-model

The committee considered all the claims very carefully and allocated the available funds as fairly as possible. Unfortunately there was not enough for everyone. We would like to thank everyone for their patience during a difficult process.

Correct English, and no arithmetic. **Name three numbers it should contain.**

8C • Plan

the total → what was asked for → who got what, exactly → what is left and where it goes

8D • Write — 100 words

8E • Peer review — two criteria

☐ Does the arithmetic work? ☐ Is the leftover accounted for?

8F • Write it again • 8G • Publish

On the wall, with the allocation sheet from Part 5E beside it.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

CULTURE FILE • Silence, Interruption and Turn-taking

Silence, overlap and turn-taking
The same meeting, two sets of rules, and both of them work for the people used to them.

1 agreement, where this is normal  OVERLAP - and it is not an argument one norm	2 go ahead - or: something is wrong  A TWO-SECOND SILENCE	3 protecting somebody else's turn  "I think Sínead was still speaking."	4 giving a turn back  "Go on, go on." another
--	---	---	--

{width=6.

6in}

Silence, overlap and turn-taking — The same meeting, two sets of rules, and both of them work for the people used to them.

9A • The same meeting, two norms 🎧 Track 9.4

Two recordings of committees deciding the same thing. **Listen to both.**

1. In which one do people overlap, and does it sound like an argument?
2. **How long is the longest silence in each?**
3. In which one does the quietest person speak, and what made it possible?

9B • What a silence means

In some places a pause means *go ahead*. In others it means *I am thinking, wait*. In others it means *something has gone wrong*.

Which does a two-second pause mean where you are from? Compare with three other people.

9C • Interrupting without taking over

"Sorry — can I just check one thing?" · "Go on, go on." · "Can I come back to that in a minute?" · "I think Sínead was still speaking."

Match each to its job.

taking a turn · giving a turn back · parking something · protecting somebody else's turn

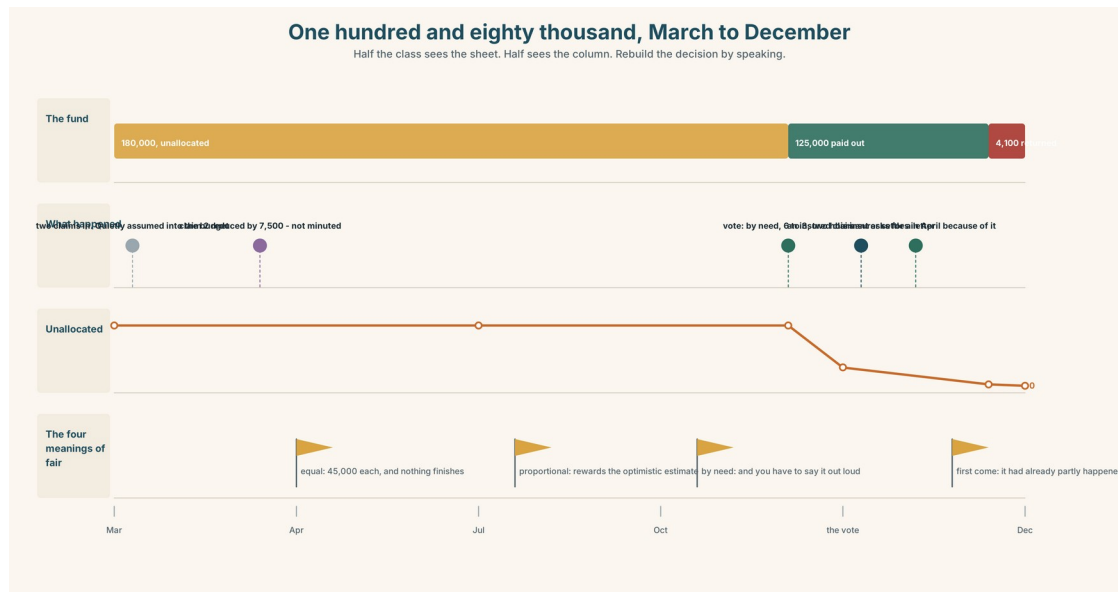

9D • Your turn

Groups of five. **Ten minutes, one decision.** One person is the timekeeper and says nothing except the total speaking time of each person at the end. **Then do it again with the quietest person as chair.**

9E • Transfer

In your next meeting, count the silences over two seconds. Bring the number and say what each one was doing.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

One hundred and eighty thousand, March to December — Half the class sees the sheet. Half sees the column. Rebuild the decision by speaking.

10A • Relay

Half the class sees the allocation sheet. Half sees the column. **Rebuild the decision by speaking.** Ten minutes.

10B • Simplify

Explain the allocation sheet from Part 5E to a claimant who has had nothing. **Four sentences only.**

Plan: what there was → what was asked → what you got and why → what you can do next

10C • Compress

The column in Part 5 into **thirty-five words**, keeping all four meanings of *fair*.

10D • Online

Write **one message** to the committee: you are the fourth claim, you accept the decision, and you are asking for one thing in writing.

10E • Your language

How does your language say *none of them*? **Is the verb singular or plural?** Say *neither of the last two has insurance* in both languages.

Part 11 • The Decision ♦ C • THE PERFORMANCE

One hundred and eighty thousand

Four claims. €238,500 asked for. €180,000 available. All four honest.

- **Equal.** €45,000 each. Two of the four cannot start work with that, so two of the four projects do not happen and the money sits.
- **By need.** The two with no insurance get everything they asked for; the two who are insured get nothing and wait for their insurers.
- **Proportional.** Everybody gets about 75 per cent. Everybody can start; nobody can finish.

11A • The evidence

1. **The allocation sheet** from Part 5E — and the claim that was quietly reduced.
2. **The chart** — what each claim buys at 45, at 75 and at 100 per cent.
3. **The voice.** One of the insured claimants, twenty seconds: *"I'd take nothing. I want that on the record because I will be saying it in the room and I do not want anybody saying afterwards that I was pushed. But I'd want it written down that I took nothing, because my insurer is going to ask me in March whether I was compensated."*

11B • Talk about it

In threes. Everybody says one. Use the frame.

I think the money should go _____, because _____.

Words you can use: *fair · equal · priority · need · shortage · limited · a fair share · go round*

11C • Decide

Write **two sentences**. Choose, and say why.

I think the money should _____, because _____.

11D • Model decision

By need, and the committee should say the word *need* out loud and vote on it by name. Equal shares of an insufficient sum produce four stalled projects, and proportional shares produce four half-finished ones; need produces two finished things and two angry people, and angry people with insurance have somewhere else to go. The important part is not the choice. It is that whoever is refused is refused in a sentence that can be repeated.

11E • The Reveal

What happened. They went by need. The vote was 6–3 and took two hours, most of which was spent on whether *need* could be defined without insulting anybody.

The insured claimant who offered to take nothing did take nothing, and asked for the letter. His insurer settled in April, and the letter is the reason: it proved he had not been compensated twice.

€4,100 was left over because one of the two funded claims came in under estimate. It was not carried over. It went back to the county in December and the committee has been asked about it at every meeting since.

Two things were finished. One man got his insurance because he had asked for a letter. And four thousand pounds went back.

Was it the right decision? Say why — and say what should have been done with the €4,100.

Part 12 • Landing ♦ all three lines

12A • Recycle — ten items

1. _____ of them are honest. (*every one*)
2. _____ of it can be carried over. (*zero, uncountable*)
3. _____ of the last two has insurance. (*zero of two*)
4. They have **run** _____ **of** dehumidifiers.
5. It will not **go** _____ .
6. (*Unit 8*) The hall, _____ was built in 1884, is the oldest.
7. (*Unit 7*) This time next year I _____ (live) in Galway.
8. (*Unit 6*) The rope _____ (must / break) in the night.
9. (*Unit 4*) She _____ me that she had checked it. (*said / told*)
10. (*A2.1 U9*) There are _____ many forms and nobody reads them.

12B • Consolidate

One hundred words. How something limited was shared out. The total, who got what, four different quantifiers, and what was left.

12C • Can-do, with evidence

I can...	My evidence	Sure?
say exactly how many, with <i>of</i>	Part 3G score	☐ ☒ ☒
report an allocation in a hundred seconds	Part 4C recording	☐ ☒ ☒
write a hundred words whose arithmetic works	Part 8 draft 2	☐ ☒ ☒
take a turn without taking over	Part 9D group work	☐ ☒ ☒

12D • Replay 🟡

Find your thirty seconds from Part 0C. Listen. **Record it again.** One sentence: what is different?

12E • Glossary — forty items, as a map

THE MONEY · fund · relief · money · grant · total · supply **THE PROCESS** · request · allocate · share · priority · set aside · split up **WHEN THERE IS NOT ENOUGH** · shortage · limited · run out of · go round · use up · there isn't enough to go round **WHAT IS LEFT** · remaining · spare · enough · the rest of **THE JUDGEMENT** · fair · equal · a fair share · some of us, not all **HOW MANY** · all · most · both · neither · either · none · several · few · plenty · half · each · most of them · none of it · a couple of

Unit 10 • Who do you become after?

A2.2 • Unit 10 • The Town That Came Back

English Animated • *Telling the Story* • Ballinmore, west coast of Ireland Student's Book pages 204–225 • 22 pp • ~10 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

Strand Road, the following September — Ten things to find. Three of them are new words for old things.

Who do you become after?

By the end of this unit you can write a reflective piece about how a place — or a person — changed. One hundred and ten words.

◆ A • THE WORLD

A town being offered a story about itself, and asked to agree to it

◆ B • THE SYSTEM

articles and determiners, reviewed · abstract nouns · 23 words for identity and change · 17 determiners · *the* as /ðə/ and /ði:/

◆ C • THE PERFORMANCE

A hundred and ten words about what a place has become

0A • Find it

Find ten things in this picture. Three of them are new words for old things.

a new town sign · a repainted shopfront · a visitor centre leaflet · a watermark left on purpose · a plaque · a bus of visitors · a For Sale sign taken down · a scaffold coming off · a camera · a hand-painted notice in a window

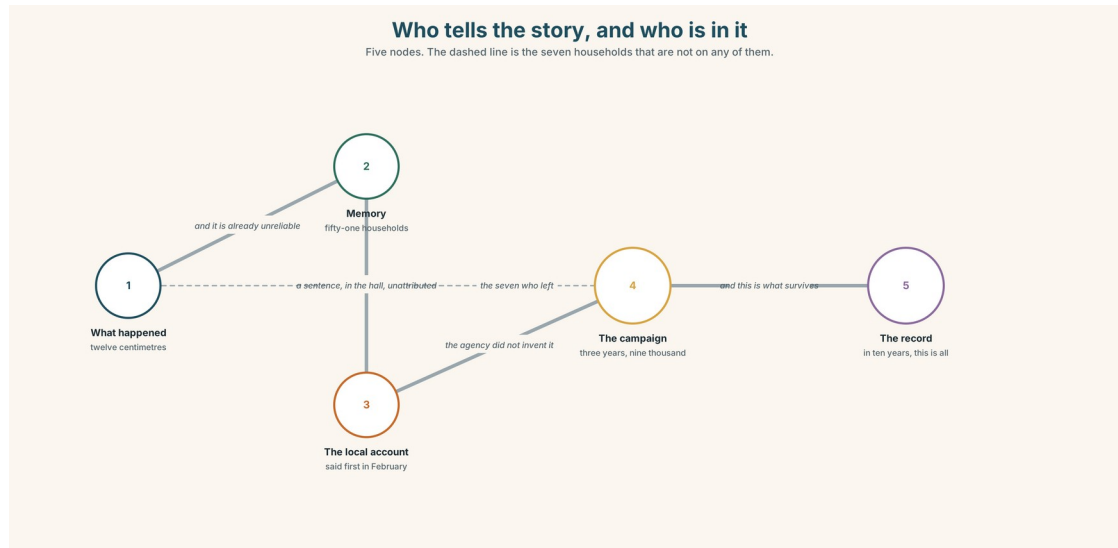

0B • Guess it

One thing in this picture has been kept deliberately. Which, and who decided?

