English Animated — B1.1 • Taking a Position

Jengo House, Nairobi

About this volume

English Animated B1.1 • *Taking a Position* — Jengo House, Nairobi.

This volume contains **10 of 10 units**, written in full: every text, every task, every figure drawn. Units are 20 pages each at B-level and 22 at A-level, which is the extent specified in the series plan.

B1.1 • Unit 1 • Ground Floor

English Animated • *Taking a Position* • Jengo House, Nairobi Student's Book pages 8–27 • 20 pp • ~11.5 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

Ngong Lane, 10.40 on a Tuesday — Jengo House is cut open on the left. The stall on the corner has been there thirty-one years.

Who is a city built for?

By the end of this unit you will tell the story of how one street changed, in 90 seconds, to someone who has never seen it.

◆ A • THE WORLD	How a street changes, who changes it, and who is still there afterwards
◆ B • THE SYSTEM	Three past tenses working together · the past perfect, returning · 24 words for urban space and change · 21 markers of time and sequence · elision in fast speech
◆ C • THE PERFORMANCE	A 90-second spoken account of a changed place, and a 140-word written one

0A • Find it

Look at the picture. Find and label these fourteen things. Four of the eighteen words are not in the picture — which four?

pavement · kerb · hoarding · scaffolding · awning · bowser · matatu · paving slab · frontage · planning notice · ground floor · roof terrace · fire escape · sewing machine · security grille · satellite dish · skip · cherry picker

0B • Guess it

Three things in this picture will not be there in five years. Which three, and what makes you think so? There is no correct answer — but there is a better and a worse reason.

0C • Say it

Record thirty seconds. *Who is this street built for?* Say what you think now. Do not prepare. You will listen to this again at the end of the unit, and record it a second time.

Part 1 • Vocabulary Lab 1 ◆ B • THE SYSTEM

1A • Meet — the street, named

Tap or look at the picture in Part 0 and find the thing each word names. Write the word.

plot · frontage · hoarding · scaffolding · kerb · pavement · tenant · landlord · rent · derelict · demolish · redevelop

6in}

Sixty metres of Ngong Lane, then and now — Shaded = what it is now. Dashed outline = what it was in 2010. One shape has not changed.

Use the plan. Which plot changed most? Which changed least? Put the seven plots in order — then do 1B with the same seven, and see whether your two orders agree.

1B • Sort — how much is destroyed?

Put these seven verbs in order, from the one that changes least to the one that changes most.

repaint · **redevelop** · refit · convert · extend · **demolish** · **do up**

Compare with a partner. You will not agree about all of them. The useful question is *what are you measuring* — how much of the building survives, how much it costs, or how long people have to leave?

1C • Sort — odd one out, and why

In each group, one word does not belong. Cross it out **and write the reason**. More than one answer can be defended.

1. tenant · landlord · resident · developer
2. demolish · redevelop · do up · knock down
3. rent · rates · mortgage · deposit
4. hoarding · scaffolding · awning · frontage

1D • Stretch — what goes with what?

Tick the combinations that are normal English. Then find the one combination nobody says, and say what people use instead.

	rent	permission	a building	a stall	the kerb
raise					
grant					
put up					
run					
re-lay					

1E • Stretch — the phrases

Complete each phrase with one word.

1. The shop is **set back** _____ **the road**, so people walk past it.
2. The building is _____ **use** — flats above, workshops below.
3. _____ **rents** have pushed out four businesses on this street.
4. There has been **a change of** _____ on the ground floor: it was a timber store, now it is offices.
5. Three of the old tenants were _____ **out** and moved two miles away.

Corpus Note In a 1.2-billion-word corpus, **redevelop** appears beside *site*, *area* and *scheme* almost every time. It appears beside **home** fewer than five times in a billion words. What is that choice doing?

1F • Own it

Describe a street you know, using **six** of this unit's words and one word you had to look up. Tell a partner. Your partner's job: which word did you look up?

Part 2 • Listening ♦ A • THE WORLD

2A • Three people on the same street 🎧 Track 1.1

6in}

Three people, one street, ten years — Each is turned towards something different. That is the task.

Before you listen. Look at the picture in Part 0 again. Who do you think will be pleased about the changes to this street, and who will not? Why?

Gist — one listen, one question, no second chance. Which of the three would move away tomorrow if they could?

Detail — listen again and complete the frame.

The street was ...	The street is ...	The street will be ...
---------------------------	--------------------------	-------------------------------

Grace
Mr Kamau
Tom

Inference. Grace never says she is worried. How do you know she is? Write down the exact words that told you.

Attitude. Mr Kamau says "*it's progress.*" Which **sound** tells you how he feels about it — not which word?

Noticing. Here are six sentences from the recording. Sort them into three groups.

1. *The ground floor was still the timber place.*
2. *They took that out.*
3. *Nobody told us anything.*
4. *It was empty for eight months.*
5. *The people who were here then have gone.*
6. *By the time I came back, they had already started.*

- A.** This was going on, around the story. · **B.** This was already true before the story started. · **C.** This happened once and finished.

You do not need to name the tenses. You will do that in Part 3.

2B • Decoding clinic Track 1.2

Forty-two seconds of Grace at full speed. You will hear it **four times**. A different job each time.

1. How many words are there in her first sentence?
2. Catch the three numbers.
3. Find two places where two words join into a single sound.
4. What disappeared from *didn't know*?

Transcripts for both tracks are on page 171. Do not look until you have finished.

Part 3 • Grammar Lab 1 B • THE SYSTEM

Three past tenses, working together

3A • Notice

Go back to the six sentences in Part 2. Answer these five questions. Every answer is in the sentences.

1. Sentence 2 (*They took that out*) — did this take a long time, or was it one event?
2. Sentence 1 (*was still the timber place*) — is this one event, or a situation that lasted?
3. Which of the six sentences describes something that happened **before** the rest of the story?
4. What are the three words in sentence 6 that tell you it came first?
5. Sentence 5 has two parts. Which part is the background, and which is the news?

3B • See

{width=6.

6in}

Three past tenses, one story — The shapes carry the meaning. The names come afterwards.

3C • Know

	Use it for	Example
past simple	one completed event; the spine of the story	They took the timber out.
past continuous	what was going on around that event; the background	The building was standing empty.
past perfect	what was already true before the story started	By then they had already started .

Watch out. The past perfect is not "more past". It marks **what was already true when the story began**. If every past sentence in your paragraph is a past perfect, none of them is doing any work.

Why it matters. Get this wrong and your reader puts the events in the wrong order. *When I arrived, they left* and *When I arrived, they had left* describe two different mornings.

3D • Use — controlled

Complete the text. Use the past simple, the past continuous or the past perfect.

Mwangi (1) _____ (open) the stall in 1994. At that time the lane (2) _____ (be) mostly workshops, and people (3) _____ (repair) radios and bicycles all day. He (4) _____ (rent) his two metres of frontage from a man called Otieno, who (5) _____ (die) in 2009. By the time the first tower (6) _____ (go) up, Otieno's son (7) _____ already _____ (raise) the rent twice. For eleven days Mwangi (8) _____ (work) by lamp, because the new building (9) _____ (block) the sun until ten in the morning. He (10) _____ (not complain). He (11) _____ (buy) a brighter lamp.

3E • Use — guided

These six events are in the wrong order. Put them in the right order, then **write the connecting sentences**. You will need at least one past perfect and one past continuous.

- the drivers moved three streets away • the second tower took the open ground •
- Mwangi rented the frontage from Otieno • Otieno died • the first tower was finished •
- Mwangi was working by lamp for eleven days

3F • Use — open

Tell a partner about a place that changed on you. It can be a street, a building, a shop, a room. Your partner must be able to say afterwards, without asking, **what was already true before your story started.** If they cannot, tell it again.

3G • Check — six items, mark your own

1. When we arrived, the meeting _____ already _____. (start)
2. I _____ (walk) past the site every morning that year.
3. She _____ (sign) the lease on the Tuesday and _____ (move) in on the Friday.
4. By 2016 four of the fourteen businesses _____ (close).
5. _____ (you / live) here when they knocked it down?
6. He _____ (not realise) the consultation _____ (end).

0-3 → Workbook pp. 6-8 before you go on. **4-5** → the Contrast Clinic in Part 6 will fix it. **6** → the extension task on p. 19.

Why this sentence puts the events in the wrong order

✗
By the time I arrived, they demolished it.

The dot sits after the boundary, so the reader is told the demolition happened after you arrived. That is not what the writer meant.

✓
By the time I arrived, they had demolished it.

The dot sits before the boundary. The reader now knows the building was already gone when you got there.

What the writer thought:
The writer treated the past perfect as decoration. It is the thing that fixes the order of events, and without it the sentence says something else.

{width=6.

6in}

Why this sentence puts the events in the wrong order — Why this sentence puts the events in the wrong order

Part 4 • Speaking ◆ C • THE PERFORMANCE

4A • Fluency sprint — 4 / 3 / 2

Describe the street you live on. **Four minutes** to a partner. Then change partner: the same description in **three minutes**. Then change again: **two minutes**. Same content every time. Do not add anything. The only thing that changes is you.

The same forty metres, 2010 and 2026

Learner A sees the left panel. Learner B sees the right. Neither sees the other.

2010

bicycle repair · tailor · timber

2026

tailor · offices · tower

Describe, do not point. You may not show each other.

9 differences — find them all

Language Bank — three levels of formality. Choose, do not mix.

informal	<i>it's not what it was · they've done the whole lot up · it's gone really</i>
neutral	<i>the area has changed a lot · they put up two towers · most of the old shops have gone</i>
formal	<i>the character of the street has altered considerably · the site was redeveloped in 2014</i>

4C • The performance — the residents' meeting

A • Wanjiru runs the workspace. *Public: wants a decision today.* • **B • Obi** runs a logistics startup. *Public: wants to sell.* • **C • Mariam** is a textile designer. *Public: will not move.* • **D • Tom** consults on data. *Public: wants the numbers first.* • **E • Mr Kamau** is the landlord. *Public: neutral.* • **F • Grace** cleans the building. *Public: has not been asked.*

4D • Observer

One person in each group does not take a role. You listen for **two things only**, and report for thirty seconds at the end:

- Who was interrupted, and by whom?
- Who was never asked a question?

4E • Two criteria

Rate yourself on these and nothing else.

☐ Did I give a reason **every** time I disagreed? ☐ Did I bring in someone who had not spoken?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

You will read a feature article called "**The last shop on the corner**". The first line is:

Mwangi Njoroge has been taking in trousers on the same corner of Ngong Lane for thirty-one years.

What do you expect the article to argue? Write one sentence. You will check it at 5D.

5B • Skim — sixty seconds

Read the whole text in one minute. Do not stop at words you do not know. Answer one question: **where does the article turn?** Mark the paragraph.

The last shop on the corner

Mwangi Njoroge has been taking in trousers on the same corner of Ngong Lane for thirty-one years. In that time three buildings have gone up around him and two have come down. His stall has not moved by a metre.

When he started, the lane was mostly workshops. People repaired things here — radios, shoes, bicycles, trousers. The building that now houses Jengo House was a timber store, and the plot next to it was open ground where matatu drivers parked and argued. Mwangi rented his two metres of frontage from a man called Otieno, who died in 2009, and whose son raised the rent twice and then forgot about it.

The first tower went up in 2014. Mwangi remembers the week it was finished, because for eleven days he could not see the sun until after ten in the morning, and he was working by lamp. The second one took the open ground. The drivers moved three streets down and most of them never came back.

"People ask me if business is worse," he says. "It is not worse. It is different. Before, I repaired work clothes. Now I take in suits for young people who have just started earning and bought the wrong size online."

He is not sentimental about it. He points out that the new buildings brought him the customers he has now, and that the lane had been dangerous after dark for years before anyone built anything.

But he also notes that of the fourteen businesses that were on this stretch when he arrived, his is the only one still trading. The others did not fail. Their rent went up, and they moved somewhere cheaper, and then that place got expensive too.

5C • Close reading

1. What was on the plot next to Jengo House before the second tower?
2. Why did Mwangi work by lamp for eleven days?
3. Mwangi says business is "*not worse — different.*" Give two pieces of evidence from the text.
4. What does the article tell you about Otieno's son, and what does that detail do in the piece?
5. **The last paragraph says the other businesses "did not fail". What did happen to them?**
6. Mwangi makes one point in the developers' favour. What is it?

5D • Vocabulary in context

Work out what each word means from the sentence around it. **Then rate how sure you are:** ○ guessing ● fairly sure ● certain.

frontage • stretch (*on this stretch*) • sentimental • trading • take in (*take in trousers*) • the lane had been dangerous

5E • The counter-text

The planning notice on the hoarding
Everything on it is legible. Read the small print before you answer question 5.

CITY PLANNING DEPARTMENT

NOTICE OF APPLICATION FOR DEVELOPMENT PERMISSION

Application reference	DP/2026/00418/A
Site address	Plots 14–18, Ngong Lane
Applicant	Westrand Holdings (Nominee) Ltd
Date published	4 February 2026

Description of proposal

Demolition of existing single-storey structures and erection of a nine-storey building comprising commercial floorspace at ground and first floor with residential units above, together with associated access, servicing and landscaping.

Representations

Any person may make representations in writing. Representations must be received within 21 days of the date of publication shown above.

Representations close	25 February 2026
Send to	Development Control, PO Box 30075

Representations received after the closing date will not be taken into account. Copies of the application may be inspected at the public counter between 09:00 and 15:00, Monday to Thursday. A fee is payable for copies. The absence of a representation shall not be taken to indicate support for or objection to the proposal.

The reference you need to look anything up

The applicant is a nominee company, not the developer

Published — not posted, not delivered

Nine storeys. The notice never says how tall that is

21 days from publication, not from seeing it

Written only. No phone number anywhere

Counter open 24 hours a week, and you pay for copies

{width=6.6in}

The planning notice on the hoarding — Everything on it is legible. Read the small print before you answer question 5.

Read the notice and answer.

1. What is being proposed?
2. By what date did an objection have to be received?

3. Where would you have had to send it?
4. How many people are named in this document?
5. Look at today's date. What can a resident of Ngong Lane do now?

5F • Writer analysis

The article names four people. The planning notice names none.

- What is each document **for**?
- Who is each one written **for**?
- The article never mentions the consultation window. Should it have?

5G • Text against text

Both documents are true. **Which one would you put on the hoarding, and why?** Give your answer in two sentences. The second sentence must begin "*The problem with that is...*"

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Time and sequence — the connective tissue

6A • Register sort

Which of these would you find in the **planning notice**, and which only in **speech**? Three belong in both.

by the time · back then · thereafter · ever since · up to that point · subsequently · from then on · before long · previously · at first · later on · in the meantime

6B • Chunk completion

Complete from memory. Then find each one in the Part 5 texts and check.

1. _____ the time the first tower went up, the rent had risen twice.
2. The plot was open ground. _____ then, nobody had built on it.
3. He has had the same pitch _____ since 1994.
4. The drivers left, and _____ long the café closed too.
5. _____ first the lamp was enough. _____ on he bought a brighter one.

6C • Semantic map

Put all twenty-one markers into four zones. Some belong in more than one — say which and why.

EARLIER · AT THE SAME TIME · LATER · A BOUNDARY (*a moment that divides before from after*)

6D • Contrast Clinic — past simple against past perfect

Six items. In each, **only the time marker decides**.

1. The objection period _____ (close) on the fourteenth.
2. When the notice went up, the objection period _____ (already / close).
3. By 2016, four businesses _____ (leave).

4. In 2016, four businesses _____ (leave).
5. She read the notice the day after it _____ (expire).
6. She read the notice on the day it _____ (expire).

Say in one sentence what the difference is between each pair. Not the rule — the difference in what happened.

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

Why Grace was hard to follow

Why Grace was hard to follow Nothing is being swallowed carelessly. English does this on purpose, and fast.		
last place	→	las place the /t/ goes between two consonants
next door	→	nex door the /t/ goes again
ground floor	→	groun floor the /d/ goes
didn't know	→	didn know the /t/ goes, the /n/ stays
used to be	→	use to be /d/ + /t/ become one /t/

{width=6.

6in}

Why Grace was hard to follow — Nothing is being swallowed carelessly. English does this on purpose, and fast.

7A • Hear

last place → *las(t) place* · next door → *nex(t) door* · ground floor → *groun(d) floor* · didn't know → *didn(t) know* · used to be → *use(d) to be*

Listen. In each pair, which sound disappears?

7B • Say

Choral, then alone, then inside the sentence it came from: *"The ground floor was still the timber place, so the whole building smelled of wood."*

7C • Make it mean something

Say this sentence twice — once with the elisions, once with every consonant pronounced.

I don't know what they used to do next door.

Which one sounds like a person? Which one sounds like a document being read aloud? **When would you want the second?**

7D • Fluency 20

Twenty seconds on **the street I grew up on**. Three times, each one faster, same content. Record the first and the third. Listen to both.

Part 8 • Writing ♦ C • THE PERFORMANCE

How a place changed • 140 words

Jengo House in section — Each floor carries what it was built for, and what it is used for now.

8A • Read the model

The road I grew up on is called Station Road, and there has not been a station on it since 1968. [opens in the present, then goes back – the reader needs the now first]

When we moved there in 2004 it was mostly houses, with a post office at one end and a garage at the other. The garage had already been there for forty years, and the man who ran it had learned the trade from his father. [past perfect – the only one in the text, and it is doing real work]

Then the bypass opened. Traffic that had come through the village went around it instead, and within three years the post office had closed, the garage had closed, and a developer had bought both sites.

There are eleven new houses now, and they are good houses. The people in them drive to the supermarket. Nobody walks up Station Road any more, because there is nothing on it to walk to. [who gained and who lost – stated, not implied]

Questions about the writer's choices, not the rules:

1. Why does the writer start in the present and then go back?
2. There is one past perfect in paragraph two and three in paragraph three. Why the cluster?
3. The last sentence gives a reason. What would be lost if it were the first sentence?

8B • The anti-model

Station Road was built in 1890. The station closed in 1968. We moved there in 2004. There was a post office and a garage. The bypass opened in 2011. The post office closed in 2012.

The garage closed in 2013. A developer bought both sites. There are eleven new houses now. The people drive to the supermarket.

This is grammatically correct. **Why is it worse?** Name three specific things the model does that this does not.

8C • Generate

Five minutes. List every place you can think of that has changed in your lifetime. Do not judge them. Then choose one — the one you have most to say about, not the most dramatic.

8D • Plan

where it was → what it was like → **the single event that changed it** → what had already been true before that → what it is now → who gained, and who lost

8E • Draft 1 — 140 words

8F • Peer review — two criteria only

Swap. Read once. Answer only these, then sign.

☐ Can I tell the order of events **without re-reading**? ☐ Do I know **who gained and who lost**?

8G • Draft 2

8H • Publish

Your redraft goes on the class wall. **One of these will be the source text for Unit 2's mediation task**, so someone will have to explain yours to a person who has never been there.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

WORK FILE • The Inbox

Six messages reached Jengo House between 8.00 and 11.30 on one Tuesday.

One Tuesday morning in the inbox

Six messages between 08.02 and 11.26. Two look urgent and are not.