0C • Say it

Record thirty seconds. *Think of a place you know that changed. Is the story people tell about it true?* You will record it again at the end of this unit.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

6in}

{width=6.

Who tells the story, and who is in it — Five nodes. The dashed line is the seven households that are not on any of them.

1A • Meet — the words of who you are now

Match each word to one place on the map.

identity • change • community • memory • story • reputation • local • outsider • newcomer • truth

1B • Sort — about a person, a place, or both?

Three columns.

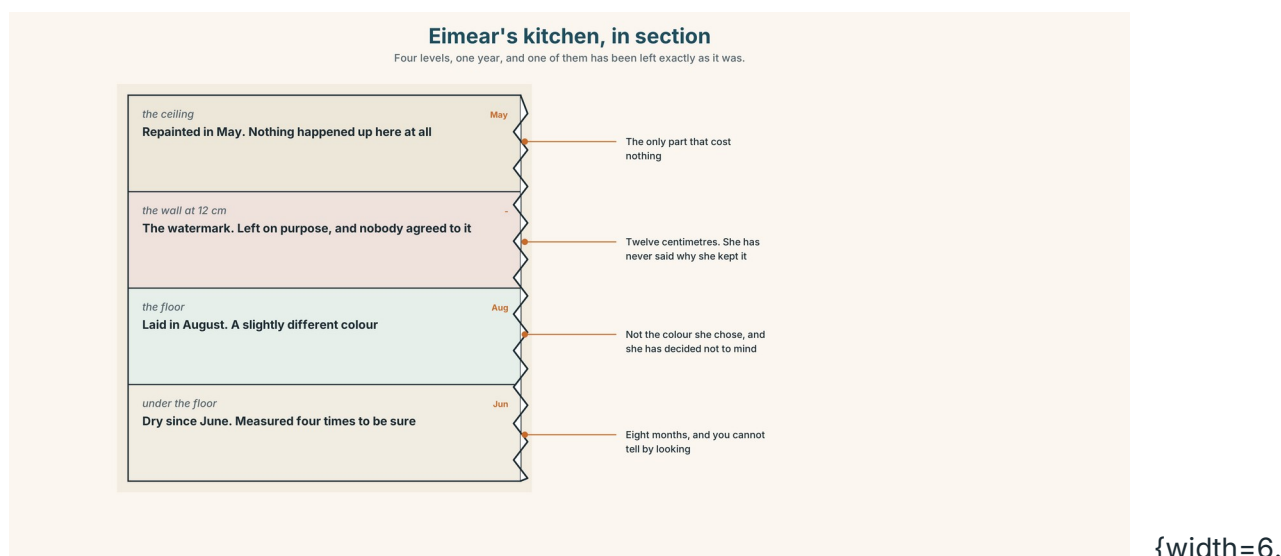

identity • newcomer • belong • local • reputation • outsider • memory • community

One of them is given to you by other people, always. Which?

1C • Meet — three words about the story

marketing • genuine • truth

Marketing is not the opposite of truth. What is the difference between a true story and a genuine one? **Give an example.**

6in}

Eimear's kitchen, in section — Four levels, one year, and one of them has been left exactly as it was.

Look at Eimear's kitchen, in section. Four levels, one year. **Which level has been deliberately left as it was, and why?**

1D • Stretch — the phrases

Complete each one with one word.

- Some of them want to **put it behind** _____ and some do not.
- You cannot **move** _____ until somebody has said what happened.
- The brochure calls it **the town** _____ **came back**.
- She said she would rather **tell the** _____ and have fewer visitors.
- It took eight months to **live** _____ the photograph of the kitchen.

1E • The saying

f That's not what happened.

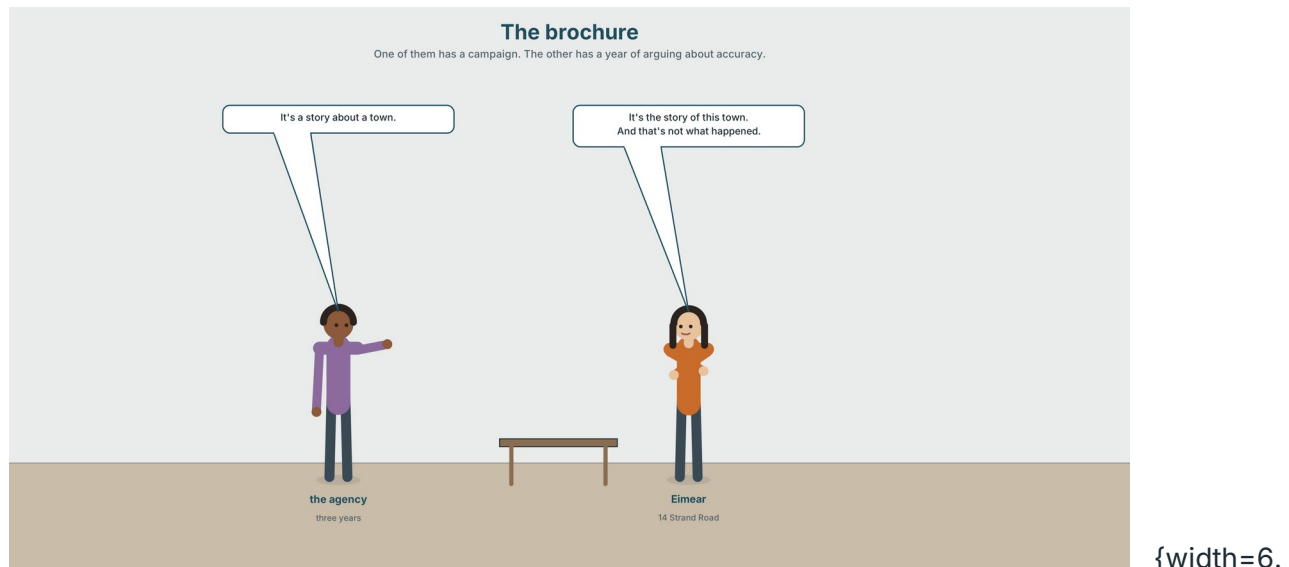

Four words that one person says in every town meeting, and that nobody wants to hear.

Write what comes next — once from somebody who is right, and once from somebody who is wrong but sincere.

1F • Own it

Think of a story people tell about where you are from. Tell a partner **three sentences**: what the story is, who tells it, and what it leaves out.

Part 2 • Listening ♦ A • THE WORLD

6in}

The brochure — One of them has a campaign. The other has a year of arguing about accuracy.

2A • The brochure 📞 Track 10.1

Before you listen. A tourism agency has offered to market the town as *the town that came back*.
Guess: who objects, and on what grounds?

Listen once. One question. What would the campaign be worth, in visitors?

Listen again. Complete the table.

	What they want	What they are afraid of
the agency		
Sinéad		
Eimear		

Listen again. Choose.

1. The campaign would run for **indefinitely / one season / three years**.
2. Eimear objects because the story is **embarrassing / false / incomplete**.
3. The agency offers to **change the words / add a page / drop the campaign**.
4. The decision will be made by **a public meeting / the agency / the committee**.

Noticing. Four sentences from the recording.

1. *It's a story about a town.*
2. *It's the story of this town.*
3. *A town came back.*
4. *The town came back.*

Two of these are about any town. Two are about this one. Which, and what single word does the work?

2B • Decoding clinic 🎧 Track 10.2

Twenty-five seconds of Eimear. Four jobs.

1. How many times does she say *the*?
2. Can you hear the difference between *the town* and *the other*?
3. Catch the number of visitors.
4. She says one word with heavy stress twice. Which?

Transcripts, page 159.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

The small words that decide what you mean

3A • Notice

Look at the four sentences in Part 2.

1. Sentences 3 and 4 differ by one word. **Which town is each about?**
2. In sentence 1, *a story* — why not *the story*?
3. **When do you use no article at all?** Try: *Water came in.* / *The water came in.*
4. *this town, that town, such a town.* **What does each one add?**
5. Try "*It's story about the town.*" **What is missing, and does it matter?**

3B • See

One word, two towns
The only difference between these two sentences is an article, and they are about different places.

A	town	came	back	/	THE	town	came	back
any town. A general claim					this one, and we both know which			
					one word, and the whole argument is here			

{width=6.

6in}

One word, two towns — *The only difference between these two sentences is an article, and they are about different places.*

Now look at the second picture. **It runs from no article to *the*. Where does a thing stop being any example and become *this one*?**

Five steps, from a thing in general to the one thing we are both looking at.

THIS town	pointing. And you can see where I am pointing
THE town	we both know which, and nobody has to say
A town	one of several. First mention
SUCH a town	one of that kind - and the kind has just been described
Towns change. Water is heavy.	article. General, plural or uncountable

 $\{\text{width}=6.$

From no article to the — Five steps, from a thing in general to the one thing we are both looking at.

	Use it when	Example
no article	general, plural or uncountable	<i>Water came in. · Towns change.</i>
a / an	one of several, first mention	<i>It's a story about a town.</i>
the	we both know which one	<i>The water came in. · The story of this town.</i>
this / that	pointing, near or far	<i>This town · that winter</i>
such	of that kind	<i>Such a story.</i>
own	emphasising possession	<i>her own kitchen</i>

First mention takes a; second mention takes the. *They have offered **a** campaign. **The** campaign would run for three years.*

3D • Use — controlled

3E • Use — guided

1. _____ water came in at about ten.

2. _____ water is heavier than people think.
3. She wrote _____ letter. _____ letter was two pages long.
4. _____ truth matters.
5. _____ truth about the drain took fourteen months.
6. It is _____ story about _____ town, not _____ story of this one.

3F • Use — open

Describe a place to a partner in six sentences. Your partner's job is to catch any article that should not be there, and any that is missing.

3G • Check — six items

1. _____ water came in at ten. (*we know which water*)
2. _____ water is heavier than people think. (*in general*)
3. They offered _____ campaign. _____ campaign runs for three years.
4. _____ truth matters. (*in general*)
5. _____ truth about that night is complicated.
6. It's _____ story about _____ town. (*any town*)

0–3 → Workbook pp. 58–60. **4–5** → Part 6. **6** → page 217.

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency starter — a, the, nothing

Your teacher says a noun: *water*. Each learner must use it three times — once with no article, once with *a*, once with *the* — and all three must be true.

Six nouns. Six rounds.

4B • The functional core — saying what a place has become

Fifty-one households, and forty-four

Learner A has the brochure. Learner B has the survey. The same town, a year apart.

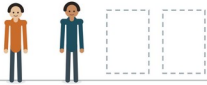

the brochure

"a community of fifty-one households"

the street

forty-four, and seven shut

Which seven differences are the same difference?

7 differences — find them all

6in}

{width=6.

Fifty-one households, and forty-four — Learner A has the brochure. Learner B has the survey. The same town, a year apart.

Language Bank

the change	<i>It isn't the place it was. · What's changed is...</i>
the continuity	<i>The same people are still... · Nothing has changed about...</i>
the story	<i>People say it's the town that... · That's the version.</i>
the correction	<i>That's not what happened. · It's more complicated than that.</i>

Role play. Learner A works for the agency. Learner B lives in the town. **Six minutes.** Neither may say *lie*.

4C • The performance — one hundred seconds

Describe **how a place or a person changed**. **One hundred seconds.** You must give:

what it was · what it is · what has not changed · the story people tell, and what it leaves out

Record it.

4D • Observer

One person listens for **one thing**: did the speaker say what had **not** changed?

4E • Two criteria

☐ Were my articles right where the meaning depended on them? ☐ Is there one thing in my account that the official version leaves out?

Part 5 • Reading A • THE WORLD

5A • Predict

A feature article. The title is "**The town that came back, and the seven people who did not.**" **What do you expect the writer to be doing?** One sentence.

5B • Read — one hundred and twenty seconds

The town that came back, and the seven people who did not

The campaign is good. I want to begin there, because the easy piece to write about Ballinmore this autumn is the cynical one and it would also be wrong.

The photographs are of real people doing real things and nobody is pretending the hall is finished. The line — *the town that came back* — is three years of work by people who were not paid for most of it, and the agency did not invent it. Somebody in the town said it first, in the hall, in February, and nobody wrote down who.

Here is what it leaves out. Of the fifty-one households surveyed, seven have gone. Two sold, two were bought out, and three are simply not here and the houses are shut. Seven out of fifty-one is

The town did come back. It came back smaller, and it is carrying a sea wall decision it has not made and a hall it has decided to keep without quite saying why.

5C • Answer

- ## 5D • Vocabulary in context

the cynical one · bought out · an edit · insisting on · available to be photographed

5E • The counter-text

6in}

The brochure page — Six photographs, four numbers, and the number fourteen does not appear.

Read the brochure page and answer.

1. What is the headline, and how many photographs are there?
2. **Which numbers appear in the brochure, and which do not?**
3. What does the small print say about who the campaign is funded by?
4. One caption describes something that is still unfinished. Which, and how is it worded?

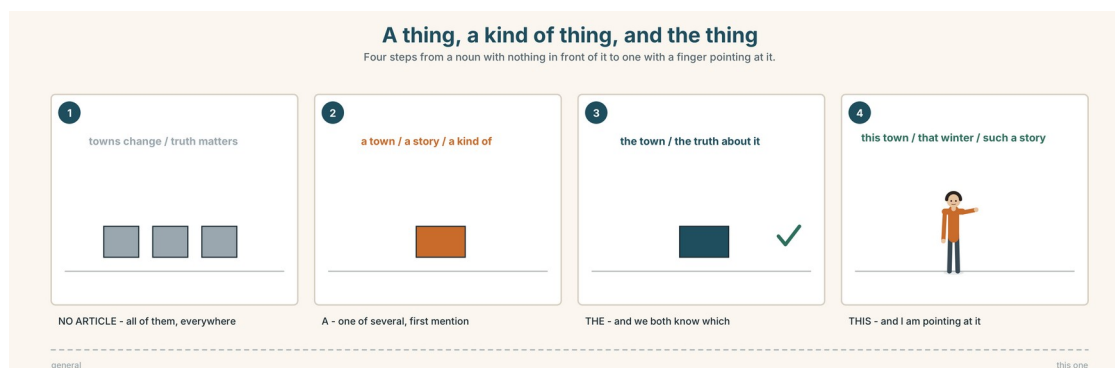

5F • Two texts

The feature says **seven of fifty-one households have gone**. The brochure says **"a community of fifty-one households"**.

Put those two facts together. Is the brochure lying? Two sentences.

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

The words you cannot point at

{width=6.

6in}

A thing, a kind of thing, and the thing — Four steps from a noun with nothing in front of it to one with a finger pointing at it.

6A • Sort — concrete or abstract?

Two columns, and put the right article beside each.

change · identity · boat · reputation · wall · pier · truth · community · memory · hall

Two of the abstract ones can also be concrete. Which, and in what sentence?

6B • Chunk completion

1. **The whole** _____ took fourteen months.
2. It is **a kind** _____ apology, though nobody calls it that.
3. **The one** _____ said it first was never named.
4. **In the** _____ they voted to keep it.
5. She can **sum** _____ the whole year in one sentence, and does.
6. **It's not** _____ simple.

6C • Abstract nouns and the article

Truth matters. — all truth, everywhere. *The truth about that night.* — one particular truth. *A truth that nobody wants.* — one of several.

Write the three versions for each of these: *memory · change · community.*

A STORY ABOUT A TOWN, and THE STORY OF THE TOWN

Two sentences, four articles, and only one of them can be argued with.

a story about a town

any town. Nobody can object

the story of the town

this one, and seven people are not in it

Which one can somebody who lives there contradict?

6 differences — find them all

{width=6.

6in}

A STORY ABOUT A TOWN, and THE STORY OF THE TOWN — Two sentences, four articles, and only one of them can be argued with.

Six differences. Find them, then answer the question under the picture.

6D • Contrast Clinic — a, the, or nothing

Six items.

1.

It's ____ story of this town.

2.

____ memory of that night is unreliable.

3.

____ water came in at ten.

4.

____ memory is unreliable.

5.

It's ____ story about ____ town.

6.

____ water is heavier than people think.

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

One word, two sounds

One word, two sounds, three jobs

The has a weak form, a strong form, and a stressed form that means something else again.

the town

→

ðə taʊn

before a consonant: /ðə/

the only one

→

ðiː ɒnli wʌn

before a vowel sound: /ðiː/

the hall

→

ðə hɔːl

h counts as a consonant here

the hour

→

ðiː aʊə

and here it does not

THE town

→

ðiː taʊn

stressed: the real one, and no other

{width=6.

6in}

One word, two sounds, three jobs — *The* has a weak form, a strong form, and a stressed form that means something else again.

7A • Hear Track 10.3

the town → /ðə taʊn/ — before a consonant the only one → /ði: əʊnli wʌn/ — before a vowel
THE town → /ði: taʊn/ — **stressed, and it now means *the real one***

7B • Say

Say all three. Then say the sentence three times, faster:

The truth about the only night that matters.

7C • Make it mean something

Say these two:

It's a story about a town. (any town) It's THE story of THE town. (this one, and no other)

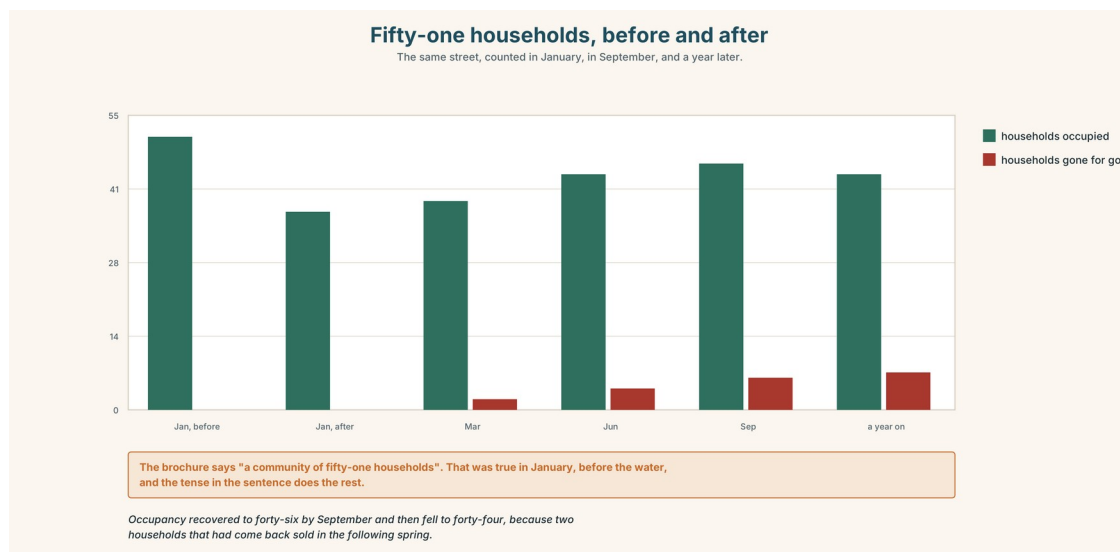

The second one is doing something the first cannot. What?

7D • Fluency 20

Twenty seconds: **three nouns, each said with no article, with *a*, and with *the*.** Three times, faster.

Part 8 • Writing C • THE PERFORMANCE

How a place changed • 110 words

{width=6.

6in}

Fifty-one households, before and after — The same street, counted in January, in September, and a year later.

8A • Read the model

The kitchen is finished. The floor went down in August, eight months after the water, and it is a slightly different colour from the one that came up, which I did not choose and have decided not to mind. [a concrete thing, a date, and one small refusal of sentiment]

What has not changed is that I still look at the yard drain every time it rains hard. I expect I will do that for the rest of my life and I am fairly relaxed about it. [the continuity, and it is a habit rather than a feeling]

People say we are the town that came back. We are a town that came back smaller, and I would rather be in a true sentence than a good one. [the correction, and the whole argument is in the difference between *the* and *a*]

Questions about the writer's choices:

1. The first paragraph is about the colour of a floor. **Why not about how she felt?**
2. The last sentence turns on one article. **Point at it, and say what it does.**

8B • The anti-model

Our town has been through a difficult time but we have come back stronger than ever. The community spirit here is amazing and everyone has pulled together. We are proof that a town can survive anything.

Correct English, and no town in it. **Name three things it does not say** — and the one word in it that the feature in Part 5 would object to.