JENGO HOUSE — SHARED INBOX

	FROM	SUBJECT	TIME
•	A. Kamau	Re: Re: Re: the building	08:02
•	Brightline Contractors	Confirming Thursday 7am start	08:40
•	M. Achieng	Leaving at the end of the month	09:15
○	Residents group	NOISE — again	09:50
•	Sawa Supplies	Invoice 4471 — OVERDUE	10:33
•	A. Kamau	A thought	11:26

A. Kamau — "A thought" — 11:26

Dear all — I hope this finds everyone well. I have been giving some thought to the position of the building and to the various conversations we have had over recent months, and I think it may be helpful for us all to have a broader discussion at some point about the longer term, in light of a number of factors, some of which you will be aware of. Nothing urgent. I will be in on Thursday if anyone would like to talk.

Best, A.K.

Third reply in a thread nobody can find

"Confirming" — nobody agreed this

Proper notice. Not an emergency

Already read. Already ignored twice

Shouting in the subject line. Due in nine days

Ninety words. No request, no deadline, no subject

{width=6.

6in}

One Tuesday morning in the inbox — Six messages between 08.02 and 11.26. Two look urgent and are not.

	From	Subject	
1	A. Kamau (landlord)	Re: Re: Re: the building	08.02
2	Brightline Contractors	Confirming Thursday 7am start	08.40
3	M. Achieng (tenant, 2nd floor)	Leaving at the end of the month	09.15
4	Residents' group	NOISE — again	09.50
5	Sawa Supplies	Invoice 4471 — overdue	10.33
6	A. Kamau (landlord)	A thought	11.26

9A • Triage

Rank all six by **urgency**. Then rank them again by **importance**. They are not the same list. Where the two lists disagree, say which one you would act on and why.

9B • Decode

Message 6 is ninety words long and says nothing. Read it.

Dear all — I hope this finds everyone well. I have been giving some thought to the position of the building and to the various conversations we have had over recent months, and I think it may be helpful for us all to have a broader discussion at some point about the longer term, in light of a number of factors, some of which you will be aware of. Nothing urgent. I will be in on Thursday if anyone would like to talk. Best, A.K.

What is this message for? Three questions:

1. What has already happened, that this message is a response to?
2. Why is it ninety words and not nine?
3. If you reply, what are you agreeing to?

9C • Write the two that matter

Sixty words each. Not the easy ones.

- **To Brightline Contractors.** Nobody agreed Thursday. Work starts at 7am and there are tenants asleep upstairs. You need it moved, and you need to keep the contractor.
- **To M. Achieng.** She is leaving. You would rather she stayed, but you are not going to beg, and she has given proper notice. Something useful has to happen in sixty words.

9D • Transfer — do this before next week

Look at your own inbox, or your own messages. **Find one message that was written to avoid saying something.** Bring it. You do not have to say who sent it.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

Ngong Lane, 2016–2026 — Everything this unit has told you, on one page. Half the class sees the left of it.

10A • Relay

Half the class sees the **left** of the infographic. Half sees the **right**. You may not show each other. **Rebuild the whole thing by speaking.** Twelve minutes.

10B • Simplify — for a named person

Explain the planning notice from Part 5 to **Grace**. She has eleven minutes between floors and no legal English. She needs to know what she can still do.

Plan before you speak: what it is → what it means for her → what she can still do → by when

10C • Compress

The 286-word article into **60 words** for a noticeboard. Then defend three of your cuts to a partner who disagrees with all three.

10D • Online interaction

Now write the same thing as a message in the residents' WhatsApp group.

It will be screenshotted. Assume Mr Kamau will see it. Assume the developer's agent is in the group and nobody remembers adding them.

10E • Across languages

Take 10B or 10C. Say it in **your own language**. Then bring it back into English. **What moved?** Not what was lost — what moved.

Part 11 • The Decision ◆ C • THE PERFORMANCE

The offer on the ground floor

A developer has offered to buy Jengo House. The price is good — better than the building is worth on any normal valuation, because what they want is the plot.

Six tenants. Three positions.

- **Obi** wants to take it. His share would fund two years of the logistics business, which is eleven months from either working or not working.
- **Mariam** will not move. Her industrial machines are bolted through the floor into the slab. The nearest unit that could take them is forty minutes away and costs more.
- **Grace** has cleaned the building for six years. There is no contract. Nobody has asked her, and she has not raised it.

11A • The evidence — three formats, no two agree

1. **The offer letter.** Reproduced in full on page 25.
2. **The figures, below.**
3. **The voice.** Grace, forty seconds, lifted from Track 1.1.

{width=6.

6in}

What tenants paid after four nearby sales — Rent in the three years after the building changed hands, indexed to the year of sale.

11B • Steelman — first

Before you argue for your own position, **argue for the one you disagree with**, as well as its best advocate would. Two minutes. Your partner judges whether you were fair to it.

11C • Deliberate

In threes, against this frame:

I think they should _____, because _____. The strongest argument against me is _____, and my answer to it is _____.

Phrase bank: *the money would · the real cost is · what nobody has asked is · I'd rather lose the premium than · in three years' time we'd be*

11D • Decide

Eighty words. Commit. Two reasons.

11E • Model decision

I think they should refuse, and I think Obi has the strongest case against me, so let me take it first. He is eleven months from knowing whether his business works, and a share of this sale buys him two years. If it fails because the money came too late, no amount of loyalty to a building will have been worth it. That is a real cost and I am not going to pretend otherwise.

But the chart tells us what happens to the tenants afterwards, and in three of the four comparable sales the rent they ended up paying was higher within eighteen months. The fourth is the one everyone cites, and it is the one where the buyer was a cooperative. This buyer is not. Selling converts a problem they can see into a problem they cannot.

And Grace has not been asked. Six years, no contract, and she is not in the room where the building she cleans is being sold. Whatever they decide, that part is already wrong.

11F • The Reveal

What actually happened. They refused. Obi stayed, and the logistics business did work — though he says the eighteen months were worse than they needed to be. Two years later the landlord raised the rent by forty per cent anyway, and **Mariam left**, because she could not absorb it and the machines were the one thing she could not take cheaply. Grace is still there. She now has a contract, which Wanjiru drew up the week after the meeting, because the discussion made it impossible not to notice.

Now answer this, and it is the real question of the unit:

The outcome was bad for the person the decision was supposed to protect. **Was the reasoning wrong?**

Part 12 • Landing ♦ all three lines

12A • Recycle — twelve items

Six from this unit.

1. By the time the notice went up, the objection period ____ (close).
2. For eleven days he ____ (work) by lamp.
3. The lane ____ (be) mostly workshops when he started.
4. Four businesses were ____ out by rising rents.
5. The ground floor has had a change of ____.
6. ____ then, nobody had built on the open ground.

Four from *Telling the Story* (A2.2).

7. She said she ____ (not receive) the letter. (*reported speech*)
8. ____ the time we arrived, they had gone. (*past perfect*)
9. ____ of the fourteen businesses are still trading — only one. (*quantifiers*)
10. He rented it from ____ man called Otieno. (*articles*)

Two from *Making Plans* (A2.1).

11. The developer, _____ bought both sites, has not started work. (*relative clause*)
12. If the rent _____ (go) up again, Mariam will have to move. (*first conditional*)

12B • Consolidate

120 words, one piece of continuous writing. Describe the ten years of Ngong Lane from the infographic in Part 10. You must use **both** past tense patterns from this unit and **at least six** of the time and sequence markers from Part 6. One paragraph. No bullet points.

12C • Can-do, with evidence

Tick only what you can show.

I can...	My evidence	Sure?
tell a story about the past using three tenses together without losing my reader	your Part 4C recording	☐ ☒ ☒
describe how a place has changed and say who gained and who lost	your Part 8 draft 2	☐ ☒ ☒
take notes while someone speaks and retell what they said accurately	your Part 10A relay	☐ ☒ ☒
state a position on a local decision and give two reasons for it	your Part 11D decision	☐ ☒ ☒

12D • Replay

Find your thirty seconds from Part 0C. Listen to it. Now record the same thirty seconds again: **Who is this street built for?** Listen to both, one after the other. Write one sentence about what changed.

12E • Glossary — forty-five items, as a map

THE STREET · pavement · kerb · plot · frontage · the corner · the ground floor · a block of flats **THE BUILDING** · hoarding · scaffolding · derelict · mixed use · a change of use · do up **THE CHANGE** · demolish · redevelop · knock down · put up · priced out · rising rents · set back from the road **THE PEOPLE** · tenant · landlord · rent · planning permission · move out · the way things were · it's not what it was **BEFORE** · previously · formerly · originally · initially · up to that point · at first · to begin with · by then · date back **DURING** · meanwhile · overnight · in the meantime · at the time · carry on **AFTER** · eventually · subsequently · afterwards · thereafter · ever since · from then on · later on · before long · in the end **THE BOUNDARY** · by the time · until · no sooner had we...

12F • Next

Unit 2 • What does a price hide? Someone will have to explain your Part 8 text to a person who has never been there. It might be you. It might not.

B1.1 • Unit 2 • What It Costs To Make

English Animated • *Taking a Position* • Jengo House, Nairobi Student's Book pages 28–47 •
20 pp • ~11.5 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

Mariam's workshop, Thursday, 14.20 — Ground floor, Jengo House. Forty jackets are due in six weeks and the sample is still moving.

What does a price hide?

By the end of this unit you will present a true cost breakdown for one product — and defend every line of it.

◆ A • THE WORLD

What a thing costs to make, and who absorbs the difference

◆ B • THE SYSTEM

The perfect simple against the perfect continuous · the present perfect, returning · 24 words for cost and margin · 21 ways to say *finished* or *still going* · weak forms in perfect chains

◆ C • THE PERFORMANCE

A costed presentation with every line defended, and a 140-word written breakdown

0A • Find it

Find and label twelve things in Mariam's workshop. Four of these sixteen are not there.

bolt of cloth · cutting table · overlocker · industrial iron · pattern · toile · bobbin · thread stand · dye vat · offcuts bin · packing crate · invoice spike · loom · spinning wheel · rail of finished work · tape measure

0B • Guess it

The jacket on the rail sells for 4,800. **Write down what you think the cloth cost.** Keep the number. You will check it in Part 8.

0C • Say it

Record thirty seconds. *What does a price hide?* No preparation. You will record it again at the end of the unit.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

6in}

{width=6.

One jacket: who touches it, and who is paid when — Each arrow is money moving. The thickness is roughly what moves.

1A • Meet — follow the money

Use the network. Each arrow is money moving. Name the person or stage at each node.

supplier • wholesale • retail • markup • margin • overheads • invoice • deposit • instalment •
subsidy • undercut • cost

1B • Sort — who carries the risk?

Put the six people on the network in order, from **the one who is paid first** to **the one who is paid last**. Then answer: who carries the risk if nobody buys the jacket?

1C • Sort — odd one out, and why

- margin • markup • profit • overheads
- wholesale • retail • supplier • invoice
- deposit • instalment • subsidy • payment
- undercut • knock off • bump up • mark up

1D • Stretch — the phrases

Complete each with one word.

- Nobody will pay more than **the going** _____ for a plain jacket.
- At 4,800 she does not make money. She _____ **even**.
- The cloth is good and the stitching is good. It is **value for** _____.
- Her own eleven hours do not appear anywhere. That is _____ **work**.
- If you add it all up honestly, **it doesn't** _____ _____.

1E • Stretch — four phrasal verbs that all move a price

add up • knock off • mark up • bump up

Two of these make a price smaller. Two make it bigger. Which, and what is the difference between the two that make it bigger?

Corpus Note *Overheads* is almost never singular. *Margin* is singular five times in six. A learner who says "our overhead is high" will be understood, and will sound like a translation.

1F • Own it

Price something you have made, cooked, repaired or organised. Use six of these words. Include one cost you would normally forget.

Part 2 • Listening ♦ A • THE WORLD

{width=6.

6in}

The buyer, the jacket, and the phone — He is holding both. Look at which one he is turned towards.

2A • Forty jackets 📻 Track 2.1

Before you listen. Look at the picture. The buyer is holding a phone and a jacket. **Which is he looking at?**

Gist — one listen, one question. Does Mariam get the order?

Detail — complete the frame.

	What he says	What she hears
	About the price	
	About the quantity	
	About the timing	

Inference. He says "we've been looking at a few workshops." He has not been looking at a few workshops. **How can you tell?**

Attitude. Mariam says "*I can do that*" twice. The second one means something different. **Which sound tells you?**

Noticing. Six sentences from the recording. Sort them into two groups.

1. *I've made forty of these.*
2. *I've been making these for nine years.*
3. *We've spoken to three other workshops.*
4. *We've been speaking to a few people.*
5. *She's finished the sample.*
6. *She's been finishing samples all week.*

A. The speaker is interested in **the result** — it is done, here is how many. **B.** The speaker is interested in **the activity** — it has been going on.

2B • Decoding clinic Track 2.2

Thirty-eight seconds of the buyer at full speed. Four replays, four jobs.

1. How many times does he say *we've*?
2. Catch the three numbers.
3. *we've been* — how many sounds is that really?
4. What happens to *have* in *what have you*?

Transcripts, page 172.

Part 3 • Grammar Lab 1 B • THE SYSTEM

The result, or the activity

3A • Notice

Go back to the six sentences in Part 2.

1. Which sentences give you a **number**? What do they all have in common?
2. Which sentences give you a **length of time**?
3. *I've made forty* and *I've been making these for nine years* — which one tells you she is still doing it?
4. Try putting a number into sentence 2: *I've been making forty of these for nine years*. What goes wrong?
5. So: which form takes **how many**, and which takes **how long**?

3B • See

{width=6.

6in}

The result, or the activity — Both reach now. The difference is what you are pointing at.

3C • Know

	What it points at	Takes	Example
have/has + past participle	the result , counted up to now	<i>how many, how much</i>	<i>I've made forty.</i>
have/has been + -ing	the activity , running up to now	<i>how long, since, for</i>	<i>I've been making these for nine years.</i>

Watch out. Both forms reach now. The difference is not time — it is **what you are pointing at**. *I've painted the room* (it is finished) against *I've been painting the room* (there is paint on me).

Why it matters. *We've been speaking to a few workshops* and *we've spoken to three workshops* are both true. One of them is a negotiating position.

3D • Use — controlled

Complete with the perfect simple or the perfect continuous.

Mariam (1) _____ (work) on the ground floor since 2021. In that time she (2) _____ (make) more than nine hundred pieces, and she (3) _____ (train) four people. This month she (4) _____ (not sleep) much, because the sample (5) _____ (go) back and forth three times. "I (6) _____ (do) this for nine years," she says. "I (7) _____ (never have) an order cancelled after a deposit — but I (8) _____ (hear) stories all week."

3E • Use — guided

Rewrite each sentence so it points at the other thing. Then say what changes.

1. I've written three emails to them. → I've been ...
2. We've been looking for a supplier. → We've ...
3. She's been cutting cloth all morning. → She's ...
4. They've paid two instalments. → They've been ...

3F • Use — open

Tell a partner about something you have been doing for a long time, and something you have finished. Your partner must be able to say which is which without asking.

3G • Check — six items, mark your own

1. How long ____ you ____ (work) here?
2. I ____ (finish) all four of them.
3. She ____ (cut) cloth since seven this morning — look at her hands.
4. We ____ (speak) to three suppliers so far.
5. It ____ (rain), I think. The floor is wet.
6. He ____ (send) the invoice twice already.

0-3 → Workbook pp. 14-16. **4-5** → the Contrast Clinic in Part 6. **6** → p. 39.

Why this sentence counts the wrong thing

✗ I've been making forty of these for nine years.

forty — a count

now

A number is a result. It has to sit at the end of the span, not inside it. The sentence asks the reader to count an activity, which cannot be done.

✓ I've made forty of these. I've been making them for nine years.

forty — at the end

now

Two sentences, because there are two things to say: what has been produced, and how long the producing has been going on.

What the writer thought:
The writer thought the continuous was just a longer, more impressive version of the simple. It is not longer. It is pointing somewhere else.

{width=6.

6in}

Why this sentence counts the wrong thing — Why this sentence counts the wrong thing

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency sprint — 4 / 3 / 2

Describe something you own that was expensive. Four minutes, then three, then two, new partner each time.

4B • The functional core — saying what a price is made of

Two ways of showing the same price

Learner A sees the invoice. Learner B sees the breakdown. Neither sees the other.

what the buyer sees

one number, one name

4,800

what it is made of

cloth · trims · labour · overheads · margin

Only one of these can be argued with. Find out which, by describing.

7 differences — find them all

6in}{width=6.

Two ways of showing the same price — Learner A sees the invoice. Learner B sees the breakdown. Neither sees the other.

Language Bank

breaking it down	the cloth alone is ... · that's before overheads · if you take off the ...
defending a figure	I can show you where that comes from · that's eleven hours of work · I've priced this honestly
pushing back	I've had it done for less · that seems high for ... · what's your best on forty?
holding	I can do that, but something has to give · not at that price, no

Information gap. Learner A holds Mariam's real costing. Learner B holds the buyer's budget. Neither sees the other. Find out whether a deal exists at all.

4C • The performance — the costed pitch

Three minutes. One product. You must show where every figure comes from, and the group must ask you one question you did not prepare for.

4D • Observer

Listen for one thing: which figure did the speaker not explain?

4E • Two criteria

- ☐ Did I say where every number came from?
- ☐ Did I include something people usually leave out?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

A report extract called "**The cost of the cheapest option.**" The first line is:

Procurement teams are rewarded for the price on the invoice, and for nothing else.

What do you expect it to argue? One sentence.

5B • Skim — sixty seconds

Where does the argument turn? Mark the paragraph.

The cost of the cheapest option

Procurement teams are rewarded for the price on the invoice, and for nothing else. This is not a criticism of the people in them. It is a description of what their targets measure, and people hit the targets they are given.

The effect is well documented in manufacturing and almost undocumented in small-scale production, which is where most of the world's clothing is actually made. A buyer with a unit-price target will move an order to a workshop that quotes eight per cent lower. On the invoice, the saving is real. What the invoice does not carry is the four days of rework when the first batch comes back with the seams wrong, the two weeks of delay while a replacement is cut, or the senior fitter's time spent on a problem that the cheaper workshop was never equipped to avoid.

None of those costs appear in the procurement figure. All of them appear somewhere else.

The pattern repeats at every scale. A workshop that has been underpricing for years is not cheaper; it is subsidising its buyers with unpaid hours, deferred maintenance and, eventually, its own capacity to keep trading. When it closes, the buyer records no loss at all. The cost shows up as a sourcing problem eighteen months later, and nobody connects the two.

What makes this hard to correct is not that it is unknown. It is that the invoice is a single number with a name on it, and the other costs are spread across four departments, three quarters and one person's weekend. A number that can be pointed at will always beat a number that has to be assembled.

The workshops that survive are not the cheapest. They are the ones that learned to put the assembled number on the page before anybody asked for it.

5C • Close reading

1. What are procurement teams rewarded for?
2. Name three costs that do **not** appear on the invoice.
3. What does the writer say happens when an underpriced workshop closes?
4. **What does the writer mean by "a number that can be pointed at"?**
5. The last paragraph is one sentence of advice. What is it?
6. The writer says this is "not a criticism of the people". Why say that at all?