8C • Plan

one concrete thing, with a date → one thing that has not changed → the story people tell → your own sentence, and make the articles do the work

8D • Write — 110 words

8E • Peer review — two criteria

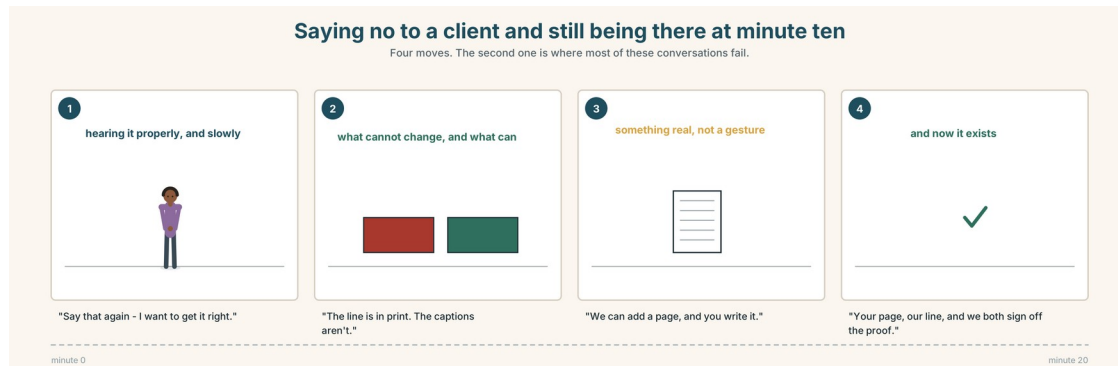

☐ Is there one concrete object with a date attached? ☐ Does one article in the piece carry an argument?

8F • Write it again • 8G • Publish

On the wall, with the brochure page from Part 5E beside it.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

WORK FILE • The Client Problem

{width=6.

6in}

Saying no to a client and still being there at minute ten — Four moves. The second one is where most of these conversations fail.

9A • Twenty minutes and a disagreement 📞 Track 10.4

The agency's account manager meets the committee. **Listen.**

1. What does the agency say it is willing to change?
2. **What does the committee ask for that the agency cannot give, and why not?**
3. Who proposes the thing that is eventually agreed?

9B • The four moves

hearing the objection properly · separating what you can and cannot change · offering something real · agreeing what is written down

Match each to one phrase.

"Say that again — I want to get it right." · "The line is in print. The captions aren't." · "We can add a page, and you write it." · "So: your page, our line, and we both sign off the proof."

9C • Saying no to a client without losing them

Which of these four is the strongest, and why?

1. *"I'm afraid that's not possible."*
2. *"We can't change the line. Here's what we can change."*
3. *"I'll see what I can do."*
4. *"That's a fair point and I don't have an answer today."*

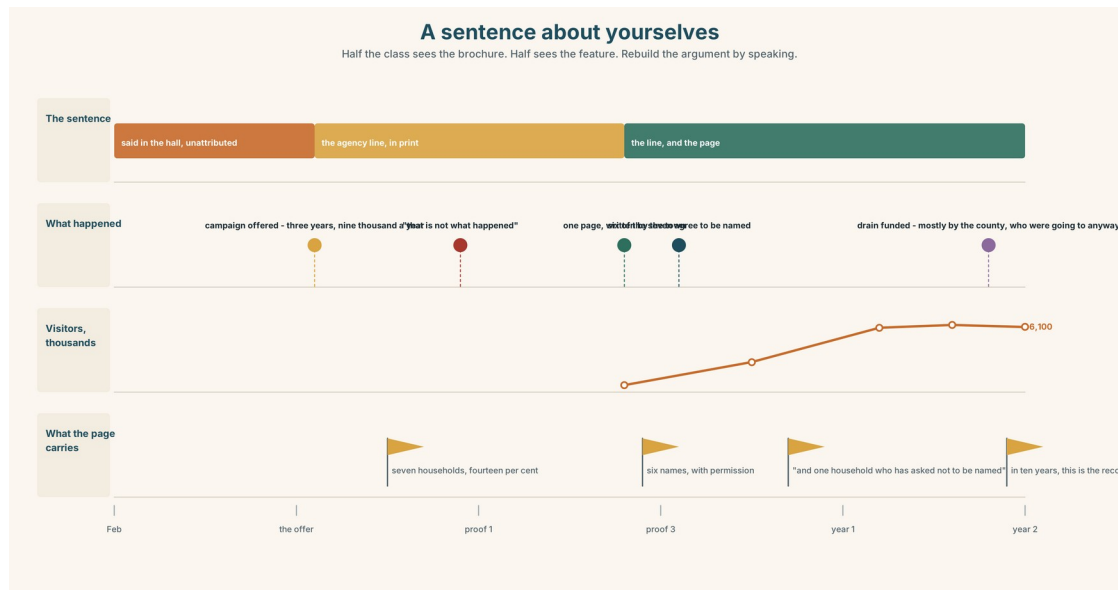

9D • Your turn

In pairs. **Ten minutes.** One of you is a client who wants something you cannot give. **You must say no in the first three minutes and still be talking at minute ten.**

9E • Transfer

Find one thing this week that you have to refuse. Refuse it, and offer one real alternative. Bring what happened.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

A sentence about yourselves — Half the class sees the brochure. Half sees the feature. Rebuild the argument by speaking.

10A • Relay

Half the class sees the brochure. Half sees the feature. **Rebuild the whole argument by speaking.** Ten minutes.

10B • Simplify

Explain the brochure page from Part 5E to somebody who lived through the flood. **Four sentences only.**

Plan: what it says → what it does not say → who paid for it → what you can ask for

10C • Compress

The feature in Part 5 into **thirty-five words**, keeping the last sentence's point.

10D • Online

Write **one message** to the agency: you support the campaign, you are asking for one page, and here is the sentence you want on it.

10E • Your language

Does your language have articles? **If not, how does it say a town and the town?** Say *it's the story of the town* in both languages, and explain to a partner what carries the difference.

Part 11 • The Decision ♦ C • THE PERFORMANCE

A sentence about yourselves

The agency will run *the town that came back* for three years. It would bring about nine thousand visitors a year. Seven of the fifty-one households have gone.

- **Agree.** It is true. The town did come back, and the money would pay for the drain.
- **Refuse.** Eimear says it is a story about what happened to the town told by people it did not happen to, and that the town spent a year insisting on accuracy.
- **Agree, with a page.** The campaign runs. The town writes one page of the brochure, in its own words, including the seven.

11A • The evidence

1. **The brochure page** from Part 5E — and the numbers that are not on it.
2. **The chart** — households, before, after, and now.
3. **The voice.** One of the seven, by phone, twenty seconds: *"I've no objection at all. I'd like to be in it, actually. I'd like somebody to put in writing that we were there, because in about ten years the only record of it will be the brochure, and we are not in the brochure."*

11B • Talk about it

In threes. Everybody says one. Use the frame.

I think the town should _____, because _____.

Words you can use: *identity · truth · story · reputation · community · belong · outsider · genuine*

11C • Decide

Write **two sentences**. Choose, and say why.

I think the town should _____, because _____.

11D • Model decision

Agree, with the page, and put the seven on it by name with their permission. The line is true and refusing it costs the drain; but a town that has spent a year arguing about eleven-minute clocks and forty-one-word notices cannot then accept a sentence about itself without a footnote. The page is the footnote. It also solves the thing the woman on the phone actually asked for, which nobody in that room had thought to ask her about.

11E • The Reveal

What happened. They agreed, with the page. The agency accepted in one meeting and was, by every account, relieved — it had expected a fight about the line itself.

Six of the seven agreed to be named. The seventh asked not to be, and the page says *and one household who has asked not to be named*, which Eimear says is the best sentence on it.

The campaign ran. Visitor numbers were about six thousand in the first year, not nine. The drain was funded in the second year, partly from visitor levy and mostly from the county, who had been going to fund it anyway and had not said so.

They got the page. The numbers were two thirds of the promise. And the money was coming regardless.

Was it the right decision? Say why — and say what the page is actually for.

Part 12 • Landing ♦ all three lines

12A • Recycle — ten items

1. _____ water came in at ten. (*we know which*)
2. _____ truth matters. (*in general*)
3. It's _____ story about _____ town. (*any town*)
4. Some want to **put it behind** _____ .
5. **It's not** _____ **simple**.
6. (*Unit 9*) _____ of the last two has insurance. (*zero of two*)
7. (*Unit 8*) The hall, _____ was built in 1884, is the oldest.
8. (*Unit 6*) The rope _____ (must / break) in the night.
9. (*Unit 3*) By the time we arrived, it _____ (already / start).
10. (*A2.1 U10*) Could you tell me where the office _____ ?

12B • Consolidate

One hundred and ten words. How a place or a person you know has changed. One concrete object with a date, one thing that has not changed, and one sentence where an article carries the argument.

12C • Can-do, with evidence

I can...	My evidence	Sure?
use <i>a, the</i> and no article to mean different things	Part 3G score	☐ ☒ ☒
describe how a place changed in a hundred seconds	Part 4C recording	☐ ☒ ☒
write a hundred and ten reflective words	Part 8 draft 2	☐ ☒ ☒
refuse something and keep the conversation	Part 9D role play	☐ ☒ ☒

12D • Replay 🟡

Find your thirty seconds from Part 0C. Listen. **Record it again.** One sentence: what is different?

12E • Glossary — forty items, as a map

WHO YOU ARE · identity · belong · local · outsider · newcomer · community · reputation
WHAT CHANGED · change · name · rename · story · memory · truth · genuine · marketing
HOW PEOPLE FEEL · proud · ashamed · visitor **MOVING ON** · put it behind us · move on · live down · the town that · tell the truth · that's not what happened **THE SMALL WORDS** · the · a · an · some · any · this · that · these · those · such · own **PUTTING IT TOGETHER** · the whole thing · a kind of · the one who · in the end · sum up · it's not that simple

12F • Next

B1.1 • Taking a Position — Jengo House, Nairobi.

End of A2.2 • *Telling the Story*

Four hundred active items. Eleven new structures. Ten decisions, and in four of them the honest option cost somebody money.

Look back at your recording from Unit 1, Part 0C. Listen to it once. Then record the same thirty seconds again. **One sentence: what is different?**

Answer Key

Open tasks — speaking, writing, discussion — are not keyed. Their success criteria are in the unit, at 4E and 8E.

A2.2 • Unit 1 • Twelve Centimetres

0B • Guess it Worst at the low end of Strand Road, by the yard drains. The tide marks on the three houses are at different heights — ankle, knee and a hand's width above the sill — and the lowest house is the one where the road dips and the drain is. The water did not come over the wall; it came up through the yard.

1B • Sort — a thing, an action, or a judgement?

an action — protect · recover · prepare **a thing** — wall · rubble · shelter · damage **a judgement** — foolish · lucky · safe **Only ever said afterwards:** *foolish* and *lucky*. Nobody is lucky or foolish in advance — both words need the outcome, which is the whole argument about Donal and his car.

2A • Thursday, and the top road 📶 Track 1.1 **1 T · 2 T · 3 F · 4 T Table** — Donal: moved the car to the top road on the Thursday; would move it on the Wednesday. Eimear: thought about the sandbags and left them in the shed; would put them out and would not wait to see what anybody else did. Sinéad: opened the hall on the Friday night; would open it earlier and would not wait for the council.

Noticing — The future: 1 (*If it happened again, I'd move it*) and 4 (*I wouldn't do anything differently*). **The past:** 2 (*I'd have gone earlier*) and 3 — which is about a past choice stated as a standing preference. (*Accept 3 as either if the learner argues it.*)

3D • Use — controlled 1 happened · 2 would move · 3 had been · 4 would not have lost · 5 were · 6 would not wait · 7 were · 8 would not be

3E • Use — guided 1 If I had the money, I would move.
2 If we were ready, we wouldn't worry.
3 If he asked, somebody would help him.
4 If the hall were open, people wouldn't sleep in cars.
5 If I were you, I could decide.

5C • Answer 1 The drain in the yard started going the wrong way, at about ten. It does not come in the door first.

2 Since 2019 — about five years. She had kept them from a warning that came to nothing.

3 Because Donal had moved his car, everyone was being funny about it, and she did not want to be the second one.

4 She would not wait to see what anybody else did. She will **not** promise that she would actually put the sandbags out — that is easy to say in September and she does not know what she would do in January.

5 Because you cannot put a new floor down until the old one is dry, and you cannot tell when it is dry — so you wait, lay one, and sometimes you are wrong.

6 The sandbags are a thing she did not do. The waiting is the reason she did not do it. One is a mistake and the other is a habit, and only the second is worth changing.

5D • Vocabulary in context **came to nothing** — the 2019 warning, where nothing happened · **being funny about it** — teasing Donal, mildly and publicly · **the second one** — the second person to look

foolish, which is worse than the first · **in September** — long after, when it is easy to be brave · **you cannot tell when it is dry** — the honest limit that makes the eight months unavoidable

5E · The counter-text 1 Flood: 2,500. Storm damage: 350 — about seven times less, for the thing that is more likely to happen here.

2 Gradual damp; items stored below ground level; floor coverings laid less than twelve months before the claim; garden structures including sheds and their contents. **Eimear lost** the floor covering (*hers was eight months old*) and the contents of the shed — and the sandbags were in the shed.

3 Fifteen working days, after being notified within thirty days.

4 "Flood cover may be withdrawn at renewal following a claim." It is in bold because it is the only line about next year — and because a claimant who reads it may decide not to claim, which is what the bold is for.

6A · Sort — how sure, and how honest? **Most certain → least:** certainly · probably · maybe · supposing.

The two that are not about certainty: *honestly* is about the speaker — it marks what follows as costing them something. *otherwise* is about consequence — it names what happens if you do not.

6B · Chunk completion 1 were · 2 position · 3 have · 4 rather · 5 otherwise · 6 thought

6C · Three words that change the whole sentence 1 **instead** — assumes the listener knows what she did not do (*wait*).

2 **Otherwise** — assumes the listener knows what happens if they do not (*the water comes*).

3 **differently** — assumes the listener knows what she did the first time, and is being asked to compare.

6D · Contrast Clinic — first or second conditional

1 rains / will cancel — **first:** the forecast says it will, so it is a real possibility. 2 see / will tell — **first:** probable. 3 rained / would not hold — **second:** it never has, so it is imagined. 4 leave / will catch — **first:** it is available right now. 5 were not / would ... go — **second:** the hall is there. 6 were / would go — **second:** I am not you, and never will be.

7C · Make it mean something Model: *I **WOULD** do it — but the sandbags are in the shed and the shed is behind the water.* The contrastive stress on *would* always has a *but* coming; the plain *I'd do it* needs nothing after it.

12A · Recycle — ten items 1 happened / would move · 2 were · 3 rather · 4 risk · 5 of · 6 rains · 7 are not allowed to · 8 was built · 9 when · 10 since

A2.2 · Unit 2 · Nowhere Near Finished

0B · Guess it The scaffolding, the temporary road and the hall roof. The scaffolding has weathered — the boards are grey and there is grass at the base of the uprights. The temporary road has ruts worn into it and a pothole already patched. The roof has new tiles that have dulled and two gaps near the ridge that have not.

1B · Sort — finished, going on, or not started?

going on — the temporary road · the hall windows · the sea wall survey **not started** — the kitchen floor · the plasterboard · the slipway **finished** — the drain · the roof **The one that depends who you ask: the roof.** The contractor's report says 100 per cent complete; the door log says two ridge tiles are missing and you can see daylight. Finished or going on, depending entirely on which document you are holding.

2A · Eight months of it 📶 Track 2.1 **1 c)** three months · **2 a)** since June · **3 b)** three · **4 b)** on and off
Table — Roof: started 6 May, finished 2 June (*disputed*); two ridge tiles missing. Windows: started, 2 of 4 done; the contractor is on another site. Floor: not started; waiting for plasterboard since June.

Noticing — **A result:** 1 (*We've done the roof*) and 3 (*I've phoned him four times*). **The activity:** 2 (*We've been doing the roof since June*) and 4 (*I've been phoning him all week*).

3D · Use — controlled 1 have been working · 2 have finished · 3 has not started · 4 have been waiting · 5 has phoned · 6 has been phoning · 7 has not answered

3E · Use — guided 1 have written — three is a countable result.

2 have been writing — *all morning* is a span.

3 **Either**. *has lived* and *has been living* are both correct with a state verb and a *since* phrase; the continuous adds a slight sense of impermanence.

4 have fixed — finished.

5 have been fixing — *since June* is a span and it is not finished.

6 have known — *know* is not normally used in the continuous.

5C · Answer 1 Eleven volunteers, six hours, on 14 January.

2 Survey on 2 February; contractor appointed on 9 March — five weeks, and no paper in between.

3 Two entries, in two hands. The first says the roof is done and the men have moved to the school. The second says the roof is **not** done — two ridge tiles missing, and you can see daylight.

4 Ordered 11 June; still not delivered on 1 September — nearly three months.

5 Windows: two of four. Floor: not started.

6 Because four different people have kept it, which means nobody was given the job. It tells you the hall is being run by whoever is there — and it is also why the log is more reliable than the report: four people had to agree for an entry to stand uncorrected.

5D · Vocabulary in context **isolated** — disconnected for safety, so the kitchen cannot be used · **w/c** — week commencing · **appointed** — formally given the contract · **ridge tiles** — the tiles along the top of the roof, where the daylight is · **2 of 4** — two of the four windows, which is the shortest sentence in the log and the clearest

5E · The counter-text 1 Sixty-eight per cent.

2 As a change of supplier, outside the contractor's control — and no extension of time is claimed at this stage, which is the sentence that matters: it concedes the delay is his to absorb while describing it as somebody else's fault.

3 **The roof** — the log says daylight through the ridge. (*The other two marked complete, strip-out and electrical first fix, the log does not dispute; the real disputes are the roof, the 50 per cent on windows, which the log records as two of four, and the 68 per cent overall.*)

4 30 November. It has moved **three** times — from 30 June to 31 July to 30 September to 30 November.

6A · Sort — a point, a length, or a frequency?

HOW OFTEN — non-stop · on and off · constantly · day after day **A LENGTH** — lately · all week · for · throughout **A POINT** — yet · recently · since · still

6B · Chunk completion 1 week · 2 on · 3 after · 4 throughout · 5 still · 6 yet

6C · Three that are nearly the same 1 **lately** — a question about the recent period. *Recently* also works; *still* would be wrong because it needs a continuing state.

2 **recently** — a state continuing to now. *Lately* also works. *Still* would mean she had been tired before and has not stopped, which is a different claim.

3 **still** — a continuing state, and the only one of the three that is not about recency. *Lately* and *recently* would both be odd with a present continuous that has lasted three months.

6D · Contrast Clinic — simple or continuous

1 have owned — *own* is a state verb and does not take the continuous. 2 have read — three is a countable result. 3 have ... phoned — the question counts completed calls. 4 have been building — a span, unfinished. 5 have built — a countable result. 6 have been reading — a span, and no number offered.

7C · Make it mean something *We've **BEEN** waiting* is a complaint about the other person: the stress on the auxiliary answers somebody who has implied you have not. *We've been **WAITING*** is a complaint about the situation — it puts the news on the activity and says that waiting is the whole of what has happened.

12A · Recycle — ten items 1 have been waiting · 2 have phoned · 3 near · 4 up · 5 after · 6 were · 7 rather · 8 for · 9 who / that · 10 was built

A2.2 · Unit 3 · Who Was Warned, and When

0B · Guess it Donal, Eimear and the council duty officer. Donal is the only person whose car is not on the street. Eimear is standing at her shed door with the bolt drawn back and has not opened it. The duty officer is the one in the parked car at the top of the road with the phone face-up on the dashboard — the revision was sent to that phone at 13.40.

1B · Sort — a fact, a judgement, or a procedure?

a **judgement** — responsible · blame · fault a **fact** — witness · evidence · record · cause a **procedure** — inquiry · report · minute **The one that moves when it is written down:** *record*. Spoken, it is a judgement — *for the record*, as Eimear uses it. Written, it becomes a fact that other documents have to argue with, which is exactly what she is doing and why she says it is not evidence.

2A · The order of the night 📻 Track 3.1 1 T · 2 T · 3 T · 4 T **Order (1–6):** 1 the forecast changed · 2 Donal moved his car · 3 Eimear decided not to use the sandbags · 4 the drain reversed · 5 the hall opened · 6 the water reached the doors.

Noticing — Plain past: 1 (*The forecast changed on the Thursday*). The other three all put one past event before another: 2 with *had changed*, 3 with *had already started*, 4 with *after he had moved it*.

3D · Use — controlled 1 had already reached · 2 had moved · 3 had changed · 4 decided · 5 had moved · 6 had not known · 7 had changed

3E · Use — guided 1 He moved the car after the forecast had changed. (*or* The forecast had changed before he moved the car.)

2 The drain had reversed before anybody noticed the tide.

3 She had put the sandbags in the shed in 2019, five years before the water came.

4 The hall had opened before the first family arrived.

5 He had warned four people, and nobody acted.

5C · Answer 1 The forecast had changed that morning — the surge had gone from 1.1 metres to 1.6 — and the yard drain had backed up twice in November.

2 Four. Two of them laughed, kindly — and he says he would have laughed too.

3 Because he did not want to be the man knocking on doors about a forecast.

4 She did not laugh, and she thought about the sandbags and decided against them. She did **not** say anything when the other two laughed.

5 That Donal was right and was treated as though he were being silly, and that she joined in by saying nothing. She says it is not evidence because it is about how people behaved, not about what caused the flood.

6 That if he had knocked on eleven doors she does not think it would have made any difference. It is protecting **Donal** — from becoming the story about one man who should have done more.

5D · Vocabulary in context **surge** — the rise in sea level above the normal tide · **backed up** — ran the wrong way and filled · **laughed kindly** — without malice, which makes it harder to answer · **joined in by saying nothing** — the admission the whole submission exists for · **would have made any difference** — the third conditional she uses to protect somebody else

5E · The counter-text 1 Forecast revised at 13.40; drain reversed at 21.50.

2 From 13.40 to the first water at 23.30 — **nine hours and fifty minutes**.

3 "Council duty officer reads revision" and "Any council warning to residents".

4 The 21.50 drain reversal. The resident says "about ten"; photographic metadata gives 21.50. The difference is **forty minutes**, and the inquiry has adopted the metadata.