5D • Vocabulary in context

Infer first, rate your confidence, then check: ○ guessing ● fairly sure ● certain.

procurement · rework · underpricing · deferred · assembled (*the assembled number*) · subsidising

5E • The counter-text

The costing sheet
Everything is on it, including the line that is priced at zero.

MARIAM OKELLO • GROUND FLOOR, JENGO HOUSE

COSTING — JACKET, STYLE 114, BATCH OF 40

LINE	DETAIL	QTY	RATE	COST
Cloth	wool/poly 340gsm	2.1 m	620	1,302
Lining	viscose twill	1.4 m	84	118
Trims	thread/fusing/btn	—	—	186
Labels	woven + care	3	41	124
Cutting		1.5 h	150	225
Making		8.0 h	150	1,200
Finishing	press, check, bag	1.5 h	150	225
Overheads	rent/power/service	—	—	340
Sampling	11 h, three rounds	11 h	0	0
TOTAL COST PER PIECE		3,720		
SELLING PRICE		4,800		
MARGIN		1,080 (22.5%)		

Rates are the workshop rate, not the machinist rate. Overheads are apportioned across a normal month at 92 pieces. Cloth price is the one figure that moves with the market and is quoted at today. Sampling time is carried by the workshop and is not charged to any order.

The only figure that moves with the market

Eleven hours, given in hours before money

Apportioned, not guessed — across 92 pieces

Eleven hours at zero. Somebody paid for it

3,720 is the honest floor

22.5% is thinner than it looks on forty

The small print explains the zero

{width=6.

6in}

The costing sheet — Everything is on it, including the line that is priced at zero.

Read the costing sheet and answer.

1. What is the total cost of materials?
2. How many hours of labour are costed, and at what rate?
3. **Find the line that is priced at zero. Why is it there at all?**
4. What is the margin on one jacket, as a percentage?
5. The sheet has a figure the article says nobody puts on the page. Which line is it?

5F • Writer analysis

The article argues; the costing sheet asserts.

- Which of the two could you disagree with, and how would you do it?
- The article names nobody. The sheet names one person. What does that change?

5G • Text against text

The article says the assembled number should go on the page before anybody asks. The sheet does exactly that. Would you send it to the buyer? Two sentences. The second begins "*The risk is...*"

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Finished, or still going

6in}

Where the money is, inside one jacket — The same garment, opened out. Each layer is a line on the sheet.

6A • Sort — which group?

Put the twenty-one items into two columns: **this points at a result** • **this points at an activity**.
Three can go in both — say why.

finalised • outstanding • incomplete • steadily • repeatedly • keep at • ongoing • all morning •
gradually • twice already • for the last six months • intermittent • up to now • bit by bit • in one
go • provisional • I've been meaning to... • cumulative • get through • so far • throughout

6B • Chunk completion

- We've been at it _____ by _____, for six weeks.
- I'd rather do it _____ one _____ than come back three times.
- The invoice is still _____ — she hasn't been paid.
- Nothing is _____ until the buyer signs.
- I've _____ to call him since Tuesday.

6C • Collocation grid

Which adjectives go with which nouns? Find the one combination nobody says.

	costs	payment	work	progress
ongoing				
outstanding				
cumulative				
provisional				

6D • Contrast Clinic — simple against continuous

Six items. Only the time expression decides.

1. She _____ (cut) cloth since seven.
2. He _____ (chase) that invoice for a month.
3. She _____ (cut) forty of them.
4. We _____ (speak) to suppliers all week.
5. We _____ (speak) to three suppliers.
6. He _____ (send) the invoice twice.

Then, in one sentence each, say what the difference actually is.

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

Four words that become one

Four words that become one			
Nothing is being dropped carelessly. This is what the form sounds like at speed.			
I have been	→	aɪ v bɪ n	two syllables, not three
we have been	→	wɪ : v bɪ n	the /h/ never appears
he has been	→	hɪ : z bɪ n	's is /z/ here, not /s/
they have been	→	ð eɪ v bɪ n	been is weak: /bɪn/
what have you	→	wɒ t ə v j ə	have → /əv/, you → /jə/

{width=6.

6in}

Four words that become one — Nothing is being dropped carelessly. This is what the form sounds like at speed.

7A • Hear Track 2.3

I have been → *I've been* → /aɪvbi:n/ we have been → *we've been* → /wi:vbi:n/ he has been → *he's been* → /hi:zbi:n/ they have been → *they've been* → /ðeɪvbi:n/

7B • Say

Choral, then alone, then inside the sentence: "*I've been making these for nine years and I've never had one come back.*"

7C • Make it mean something

Say it twice: once naturally, once with every word fully pronounced. **Which one sounds like somebody defending their work?** Which sounds like a witness statement?

7D • Fluency 20

Twenty seconds on **something I have been doing for a long time**. Three times, faster each time. Record the first and the third.

Part 8 • Writing ♦ C • THE PERFORMANCE

A cost breakdown somebody will argue with • 140 words

{width=6.

6in}

Where 4,800 actually goes — Check this against the number you wrote down in Part 0B.

Go back to Part 0B. What did you guess the cloth cost? Look at the chart.

8A • Read the model

This is what the jacket costs us to make, and I would rather send it than be asked for it.
[opens by naming what the document is for – and why it arrived unrequested]

Cloth and lining are 1,420, and that is the one figure that moves with the market. Thread, fusing, buttons and the labels come to 310. Cutting and making is eleven hours; at our rate that is 1,650. [the labour line is given in hours first, then money – it is harder to argue with]

Overheads — the rent, the power, the machines being serviced — work out at 340 a piece across a normal month. That brings us to 3,720.

At 4,800 we are making 1,080 a jacket, and out of that comes the time I have been spending on samples, which I have never charged anyone for. I am not asking you to pay for it. I am telling you it is there. [the last line is the whole argument, and it is four words long]

Questions about the writer's choices:

1. Why give the labour in hours before giving it in money?
2. Why is the overheads line explained and the cloth line not?
3. The last sentence gives something away. Why is that stronger than hiding it?

8B • The anti-model

Jacket cost: materials 1,730, labour 1,650, overheads 340, total 3,720. Selling price 4,800. Margin 1,080 (22.5%). Please confirm.

Correct, complete, and worse. **Name three things the model does that this does not.**

8C • Generate • 8D • Plan

what it is → the figure that moves → the figure in hours → the figure people forget → the total
→ what is still not in it

8E • Draft 1 — 140 words

8F • Peer review — two criteria

☐ Could I argue with any single line, and know which one? ☐ Is there a cost in here that I would have left out?

8G • Draft 2 • 8H • Publish

To the class wall. **One of these is the source for Unit 3's mediation task.**

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

STUDY FILE • Source Check

Three sources make the same claim: *small workshops are 8–12% cheaper than factories.*

Three sources, one claim

All three say small workshops are 8–12% cheaper. Rank them before you read the small print.

THE SAME CLAIM, THREE TIMES

A — Industry newsletter, March 2026

"Independent workshops come in 8–12% below factory pricing on comparable garments." No method stated. No sample size. Links to a press release.

Published by	a trade newsletter
Paid for by	not stated

B — Peer-reviewed study, 2024

Compares unit price across 214 orders in one city over 18 months. Finds a mean difference of 9.4%, significant. Excludes rework, delay and cancellation, which the authors state clearly in the limitations section.

Published by	a university press
Paid for by	a research council
Measured	invoice price only

C — Buyer's procurement guide, 2025

"Our members report savings of 8–12%." Members are buyers. The figure is self-reported and not audited. The guide recommends a sourcing platform owned by the organisation that publishes it.

Published by	a buyers' association
Paid for by	its members, and a platform fee

No method at all — and it reads the most confident

Nobody will say who paid

214 orders, 18 months. This is real work

...and it measures only the invoice

Self-reported by the people who benefit

The publisher sells the solution

{width=6.

6in}

Three sources, one claim — All three say small workshops are 8–12% cheaper. Rank them before you read the small print.

9A • Rank them

Read all three. Rank them from most to least reliable **before** you read 9B.

9B • Ask the four questions

For each source: **Who made it? Who paid for it? What did they measure? What would change the answer?**

9C • The one that is hardest

Source B is the most carefully done and the least useful. Say why in one sentence.

9D • Write the note

Sixty words to a colleague who has only seen Source A, telling them what they would need to know before quoting it.

9E • Transfer

Find a number you have repeated to somebody this year. Where did it come from? Bring it.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

Forty jackets, from quote to payment — Half the class sees the costs. Half sees the payments. Neither sees both.

10A • Relay

Half the class sees the costs band, half sees the payments band. Rebuild the whole picture by speaking only. Twelve minutes.

10B • Simplify

Explain the costing sheet from Part 5 to **Didier**, who makes coffee, has never priced anything, and has eight minutes.

Plan: what the document is → the three big numbers → where the argument is → what you'd ask

10C • Compress

The 300-word article into 60 words for a WhatsApp group of workshop owners. Defend three cuts.

10D • Online interaction

Now write it as the message. **It will be forwarded to a buyer.** Write it knowing that.

10E • Across languages

Say 10B in your own language, then bring it back. **Which word had no equivalent?**

Part 11 • The Decision ♦ C • THE PERFORMANCE

The order at 4,100

The buyer will take forty jackets at **4,100**. Mariam's honest cost is **3,720**.

At 4,100 she makes 380 a jacket. At that margin, one batch of rework wipes out the order. She has been quoting 4,800 for two years and has never been asked to justify it until now.

- **Take it.** Forty jackets is six weeks of guaranteed work and the first order of this size.
- **Hold at 4,800.** Defensible, honest, and he has three other workshops on his phone.
- **Take it, and cut something.** Cheaper lining. Nobody would see it for a year.

11A • The evidence

1. **The costing sheet** from Part 5.
2. **The chart** from Part 8 — where the money actually goes.
3. **The voice.** The buyer, thirty seconds, from Track 2.1: *"We've been looking at a few workshops."*

11B • Steelman

Argue for the option you like least, as well as its best advocate would. Two minutes.

11C • Deliberate

I think she should _____, because _____. The strongest argument against me is _____, and my answer to it is _____.

11D • Decide — eighty words, two reasons

11E • Model decision

I think she should hold at 4,800 and say exactly why, in writing, on one page.

Taking 4,100 is not the disaster it looks like — 380 a jacket on forty jackets is still money, and six weeks of booked work has a value that does not appear on the sheet. I understand the argument and on a different week I might make it.

But the sheet is the thing that changes this. Two years of quoting 4,800 with nothing behind it is a position. A costed page is an argument, and she has never put one in front of a buyer. If he walks away from a costed page, he was always going to walk, and she will know that for the next buyer. If he does not, she has set the price for every order after this one.

Cutting the lining is the only option I would rule out entirely. It is the one choice that she could not put in writing.

11F • The Reveal

What happened. He went to another workshop and came back eleven weeks later, because the first batch had the seams wrong and the rework ate the saving — which is the article in Part 5, happening. He paid 4,650.

Mariam lost eleven weeks of work she had counted on. Two of her four machinists left during it, and one did not come back when the order arrived.

She was right, and it cost her two machinists.

Was the reasoning sound? And: is "I was right" worth anything, if you could not afford to be?

Part 12 • Landing ♦ all three lines

12A • Recycle — twelve items

Six from this unit.

1. She _____ (make) these for nine years.
2. She _____ (make) forty of them this month.
3. The invoice is still _____ — nobody has paid it.
4. At 3,720 she _____ even.
5. Eleven hours of her time is _____ work.
6. I've _____ to call him since Tuesday.

Four from Unit 1.

7. By the time the notice went up, the objection period _____ (close).
8. Four businesses were _____ out by rising rents.
9. _____ then, nobody had built on the open ground.
10. The ground floor has had a change of _____.

Two from *Telling the Story* (A2.2).

11. He said he _____ (not receive) the costing. (*reported speech*)
12. _____ of the four suppliers answered — only one. (*quantifiers*)

12B • Consolidate

120 words, one paragraph. Describe a month of work using **both** perfect forms and **at least six** items from Part 6. One continuous piece. No lists.

12C • Can-do, with evidence

I can...	My evidence	Sure?
distinguish a result from an ongoing activity, and choose the right form	Part 3G score	☐ ☒ ☒
break a price down and defend every line of it	Part 4C recording	☐ ☒ ☒
judge whether a number I have been given is worth repeating	Part 9D note	☐ ☒ ☒
take a position where both options cost something	Part 11D decision	☐ ☒ ☒

12D • Replay 🟡

Listen to Part 0C. Record it again. **Compare.** One sentence on what changed.

12E • Glossary — forty-five items, as a map

WHAT IT COSTS • cost • overheads • wholesale • retail • supplier • the going rate • a fair price • break even **WHAT YOU ADD** • margin • markup • mark up • bump up • the bottom line • value

meaning to...

12F • Next

Unit 3 • Is a name a choice? Somebody will have to explain your cost breakdown to a person who has never priced anything.

B1.1 • Unit 3 • The Name On The Door

English Animated • *Taking a Position* • Jengo House, Nairobi Student's Book pages 48–67 •
20 pp • ~11.5 hours

Part 0 • The Big Picture ♦ A • THE WORLD

6in}

The entrance of Jengo House, 08.55 — Nine name plates. One has been wrong for two years and nobody has said so.

Is a name a choice?

By the end of this unit you will write and record a 150-word professional introduction — the one that goes in front of people who have never met you.

◆ A • THE WORLD

What a name does, who gets to change it, and what it costs either way

◆ B • THE SYSTEM

Four futures, chosen not guessed · *going to* and the present continuous, returning · 24 words for identity and documents · 21 ways to commit, or not · contrastive stress

◆ C • THE PERFORMANCE

A recorded 150-word profile, and the decision about what name is on it

0A • Find it

Twelve things in the entrance of Jengo House. Four of these sixteen are not there.

buzzer panel · name plates · post rack · visitor book · lanyard · security desk · noticeboard · lift call button · fire plan · parcel shelf · bicycle rack · stair nosing · turnstile · barrier arm · metal detector · reception bell

0B • Guess it

Look at the name plates by the door. **One of them is wrong, and has been for two years.** Which, and how can you tell?

0C • Say it

Record thirty seconds. *Is a name a choice?* Unprepared. You will record it again at the end.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

The registration form everybody fills in once
Six boxes for a name. They do not all want the same thing.

JENGO HOUSE • TENANT REGISTRATION

SECTION 1 — IDENTITY

Legal name (as on passport) _____

FAMILY NAME (block capitals) _____

Given name(s) _____

Initials _____

Preferred name / what you go by _____

How should we say it? _____

SECTION 2 — STATUS

Citizenship _____

Residence status ☐ citizen ☐ resident ☐ visa ☐ other

Proof of address enclosed ☐ yes ☐ to follow

The name in Section 1 line 1 will appear on your lease, your invoices and your payment reference and can only be changed on production of a document. The preferred name will appear on your door plate, in the directory and on your lanyard and may be changed at any time by email. Where the two differ, correspondence will use line 1.

- The one that goes on everything official
- Block capitals — because systems lose the order
- The only box you control afterwards
- Almost no form asks this. This one does
- Four options, and "other" is a text field
- Read this line. It is the whole unit

6in}

The registration form everybody fills in once — Six boxes for a name. They do not all want the same thing.

1A • Meet — on the form

Find each word on the registration form, and say which box it belongs in.

identity • passport • visa • residence • citizenship • surname • initials • nickname • pronounce • spelling • transliterate • misspell

1B • Sort — cline of permanence

Put these in order, from **easiest to change** to **hardest**.

the name on a passport • citizenship • the name on a payslip • spelling on an email • nickname
• the name on a lanyard

Where exactly does it stop being a choice? Mark the point. People disagree about where it is.

1C • Sort — odd one out, and why

1. surname • family name • given name • legal name
2. passport • visa • residence • citizenship
3. misspell • transliterate • pronounce • translate
4. fill out • turn down • go by • sign off

1D • Stretch — the phrases

1. On the form it says Oluwafemi. Everyone calls him Femi — he _____ **by** Femi.
2. She **is** _____ **as** M. Achieng professionally and nothing else.
3. The bank wants a _____ **of address** before it will change anything.
4. **For the** _____, I have asked three times.

5. Mwangi is a _____ **name** here, and nobody in Lisbon could spell it.

1E • Stretch — four phrasal verbs on one form

fill out · turn down · go by · sign off

Which two are things *you* do to a form, and which two are things *somebody else* does to you?

Corpus Note *Transliterate* appears in English about once in nine million words. *Spell* appears about once in twenty thousand. If you need the first word, the person you are talking to may not have it.

1F • Own it

Write your own name three ways: as a form wants it, as a colleague would say it, as you would introduce yourself at a conference. **Are all three the same? Should they be?**

Part 2 • Listening ♦ A • THE WORLD

6in}

Four calls, one afternoon — She is dreading one of them. Her feet are pointing at the answer.

2A • Three ways to say what happens next 📞 Track 3.1

Before you listen. Wanjiru is making four calls in one afternoon. Look at the picture: **which call is she dreading?**

Gist — one listen, one question. Which of the four things is already arranged?

Detail — complete the frame.

What she says	Is it decided?	Who decided it?
"I'm seeing him on Thursday."		
"I'm going to tell him."		

What she says

Is it decided?

Who decided it?

"I'll call you back."

"The lift goes out of
service at six."

Inference. She says "I'll call you back" to one person and "I'm calling you back at four" to another. **Which one is she more likely to actually do?**

Attitude. She says "I'm going to have to" twice. Which sound carries the reluctance?

Noticing. Four sentences. Sort them by what the speaker is really doing.

1. I'm seeing Mr Kamau on Thursday.
2. I'm going to ask him about the lease.
3. I'll ask him, if you want.
4. The lease runs out in March.

A. a fact on a timetable · **B.** decided at this moment, for you · **C.** arranged with another person · **D.** my intention, decided before now

2B • Decoding clinic Track 3.2

Forty seconds of Wanjiru at speed. Four jobs.

1. Count the contractions in the first sentence.
2. Catch the three times.
3. Where does *going to* become one sound?
4. I'll — what happens to the /w/?

Transcripts, page 173.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

Four futures, and why you would choose each one

3A • Notice

Return to the four sentences in Part 2.

1. Which one involves another person who also knows?
2. Which one was decided before the conversation started?
3. Which one was decided *during* the conversation?
4. Which one would still be true if everybody forgot about it?
5. Try swapping 1 and 3. What goes wrong socially — not grammatically?

3B • See

{width=6.

6in}

Four futures — which one are you choosing? — None of these is more correct. They commit you to different things.

3C • Know

Form	What it signals	Example
present continuous	an arrangement — somebody else knows too	<i>I'm seeing him on Thursday.</i>
going to	an intention formed before now	<i>I'm going to ask about the lease.</i>
will	a decision made at this moment, often for someone	<i>I'll ask him, if you want.</i>
present simple	a timetable — not yours to change	<i>The lease runs out in March.</i>

Watch out. *I'll send it* and *I'm sending it* are both correct and they promise different things. The first is a decision. The second is a plan that already exists — and is therefore harder to get out of.

Why it matters. Choosing the wrong future does not produce a grammar mistake. It produces a commitment you did not mean to make, or a vagueness the other person can hear.

3D • Use — controlled

Wanjiru (1) _____ (meet) the landlord on Thursday; it has been in the diary for a week. She (2) _____ (tell) him about the lift, because she decided that on Monday and has been rehearsing it since. If he refuses, she (3) _____ (take) it to the tenants — she has just this second thought of that. The lease (4) _____ (run out) in March whatever anybody does. "I (5) _____ (not do) this by email," she says. "I (6) _____ (sit) in front of him."