6A · Sort — earlier, same time, or later?

earlier — up to that point · the night before · before · already · previously · until **same time** — just · by the time · once **later** — after · afterwards · then

6B · Chunk completion 1 time · 2 soon · 3 before · 4 point · 5 through · 6 already

6C · Two that look the same 1 By the time she phoned, he had already left.

2 By the time the last family arrived, the hall was full.

3 By the time the vote was taken, nobody had read the notice.

6D · Contrast Clinic — past simple or past perfect

1 moved / flooded — two plain pasts in order, so no perfect is needed. 2 had reversed / was — the reversal came first and the lateness followed. 3 had kept / had ... used — both before the night the story is told about. 4 arrived / had gone — *by the time* needs the perfect in the other half. 5 flooded / had moved — *two days earlier* puts the move before. 6 did not know / had changed — the change was earlier than the not knowing.

7C · Make it mean something The argument is with the inquiry, or with whoever has said in evidence that he did not move it. Contrastive stress on *HAD* only makes sense against a denial. The plain *he'd moved it* is just chronology, and it is what a witness statement should sound like.

12A · Recycle — ten items 1 had already started · 2 had changed · 3 into · 4 hindsight · 5 out · 6 have been waiting · 7 have phoned · 8 were · 9 when · 10 used

A2.2 · Unit 4 · Forty Minutes Apart

0B · Guess it Resident A's kitchen clock and Resident B's radio programme. Both are independent of each other, both would be given in good faith, and both are wrong — the clock by eleven minutes fast, the programme because it ended at 23.15 and not at half past. Two sources agreeing does not make either of them right.

1B · Sort — the thing said, the person, or the test?

the test — accurate · doubt · exact · trust **the thing said** — claim · version · account **the person** — source · editor · journalist **The one in two columns:** *source*. It is the person who told you and the document you got it from — *a source close to the inquiry* and *a primary source* are different things, and a newspaper uses the ambiguity on purpose.

2A · Three times, one night 📻 Track 4.1 **1 T · 2 T · 3 F · 4 F Table** — Eimear: eleven o'clock; at her kitchen door; very sure, and she checked a clock. Donal: half past eleven; listening to the radio; very sure, and he insists. Sinéad: does not give a clock time at all; opening the hall; openly unsure, and says she went by when the hall filled.

Noticing — The words themselves: 1 and the direct quotation inside it. **Reporting:** 2, 3 and 4. **The one that is not neutral:** 4 — *insisted* tells the reader he was being contradicted and would not move.

3D · Use — controlled 1 was / had been · 2 had checked · 3 was · 4 had not looked · 5 had gone / went · 6 showed · 7 had adopted

3E · Use — guided 1 Eimear said she had checked the clock.
2 Donal insisted it had been half past, not eleven.
3 Sinéad explained that she had not looked at a clock.
4 The inquiry stated that it had adopted the photographic time.
5 The council refused to comment.

5C · Answer 1 Forty minutes.
2 It was eleven minutes fast.
3 By a radio programme he knew ended at half past. The programme in fact ended at 23.15 — fifteen minutes out.
4 The point at which the hall was full. Hall records show capacity at 23.25.
5 23.30, from photographic metadata.
6 That none of the three is unreliable. Each used the best instrument they had, and each instrument was wrong by five to twenty minutes, which is normal. An account matching the metadata exactly would be more unusual than these three and would deserve more scrutiny, not less.

5D · Vocabulary in context **reconciling** — making different accounts fit together · **capacity** — the point at which the hall was full · **metadata** — the data a photograph carries about itself · **the best instrument available** — whatever each person had to hand, which is the inquiry's defence of them · **deserve more scrutiny** — be examined harder, because it is too good

5E · The counter-text 1 "WITNESSES CONTRADICT EACH OTHER OVER FLOOD TIMING." It implies the residents are unreliable and at odds — which is the opposite of what 4.6 says.
2 It quotes 4.1 to 4.5. It leaves out **4.6**, the paragraph saying all three accounts are honest and that an exact match would be more suspicious.
3 Resident A **claims**; Resident B **insists**; Resident C **admits**. Three loaded verbs for three accounts the report calls honest.
4 "The inquiry is understood to have found the residents' evidence of limited value." No paragraph of the report says this.

6A · Sort — neutral, or loaded?

loaded — reveal · insist · admit **neutral** — repeat · add · reply · mention · tell · state · say · announce **Neutral in a report, loaded in a newspaper:** *announce*. In minutes it simply means said formally; in a headline it implies self-importance. (*Accept repeat**, which in a newspaper implies the speaker has been told already.)*

6B · Chunk completion 1 that · 2 that · 3 to · 4 comment · 5 out · 6 effect

6C · Three that change the reader's mind 1 *She said that she had checked a clock.* **Lost:** the suggestion that checking a clock was something to confess. **Gained:** a sentence the reader can judge.

2 *He said that the programme ended at 23.15.* **Lost:** the sense that this was hidden. **Gained:** the fact, which is more useful than the drama.

3 *She said that the hall was full by then.* **Lost:** the writer's doubt. **Gained:** the reader's right to their own.

6D · Contrast Clinic — report it

1 She said she had checked it twice. 2 He said he would send it the next day. 3 She said she was at the door. 4 He said he had not said that. 5 She said the drain is still blocked. (*no shift — it is still true*) 6 He said he could not remember.

7C · Make it mean something *He said it was **HALF PAST*** is the report version: the stress is on the content, and the sentence simply passes the fact on. *He **SAID** it was half past* is the conversation afterwards: the stress on the verb separates what he said from what turned out to be true, and a report should not do that.

12A · Recycle — ten items 1 was · 2 told · 3 to · 4 record · 5 correction · 6 had already started · 7 had changed · 8 have been waiting (*Unit 2*) · 9 were · 10 was built

A2.2 · Unit 5 · The Wrong Question

0B · Guess it The open notebook on the interviewer's knee, and the door he is standing in. The notebook: people shorten their answers when they can see the writing. The doorway: standing on the step with the householder inside means the interview is being conducted at the boundary, which keeps it short and keeps the neighbours in earshot.

1B · Sort — the interviewer, the person, or the room?

the person — awkward · consent · honest **the interviewer** — notebook · direct · follow-up
the room — pressure · anonymous · silence **It belongs to whoever is most frightened:**
silence. In an interview the silence is owned by whoever is least comfortable with it — and a good interviewer gives it away on purpose, which is the hardest technique in the unit.

2A · Fifty-one doors 📻 Track 5.1 1 c) how deep it was · 2 b) most · 3 b) not asked · 4 b) six **Table** — Q1: how deep the water was at its highest; a number, in centimetres; nobody asked where it came from. Q4: whether they received a warning; yes or no, with an open follow-up; nobody asked whether the warning reached them in time to act. Q9: *anything else?*; nine of forty-four wrote anything; nobody asked the harbour master.

Noticing — The words themselves: 1 and 3. **Reports:** 2 and 4. **In sentence 2** the word order goes back to statement order — *how deep the water had been*, not *how deep was the water* — and the auxiliary disappears.

3D · Use — controlled 1 had been · 2 had measured · 3 not to guess · 4 whether / if · 5 to keep · 6 where · 7 had come

3E · Use — guided 1 He asked where the water had come from.

2 He asked whether they had looked at the drain.

3 He told them to keep the photographs.

4 He told them not to throw anything away.

5 He asked whether they would be willing to be named.

5C · Answer 1 A list of questions, and a decision about who is asked.

2 Fifty-one households, forty-four responses, six weeks.

3 It asked how deep the water had been, when it arrived, what was damaged, whether people had received a warning, and whether they intended to stay. It did **not** ask where the water came from — the question the money depended on.

4 "You cannot find an answer to a question you did not ask."

5 The harbour master, who has watched that drain for twenty-two years. He does not live in a flooded house, so he was not on the register the list was correctly drawn from.

6 Redoing it takes six weeks; publishing it as it stands takes an afternoon. **The warning** is the second half: it will be quoted for ten years.

5D · Vocabulary in context **response rate** — the proportion who answered, here 44 of 51 · **nobody was led** — no question pushed people towards an answer · **the flood plain** — the area the register covers, which is how the harbour master was excluded · **drawn up** — compiled, correctly · **as it stands** — unchanged, with the gap still in it

5E · The counter-text 1 Nine questions; two are open — 5 and 9.

2 Question 9, *Anything else?* It is the only place the source could be mentioned, and it is the last box on the second side. Nine of forty-four completed it.

3 It allows the answers to be used in anonymous and aggregated form in the council's report. It does **not** allow anybody to be quoted by name — which is why the harbour master could not have been used even if he had been asked.

4 "10. Where do you think the water came from? (I think it was the old drain — R.)" — added by hand to four copies.

6A · Sort — does it need a person after it?

needs a person — order · invite · want · beg · advise · encourage · remind · tell **no person** — refuse · say **both** — ask **The one in both:** *ask. He asked whether...* takes no person and means a question; *He asked me to wait* takes a person and means a request. Two different verbs wearing one spelling.

6B · Chunk completion 1 to · 2 not · 3 to · 4 whether / if · 5 off · 6 know

6C · Three ways of saying no 1 **refused** · 2 **avoided** · 3 **No comment**

Which tells you most: *avoided*. A refusal and a *no comment* tell you only that there is something there; four minutes about the wall tells you what the something is about.

6D · Contrast Clinic — report it

1 He asked where I lived. 2 He asked whether I had seen it. 3 He told me not to move anything. 4 She asked why they had not asked the harbour master. 5 He asked me to sign it. 6 She told me to wait there.

7C · Make it mean something The rising version is useful when you are checking that you have understood a report somebody else has given you — turning their statement back into a question without contradicting them. It is also how you ask a second question while appearing to repeat the first, which is the move the survey needed and did not have.

12A · Recycle — ten items 1 it had been · 2 to measure · 3 whether / if · 4 question · 5 record · 6 told · 7 to · 8 had already started · 9 have been waiting · 10 is

A2.2 • Unit 6 • Two Miles Out, and Empty

0B • Guess it The coiled rope, the open hatch and the lifejacket on the shed hook. A boat that broke away does not have its rope coiled by somebody who knew how; a boat drifting in a sea does not usually have its hatch left open; and a man who never went out without a lifejacket in forty years did not go out. **What would explain them:** somebody untied it deliberately, in no hurry, from the pier — which is the one explanation nobody has written down.

1B • Sort — a fact, a feeling, or a story?

a feeling — unlikely · strange · suspect **a fact** — clue · missing · empty · obvious **a story** — theory · mystery **A fact always described as a feeling:** *obvious*. Something is either true or not; *obvious* reports how it struck the speaker. Mossie had been saying it must have broken its mooring since nine, before anybody looked at the rope, and he called it obvious.

2A • Three explanations 🎧 Track 6.1 **1 F · 2 T · 3 T · 4 F Table** — It broke its mooring: the boat was adrift and the tide turned at two; against it, the rope was untied with the turns still in it. The engine failed: possible in principle; against it, the tank was almost full and the vessel has not been recovered to check. He took it out: nothing supports it; against it, the lifejacket is on the hook and he had not gone out without it in forty years.