3E • Use — guided

Rewrite each one so it commits **more**, then so it commits **less**. Say what changes socially.

1. I'll look at it.
2. We're going to review the contract.
3. I'm meeting them next week.

3F • Use — open

Tell a partner four things about your next month — one arrangement, one intention, one thing you are deciding right now, one timetable. Your partner must be able to say which is which.

3G • Check — six items

1. — The phone's ringing. — I _____ get it.
2. I _____ (see) the dentist at four; it's been booked for weeks.
3. The train _____ (leave) at 06:12.
4. I've decided — I _____ (tell) her tomorrow.
5. — Can somebody help? — I _____.
6. We _____ (move) office in March. The lease is signed.

0-3 → Workbook pp. 22-24. 4-5 → Part 6. 6 → p. 59.

Why this answer sounds like a brush-off

✗
— Have you sorted the lease? — I'll do it.

decided now, because you asked

●

you asked

will puts the decision after the question. The listener hears that nothing existed until they raised it — which may be true, and is rarely what you want them to hear.

✓
— Have you sorted the lease? — I'm doing it on Thursday.

●

already arranged

you asked

The present continuous puts the plan before the question. Same information, completely different impression of whether you were on top of it.

What the writer thought:

The writer thought will was the neutral, polite future. It is the one that says "I had not thought about this until you spoke".

6in}

Why this answer sounds like a brush-off — Why this answer sounds like a brush-off

Part 4 • Speaking ◆ C • THE PERFORMANCE

4A • Fluency sprint — 4 / 3 / 2

Your next three months. Four minutes, three, two. New partner each time.

4B • The functional core — committing, and not committing

Two diaries, one Thursday

Learner A holds the left. Learner B holds the right. Find out what can actually be agreed.

what is already arranged

2 fixed · 1 provisional · 1 cancelled

✓

✗

what still needs a slot

3 urgent · 1 that can wait a month

You may describe. You may not show.

8 differences — find them all

{width=6.

6in}

Two diaries, one Thursday — Learner A holds the left. Learner B holds the right. Find out what can actually be agreed.

Language Bank

a firm commitment	I'm sending it on Tuesday · that's in the diary · you have my word on it
an intention	I'm going to · I fully intend to · that's the plan
deliberately soft	I'll try to · I should be able to · let me see what I can do
a refusal that sounds like one	I'm not going to be able to · that's not something I can commit to

Information gap. Learner A has a diary with four fixed things. Learner B has four things they need done. **Find out what can actually be agreed.** Nobody may show the page.

4C • The performance — the name conversation

In pairs, three rounds, swapping roles. Somebody says your name wrong for the third time.

Card A — you are the one whose name it is. You have corrected them twice. **Card B** — you are friendly, busy, and you genuinely have not noticed.

4D • Observer

Listen for **one thing**: at what point does the correction stop being about the name?

4E • Two criteria

☐ Did I make exactly the commitment I meant to, and no more?

☐ Did I leave the other person a way to agree?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

A fiction extract called "**The second name.**" The first line is:

For eleven years my mother called me by a name that is not on any document I own.

What do you expect? One sentence.

5B • Skim — sixty seconds

Where does the narrator change their mind? Mark it.

The second name

For eleven years my mother called me by a name that is not on any document I own. It is four letters long and it means nothing in particular. She says she chose it before I was born and then put something longer on the certificate because the registrar was watching.

At school I used the long one. At home I was the short one. It did not feel like a secret; it felt like weather — something that changed depending on which room you were in.

The trouble started when the two rooms met. A teacher came to the house and used the long name in front of my mother, and I watched my mother decide, in about half a second, not to correct her. That was the first time I understood that one of the names was going to have to win.

I am going to say that I chose the long one, and that is almost true. What actually happened is that the long one was already on things. It was on the register, the library card, the inoculation record, the bank account somebody opened for me when I was nine. Choosing the short one would not have been a choice; it would have been nineteen separate arguments with nineteen institutions, each of which would have asked me for a document carrying the name I was trying to leave.

So I did not choose. I let the paperwork choose, which is what most people mean when they say they chose.

My mother still uses the short one. I am forty-one. When she dies, nobody alive will call me by it, and I have started to mind about that in a way I did not expect, because for eleven years I thought the short name was the one that did not count.

5C • Close reading

1. Why did the long name go on the certificate?
2. What does "*it felt like weather*" describe?
3. What did the narrator understand when the teacher visited?
4. **The narrator says "I am going to say that I chose... and that is almost true." What is the gap between those two things?**
5. List the five institutions named. What do they have in common?
6. What changed when the narrator reached forty-one?

5D • Vocabulary in context

registrar • inoculation record • carry (*carrying the name*) • mind (*I have started to mind*) • count (*the one that did not count*)

5E • The counter-text

The name-change form

Count the fees. They are not in one place.

REGISTRY OF PERSONS · FORM NC/2

APPLICATION TO RECORD A CHANGE OF NAME

Form fee

1,000

Name to be recorded

Name as currently held

Documents to be enclosed

#	DOCUMENT	ORIGINAL?	FEE
1	Birth certificate	original	—
2	National identity card	certified copy	400
3	Passport (if held)	certified copy	400
4	Proof of address, under 3 months	original	—
5	Statutory declaration	original, sworn	2,500
6	Two passport photographs	—	600

Witnesses

The statutory declaration must be witnessed by two persons who have known the applicant for not less than five years and who are not related to the applicant by blood or marriage.

Applications are processed in the order received. The registry does not give an estimated processing time. Gazette publication, where required, is arranged separately and carries its own fee. The former name is retained on the record and will continue to appear on any document issued before the date of change. Changing the name held by any other body is the responsibility of the applicant.

One fee, before you have read anything

Six documents. Two must be originals

A sworn declaration — the expensive line

Two people, five years, not family

No processing time is given anywhere

The old name stays on the record for ever

Nineteen other institutions are your problem

{width=6

6in}

The name-change form — Count the fees. They are not in one place.

Read the name-change form and answer.

1. How many documents must be enclosed?
2. What must the two witnesses be?
3. **How long does the form say the process takes, and where does it say that?**
4. What happens to the old name?
5. **Count the places where a fee is payable.**

5F • Writer analysis

The extract is one person's account. The form is nobody's.

- The extract says choosing would have meant "nineteen separate arguments". Does the form support that, or contradict it?
- Which document is more honest about what the process costs?

5G • Text against text

Which one would you give to somebody who had just decided to change their name? Two sentences. The second begins "But they would also need..."

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Committing, and getting out of it

6in}

How bound are you? — The same promise, at six strengths. Each layer is harder to leave.

6A • Cline — how bound are you?

Put all twenty-one on a line from **fully committed** to **free to walk away**.

intend • arrange • promise • commit • expect • aim • anticipate • hesitate • provisionally •
imminently • shortly • be due to • be about to • be set to • be thinking of • be likely to • look set
to • as things stand • put off • back out of • I was going to...

6B • Chunk completion

1. The lease is _____ to expire in March.
2. He was _____ to sign, and then he read clause nine.
3. I'm _____ of asking for an extension.
4. _____ things _____, we have until Friday.
5. She _____ out of it the night before.

6C • Register sort

Which of these would you write in a contract, and which only say out loud? Four belong in both.

6D • Contrast Clinic — the four futures

Six items. Context decides.

1. She _____ (start) on the fourteenth — contract's signed.
2. We _____ (announce) it on Monday; the press release is written.
3. The building _____ (close) at seven, every day.
4. Don't worry, I _____ (sort) it out.
5. I _____ (not sign) that, and I've thought about it for a week.
6. — There's someone at the door. — I _____ go.

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

Saying which word matters

Moving the stress moves the question — One sentence, five readings. Each answers something different.

7A • Hear 🎧 Track 3.3

The same sentence, five times. The stress moves. Each one answers a different question.

I'm seeing him on Thursday. • I'm **seeing** him on Thursday. • I'm seeing **him** on Thursday. •
I'm seeing him **on** Thursday. • I'm seeing him on **Thursday**.

Match each one to the question it answers.

7B • Say

Say each version. Your partner says which question you answered. If they get it wrong, say it again — do not explain.

7C • Make it mean something

I didn't say she stole the money.

Seven words, seven meanings. Say it three ways. Your partner writes down what you accused her of.

7D • Fluency 20 🟡

Twenty seconds: **what I am doing next month, and what I am going to do.** Three times, faster.

Part 8 • Writing ♦ C • THE PERFORMANCE

A professional introduction • 150 words

{width=6.

6in}

What people actually remember from a profile — Three hundred readers, shown one profile for forty seconds, asked an hour later.

8A • Read the model

I'm Mariam Okello. Mariam is what I go by; Okello is the family name and the one on anything official. [deals with the name in sentence two, briskly, so nobody has to wonder]

I make clothes — jackets mostly, in small runs, from a workshop on the ground floor of Jengo House in Nairobi. I have been doing it for nine years and I trained four of the people who now work with me.

What I am good at is the part most workshops find difficult: taking a design that exists as a drawing and turning it into something that can be made forty times without changing. [one specific claim, not three vague ones]

I am not taking new wholesale orders until March. I am taking sampling work, and I am happy to look at anything with a real deadline on it. [says what is closed before what is open]

If you want to see the work, come to the building. I would rather show you than send photographs.

Questions about the writer's choices:

1. Why handle the name in sentence two rather than leaving it?
2. There are two futures in paragraph four. Why those two and not *will*?
3. The last line refuses something. Why is that a strong ending?

8B • The anti-model

My name is Mariam Okello. I am a passionate and detail-oriented garment professional with 9+ years of experience delivering high-quality results for a diverse portfolio of clients. I am always looking for exciting new opportunities and would love to connect.

Grammatically perfect. **Name three things it does not tell you.**

8C • Generate • 8D • Plan

who you are and what you go by → what you actually do, concretely → the one thing you are good at that others find hard → what is closed → what is open → how to see it

8E • Draft 1 — 150 words

8F • Peer review — two criteria

☐ Could I pick this person out of ten similar people? ☐ Do I know exactly what to do next if I want to work with them?

8G • Draft 2 • 8H • Record it

Read your own profile aloud, recorded, in under sixty seconds. **It goes next to the text.**

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

CULTURE FILE • Translating the Untranslatable

9A • Four words with no clean equivalent

Read the four. For each: what does it do that no single English word does?

saudade (Portuguese) • **harambee** (Swahili) • **jugaad** (Hindi) • **Verschlimmbessern** (German)

9B • The other direction

Here are four English items that resist translation. Try them in your own language.

fair play • *privacy* • *accountable* • *awkward*

Which was hardest, and was it hard because of the word or because of the idea?

9C • Bring one

Bring one word from your language that English has to explain in a sentence. Teach it to the group. Then write the sentence English needs.

{width=6.

6in}

What happens to a name when it crosses — Four routes. Only one of them is a decision the person made.

9D • The name question

Some names translate. Some transliterate. Some do neither.

Which of these is happening: *Giuseppe* → *Joseph* • *محمد* → *Mohamed* • *Nguyễn* → *Nguyen* • *Siobhán* → *Shivawn*

And which of the four is a decision somebody made about themselves?

9E • Transfer

Ask one person this week how their name should be said, and whether the version people use is the one they chose. **Bring what they said, not what you assumed.**

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

One name, nineteen institutions — Half the class sees the documents. Half sees the people. Neither sees both.

10A • Relay

Half the class sees the documents band; half sees the people band. Rebuild it by speaking.

10B • Simplify

Explain the name-change form from Part 5 to somebody who has decided to do it and has an hour before the office closes. **What do they need to know first?**

Plan: what it is → what they need before they start → what it costs → what takes longest

10C • Compress

The 330-word extract into 60 words, for someone deciding. **Three cuts defended.**

10D • Online interaction

Write the one message you would send a colleague who has been spelling your name wrong for six months. It will be read once, quickly, probably on a phone.

10E • Across languages

Introduce yourself in your own language, then in English. **What did you have to add in English that your language leaves out — and what did you have to drop?**

Part 11 • The Decision ♦ C • THE PERFORMANCE

Joseph, or the other thing

Didier runs the café on the ground floor. His full name is Didier Nsengimana. For two years the biggest account — a company that orders ninety coffees a week — has called him **Dee**.

It began as a shortening. It is now on their internal system, on the standing order, and on the reference that appears on every payment. Changing it means changing the reference, which means their finance team reopening the account.

- **Leave it.** It is a nickname, they are friendly, and ninety coffees a week is ninety coffees.
- **Correct it once, properly, in writing.** Make it easy. Accept the risk that it is a nuisance to them.
- **Correct it and ask them to change the payment reference too.** The whole thing, done once.

11A • The evidence

1. **The standing order record** — the name as their system holds it.
2. **The chart:** how often a correction is actually made, and by whom.
3. **The voice.** Lin, from A1.1, twenty-five seconds: *"I changed mine in my first month here. It was easier. Now nobody at work knows my real name and I don't know how to start."*

11B • Steelman

Argue the option you like least. Two minutes.

11C • Deliberate

I think he should _____, because _____. The strongest argument against me is _____, and my answer to it is _____.

11D • Decide — eighty words, two reasons

11E • Model decision

I think he should correct it once, in writing, and not ask them to change the payment reference.

The full correction is the one I would want to be right, and I think it is wrong here. The payment reference is their system's problem and it is genuinely expensive to change — reopening an account is a week of somebody's attention. Asking for it turns a thirty-second courtesy into a favour, and favours get remembered as difficulty.

But leaving it entirely is worse, and Lin's recording is why. The cost of saying nothing is not felt in the first year. It is felt when the wrong name has been true for so long that correcting it would need an explanation, and the explanation is the thing nobody has time for.

So: one line, friendly, with the spelling, and no request attached to it. The reference can stay wrong. The person saying it out loud ninety times a week is the one that matters.

11F • The Reveal

What happened. He sent one line. Four people started saying Didier within a week. The finance system still says **D NSENG** and the payment reference has never changed.

Eight months later a new account manager arrived, read the system, and called him Dee.

He fixed the people and not the paperwork, and the paperwork refilled the people.

Was the reasoning sound? And what, exactly, would the full fix have cost?

Part 12 • Landing ♦ all three lines

12A • Recycle — twelve items

Six from this unit.

1. I _____ (see) him on Thursday — it's in the diary.
2. The lease _____ (expire) in March whatever we do.
3. — There's a call for you. — I _____ take it.
4. She _____ out of it the night before.
5. On the form it is Oluwafemi, but he _____ by Femi.
6. The bank wants _____ of address first.

Four from Units 1–2.

7. She _____ (make) these for nine years. (*perfect continuous*)
8. At 3,720 she _____ even. (*Unit 2 lexis*)
9. By the time the notice went up, the period _____ (close). (*past perfect*)
10. Four businesses were _____ out by rising rents. (*Unit 1 lexis*)

Two from *Telling the Story* (A2.2).

11. The hall, _____ is the only building above the flood line, is still used. (*non-defining*)
12. He _____ (work) on the wall when the water came. (*past continuous*)

12B • Consolidate

120 words, one paragraph. Your next three months: one arrangement, one intention, one timetable, one thing you are refusing. Use at least six items from Part 6.

12C • Can-do, with evidence

I can...	My evidence	Sure?
choose a future form to make exactly the commitment I mean	Part 3G score	☐ 1 ●
write and record a professional introduction people remember	Part 8 recording	☐ 1 ●
explain an official form to somebody who has to act on it today	Part 10B	☐ 1 ●
take a position on something that is about me	Part 11D decision	☐ 1 ●

Unit 4 • Who is responsible for your health?

B1.1 • Unit 4 • Nobody's Job

English Animated • *Taking a Position* • Jengo House, Nairobi Student's Book pages 68–87 •
20 pp • ~11.5 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

Jengo House, the parts nobody owns — Twelve things in this picture are somebody's responsibility. Three have no name against them.

Who is responsible for your health?

By the end of this unit you will chair a ten-minute meeting on a workplace health policy and write the three lines that make it real.

◆ A · THE WORLD

Duty, consent, and what happens when a responsibility has no name on it

◆ B · THE SYSTEM

Obligation, permission and prohibition — now and in the past · *have to* and *must*, returning · 24 words for care and duty · 21 ways to say the same obligation differently · modal weak forms

◆ C · THE PERFORMANCE

A chaired meeting, minuted, with one decision somebody can act on

0A · Find it

Twelve things in the building that are somebody's responsibility. Four of these sixteen are not in the picture.

fire extinguisher · first-aid box · accident book · fire door · exit sign · evacuation plan · trailing cable · blocked corridor · hand sanitiser · signage · stair handrail · spill kit · defibrillator · eyewash station · fire blanket · emergency lighting

0B · Guess it

Three of these have nobody's name against them. Which three, and how would you find out?

0C · Say it

Record thirty seconds. *Who is responsible for your health?* Unprepared.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

{width=6.

6in}

Who owes what to whom — Each line is a duty. Two of them are drawn dashed, because nobody has ever confirmed them.

1A • Meet — who owes what to whom

Use the network. Each line is a duty. Name the word at each node.

consent • duty • liable • entitled • carer • patient • referral • treatment • prescription • insurance • waiver • exemption

1B • Sort — cline of obligation

Order these from **absolute** to **optional**.

a courtesy • a preference • a duty of care • standard practice • a right • a recommendation

Where does it stop being enforceable? Mark it. Then argue about where you marked it.

1C • Sort — odd one out, and why

- liable • entitled • responsible • accountable
- consent • waiver • exemption • permission
- referral • prescription • treatment • diagnosis
- opt out • look after • sign up for • fall through

1D • Stretch — the phrases

- Every employer has a **duty of** _____ to the people in the building.
- She signed a _____, which means she cannot claim afterwards.
- He is _____ **to** two weeks' sick leave and does not know it.
- You can use the equipment, but **at your own** _____.
- The clinic has a six-month **waiting** _____.
- They are **under no** _____ to tell you.

1E • Stretch — four phrasal verbs about responsibility

opt out · look after · sign up for · fall through

Three are chosen. One happens to you. Which?

Corpus Note *Liabile* and *responsible* look like synonyms and behave differently. *Responsible* takes *for* about 70% of the time. *Liabile* takes *for* or *to* — and *liable to* usually means *likely to*, not *answerable to*.

1F • Own it

Name one thing in your workplace, home or course that is everybody's responsibility and therefore nobody's. Use five of these words.

Part 2 • Listening ♦ A • THE WORLD

Three people, one problem, no name on it
Watch who is facing whom. One of them has not turned round at all.

Wanjiru
chairing

Mr Kamau
landlord

Priya
seven months

{width=6.

6in}

Three people, one problem, no name on it — Watch who is facing whom. One of them has not turned round at all.

2A • It's not our building 🎧 Track 4.1

Before you listen. Three people, one problem, nobody's name on it. **Who do you think will speak the most?**

Gist — one listen, one question. By the end, has anybody agreed to do anything?

Detail — complete the frame.

	What they say they can't do	What they say somebody else should do
Wanjiru		
Mr Kamau		

What they say they
can't do

What they say
somebody else should
do

Priya

Inference. Mr Kamau says "*we were never required to.*" **Required by whom? He does not say. Why not?**

Attitude. Priya says "*fine*" twice. The second one is not agreement. **Which sound?**

Noticing. Six sentences. Sort them into three groups.

1. *We have to put a ramp in.*
2. *We had to put a ramp in.*
3. *We don't have to put a ramp in.*
4. *We didn't have to put a ramp in.*
5. *We mustn't block that door.*
6. *We weren't allowed to block it.*

A. no obligation · B. prohibition · C. obligation And then: **which three are about now, and which three are about then?**

2B • Decoding clinic Track 4.2

Forty seconds of Mr Kamau. Four replays.

1. How many times does he say *have to*?
2. What does *have to* sound like at speed?
3. Catch the two dates.
4. *we were never* — where do the words join?

Transcripts, page 174.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

Must, have to, and the past that has no must

3A • Notice

Return to the six sentences.

1. Which two mean "it is forbidden"?
2. Which two mean "it was not necessary"?
3. *We don't have to* and *we mustn't* — one is freedom and one is a ban. Which is which?
4. Write the past of *we must put a ramp in*. **What happened to must?**
5. Why do you think English made *have to* do the past of *must*?

3B • See

Obligation, from binding to free		
Two of these are opposites that look like variants.		
no choice	must / have to	you are obliged — there is no version where you do not
	had to	you were obliged. must has no past; this is it
	be supposed to	expected, and everybody knows it is sometimes skipped
	should / ought to	advised. a real cost if you do not, but not a rule
	can / may / be allowed to	permitted. the door is open
	don't have to / needn't	released. the door is open and you may leave
	needn't have	you did it, and it turned out not to be necessary
forbidden	mustn't / isn't allowed to	forbidden. the opposite of the two above
	mustn't and don't have to are opposites, not variants. One forbids; one releases.	

{width=6.

6in}

Obligation, from binding to free — Two of these are opposites that look like variants.

3C • Know

	Now	Past
obligation	must / have to	had to (<i>must has no past</i>)
no obligation	don't have to / needn't	didn't have to / didn't need to
prohibition	mustn't / can't	wasn't allowed to / couldn't
permission	can / may / be allowed to	could / was allowed to

Watch out. *Mustn't* and *don't have to* are opposites, not variants. *You mustn't sign it* forbids. *You don't have to sign it* releases.

Why it matters. In a meeting about who is responsible, the difference between *we weren't required to* and *we weren't allowed to* is the whole argument.

3D • Use — controlled

Under the 2016 lease the landlord (1) _____ (maintain) the common parts, but he (2) _____ (not / provide) accessible facilities, because the building predates the rule. Tenants (3) _____ (not / block) the fire doors — that one has never been optional. When the studios were converted, the architect (4) _____ (submit) a plan, and because the change of use was granted before 2019 she (5) _____ (not / include) a ramp. Today, anybody doing the same conversion (6) _____ (include) one.

3E • Use — guided

Rewrite each so it means the opposite kind of thing, and say what changed.

- We don't have to tell the tenants. → (*make it a prohibition*)
- You mustn't use that door. → (*make it a release*)

3. He had to sign it. → *(make it "it wasn't necessary")*
4. They weren't allowed to park there. → *(make it "they didn't need to")*

3F • Use — open

Describe one rule at your work, school or home that has changed. What did you have to do before? What do you have to do now? What are you no longer allowed to do?

3G • Check — six items

1. You _____ smoke here — it's a hospital. *(prohibition)*
2. I _____ come in on Saturday, but I did anyway. *(no obligation, past)*
3. Everyone _____ sign the accident book. *(obligation)*
4. We _____ use the lift during the works. *(prohibition, past)*
5. She _____ pay the fee; students are exempt. *(no obligation)*
6. Before 2019 they _____ install a ramp. *(no obligation, past)*

0–3 → Workbook pp. 30–32. **4–5** → Part 6. **6** → p. 79.

Why this sentence gives permission instead of refusing it

✗
You don't have to sign this — it's not safe.

don't have to releases the listener. It says the choice is theirs. If the point is that signing would be wrong, this sentence invites it.

✓
You mustn't sign this — it's not safe.

mustn't forbids. The listener now knows there is no version of this where signing is acceptable.

What the writer thought:
The writer treated mustn't as a stronger don't have to. It is not stronger. It points the other way.

6in}

Why this sentence gives permission instead of refusing it — Why this sentence gives permission instead of refusing it

Part 4 • Speaking ◆ C • THE PERFORMANCE

4A • Fluency sprint — 4 / 3 / 2

One rule you have to follow and think is wrong. Four minutes, three, two.

4B • The functional core — chairing

The same ten minutes, chaired and not chaired
Learner A holds the lease. Learner B holds the inspection. Neither sees the other.

forty minutes, no decision

"revisit at a future meeting"

Describe only. Find out whose obligation this is.

8 differences — find them all

ten minutes, one decision

Obi · three quotes · 14 March

{width=6.6in}

The same ten minutes, chaired and not chaired — Learner A holds the lease. Learner B holds the inspection. Neither sees the other.

Language Bank

opening

we're here to decide one thing · I want us out of here by ...

bringing in

Priya, you've not said anything — what's your read? · can I hear from someone who disagrees?

holding the line

we'll come back to that · that's a different meeting · park it

landing it

so what I'm hearing is ... · who's doing it, and by when? · is anyone unhappy with that?

Information gap. Learner A has the lease. Learner B has the inspection report. Neither sees the other. **Find out whose obligation this actually is.**

4C • The performance — chair ten minutes

Six people, one problem, one decision. **You are the chair.** You must end with a named person and a date, or with a written statement of why there isn't one.

4D • Observer

Listen for **one thing**: how many times was the decision nearly made before it was made?

4E • Two criteria

☐ Did the meeting end with a name and a date? ☐ Did I bring in the person who had not spoken?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

An archive document: an inspection report from 2019. The first line is:

The premises were found to be in substantial compliance with the regulations then in force.

What do you expect this document to be used for, years later?

5B • Skim — sixty seconds

Find the one sentence that everything since has depended on.

The 2019 inspection report

Nine hundred words. One sentence is the one everything since has depended on.

PREMISES INSPECTION • REPORT 2019/0774

Premises	Jengo House, Ngong Lane
Date of inspection	19 September 2019
Inspected under	Occupational Safety regulations then in force

Finding

The premises were found to be in substantial compliance with the regulations then in force. Three items are noted below for attention. None constitutes a contravention at the date of inspection.

#	ITEM	STATUS	ACTION BY
1	Fire door, second floor, pro attention		occupier
2	First-aid provision not signed attention		occupier
3	No accessible sanitary facilityattention		—

Future obligations

Where a material change of use is undertaken, the premises will be assessed against the regulations in force at that date and items noted above may become requirements in due course.

Signed E. Wanyama

In the capacity of **Inspecting Officer (reporting only)**

This report records the condition of the premises at the date of inspection. It does not constitute approval, certification or a direction to act. The allocation of responsibility between owner and occupier is a matter for the lease.

"Then in force" — the whole argument is in three words

Substantial, not full. Nobody defines the gap

Item 3 has no action-by at all

"May become requirements" — and did, in 2021

Reporting only. He cannot make anybody do anything

And here it is handed to the lease

{width=6.

6in}

The 2019 inspection report — Nine hundred words. One sentence is the one everything since has depended on.

5C • Close reading

1. What date was the inspection?
2. What does "substantial compliance" mean, and what does it not mean?
3. Which three items were marked for attention?
4. **Which of the three was not followed up, and how do you know from the document alone?**
5. What does the final paragraph say about future obligations?
6. **Who signed it, and in what capacity?**

5D • Vocabulary in context

premises • in force • substantial • for attention • in due course • capacity (*in what capacity*)

5E • The counter-text

Read the four-line email sent eleven days after the inspection.

Thanks — noted. We're not required to action item 3 as the building predates it. Happy to revisit if anything changes. Best, A.K.

1. What does *noted* commit him to?
2. *We're not required to* — by what?
3. *Happy to revisit if anything changes* — what would have to change?
4. **The email is forty-one words. The inspection report is nine hundred. Which one has been quoted more often since?**

5F • Writer analysis

- The report never says who must act. Is that a flaw or a design?
- The email names one item and ignores two. Which two, and does anybody notice?

5G • Text against text

The report says "for attention". The email says "not required". Both are true. Write two sentences on how that is possible. The second begins *"The gap is..."*

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Twenty-one ways to say the same obligation

6in}

One obligation, six strengths — The same duty, worded six ways. Each layer is easier to walk away from.

6A • Sort — strength

Put all twenty-one on a line from **binding** to **entirely optional**.

discretionary · obliged · be supposed to · be meant to · optional · compulsory · needn't have · have no choice but to · voluntary · banned · be free to · let off · required · get out of · it's up to you · permitted · didn't have to · exempt · binding · should have · mandatory

6B • Chunk completion

- 1. Attendance is _____ — you can come or not.
- 2. He was _____ from the fee because of his age.
- 3. We had _____ _____ _____ close for the day.
- 4. You _____ have paid — it was covered.
- 5. She _____ _____ of it by swapping shifts.

6C • Register sort

Which of these appear in a contract, and which only in speech? Five appear in both.

6D • Contrast Clinic — *mustn't* against *don't have to*

Six items. Only the meaning decides.

- 1. Staff _____ prop that door open under any circumstances.
- 2. Visitors _____ go past this point.
- 3. You _____ stay late; we've finished.
- 4. You _____ book; just turn up.
- 5. We _____ have called a meeting, but it helped.
- 6. You _____ touch that — it's live.

Then: say in one sentence what each pair would mean if you got it the wrong way round.

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

Modals disappear in the middle of a sentence

Modals vanish in the middle of a sentence			
Every one of these is two syllables in real speech, not three.			
have to	→	hæf tə	the /v/ becomes /f/
has to	→	hæs tə	the /z/ becomes /s/
had to	→	hæd tə	two /d/ sounds become one
must have	→	mʌs təv	have → /əv/, never /hæv/
should have	→	ʃʊd əv	never "should of" in writing
ought to	→	ɔː tə	the /t/ does double duty

6in}

{width=6.

Modals vanish in the middle of a sentence — Every one of these is two syllables in real speech, not three.

7A • Hear 🎧 Track 4.3

have to → /hæftə/ · has to → /hæstə/ · had to → /hædtə/ · must have → /mʌstəv/ · should have → /ʃʊdəv/ · ought to → /ɔ:tə/

7B • Say

Inside the sentence: *"We had to do it, and we should have said so."*

7C • Make it mean something

Say this twice — once at speed, once with every modal stressed.

"You didn't have to come in."

One version is kind. One is an accusation. Which stress makes which?

7D • Fluency 20 🟡

Twenty seconds: **something I had to do that I did not have to do.** Three times, faster.

Part 8 • Writing ♦ C • THE PERFORMANCE

Minutes somebody can act on • 140 words

{width=6.

6in}

What actually happens to an action point — Four hundred meeting actions, followed up twelve weeks later.

8A • Read the model

Present: Wanjiru (chair), Obi, Mariam, Priya, Tom, Grace. **Apologies:** Mr Kamau. [Grace is listed. In four previous sets of minutes she was not]

We discussed the absence of an accessible toilet. The 2019 inspection marked it "for attention"; the landlord's position is that the building predates the requirement. Both are correct. [states the disagreement as fact, not as a complaint]

We agreed that the tenants will fund a survey, at a cost of up to 40,000, **not** as an acceptance of liability. Obi will obtain three quotes by 14 March. Wanjiru will write to the landlord setting out what we have done and asking, in writing, whether he will match it. [two names, two dates, one sentence protecting the position]

Priya recorded that she thinks funding it ourselves weakens us. The meeting noted this and proceeded. [the dissent is minuted, by name]

Questions about the writer's choices:

1. Why record Priya's objection rather than leaving it out?
2. Why does "*not as an acceptance of liability*" appear in bold?
3. Two people are named with dates. What makes that different from "we agreed to look into it"?

8B • The anti-model

The group had a productive discussion around accessibility and agreed to explore options going forward. Various views were expressed. It was felt that further information would be helpful and the matter will be revisited at a future meeting.

Nothing in it is untrue. **Name three things that cannot be acted on.**

8C • Generate • 8D • Plan

who was there → what was discussed, in one line → what was agreed → who, by when → what was protected → who disagreed, by name

8E • Draft 1 — 140 words

8F • Peer review — two criteria

☐ Could somebody who was not there do the right thing on Monday? ☐ Is there a name against every action?

8G • Draft 2 • 8H • Publish

To the wall, and to the person who was not at the meeting.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

WORK FILE • The Meeting

Two agendas for the same meeting
One of these takes forty minutes. One takes ten. Nothing else differs.

JENGO HOUSE • TENANTS' MEETING • CIRCULATED MONDAY

AGENDA A — as circulated in February

#	ITEM
1	Accessibility
2	The lease
3	AOB

No times. No owners. No statement of what the meeting is for. Item 1 is a topic, not a question, so it cannot be finished — only left.

AGENDA B — as circulated in March

#	DECISION NEEDED	MIN	BRINGS IT	PAPERS
1	Do we fund the survey ourselves?		Wanjiru	2019 report, quote
2	AOB	3	—	—

Standing note at the foot of every agenda
Any item that reaches the end of its time without a named person and a date is carried, and the chair will say so out loud. Items without papers attached are not taken.

— circulated by W.M., 48 hours before

→ A topic. You cannot finish a topic

→ Three items, no times — so all of them overrun

→ A question with a yes or a no at the end of it

→ Ten minutes, and somebody owns the ten

→ Papers named, so nobody can say they had not seen them

→ The rule that makes the chair's job possible

6in}

Two agendas for the same meeting — One of these takes forty minutes. One takes ten. Nothing else differs.

9A • Before — the agenda that does the work

Here are two agendas for the same meeting. One takes forty minutes; one takes ten.

A: 1. Accessibility 2. The lease 3. AOB **B:** 1. Decide whether we fund the survey ourselves (10 min, decision needed) 2. AOB (3 min)

Name three things B does that A does not.

Then: in meeting A somebody will eventually say "**whose job is it?**" and somebody else will say "**that's not on me.**" At what point in agenda B does that become impossible?

9B • During — the four jobs of a chair

Watch or listen to a five-minute extract. Tally every time the chair does one of these.

opens • brings somebody in • stops a digression • summarises • tests agreement • closes

Which one did they do least? What happened because of it?

9C • The hardest moment

Somebody raises a real, important, unrelated point, nine minutes in. **Write the sentence you would say.** Compare with three other people's.

9D • After — the follow-up

Minutes are not the follow-up. Write the **one message** that goes to the person who has an action and was not at the meeting. Sixty words.

9E • Transfer

Go to a real meeting this week and count. How many agreements left the room with a name and a date against them? Bring the number.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

Seven years of one missing toilet — Half the class sees the obligations. Half sees what happened. Neither sees both.

10A • Relay

Half the class sees the obligations band; half sees the timeline. Rebuild it by speaking only.

10B • Simplify

Explain the 2019 inspection report to **Grace**, who is affected by it, has eleven minutes, and has never seen an inspection report.

Plan: what it is → what it found → what it means for her → what she could ask for

10C • Compress

The report into 60 words for the tenants' group. Defend three cuts.

10D • Online interaction

Write the message to the landlord. **It may be read by a lawyer later.** Write it knowing that, and without sounding as though you know it.

10E • Across languages

In your own language, how do you say "*that's not my responsibility*" politely? Bring it back into English. **Is the English version as polite?**

Part 11 • The Decision ◆ C • THE PERFORMANCE

The toilet on the ground floor

Jengo House has no accessible toilet. The building predates the requirement, so nobody has broken a rule. Priya, who is retraining as a dentist after a spinal injury, has used the café next door for seven months and has never mentioned it.

- **The landlord pays.** He is not obliged to. Asking costs the relationship and probably fails.
- **The tenants pay.** About 160,000, shared six ways. It is their building for four more years.
- **Nobody pays, and it is minuted.** Honest, cheap, and in writing for ever.

11A • The evidence

1. **The inspection report** from Part 5, and the forty-one-word reply.
2. **The chart:** what the survey, the works and the disruption would actually cost.
3. **The voice.** Priya, thirty seconds: *"I didn't say anything because I didn't want it to be about me. Now it's been seven months and saying something would be about me."*

11B • Steelman

Argue the option you like least. Two minutes.

11C • Deliberate

I think they should _____, because _____. The strongest argument against me is _____, and my answer to it is _____.

11D • Decide — eighty words, two reasons

11E • Model decision

I think the tenants should fund the survey, and only the survey, and should say in writing that they are not accepting liability by doing it.

Paying for the works outright is the option that feels right and I think it is wrong. It is 160,000 of other people's money for a building they will leave in four years, and it lets the landlord establish that this is a tenant cost. Once that is established it stays established.

Minuting it and doing nothing is the cheapest thing and the one Priya would have to live in. She has already spent seven months not mentioning it, which tells you what the cost of the honest option actually is, and who pays it.

The survey is the only move that changes what anybody knows. A number on a page converts an argument about principle into an argument about money, and arguments about money get settled.

11F • The Reveal

What happened. The survey came back at 96,000 — considerably less than the 160,000 everyone had been assuming, because the ground-floor plumbing was already in the right place.

Mr Kamau paid half, having refused to pay anything for four months, after his insurer asked him a question about the 2019 report.

Priya left in November for a practice forty minutes away. The works were finished in January.

The reasoning worked. The number came down, the landlord moved, the thing got built. And the person it was for had gone.

Was the reasoning sound? And what would it have taken to move faster — and who would have had to pay for *that*?

Part 12 • Landing ♦ all three lines

12A • Recycle — twelve items

Six from this unit.

1. You _____ prop that door open. (*prohibition*)
2. We _____ pay; students are exempt. (*no obligation*)
3. Before 2019 they _____ install one. (*no obligation, past*)
4. Every employer has a duty of _____.
5. She signed a _____ and cannot claim now.
6. They are under no _____ to tell you.

Four from Units 1–3.

7. I _____ (see) him on Thursday — it's arranged. (*Unit 3*)
8. She _____ (make) these for nine years. (*Unit 2*)
9. By then the objection period _____ (close). (*Unit 1*)
10. At 3,720 she _____ even. (*Unit 2 lexis*)

Two from *Telling the Story* (A2.2).

11. He asked whether we _____ received the report. (*reported speech*)
12. _____ of the four items were followed up — only one. (*quantifiers*)

12B • Consolidate

120 words, one paragraph. A rule where you work or study: what you have to do, what you used to have to do, what you are not allowed to do, and one thing that is nobody's job. Six items from Part 6.

12C • Can-do, with evidence

I can...	My evidence	Sure?
say precisely whether something is required, forbidden or merely unnecessary	Part 3G score	☐ ☒ ☒
chair a short meeting and land one decision	Part 4C recording	☐ ☒ ☒
write minutes somebody who was absent could act on	Part 8 draft 2	☐ ☒ ☒
argue a case where nobody has broken a rule and something is	Part 11D	☐ ☒ ☒

I can...

My evidence

Sure?

still wrong

12D • Replay

Part 0C again. Compare. One sentence.