Noticing, most sure first: 3 (*can't have*) is nearly impossible — but as a statement the speaker is nearly certain of. **1 must have** — nearly certain. **4 it's possible that** — open. **2 might have been** — open, and the weakest. (*Accept 3 first or 1 first if the learner distinguishes certainty about the event from certainty about its impossibility.*)

3D • Use — controlled 1 must have broken · 2 might have been · 3 can't have taken · 4 could have failed · 5 unlikely · 6 will never know

3E • Use — guided 1 The rope must have broken.

2 The current might have taken it.

3 He can't have been on board.

4 Somebody must have moved it.

5 Nobody might have noticed until morning. → better: *It's possible that nobody noticed until morning / Nobody may have noticed until morning.*

5C • Answer 1 Half past eleven on the Tuesday, two miles out, drifting east, hatch open, with a fuel can and a coil of rope aboard.

2 That it must have broken its mooring. He had been saying it since nine — before anybody had looked at the rope.

3 It had not been cut and it had not frayed. It had been **untied**, by somebody who tied things for a living, because the turns were still in it. It matters because it rules out the only theory anybody wants.

4 On the hook in the shed, where it had been on Sunday and is now. The insurance man asked whether anybody had actually seen him put it on, on any particular day.

5 Because nobody watches a man they have known for forty years put on a lifejacket. The absence of a witness is not evidence of anything, and the question is designed so that it is.

6 That the explanation on the form was chosen because it is the cheapest of the three to be true — not because it is the most likely.

5D • Vocabulary in context **drifting east** — moving with the tide, not under power · **the turns were still in it** — the rope kept the shape of a knot that was undone, not broken · **on the hook** — in its usual place, which is the whole of the evidence · **that is not a theory** — a refusal to have a fact reclassified as an opinion · **the cheapest of the three to be true** — the one that costs the insurer least

5E · The counter-text 1 Three causes; **one** only. Ticking more than one refers the claim and suspends settlement pending survey.
2 Box A mooring failure 18,000; Box B mechanical failure 18,000; Box C cause unknown 6,000 — **the lowest**.

3 A: the mooring, or a photograph of it. B: an engineer's report on the vessel — which has not been recovered. C: none.

4 Box A. Ticked, crossed out, ticked again, then crossed out, with the assessor's note: "Rope untied, not broken. Photographs attached. — A.H." So the honest box is C, and C pays a third.

6A · Sort — how certain? **Certain** → **barely possible**: definitely · clearly · obviously · surely · presumably · apparently · possibly.

The two about what other people say: *apparently* reports somebody else, and *surely* appeals to what everybody would agree — neither is a claim about what the speaker knows. (*Accept presumably as a third: it fills a gap with logic rather than knowledge.*)

6B · Chunk completion 1 have · 2 have · 3 have · 4 that · 5 out · 6 settles

6C · Two that sound like certainty and are not 1 **Presumably** — it is in the tide table, so it is logic rather than report. (*Accept apparently if the learner reads the table as a source.*)

2 **Presumably** — nobody saw it; the hatch is the gap being filled.

3 **Apparently** — the harbour master said so, which is exactly what *apparently* reports.

6D · Contrast Clinic — must, might or can't

1 must 2 can't 3 might 4 can't 5 must 6 can't

7C · Make it mean something The contrastive *MUST* has already been contradicted once — you only stress the modal when somebody has pushed back. The weak *must've* is the first time the thought has been said aloud. In the story Mossie is on the stressed version by nine in the morning, which is the detail the narrator's father found interesting.

12A · Recycle — ten items 1 must have broken · 2 can't have been · 3 might have been · 4 out · 5 up · 6 was built (A2.1 U7) · 7 told · 8 had already started · 9 were · 10 are not allowed to

A2.2 · Unit 7 · This Time Next Year

0B · Guess it Peadar, the narrator, and one of the two apprentices. Peadar: there is a kitbag by the pier bollard and the Galway boat's name chalked on the shed door. The narrator: she is the only one holding a college envelope. The apprentice: he is standing with the boatyard group and is the one with nothing in his hands — the second berth has not been confirmed.

1B · Sort — a thing you get, or a thing you do?

a thing you do — qualify · apply **a thing you get** — training · promotion · chance · course · contract **both** — plan **The one that is both**: *plan*. You make a plan and you are given one — a training plan, a plan for the hall — and people confuse them because *we have a plan* can mean *we decided something* or *somebody handed us a document*.

2A · The Galway boat 🗣️ Track 7.1 1 c) two seasons · 2 c) three weeks at a time · 3 b) at college · 4 a) still waiting **Table** — Peadar: will be in Galway, taking a bigger boat out at four; the refit has to be finished first; he is not saying that clause 9 leaves him unpaid from 1 March. Aoife: will be at college in Dublin; nothing has to happen first, which is the point; she is not saying that hers is the only plan with no *if* in it. Sinéad: will be here; the plasterboard has to arrive; she is not saying what happens if the committee stops paying the insurance.

Noticing — The decision: 1 (*I'll take it*). The other three describe a future that is simply going on.

3D · Use — controlled 1 will be living · 2 will be taking · 3 starts · 4 will be studying · 5 will be · 6 will still be waiting · 7 is not going · 8 will be doing

3E · Use — guided 1 In October I'll be studying on the course.

2 Next year he'll be taking a bigger boat out at four.

3 This time next year we'll be using the hall. (*or ...we'll still be rebuilding it.*)

4 By then she'll be working in Dublin.

5 By Christmas they'll still be waiting for the plasterboard.

5C · Answer 1 In February. If he goes: the boatyard loses its best customer; Tomás's cousin does not take on the two apprentices; and the writer's brother applies to the college in Sligo instead.

2 The college in Sligo — which he does not want, and which he will probably get.

3 The hall will not reopen until the plasterboard arrives. If it is still shut in January, the committee must decide whether to keep paying insurance on a building nobody can use. If they stop, Sinéad will be running a community with nowhere to put it.

4 "I will be at college in Dublin by October."

5 Because it is also the only one entirely about her. Putting the certain thing last, after everybody else's conditionals, is a way of not noticing that she is the one with a plan.

6 That a small town is not a set of individual plans but one plan with eleven authors, and nobody has the whole document.

5D · Vocabulary in context **counted it out** — worked through the consequences one by one · **take on** — employ, here the two apprentices · **comes down to** — depends ultimately on · **which he will probably get** — the quiet sting: he will succeed at the thing he does not want · **eleven authors** — the number of people whose decisions are in the plan

5E · The counter-text 1 Experienced hand on an 18 m vessel in Galway; two seasons — twenty months, with no break clause before month ten.

2 Twenty-one nights at a time, three weeks on and ten days off. It is in the **contract summary**, not the advert — the advert does not mention nights at all.

3 The advert says "accommodation available". The contract says shared, at 140 a month — *available*, not included.

4 **Clause 9**. If the vessel's refit is not completed, the start date moves to the first sailing — and the engagement is not paid between 1 March and that date.

6A · Sort — soon, far off, or in between?

far off — in a year's time · this time next · eventually **in between** — ahead · onwards · by then · later **soon** — meanwhile · soon · shortly

6B · Chunk completion 1 next · 2 end · 3 time · 4 work · 5 start · 6 up

6C · Three that are not as sure as they sound 1 *I expect to be finished by March, and I have been wrong about this before.* — *hopefully* hides who is doing the hoping.

2 *I think he will take it, though he has not said so.* — *likely* states a probability nobody has measured.

3 *The hall will reopen when the plasterboard arrives, and nobody will say when that is.* — *eventually* promises a time and refuses to name one.

6D · Contrast Clinic — will, going to, or will be -ing

1 Will ... be coming — the future continuous is the polite enquiry, because it asks about an arrangement rather than a decision. 2 will have been waiting — a duration up to a point. 3 'll get — decided at this moment. 4 'll be living — an ongoing future. 5 'm going to apply — a decision already taken. 6 'll know — states do not take the continuous.

7C · Make it mean something *I **WILL** be there* is the promise: the stress answers a doubt, and what it offers is the speaker's word. *I'll be there* is the timetable: it reports an arrangement that already exists and asks nobody to trust anything.

12A · Recycle — ten items 1 will be living · 2 will be · 3 Will ... be coming · 4 for · 5 up · 6 must have broken · 7 to measure · 8 told · 9 have been waiting · 10 rains

A2.2 · Unit 8 · The Only Building Above the Line

0B · Guess it **Above:** the hall. Its door sill is drawn three steps up from the street and there is no tide mark on it. **Barely below:** the old school. Its sill is one step up and the render carries a faint horizontal line just under the window — the 1.9 metre mark, a hand's width below the glass.

1B · Sort — natural, built, or ruined?

natural — bay · cliff · headland **ruined** — ruin **built** — hall · church · lighthouse · harbour · pier **The one in two columns:** *harbour*. It is a natural inlet and a built structure, and the three-hundred-year argument is exactly about which — whether the town made the harbour or the harbour made the town.

2A · The tour 📶 Track 8.1 **1 F · 2 T · 3 F · 4 T Table** — The hall: 1884, a corn store, became a hall in 1931; the plaque does not say it is the only building above the flood line, that two hundred people were in it on the night, or that there is a proposal to sell it. The pier: 1886, rebuilt 1931; the plaque does not say it was destroyed twice. The ruin: date unknown; there is no plaque at all.

Noticing — **Sentence 2** implies there is another hall. The commas in sentence 1 make the clause non-defining: there is one hall, and by the way it was built in 1884. Without them the clause picks out which hall is meant.

3D · Use — controlled 1 which · 2 who · 3 where · 4 of which · 5 of which · 6 which

3E · Use — guided 1 The lighthouse, which was built in 1902, is still working.

2 Tomás, who wrote the survey, has been here four years.

3 The bay, where the tide comes in fastest, fills in forty minutes.

4 There are eleven landmarks, three of which have plaques.

5 The old school, whose roof was replaced last year, is empty.

5C · Answer 1 An hour long; it opened in June.

2 The plaques are brass, which will outlast the funding; and the text was written by somebody who had read the parish records rather than the tourist board's previous leaflet.

3 It gives 1884 as a corn store, 1931 as a hall, and the name of the merchant who paid for it. It does not say that the hall is the only building in the lower town above the 1.9 metre line, that two hundred people were in it on the night of the storm, or that there is a proposal to sell it.

4 Two hundred.

5 Because a heritage plaque is not a news bulletin and nobody expects it to be. The fault is that the trail is the only written account a visitor will ever read, and it stops in 1931.

6 The brass.

5D · Vocabulary in context **signposted** — marked along the route so you can follow it · **a lie by omission** — true in everything it says and misleading in what it leaves out · **the parish records** — the local written history, as against the tourist leaflet · **a news bulletin** — something the plaque is not, which the reviewer concedes · **it stops in 1931** — the whole criticism, in four words

5E · The counter-text 1 1884 and 1931. The name on it is the Dolan family — presented by them, and built for Dolan & Sons.

2 410,000 as is; 180,000 plus a retained upper floor if split into two units. The basis is **vacant possession**, which assumes the community use ends — and there is no valuation anywhere of the building in continued community use.