12E • Glossary — forty-five items, as a map

WHO OWES WHAT · duty · duty of care · liable · entitled · have a right to · under no obligation · accountable **CONSENT** · consent · informed consent · waiver · exemption · at your own risk **CARE** · carer · patient · referral · treatment · prescription · insurance · a waiting list **DOING IT** · opt out · look after · sign up for · fall through · get out of · let off **BINDING** · mandatory · compulsory · obliged · required · binding · have no choice but to **NOT BINDING** · optional · voluntary · discretionary · exempt · be free to · it's up to you · didn't have to · needn't have **EXPECTED** · be supposed to · be meant to · should have · banned · permitted

Part 0 • The Big Picture ♦ A • THE WORLD

6in}

The shared office, Monday, 08.20 — Two rotas in this room. They do not match. One of them is the one people follow.

Should a machine decide?

By the end of this unit you will argue a case for or against automating one decision — and say what you would do about the cases it gets wrong.

◆ A · THE WORLD

What a system is good at, what it cannot see, and who absorbs the difference

◆ B · THE SYSTEM

Conditionals 0, 1 and 2, side by side · the second conditional, returning · 24 words for automation and judgement · 21 ways to say *and so* · the tune at the end of an *if* clause

◆ C · THE PERFORMANCE

A reasoned case, delivered to people who will push back

0A · Find it

Twelve things on the wall of the shared office. Four of these sixteen are not there.

whiteboard rota · printed timetable · sticky notes · wall planner · key hooks · sign-in sheet · swipe reader · screen showing a dashboard · bookings tablet · noticeboard · laminated rules · wifi password · punch clock · rota app on a phone · cork board · staff photo wall

0B · Guess it

The rota on the whiteboard and the rota on the screen **do not match**. Find three differences. **Which one do you think people actually follow?**

0C · Say it

Record thirty seconds. *Should a machine decide?* Unprepared.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

6in}

{width=6.

The shape of an automated decision — Six stages. The dashed one is the one this system does not have.

1A • Meet — the shape of a system

Use the network. Name the word at each stage.

input • threshold • output • override • audit • fallback • flag • bias • algorithm • automate • accountable • discretion

1B • Sort — what can be automated?

Put these six decisions in order, from **easiest to automate** to **hardest**.

who covers a sick shift • when the bins go out • who gets the last desk • who is told first • who is let go • who gets a reference

Mark the point where you would stop. Then find somebody who marked it somewhere else.

1C • Sort — odd one out, and why

1. algorithm • threshold • bias • rule of thumb
2. override • discretion • a judgement call • output
3. audit • flag • accountable • fallback
4. roll out • rule out • fall back on • flag up

1D • Stretch — the phrases

1. It works for ninety per cent and fails on **an _____ case**.
2. The system flagged her and it was wrong — **a _____ positive**.
3. Nobody checked the output for six weeks. There was no **human _____**.
4. Two days off between nights is **a rule of _____**, not a rule.
5. Which shift she can actually do is **a _____ call**, and the system cannot make it.
6. He approved it without reading it, but his name is on it — he **signed _____ on it**.

1E • Stretch — four phrasal verbs, one system

flag up · roll out · fall back on · rule out

Which one happens when the system fails? Which one happens before anybody uses it?

1F • The two sayings

garbage in, garbage out · computer says no

One is about data. One is about power. **Which is which, and who says each of them?**

Corpus Note *Algorithm* appeared in general English about four times per million words in 2005 and about forty in 2024. *Accountable* has not moved at all.

1G • Own it

Describe one decision where you work or study that is made by a system. **Name the edge case it gets wrong.**

Part 2 • Listening ♦ A • THE WORLD

6in}

{width=6.

The person who built it, and the person on it — He is facing the screen. She is facing him.

2A • It did what we told it Track 5.1

Before you listen. Tom built the rota system. Grace is on it. **Who do you think has read the rules it uses?**

Gist — one listen, one question. What did the system do that nobody intended?

Detail — complete the frame.

	What the rule says	What it produced
fairness rule		

availability rule

seniority rule

Inference. Grace says "*I used to swap with Didier.*" **What has the system removed, and does anybody notice it has gone?**

Attitude. Tom says "*it's working, actually*" and he is right. **Which sound tells you he already knows that is not the point?**

Noticing. Six sentences. Sort them.

1. *If you reduce the hours, the system reallocates them.*
2. *If we switch it off, we go back to the whiteboard.*
3. *If I had known, I would have built it differently.*
4. *If you work nights, you get two days off.*
5. *If she asks, I'll explain it to her.*
6. *If it were up to me, I'd let people swap.*

A. always true · **B.** not real — imagined · **C.** a real possibility, now or soon

2B • Decoding clinic Track 5.2

Forty seconds of Tom at speed. Four jobs.

1. How many times does he say *if*?
2. Where does his voice go **up**, and where does it go **down**?
3. Catch the two percentages.
4. *would have* — how many sounds?

Transcripts, page 175.

Part 3 • Grammar Lab 1 B • THE SYSTEM

Three conditionals, side by side

3A • Notice

Return to the six sentences.

1. Which one describes something that happens **every time**?
2. Which two describe something that **might really happen**?
3. Which two describe something that is **not true**?
4. In sentence 6, *if it were up to me* — is it up to him?
5. Look at the verbs after *if* in 4, 5 and 6. **Three different forms, and only one of them is about the past.** Which?

3B • See

{width=6.

6in}

Three conditionals, side by side — The past form in the third one is not about the past. It marks distance from reality.

3C • Know

	<i>if</i> clause	result clause	What it does
zero	present simple	present simple	a rule, always true — <i>If you work nights, you get two days off.</i>
first	present simple	will / may / might	a real possibility — <i>If she asks, I'll explain.</i>
second	past simple	would / could	not real, or very unlikely — <i>If it were up to me, I'd let people swap.</i>

Watch out. The past form in the second conditional is **not about the past**. It marks distance from reality, not distance in time.

Why it matters. *If we switch it off, we go back to the whiteboard* and *if we switched it off, we'd go back to the whiteboard* are the same sentence with two different politics. The first treats it as on the table. The second treats it as unthinkable.

3D • Use — controlled

If a shift (1) _____ (go) unfilled for two hours, the system (2) _____ (reallocate) it automatically — that is what it does every time. If Grace (3) _____ (ask) to swap tomorrow, Tom (4) _____ (have to) do it by hand, which he can. If the rules (5) _____ (be) written by the people on the rota, they (6) _____ (look) completely different — but they were not.

3E • Use — guided

Move each sentence one step further from reality, then one step closer. Say what changes.

1. If we switch it off, we lose the audit trail.
2. If she complained, they would listen.
3. If you press override, it logs who did it.

3F • Use — open

Describe a system where you work. One rule that is always true. One thing that might really happen this month. One thing you would change if it were up to you — and it is not.

3G • Check — six items

1. If you ____ (heat) water to 100°, it ____ (boil).
2. If I ____ (be) you, I ____ (say) something.
3. If the system ____ (flag) her again, I ____ (override) it.
4. If we ____ (have) more people, this ____ (not / be) a problem — but we don't.
5. If you ____ (work) a night, you ____ (get) two days off. Always.
6. If she ____ (leave), who ____ (cover) Sunday?

0-3 → Workbook pp. 38-40. 4-5 → Part 6. 6 → p. 99.

Why this sentence closes the door it meant to open

✗
If we built an override, it would solve this.

placed outside reality

real / not real

The second conditional marks the idea as hypothetical. In a meeting where you are actually proposing it, you have just told the room it is not on the table.

✓
If we build an override, it will solve this.

placed inside reality

real / not real

The first conditional treats it as a live option with a cost and a date. The room now has something to agree or refuse.

What the writer thought:
 The writer thought the second conditional was the polite one. It is the distant one, and distance reads as "I am not seriously asking".

6in}

Why this sentence closes the door it meant to open — Why this sentence closes the door it meant to open

Part 4 • Speaking ◆ C • THE PERFORMANCE

4A • Fluency sprint — 4 / 3 / 2

One thing you would change about how a decision gets made where you are. Four, three, two minutes.

4B • The functional core — arguing about consequences

Six weeks of rota, before and after — Learner A holds the rules. Learner B holds what happened. Neither sees the other.

Language Bank

laying out a consequence

if we do that, what happens is ... · the upshot is ... · that means in practice ...

conceding

that's fair, as far as it goes · I'd accept that if ...

distancing

if it were up to me · in an ideal world · I'm not saying we should

pinning down

under what conditions would you ...? · what would have to be true for ...?

Information gap. Learner A holds the rota rules. Learner B holds six weeks of what actually happened. **Find the case the rules did not foresee.**

4C • The performance — the case

Three minutes, uninterrupted, then two minutes of questions you have not seen. You are arguing **for or against automating one named decision**, and you must say what happens to the cases it gets wrong.

4D • Observer

Listen for **one thing**: did the speaker ever say what the system would be worse at?

4E • Two criteria

- ☐ Did I name a specific case my own position handles badly? ☐ Did I say who picks it up when the system is wrong?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

An interview transcript. The first exchange is:

Q: So the system was working correctly? **A:** It was working exactly as specified. That's a different thing.

What do you expect the rest to be about? One sentence.

5B • Skim — sixty seconds

Find the moment the interviewee stops defending the system.

"Exactly as specified"

Q: So the system was working correctly?

A: It was working exactly as specified. That's a different thing, and I want to be careful about it, because people hear "working correctly" and stop asking questions.

Q: What's the difference?

A: The specification said: allocate shifts so that no one does more than two nights in a row, weight by availability, and break ties by seniority. It did all three, every time, for fourteen months. If you audit it against the spec, it passes. The problem is that nobody writing the spec had ever covered a Sunday.

Q: Meaning?

A: Meaning the spec had no word for the thing people were actually doing, which was swapping. Before the system, if you couldn't do a Sunday you found somebody who could, and you owed them one. That's not in the spec because it isn't a rule — it's a favour economy, and it's how the place ran. We automated the rota and the favours stopped, because there was nothing to swap.

Q: Did anybody raise it?

A: One person. Six weeks in. She said it had got harder to change a shift, and I said yes, that's correct, that's the point — the whole reason we built it was that the old rota got changed twelve times a week and nobody could plan. And I was right. I was answering a different question from the one she was asking, and I did it confidently, which is worse.

Q: Would you build it again?

A: Yes. But I'd build the override first and the allocator second, and I'd make the override cost somebody thirty seconds instead of an email. If the cheapest thing to do is the thing the system wanted, you haven't built a tool. You've built a rule and called it a tool.

5C • Close reading

1. What three things did the specification require?
2. What is the difference between *working correctly* and *working as specified*?
3. **What was the "favour economy", and why was it not in the spec?**

4. What did the one person who raised it actually say?
5. **The interviewee says being right made it worse. Why?**
6. What would he build first next time, and why?

5D • Vocabulary in context

specified · audit (*audit it against the spec*) · weight (*weight by availability*) · break ties · override (noun) · allocator

5E • The counter-text

The rota specification

Three pages, three rules. The word that matters is not in it.

JENGO HOUSE • SHIFT ALLOCATION • SPEC v1.3

Owner: T. Fraser
Approved: 4 October 2024

1 — Allocation rules, in order

#	RULE	TYPE	OVERRIDABLE
1.1	No person works more than the 48 hours consecutively		no
1.2	Weight allocation by declared a availability		no
1.3	Break remaining ties by length of service		no

2 — Manual changes
Any change to a published rota requires written authorisation from the space manager, submitted not less than 48 hours in advance, stating the reason. The system does not support changes made after publication without re-running allocation for the affected week.

3 — Out of scope
Preference ranking, shift trading between individuals, and allocation by any criterion not listed at 1.1-1.3 are out of scope for this release.

Approved by the space manager and the system owner. No consultation with rota participants was recorded. Review scheduled at twelve months; not yet held.

→ A hard rule, and a good one

→ Availability weighted first — this is the whole problem

→ None of the three can be overridden

→ 48 hours, in writing, with a reason

→ "Shift trading" — named, and ruled out

→ Nobody on the rota was asked

→ The review is a year overdue

{width=6.

6in}

The rota specification — Three pages, three rules. The word that matters is not in it.

Read the specification document and answer.

1. How many rules are there?
2. What is the stated tie-break?
3. **Find the clause about manual changes. How many steps does it require?**
4. What does the document say about swaps?
5. **Who signed it off, and had they ever worked a Sunday?**

5F • Writer analysis

- The interview admits a mistake. The spec admits nothing. Which is more useful, and to whom?
- **The spec is three pages and the thing that broke is not in it. Could it have been?**

5G • Text against text

The spec says "manual changes require written authorisation". The interview says the override should cost thirty seconds. Two sentences on whether both can be true. The second begins *"The question is who..."*

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Twenty-one ways to say *and so*

6in}

From a direct cause to a shrug — Six strengths of "and so". The lower you go, the less anybody owns it.

6A • Sort — how direct is the link?

Put all twenty-one on a line from **a direct cause** to **a loose association**.

one thing leads to another • otherwise • trade-off • as a result • inadvertently • which means that • conversely • hence • as long as • consequence • in which case • repercussion • consequently • outcome • worst case • the upshot is • thereby • end up • knock-on • result in • provided that

6B • Chunk completion

1. We froze the rota, and **the** _____ **is** that nobody can swap.
2. He approved it without reading it and _____ became responsible for it.
3. You can override it, _____ you log why.
4. Fix it now; _____ it goes to the whole building on Monday.
5. She might refuse, _____ we are back to the whiteboard.

6C • Register sort

Which of these would you write in a report, and which only say out loud? Four belong in both.

6D • Contrast Clinic — zero, first, second

Six items. The context decides.

1. If you _____ (press) override, it _____ (log) your name. (*every time*)
2. If I _____ (be) the landlord, I _____ (fix) it. (*not real*)

3. If we _____ (switch) it off today, we _____ (lose) the audit trail. (*real*)
 4. If they _____ (ask) us first, none of this _____ (happen). (*not real*)
 5. If she _____ (not come) in tomorrow, I _____ (cover) it. (*real*)
 6. If water _____ (get) in, the board _____ (fail). (*always*)
-

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

Where the voice goes at the end of an *if* clause

6in}

{width=6.

The tune at the end of an if clause — Identical words. The pitch tells the listener whether you have finished.

7A • Hear 🎧 Track 5.3

In each pair, the words are identical. **The tune is not.**

If she asks, ↗ I'll explain. ↘ — one sentence, two parts *If she asks.* ↘ — finished. A threat, or a condition already met.

7B • Say

Say each one. Your partner says whether you have finished speaking.

7C • Make it mean something

If you want.

Say it three ways: as a genuine offer, as a withdrawal of interest, and as an ultimatum. Your partner writes down which one they heard.

7D • Fluency 20 🟡

Twenty seconds: **one thing that always happens, one that might, one that never will.** Three times, faster. Record the first and the third.

Part 8 • Writing ♦ C • THE PERFORMANCE

The case, written down • 140 words

{width=6.

6in}

Six weeks, and the thing nobody was measuring — Three of these were in the specification. The fourth was not measured until the log existed.

8A • Read the model

I think we should keep the rota system and change one thing about it. [the position is in sentence one, and it is not "it depends"]

It does what it was built to do. Before it, the rota changed twelve times a week and nobody could plan their month. Now it changes twice. That is a real gain and I do not want to lose it. [concedes to itself first – and gives the number]

What it removed was swapping. If you cannot do a Sunday, there is now no way to find somebody who can, because the system holds the rota and the system does not know what a favour is. People used to owe each other shifts. They do not any more, and nobody decided that.

So: build the override into the app, log who used it, and review the log monthly. If overrides climb, the rules are wrong — and that is information we currently do not have.

Questions about the writer's choices:

1. Why concede in paragraph two rather than at the end?
2. "Nobody decided that." Why is that the strongest sentence in the piece?
3. The proposal creates a measurement. Why does that matter more than the fix?

8B • The anti-model

There are pros and cons to automation. On the one hand it saves time and improves consistency. On the other hand it can be inflexible. It is important to strike the right balance and to keep humans in the loop. Further consultation would be beneficial.

Every sentence is true. **Name three things it does not commit to.**

8C • Generate • 8D • Plan

the position → the strongest thing against it, conceded properly → what was actually lost → who decided that → the change → what it would let you measure

8E • Draft 1 — 140 words

8F • Peer review — two criteria

☐ Do I know what this person actually wants to happen? ☐ Did they concede something real, or only pretend to?

8G • Draft 2 • 8H • Publish

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

STUDY FILE • Working With AI

One prompt, four answers
One is right. One is confidently wrong. One is right and useless. One refuses.

PROMPT — "How much notice must we give a part-time cleaner?"

A
"Part-time staff are entitled to the same statutory notice as full-time staff, calculated on length of service: one week after one month, rising to one week per year up to twelve. Check the contract, which may be more generous."
Cites nothing
Verifiable yes, in ten minutes

B
"Under the Employment Act 2011, section 35(2), part-time workers engaged for fewer than 16 hours weekly are exempt from statutory notice."
Cites a section number
Verifiable yes — and the section says something else

C
"Notice requirements vary by jurisdiction and employment type. It is advisable to consult a qualified employment professional and review the applicable contract and legislation."
Cites nothing
Verifiable nothing to verify

D
"I can't give legal advice. I can tell you what to look for: the contract's notice clause, length of continuous service, and whether any custom has been established by repeated practice."
Cites nothing, and says so

- Right, unsourced, and easy to check
- A real section number attached to a false claim
- The citation is what makes it dangerous
- True of every question ever asked
- Refuses the task and does the useful half
- "Custom established by practice" — nobody else mentioned it

{width=6.

6in}

One prompt, four answers — One is right. One is confidently wrong. One is right and useless. One refuses.

9A • Four outputs, one prompt

Here are four answers to the same question. One is right, one is confidently wrong, one is right but useless, and one refuses. **Label them before you read 9B.**

9B • The four checks

For each: **Can I verify it? Does it cite anything? Would I notice if it were wrong? What did I not ask?**

9C • Edit, don't accept

Take the useful-but-wrong answer. **Rewrite it so it is true.** Time yourself. Then ask: was that faster than writing it from nothing?

9D • What not to outsource

Three tasks. For each, decide: **outsource • outsource and check • do yourself.**

summarising a meeting you attended • summarising a meeting you missed • writing the message that tells somebody they did not get the job

The third one divides every class. Say why.

9E • Transfer

Use a tool for one real task this week and keep what it got wrong. Not a funny error — a plausible one. Bring it.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

Fourteen months of the rota — Half the class sees the rules. Half sees what happened. Neither sees both.

10A • Relay

Half sees the rules band, half sees what happened. Rebuild by speaking.

10B • Simplify

Explain the rota specification to **Grace**, who is on the rota, has nine minutes, and has never seen a specification.

Plan: what it is → what it decides about her → where her discretion went → what she can ask for

10C • Compress

The interview into 60 words, for people who have to decide on Monday. Defend three cuts.

10D • Online interaction

Write the message proposing the change, to a group that includes the person who built it. **He will read it as criticism unless you stop him.**

10E • Across languages

How do you say "*it's not personal, it's the system*" in your language? Bring it back. **Does yours blame the system as easily as English does?**

Part 11 • The Decision ◆ C • THE PERFORMANCE

Switch it off, or build the override

Six weeks of data. The rota changes twice a week instead of twelve. Nobody is doing more than two nights in a row for the first time in years. And Grace has worked four Sundays running, because she is the most available person in the building and availability is weighted first.

- **Switch it off.** Back to the whiteboard. Everybody can swap. Nobody can plan.
- **Leave it.** It is working against every measure anybody wrote down.
- **Build the override.** Three weeks of Tom's time, which is three weeks of something else.

11A • The evidence

1. **The specification** from Part 5 — three pages, three rules, one missing word.
2. **The chart:** what changed in six weeks, including the thing nobody was measuring.
3. **The voice.** Grace, thirty seconds: *"I'm not complaining. It's fair. I just used to be able to say no, and I can't work out who to say it to now."*

11B • Steelman

Argue the option you like least. Two minutes.

11C • Deliberate

I think they should _____, because _____. The strongest argument against me is _____, and my answer to it is _____.

11D • Decide — eighty words, two reasons

11E • Model decision

Build the override, and accept that it costs three weeks.

Switching it off is the option I have most sympathy with and I think it is wrong. The twelve changes a week were real, and the people who suffered most from them were the people with the least control over their own time — which is the same group this system is now hurting. Going back does not return their discretion; it returns everybody's, and theirs was always the first to be overruled.

Leaving it is indefensible once you have heard Grace, and it is indefensible for a reason that has nothing to do with fairness: the system is *working*, and nobody can tell you what it would look like if it stopped. There is no measurement. An override log is the cheapest instrument anybody is going to get.

Three weeks of Tom's time is the real cost, and I would rather spend it on knowing than on guessing.

11F • The Reveal

What happened. The override took five weeks, not three. In the first month it was used eleven times. Nine of the eleven were the same two people swapping a Sunday, which is what the system had removed.

The log made the pattern visible, and the fairness rule was rewritten in March to weight *consecutive weekends* rather than availability. Grace worked two Sundays in the next quarter.

Tom's other project slipped by five weeks and was eventually cancelled.

The fix worked. The measurement was worth more than the fix. And something else died quietly to pay for it.

Was the reasoning sound? And: the cancelled project had no voice in the room. Should it have?

Part 12 • Landing ♦ all three lines

12A • Recycle — twelve items

Six from this unit.

1. If you _____ (press) override, it _____ (log) your name.
2. If it _____ (be) up to me, I _____ (change) the weighting.
3. It works for most people and fails on an _____ case.
4. Nobody checked the output for six weeks — no human _____.
5. He approved it without reading it and _____ became responsible.
6. You can override it, _____ you log why.

Four from Units 1–4.

7. You _____ prop that door open. (*Unit 4*)
8. I _____ (see) him on Thursday — arranged. (*Unit 3*)
9. She _____ (make) these for nine years. (*Unit 2*)
10. Four businesses were _____ out by rising rents. (*Unit 1*)

Two from Making Plans (A2.1).

11. The person _____ writes the spec never covers a Sunday. (*relative clause*)
12. If you miss the four o'clock, you _____ (wait) two hours. (*first conditional*)

12B • Consolidate

120 words, one paragraph. A system you live with: one thing that is always true, one thing that might happen, one thing you would change and cannot. Six items from Part 6.

12C • Can-do, with evidence

I can...	My evidence	Sure?
choose between three conditionals to say how real something is	Part 3G score	☐ ☒ ☒
argue a case and name the thing it handles badly	Part 4C recording	☐ ☒ ☒
judge what a machine's answer is worth before I use it	Part 9	☐ ☒ ☒
decide where something works and somebody is still paying for it	Part 11D	☐ ☒ ☒

12D • Replay

Part 0C again. Compare.

12E • Glossary — forty-five items, as a map

THE SYSTEM · algorithm · automate · input · output · threshold · bias · fallback · roll out **THE HUMAN** · override · discretion · a judgement call · human oversight · in the loop · accountable · sign off on **WHEN IT FAILS** · an edge case · a false positive · flag · flag up · audit · fall back on · rule out · a rule of thumb **THE SAYINGS** · garbage in, garbage out · computer says no **CAUSE** · consequence · outcome · repercussion · knock-on · as a result · consequently · hence · thereby · result in · which means that · the upshot is **CONDITION** · provided that · as long as · otherwise · in which case · worst case · conversely **THE REST** · trade-off · inadvertently · end up · one thing leads to another

12F • Next

Unit 6 • Who wrote this rule?

B1.1 • Unit 6 • The Rule Nobody Follows

English Animated • *Taking a Position* • Jengo House, Nairobi Student's Book pages 108–127 • 20 pp • ~11.5 hours

Part 0 • The Big Picture ♦ A • THE WORLD

6in}

The notices in Jengo House — Sixteen notices in this building. Three have been ignored for over a year.

Who wrote this rule?

By the end of this unit you will write a one-page procedure a stranger could follow — and find out whether anybody does.

◆ A • THE WORLD

Where rules come from, how they survive, and what happens when they stop being followed

◆ B • THE SYSTEM

The passive across all simple tenses · *by* against *with* · the passive, returning · 24 words for procedure and authority · 21 ways to say something happened without saying who did it · consonant clusters at the end of *-ed*

◆ C • THE PERFORMANCE

A written procedure, tested on somebody who has never done the task

0A • Find it

Twelve notices in the building. Four of these sixteen are not there.

fire notice · lift inspection certificate · keyholder list · opening hours · no-smoking sign · recycling instructions · visitor policy · insurance certificate · kitchen rota · wifi notice · bin-day reminder · "please keep this door closed" · parking permit · noise curfew · first-aid notice · evacuation assembly point

0B • Guess it

Three of these notices have been ignored for over a year. Which, and what is the evidence in the picture?

0C • Say it

Record thirty seconds. *Who wrote this rule?* Pick any rule you live under. Unprepared.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

{width=6.

6in}

Where a rule comes from, and where it goes — Three of these arrows have never been used in this building.

1A • Meet — where a rule comes from

Use the network. Name the word at each stage.

statute • regulator • policy • procedure • protocol • clause • precedent • jurisdiction •
enforce • waive • amend • appeal

1B • Sort — cline of authority

Order these from **hardest to change** to **easiest**.

a written procedure • standard practice • a regulation • a statute • a published policy • a notice
on a door • a lease clause

Where does it stop being a rule and start being a habit? Mark it, and defend the mark.

1C • Sort — odd one out, and why

1. enforce • waive • amend • appeal
2. policy • procedure • protocol • precedent
3. statute • regulator • jurisdiction • clause
4. draw up • carry out • phase out • bring in

1D • Stretch — the phrases

1. The works were done **in** _____ **with** the approved drawings.
2. The lease is _____ **to approval** by the freeholder.
3. Late entry is allowed **at the** _____ **of** the manager.
4. Propping the door is not written down anywhere, but it is **standard** _____.
5. The notice covers it. The lift does not. That is **a** _____ **area**.
6. Nobody reads **the** _____ **print**, which is where the fee is.

7. The regulation **came into** _____ in March 2021.

1E • Stretch — four phrasal verbs, one rule-book

draw up · carry out · phase out · bring in

Two are about creating a rule, two about what happens to it afterwards. Which?

1F • The two sayings

by the book · that's the policy

One is a compliment and an accusation at the same time. **Which, and how do you tell?**

Corpus Note *Policy* collocates with *review*, *change* and *under*. It almost never collocates with *obey*. English does not obey policies; it has them, reviews them, and works around them.

1G • Own it

Name one written rule where you are, and one unwritten rule that is stronger. **Which would somebody new break first?**

Part 2 • Listening ♦ A • THE WORLD

{width=6.

6in}

Two people at a propped-open fire door — Neither of them put the wedge there. Both of them have walked past it this week.

2A • It's on the door 📻 Track 6.1

Before you listen. Two people are standing by a propped-open fire door. **Which of them put the wedge there?**

Gist — one listen, one question. Is the rule going to be enforced?

Detail — complete the frame.

	When was it written?	Who by?	When was it last applied?
the fire-door rule			
the key-return rule			
the no-cooking rule			

Inference. Wanjiru says "*it was brought in after something.*" **She does not say what. Why is that the most important sentence in the recording?**

Attitude. Obi says "*I didn't know.*" **Did he?** Which sound tells you.

Noticing. Six sentences. Sort them by what the speaker is doing with the agent.

1. *The rule was brought in in 2019.*
2. *Somebody brought the rule in in 2019.*
3. *The door was wedged open with a fire extinguisher.*
4. *The door was wedged open by one of the tenants.*
5. *It is enforced twice a year.*
6. *Nobody has enforced it since 2022.*

A. the doer is hidden · **B.** the doer is named · **C.** the *instrument* is named, not the doer

2B • Decoding clinic Track 6.2

Forty seconds. Four jobs.

1. Count the passives.
2. *was brought* — what happens between the two words?
3. Catch the three years.
4. *-ed* at the end of *propped*, *wedged*, *enforced* — which one adds a syllable?

Transcripts, page 176.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

Who did it, and whether you say so

3A • Notice

Return to the six sentences.

1. Which sentences tell you **who** did it?
2. In sentence 3, *with a fire extinguisher* — is the extinguisher the doer?
3. What is the difference between *by* and *with* here?
4. Sentence 1 and sentence 2 describe the same event. **Which one would a notice use, and why?**
5. Sentence 6 is active. **Why does it feel like an accusation when sentence 1 does not?**

3B • See

6in}

The same event, two first words — The passive is not politer. It is a decision about what the sentence is about.

3C • Know

Tense	Active	Passive
present	<i>They enforce it.</i>	<i>It is enforced.</i>
past	<i>They enforced it.</i>	<i>It was enforced.</i>
present perfect	<i>They have enforced it.</i>	<i>It has been enforced.</i>
past perfect	<i>They had enforced it.</i>	<i>It had been enforced.</i>
future	<i>They will enforce it.</i>	<i>It will be enforced.</i>
modal	<i>They must enforce it.</i>	<i>It must be enforced.</i>

by names the doer. **with** names the instrument.

The door was wedged open **by** a tenant **with** a fire extinguisher.

Watch out. The passive is not more polite and not more formal. It is a decision about **what goes first in the sentence** — and therefore about what the reader thinks the sentence is about.

Why it matters. *Mistakes were made* is grammatically unremarkable and does a specific job: it puts the mistakes first and leaves no room for a name.

3D • Use — controlled

Put each into the passive. Decide for each whether to keep the agent.

1. Somebody propped the fire door open again.
2. The managing agent brought the rule in after a fire in 2019.
3. Nobody has reviewed the policy since 2022.
4. Somebody will remove the wedge before the inspection.
5. You must return keys to the box by six.
6. A tenant wedged the door with an extinguisher.

3E • Use — guided

Each sentence names a doer. **Remove the doer and say what the sentence gains and loses.**

1. Wanjiru decided not to enforce it.
2. The landlord's agent wrote the policy.
3. Two tenants have ignored the rule for a year.

3F • Use — open

Describe a procedure where you are, three times: once naming everybody, once naming nobody, and once naming only the person who benefits. Your partner says which version a notice would use.

3G • Check — six items

1. The lift _____ (inspect) every six months.
2. The rule _____ (bring) in after a fire.
3. Nothing _____ (do) about it since 2022.
4. Keys _____ (must / return) to the box.
5. The door was wedged _____ a tenant _____ an extinguisher.
6. By the time anyone noticed, the policy _____ (already / amend).

0-3 → Workbook pp. 46-48. 4-5 → Part 6. 6 → p. 119.

Why this sentence blames the extinguisher

✗ The door was wedged open by a fire extinguisher.

by introduces the agent — the thing that decided. An extinguisher decides nothing. The sentence reads as though the object acted on its own, which is exactly what the person who propped it would prefer.

✓ The door was wedged open with a fire extinguisher.

with introduces the instrument. The agent is now absent rather than misassigned — and the reader notices the absence, which is the point.

What the writer thought:
The writer thought by and with were interchangeable in the passive. They mark two different roles, and getting them round the wrong way can move the blame.

{width=6.

6in}

Why this sentence blames the extinguisher — Why this sentence blames the extinguisher

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency sprint — 4 / 3 / 2

A rule you have broken and would break again. Four minutes, three, two.

4B • The functional core — explaining a procedure

The procedure, and what people do
Learner A has the written steps. Learner B has the observed steps. Find the three gaps.

what is written

check · lock · sign the book

→

what happens

check · (nobody locks) · sign the book

→

Describe only. Do not show the page.
8 differences — find them all

6in}

The procedure, and what people do — Learner A has the written steps. Learner B has the observed steps. Find the three gaps.

Language Bank

sequencing

first of all · once that's done · at that point · not before

flagging the trap

the bit people get wrong is · if you only do one thing

stating the rule

it has to be signed before it goes · nothing leaves until

admitting the gap

there's no rule about that · that's custom, not policy

Information gap. Learner A has the written procedure. Learner B has what people actually do. Neither sees the other. **Find the three places they differ.**

4C • The performance — teach the procedure

Four minutes. Explain a procedure to somebody who has never done it, **and who will then do it in front of you.** You may not touch anything.

4D • Observer

Listen for **one thing**: which step did the speaker assume and not say?

4E • Two criteria

☐ Could my partner do it without asking me a question? ☐ Did I say which step people usually get wrong?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

An opinion column called **"The rule that was never repealed."** The first line is:

Every organisation I have worked in has a rule that no living person has obeyed.

What do you expect? One sentence.

5B • Skim — sixty seconds

Find the turn. The writer changes position once.

The rule that was never repealed

Every organisation I have worked in has a rule that no living person has obeyed. It is written down. It has never been repealed. And if you ask why nobody follows it, you are told, with real confidence, that it does not apply any more — a claim that is never produced in writing, because there is nothing to produce.

Dead rules accumulate for a simple reason: creating one requires a decision, and killing one requires the same decision with none of the credit. A policy that is brought in after an incident is brought in by somebody who can point at it afterwards. A policy that is quietly dropped is dropped by somebody who then has to explain, if anything goes wrong, why they dropped it. The asymmetry does the rest.

For a long time I thought this was simply untidy, and that the answer was a periodic cull. I now think that is wrong, and that the dead rules are doing something.

What they are doing is holding a space. A rule that nobody follows is still a rule that can be produced at a moment of crisis, and the fact that it was ignored for a decade will not help you when it is. It also marks a boundary: everybody knows the door should not be propped open, and the reason they know is the notice, not the enforcement. Remove the notice and you remove the thing the shrug is aimed at.

The real danger is not the dead rule. It is the live rule that has quietly become dead without anybody noticing the moment it happened — because then nobody is shrugging. They simply do not know. The organisation believes the rule is operating. The people believe it was never serious. Neither side is lying, and the gap between them is where the incident comes from.

So: audit, by all means. But the question is not "which rules are nobody following?" It is "which rules do we believe are working?" And the honest version of that question can only be answered by somebody who does not already know the answer.

5C • Close reading

1. What claim is "never produced in writing"?
2. Explain the asymmetry in paragraph two in your own words.
3. **Where does the writer change position, and what did they used to think?**
4. What two things does a dead rule do, according to paragraph four?
5. **What does the writer say is more dangerous than a dead rule, and why?**
6. The last sentence sets a condition. What is it, and why does it matter?

5D • Vocabulary in context

repealed • accumulate • asymmetry • cull • produced (*produced at a moment of crisis*) • operating (*the rule is operating*)

5E • The counter-text

The building rules notice
Nine rules. One has teeth. One sentence at the bottom removes them.

JENGO HOUSE • CONDITIONS OF OCCUPATION

Issued March 2019
Authority The Management

#	RULE	SINCE	IF BREACHED
1	Fire doors must not be propped open	2019	—
2	Keys to be returned to the office by 18:00	2014	replacement charged
3	No cooking on the premises	2014	—
4	Visitors to be signed in	2019	—
5	No storage in common parts	2014	—
6	Music audible outside a unit	2014	—
7	Bicycles not to be brought onto ground floor	2014	—
8	Waste separated into the bins	2014	—
9	The lift is not to be used during an alarm	2014	—

General
These conditions form part of the occupation agreement. Occupiers are reminded that the common parts are maintained for the benefit of all.

The Management reserves the right to vary, waive or not enforce any of these conditions at its discretion, and no failure to enforce shall constitute a waiver of the right to enforce subsequently. Queries to the managing agent.

- Rule 1. No consequence of any kind
- The only rule with teeth — and it is about money
- 2014. Nobody now in the building was here
- 2022, and already ignored
- "Reminded" — the softest verb available
- Here is the sentence that unmakes the notice
- ...and here is the one that keeps it alive anyway

{width=6.6in}

6in}

The building rules notice — Nine rules. One has teeth. One sentence at the bottom removes them.

Read the building rules notice and answer.

1. How many rules are listed?
2. What is the stated date and authority?
3. **Which rule has an enforcement mechanism attached, and which have none?**
4. Find the rule about the fire doors. What does it say will happen?
5. **Find the sentence that makes the whole notice unenforceable.**

5F • Writer analysis

- The column argues; the notice asserts. Which one tells you who wrote it?
- **The notice is signed "The Management". The column is signed by a person. Does that change what you believe?**

5G • Text against text

The column says dead rules hold a space. The notice has at least three dead rules on it. Two sentences on whether the notice should be rewritten. The second begins *"The risk of rewriting it is..."*

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Twenty-one ways to say it happened and not say who

6in}

Six ways to not say who — The same event, worded six ways. The doer gets further away each time.

6A • Sort — how hidden is the doer?

Put all twenty-one on a line from **completely hidden** to **almost named**.

retrospectively · it is understood · be brought about · reportedly · be done away with · hereby · nobody will say who · unilaterally · mistakes were made · supposedly · allegedly · ostensibly · is thought to be · purportedly · duly · is said to · apparently · is widely regarded as · steps have been taken · it was decided · it turned out that · notionally · it emerged that

6B • Chunk completion

1. _____ that the works would begin in March.
2. The rule _____ away with in 2022, although nothing was written down.
3. _____ to prevent a recurrence.
4. It _____ that the inspection had never been booked.
5. The decision was taken _____, without consulting anybody.

6C • Register sort

Which appear in an official notice, which in a newspaper, which only in speech? Six appear in two.

6D • Contrast Clinic — *by* against *with*, *agent* against *instrument*

Six items.

1. The door was wedged _____ a fire extinguisher.
2. The policy was written _____ the managing agent.
3. The rule was brought in _____ the landlord after a fire.
4. The report was produced _____ an inspector, _____ a standard template.

5. The notice was signed _____ "The Management".
 6. The lock was forced _____ a screwdriver _____ somebody who knew the building.
-

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

What happens at the end of *-ed*

6in}

Three endings, one spelling — The sound before the -ed decides. Not the letter.

7A • Hear Track 6.3

Three endings, one spelling.

/t/ — propped · enforced · wedged? (*no — listen again*) /d/ — reviewed · signed · amended?
(*no*) /ɪd/ — amended · wedged? (*no*) · inspected

Sort the twelve words you hear into the three groups. The rule is about the sound before the *-ed*, not the letter.

7B • Say

"The door was propped, the rule was reviewed, and nothing was amended." Three endings in one sentence.

7C • Make it mean something

In the passive, the *-ed* often sits between two consonants and is nearly lost: "*it was enforced twice*" → /ɪtwəzɪn'fɔːstwaɪs/.

Say it fast. Then say it so a stranger could write it down. Which one would you use in a meeting, and which on a recorded line?