3 4.1 metres above sea level, against a January flood level of 1.9 — and it adds that the site is not within the flood envelope and no flood resilience works are required.

4 "Not within the flood envelope" — because it is the only building in the lower town of which that is true, and that is the sentence the plaque leaves out.

6A · Sort — adds, contrasts, or changes the subject?

adds — which is why · moreover · besides · also **contrasts** — actually · although · however **changes the subject** — by the way **The one that does two jobs:** *actually*. It contrasts (*actually, it was 1931*) and it changes the subject (*actually, while I think of it...*). *besides* is the second candidate — it adds, and in speech it often dismisses.

6B · Chunk completion 1 of · 2 of · 3 way · 4 why · 5 across · 6 says

6C · Three that are not interchangeable 1 **However** — it joins two sentences, after a full stop or semicolon. *Although* would need one clause, not two sentences; *actually* would correct something nobody said.

2 **Although** — it joins two clauses inside one sentence. *However* would leave a comma splice; *actually* would make the first clause a correction.

3 **actually** — it corrects the date the listener was about to assume. *However* and *although* would both need a second idea, and there is only one here.

6D · Contrast Clinic — commas or no commas

1 Add commas: *The hall, which was built in 1884, is the oldest.* There is one hall. Without commas the sentence implies there are others. **2 Add commas.** There is one pier. **3 No commas.** The clause identifies which woman. **4 Add commas.** A name is already unique, so the clause can only be non-defining. **5 No commas.** The clause says which building. **6 No commas** — and *that* is right here, because *only* makes the clause defining.

7C · Make it mean something **With commas:** one brother. **Without:** more than one, and the clause says which. The pause does carry it — most partners get it from the pause alone, and the ones who do not are usually hearing a pause that was not there, which is why the comma has to be on the page.

12A · Recycle — ten items 1 which · 2 who · 3 of which · 4 from · 5 across · 6 will be living · 7 must have broken · 8 told · 9 had already started · 10 who / that

A2.2 · Unit 9 · Four Claims, Enough for Three

0B · Guess it The guest-house owner and the man at the back by the door. The guest-house owner has her claim folder closed on her knee and is the only person not looking at the figures on the board — she has no insurance and has already decided she will not plead for it in a room. The man by the door has brought nothing at all and is standing, which is what people do when they have come to listen rather than to ask.

1B · Sort — the money, the process, or the judgement?

the process — allocate · priority · request **the judgement** — equal · fair · limited **the money** — grant · fund · relief **Only a judgement when there is not enough:** *priority*. With enough money it is merely an order of work. With 180,000 against 246,000 it becomes a statement about whose loss matters more, which is why nobody uses the word in the meeting.

2A · One hundred and eighty thousand 📶 Track 9.1 1 c) 246,000 · **2 b)** Most · **3 b)** Neither · **4 a)** all four partly **Table** — 1: the hall, floor and wiring, 52,000; partly insured; it is the only building the whole town uses. 2: the terrace, four households, 61,500; insured; four families are still displaced. 3: the guest house, 58,000; no insurance; it is somebody's entire income. 4: the boatyard, slip and shed, 67,000; no insurance; eleven jobs depend on it.

Noticing — About money: 4 (*None of it can be carried over*). You can tell from the verb: *none of it can*, singular, with an uncountable noun. The other three take plural verbs or *of them*.

3D · Use — controlled 1 None · 2 Most · 3 neither · 4 None · 5 all · 6 some · 7 all

3E · Use — guided 1 **None** — zero out of more than two. *Neither* would need exactly two.

2 **Neither** — zero out of exactly two. *None* is possible and loses the two-ness.

3 **Most** — more than half. *Both* would need two; *all* would be too strong.

4 **Some** — a bit, but not much. (*Accept a little**.) * *Any* would need a negative or a question.

5 **Either** — one or the other of exactly two. *Both* would mean the committee must take the pair.

5C · Answer 1 €180,000; €246,000 asked for; four claims.

2 Forty-five thousand each leaves two of them with less than half of what they need, which means neither of those two can start work at all. Equal shares of an insufficient sum can be the least useful way of spending it.

3 Whoever estimated most optimistically in March.

4 Because it requires saying out loud that the other two matter less.

5 **First come**. Two of the four submitted in March and have been quietly assumed into the budget ever since.

6 That picking none of the four and splitting the difference is also a choice — and the only one that nobody will later be able to explain.

5D · Vocabulary in context **defensible** — able to be justified if challenged, which is not the same as right · **an insufficient sum** — not enough, whatever you do with it · **optimistically** — high, in March, when nobody knew · **privately believe in** — think is right and will not say · **splitting the difference** — taking a middle course with no principle behind it

5E · The counter-text 1 Claim 1, the hall floor and wiring, 52,000. Claim 2, the terrace, four households, 61,500. Claim 3, the guest house, 58,000. Claim 4, the boatyard slip and shed, 67,000. Total 238,500 — a shortfall of 58,500.

2 **Claim 2**, by 7,500 — from 69,000 in March to 61,500 in April. The reduction is not minuted, and the margin note says he found a cheaper contractor and nobody asked him to.

3 8,000 held, none of it spent. **Nothing may be carried over:** any sum unspent at 31 December returns to the county.

4 Which claims are insured — claims 1 and 2 yes, claims 3 and 4 no. It is the column the *by need* argument rests on, and it is the only column the reading never quotes.

6A · Sort — countable or uncountable?

countable — requests · claims · dehumidifiers · forms · people **uncountable** — supply · fuel · funding · money · relief **Quantifiers:** *many / a few / several* with the countable column; *much / a little / a great deal of* with the uncountable one. *supply* is countable in the plural (*supplies ran out*), which is the one worth arguing about.

6B · Chunk completion 1 of · 2 of · 3 of · 4 of · 5 up · 6 not

6C · Three that are only ever about two 1 × *Both of the four* → **Two of the four claims are from businesses**. *Both* takes exactly two.

2 × *Neither of the three* → **None of the three has insurance**.

3 ✓ **Already correct**.

4 × *Neither of them have* → **Neither of them has replied.** *Neither* takes a singular verb in careful written English.

6D · Contrast Clinic — which quantifier

1 Either 2 all 3 Most 4 Neither 5 None 6 None

7C · Make it mean something *We funded **THREE** of them* answers an accusation — somebody has said the committee funded fewer, or none, and the stress corrects the number. *We funded three of **THEM*** corrects who, not how many, and is answering a different accusation: that the money went somewhere else.

12A · Recycle — ten items 1 All · 2 None · 3 Neither · 4 out · 5 round · 6 which · 7 will be living · 8 must have broken · 9 told · 10 so

A2.2 · Unit 10 · The Town That Came Back

0B · Guess it The tide mark on the hall wall. Everything else has been painted over, and that one line has been cut round — you can see the brush edge above and below it. **Who decided:** the committee, at the meeting where they voted to keep the hall. Nothing in the picture says so, and the brush edge says somebody was told not to paint it.

1B · Sort — about a person, a place, or both?

about a person — identity · newcomer · reputation · outsider **both** — belong · memory **about a place** — local · community **Given to you by other people, always:** *reputation*. You cannot have one by yourself. (*Accept outsider for the same reason — it is a status conferred, never claimed.*)

2A · The brochure  Track 10.1 **1** c) three years · **2** c) incomplete · **3** b) add a page · **4** a) a public meeting **Table** — The agency wants the line and three years of use; it is afraid of a town that argues with its own campaign. Sinéad wants the visitors and the money; she is afraid of the hall closing before the plasterboard arrives. Eimear wants the seven households in the story; she is afraid of a town that spent a year insisting on accurate times agreeing to a sentence it would not accept about anybody else.

Noticing — **Any town:** 1 and 3. **This one:** 2 and 4. The word doing the work is **the**.

3D · Use — controlled 1 An / The · 2 a · 3 The · 4 a · 5 the · 6 the · 7 the

3E · Use — guided 1 The water came in at about ten. (*this water*)

2 — (*nothing*) Water is heavier than people think. (*water in general*)

3 She wrote a letter. The letter was two pages long.

4 — (*nothing*) Truth matters.

5 The truth about the drain took fourteen months.

6 It is a story about a town, not the story of this one.

5C · Answer 1 Because the photographs are of real people doing real things, nobody is pretending the hall is finished, and the line is three years of unpaid work.

2 From somebody in the town, in the hall, in February. Nobody wrote down who.

3 Seven of fifty-one. Two sold, two were bought out, and three are simply not here with the houses shut.

4 Fourteen per cent. Nobody markets a place with a number like that, and the people who left are not available to be photographed.

5 The town did come back — with seven households fewer, a sea wall decision it has not made,

and a hall it has decided to keep without quite saying why. *Came back* is true and is not the whole of it.

6 That the story is true and is also an edit — and it is aimed at the town itself, which has spent a year insisting on accurate times and is about to accept a sentence about itself it would not accept about anybody else.

5D · Vocabulary in context **the cynical one** — the easy article the writer refuses to write · **bought out** — paid to leave, which is not the same as selling · **an edit** — a true account with things taken out · **insisting on** — demanding, over a year, which is what makes the acceptance awkward · **available to be photographed** — the quiet reason the seven are missing from the brochure

5E · The counter-text 1 "THE TOWN THAT CAME BACK", with six photographs.

2 **Appear:** 51 households, 8 months, 200 people, 1884. **Do not:** the seven households who have gone, the fourteen per cent, and anything about how far from finished the hall is.

3 "Campaign funded by the county council and the regional tourism fund. Photographs by residents."

4 Photograph 4: "the hall, in use again". The hall is in use and is not finished — and no caption anywhere says it is finished, which is how the page stays true.

6A · Sort — concrete or abstract?

abstract — change · identity · reputation · truth · community · memory **concrete** — boat · wall · pier · hall **Articles:** the concrete nouns take *a/the* freely. The abstract ones take no article when general (*truth matters*) and *the* when particular (*the truth about that night*).

Two abstract ones that can be concrete: *community* — *a community of fifty-one households* is a countable group of people. *change* — *have you got change?* and *a change of clothes* are both physical.

6B · Chunk completion 1 thing · 2 of · 3 who · 4 end · 5 up · 6 that

6C · Abstract nouns and the article **memory:** *Memory is unreliable.* · *The memory of that night is unreliable.* · *A memory nobody else has.*

change: *Change is slow.* · *The change in the harbour took eleven years.* · *A change that nobody voted for.*

community: *Community is what kept the hall open.* · *The community in the lower town is smaller now.* · *A community of fifty-one households.*

6D · Contrast Clinic — a, the, or nothing

1 the 2 The 3 The 4 — (*nothing*) 5 a / a 6 — (*nothing*)

7C · Make it mean something The second claims the town as the subject of a known story rather than an example of a kind. *The* asserts that both the story and the town are already identified — which is exactly what a campaign is for, and exactly what Eimear objects to, because it makes one account the account.

12A · Recycle — ten items 1 The · 2 — (*nothing*) · 3 a / a · 4 them · 5 that · 6 Neither · 7 which · 8 will be living (*Unit 7*) · 9 had already started · 10 is