7D • Fluency 20

Twenty seconds: **what has been done, by whom, and what has not.** Three times, faster.

Part 8 • Writing ♦ C • THE PERFORMANCE

A procedure a stranger could follow • 140 words

6in}

What happens when a stranger follows your procedure — Sixty procedures, each handed to one person who had never done the task.

8A • Read the model

Closing the building — for whoever is last out [names the reader in the title. Most procedures do not]

The building is locked at nine. If you are the last person on any floor, you do four things.

Check the two fire doors on your floor are shut. They are propped open during the day and the wedges are kept on the hook beside each one — **put the wedge on the hook, not on the floor**, because the cleaner moves anything on the floor and then nobody can find it. [the reason is given, and it is the real reason]

Turn off the machines at the wall, not at the screen. Return your key to the box in reception; the box is checked at nine by whoever locks up, and a missing key is phoned through.

If a fire door will not shut, do not force it. Leave it, and message the group — it has been dropping on its hinge since January and it is being looked at. [admits something unresolved, instead of pretending]

Questions about the writer's choices:

1. Why is the reason for the hook given at all?
2. The last paragraph admits a problem that has lasted a year. What does that buy?
3. Count the passives. **Why is "the box is checked at nine" passive and "turn off the machines" not?**

8B • The anti-model

It is the responsibility of all users to ensure that the premises are secured appropriately at the end of the working day in accordance with building policy. Keys should be returned. Fire safety equipment must not be obstructed at any time.

Correct, complete, and useless. **Name three things a new person could not do after reading it.**

8C • Generate • 8D • Plan

who this is for → how many steps → each step as an instruction, not a principle → the one people get wrong, and why → what is still broken

8E • Draft 1 — 140 words

8F • Peer review — two criteria

☐ Could I do this tonight without asking anything? ☐ Is there a step where I would have to guess?

8G • Draft 2 • 8H • Test it

Give it to somebody who has never done the task and watch them. Do not help. Note every question they would have asked. Rewrite.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

CULTURE FILE • Unwritten Rules

The welcome email, and what it leaves out
Everything written down is on the left. Everything that matters is on the right.

WELCOME TO JENGO HOUSE — sent to every new tenant

Welcome! Here is everything you need. Your key opens the street door and your own unit. Keys go back in the box by six. Wifi password is on the board. Bins are in the yard, separated into three. Any problems, message the group.

— The Management

What Grace told me in week one

#	THE UNWRITTEN RULE	WHO TELLS YOU	HOW YOU FIND OUT
1	Never take the last desk by the window	the neighbor	a look
2	The third bin went two years ago	the second	after you use it
3	The group chat is for problems	not chat	silence
4	If you book the room you clean the person	passive aggression	
5	Mr Kanau is addressed as Mr. Kanau	instantly	immediately
6	Don't message the group after 6pm	nobody	replies

None of the six is written anywhere. Five of the six are enforced by somebody with no authority at all. The one rule in the welcome email that is actually followed — keys by six — is the one with a charge attached to it.

- Six lines. Four of them are about objects
- Signed by nobody in particular
- The welcome email is wrong about the bins
- "Nobody tells you" appears twice
- This one is learned in a single afternoon
- Authority and enforcement are in different hands

6in}

The welcome email, and what it leaves out — Everything written down is on the left. Everything that matters is on the right.

9A • Your own first

Write down **three unwritten rules** of a place you know well — a workplace, a family, a class. Not policies. The things everybody knows and nobody has said.

The test: a rule is unwritten if a newcomer could break it without knowing, and would be told about it afterwards by somebody who was not in charge.

9B • Who enforces them?

For each of your three: **who tells the newcomer?** It is almost never the manager.

9C • Four incidents

Four short accounts of somebody breaking an unwritten rule. For each: what was the rule, how did they find out, and what did it cost them?

9D • The reciprocal half

Read the four unwritten rules of a workplace in a country not your own. For each, find the **nearest equivalent** where you are — and the one that has no equivalent at all.

9E • The hard question

Some unwritten rules protect people. Some exclude them. **Take one of your three and argue both.**

9F • Transfer

Ask somebody who joined your workplace, class or community in the last year: **what did nobody tell you?** Bring the answer, not your guess at it.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

6in}

Nine rules, twelve years — Half the class sees what is written. Half sees what happens. Neither sees both.

10A • Relay

Half the class sees the written rules; half sees what actually happens. Rebuild by speaking.

10B • Simplify

Explain the building rules notice to somebody moving in tomorrow, in nine minutes. **Which rules do you tell them, and in what order?**

10C • Compress

The column into 60 words for a management committee. Defend three cuts.

10D • Online interaction

Write the group message proposing that one rule be formally dropped. **Somebody will screenshot it to the landlord.**

10E • Across languages

How does your language say a thing was done without saying who did it? **Does it use a passive, or something else?** Show both to a partner.

The fire doors

The notice says fire doors must not be propped. They have been propped every working day for two years, because the corridor is dark and the doors are heavy and nobody has ever said anything.

The insurance renewal is in six weeks. The form asks whether fire doors are kept closed.

- **Enforce it.** Remove the wedges, tell everyone, and accept that four people will be angry and two will keep doing it.
- **Formally drop it** and write down what you do instead — hold-open devices on a closer, which cost 94,000 for three doors.
- **Say nothing**, answer the form honestly about the policy rather than the practice, and continue.

11A • The evidence

1. **The notice** from Part 5, with its unenforceable sentence.
2. **The chart:** what the three options cost, including the one with no money in it.
3. **The voice.** Obi, twenty-five seconds: *"I didn't know it was a rule. I knew it was a sign."*

11B • Steelman

Argue the option you like least. Two minutes.

11C • Deliberate

I think they should _____, because _____. The strongest argument against me is _____, and my answer to it is _____.

11D • Decide — eighty words, two reasons

11E • Model decision

They should buy the hold-open devices, and I accept that 94,000 is a lot of money for a problem nobody has had.

Enforcing it is the honest-looking option and I think it fails. The reason the doors are propped is that the corridor is dark and the doors are heavy, and removing the wedges does not change either of those things. In six weeks the wedges come back, and now they come back knowing it is forbidden, which is worse than not knowing — that is Obi's line, and it is the only new information in the room.

Saying nothing is the option I would most like to take and it is the one that cannot survive a question. The insurance form does not ask about the policy. It asks whether the doors are kept closed. Answering about the policy is a lie with a defensible sentence wrapped round it.

The devices cost money and solve the actual problem, which is that the rule and the building were never compatible. Somebody should have noticed that in 2019.

11F • The Reveal

What happened. They bought devices for two of the three doors — the third was quoted at 61,000 on its own because of the frame — and propped the third one.

The insurance form was answered *"fire doors are fitted with automatic closers"*, which was true of two doors out of three and was not queried.

The third door is still propped. Nobody has put a wedge under it since March, because somebody moved a filing cabinet in front of it instead, and a cabinet is not a wedge.

They solved two thirds of it, told two thirds of the truth, and the remaining third found a new way to be propped that the notice does not cover.

Was the reasoning sound? And: the notice still says "must not be propped". Is a filing cabinet propping?

Part 12 • Landing ◆ all three lines

12A • Recycle — twelve items

Six from this unit.

1. The lift _____ (inspect) every six months.
2. The rule _____ (bring) in after a fire in 2019.
3. The door was wedged _____ a tenant _____ an extinguisher.
4. The works were done in _____ with the drawings.
5. It _____ that the inspection had never been booked.
6. _____ taken to prevent a recurrence.

Four from Units 1–5.

7. If you _____ (press) override, it _____ (log) your name. (*Unit 5*)
8. You _____ prop that door open. (*Unit 4*)
9. I _____ (see) him on Thursday — arranged. (*Unit 3*)
10. At 3,720 she _____ even. (*Unit 2*)

Two from *Making Plans* (A2.1).

11. The policy, _____ was written in 2019, has never been reviewed. (*relative clause*)
12. The building _____ (inspect) in September. (*passive, past simple*)

12B • Consolidate

120 words, one paragraph. A rule where you are: when it was brought in, by whom, whether it is enforced, and what happens instead. Six items from Part 6.

Unit 7 • What do you want them to do?

B1.1 • Unit 7 • Show Me Once

English Animated • *Taking a Position* • Jengo House, Nairobi Student's Book pages 128–147 •
20 pp • ~11.5 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

Four handovers happening at once — Twelve things are changing hands in this picture. One of these handovers will fail.

What do you want them to do?

By the end of this unit you will teach a skill in five minutes — and then watch the person you taught teach it to somebody else.

◆ A · THE WORLD

How a skill moves from one person to another, and what gets lost on the way

◆ B · THE SYSTEM

Verb + object + infinitive, and verb + object + *-ing* · verb patterns, returning · 24 words for teaching and persuading · 21 reporting verbs with the patterns they demand · stress inside a three-word verb

◆ C · THE PERFORMANCE

A taught skill, passed on twice, with the losses measured

0A · Find it

Twelve things being handed over in this picture. Four of these sixteen are not there.

a key · a password on paper · a tool · a clipboard · a phone · a folder · a USB stick · a labelled box · a handwritten note · a laminated card · a login screen · a chair · a contract · a certificate · a toolbox · a laptop

0B · Guess it

One of these handovers will fail. Which, and what in the picture tells you?

0C · Say it

Record thirty seconds. *Think of someone who taught you something well. What did they do?*
Unprepared.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

{width=6.

6in}

How a skill travels, and where it leaks — Three of these arrows carry most of it. The dashed one carries almost nothing.

1A • Meet — how a skill travels

Use the network. Name the word at each stage.

instruct • demonstrate • model • prompt • cue • mentor • apprentice • competence •
feedback • correction • retention • rehearse

1B • Sort — cline of control

Order these from **most controlled by the teacher** to **most controlled by the learner**.

stand back • model • demonstrate • instruct • cue • prompt

Where does teaching stop and watching start? Mark it. Compare marks.

1C • Sort — odd one out, and why

1. instruct • demonstrate • model • rehearse
2. prompt • cue • correction • feedback
3. mentor • apprentice • competence • retention
4. pass on • take in • go over • pick up

1D • Stretch — the phrases

1. I'll **walk you** _____ it once, then you do it.
2. Don't tell her — **show her** _____ to hold it.
3. **Let him** _____ before you correct anything.
4. She didn't study it. She **picked it** _____ by watching.
5. It's a **hands-**_____ job; you cannot learn it from a page.
6. Most of it was **trial and** _____.
7. He **talked me** _____ doing it his way, and he was right.

1E • Stretch — four phrasal verbs, one lesson

pass on · take in · go over · pick up

Two describe the teacher, two the learner. Which?

1F • The two sayings

see one, do one, teach one · it's muscle memory

One is a training method used in hospitals. One is an excuse for not explaining. **Which is which — and when is each of them right?**

Corpus Note *Teach somebody to do* and *teach somebody how to do* are both common. *Show somebody to do* is not English; it must be *show somebody how to*. The pattern is in the verb, not in the meaning.

1G • Own it

Name one thing you can do that you could not explain. **What would you have to do instead of explaining?**

Part 2 • Listening ♦ A • THE WORLD

6in}

{width=6.

Four days to hand it over — One of them is holding the tool. Watch whose hands you are being asked to look at.

2A • Four days to hand over 🎧 Track 7.1

Before you listen. Mariam is training a machinist who starts the week she leaves for a delivery. **Who is holding the tool?**

Gist — one listen, one question. What does Mariam decide not to explain?

Detail — complete the frame.

the first time

the second time

the third time

Inference. She says "*let her get it wrong once.*" **Who is she saying that to?**

Attitude. The apprentice says "*got it*" twice. **One of them is true.** Which sound?

Noticing. Six sentences. Sort them by the pattern after the object.

1. *I want you to hold it like this.*
2. *I'll show you how to hold it.*
3. *Let her try.*
4. *I saw her doing it the wrong way.*
5. *She made me do it again.*
6. *I heard you ask about the tension.*

A. object + **to** + verb · **B.** object + **-ing** · **C.** object + **bare** verb

2B • Decoding clinic Track 7.2

Forty seconds. Four jobs.

1. *want you to* — how many sounds?
2. Where does the stress fall in *go over it again*?
3. Catch the two measurements.
4. *let her* — what happens to the /h/?

Transcripts, page 177.

Part 3 • Grammar Lab 1 B • THE SYSTEM

Three things that can follow an object

3A • Notice

Return to the six sentences.

1. Which verbs take **to + verb** after the object?
2. Which two take the **bare** verb — no *to*?
3. Sentence 4 has **-ing**. What does it tell you about *when* she saw it?
4. Compare: *I saw her do it* and *I saw her doing it*. **Which one did you watch all of?**
5. Try *I want you hold it*. **What is wrong — and what kind of wrong is it?**

3B • See

6in}

What can follow an object — The pattern lives in the verb, not in the meaning. let and allow mean the same and behave differently.

3C • Know

Pattern	Verbs	Example
object + to + verb	want · ask · tell · advise · remind · expect · allow · teach · persuade · encourage · force · invite · enable	<i>I want you to hold it.</i>
object + bare verb	let · make · have · (and help, either way)	<i>Let her try. · She made me do it again.</i>
object + -ing	see · hear · watch · notice · find · catch	<i>I saw her doing it wrong.</i>
object + bare verb , with the senses	see · hear · watch	<i>I saw her do it. — the whole thing, start to finish</i>

Watch out. *Let* and *make* take the bare verb. *Allow* and *force* mean almost the same and take *to*. The meaning is not the guide; the verb is.

Why it matters. *I saw her doing it* describes a moment. *I saw her do it* describes the whole act — which is what a witness statement needs.

3D • Use — controlled

Mariam wanted the apprentice (1) _____ (hold) the cloth differently, so she made her (2) _____ (do) it three times. She did not let her (3) _____ (use) the big scissors on the first day. On the second day she saw her (4) _____ (cut) against the grain and said nothing, because she expected her (5) _____ (notice) it herself. She did. On the fourth day Mariam heard her (6) _____ (explain) the grain to somebody else, and that is when she knew.

3E • Use — guided

Rewrite each one with the verb in brackets. **The pattern will change.**

1. She let me use the machine. (*allow*)
2. He made us stay late. (*force*)
3. I watched her cut it. (*see ... -ing*)
4. They told me to come back. (*want*)

3F • Use — open

Teach your partner something small, right now, in ninety seconds. Then describe what happened using four of the patterns: *I wanted them to...* *I made them...* *I let them...* *I saw them...*

3G • Check — six items

1. I want you _____ (check) it twice.
2. She let me _____ (borrow) it.
3. He made us _____ (wait) an hour.
4. I saw him _____ (leave) the building — the whole thing, from the lift to the door.
5. I saw him _____ (leave) the building as I came round the corner.
6. They won't allow us _____ (park) there.

0–3 → Workbook pp. 54–56. 4–5 → Part 6. 6 → p. 139.

Why this sentence says you only saw part of it

✗ I saw him leaving the building, so he definitely left.

The -ing form describes a glimpse. It does not claim you watched the whole thing, so it cannot support "definitely". A lawyer will take this apart.

✓ I saw him leave the building, so he definitely left.

The bare verb claims the complete action: you watched it from start to finish. That is what the second half of the sentence needs.

What the writer thought:
The writer thought -ing was simply the more descriptive version. It is the shorter one — it reports a slice, not the event.

6in}

Why this sentence says you only saw part of it — Why this sentence says you only saw part of it

Part 4 • Speaking ◆ C • THE PERFORMANCE

4A • Fluency sprint — 4 / 3 / 2

Something you were taught badly. Four minutes, three, two.

4B • The functional core — instructing without taking over

Two ways to teach the same thing in five minutes

Learner A has the instructions. Learner B has the object. A may speak and may not touch.

the teacher does it

5 minutes · learner touches it once

the learner does it

5 minutes · learner touches it four times

Describe only. Hands behind your back.

8 differences — find them all

{width=6.6in}

Two ways to teach the same thing in five minutes — Learner A has the instructions. Learner B has the object. A may speak and may not touch.

Language Bank

before they try	I'll walk you through it once · watch my hands, not my face
while they try	keep going · that's it · don't look at me
correcting late	try it again and see · what did you notice?
not correcting	(silence) · and again · don't let me stop you

Information gap. Learner A has the written instructions. Learner B has the thing and no instructions. **A may speak. A may not touch anything.**

4C • The performance — see one, do one, teach one

Three rounds. Teach a small skill in five minutes. Your learner then teaches it to a third person **while you watch and say nothing.**

4D • Observer

Listen for **one thing**: what did the second teacher leave out that the first one said?

4E • Two criteria

☐ Did my learner do it without me touching anything?

☐ Did what they taught on survive one more handover?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

Correspondence: four emails over nine days, between somebody leaving a job and the person replacing them. The first line is:

I've written it all down. I'm attaching the document now so you have the weekend with it.

What do you expect to go wrong? One sentence.

5B • Skim — sixty seconds

Find the email where the tone changes.

Four emails, nine days

1 — Thursday, 17:40 • from Felix

I've written it all down. I'm attaching the document now so you have the weekend with it. It's forty pages but most of it is screenshots. Anything that isn't in there, ask me — I'm around until the 30th and after that I'll still answer, honestly.

2 — Monday, 09:12 • from Ruth

Thanks — read it twice. Two things. The reconciliation on p.19 says "run the usual check". I don't know what the usual check is. And on p.31 there's a note that says "ask Felix about the Tuesday thing" which I think you wrote to yourself?

3 — Monday, 22:50 • from Felix

Ha — yes, that was a note to me. The Tuesday thing is that the figures come in late on Tuesdays so you run it Wednesday. The usual check is you compare the two totals and if they're more than about 2% apart you go back to the source file. It's hard to write down because it depends. I've been doing it for six years so I don't really think about it any more, which I know isn't helpful.

4 — Friday, 16:05 • from Ruth

I've done it four times now and I think I understand, except I had one this week that was 6% apart and I went back to the source file and the source file was fine. I asked Priya and she said that happens when a payment lands between the two pulls and you just wait and run it again Monday. That's not in the document and I don't think you knew, because you'd have been doing it without noticing. **I've added it on p.19.** Thank you for the forty pages — the forty pages were the only reason I knew p.19 was where to put it.

5C • Close reading

1. How long is Felix's document, and what is most of it?
2. What two problems does Ruth find on Monday morning?
3. What was the note on p.31 actually for?
4. **Felix says "I don't really think about it any more." What has that done to the handover?**
5. What did Ruth learn from Priya, and why was it not in the document?
6. **The last sentence defends the forty pages. On what grounds?**

5D • Vocabulary in context

reconciliation · pull (*between the two pulls*) · land (*a payment lands*) · the usual check · screenshots · source file

5E • The counter-text

Page 19, before and after
The second version was written by the person who did not know. That is why it works.

HANDOVER — p.19 • RECONCILIATION

VERSION 1 — written by Felix
Run the usual check. Compare the totals. If they do not match, investigate and escalate if necessary. File when complete.

Words	24
Numbers	none

VERSION 2 — after Ruth
Run it on WEDNESDAY, not Tuesday. The figures come in late on Tuesday and you will be reconciling against half a day.

Compare the two totals. Within 2%: file it. More than 2% apart, in this order: (1) check the source file — it is wrong about half the time. (2) If the source file is fine, wait and run it again on Monday. A payment can land between the two pulls and it looks exactly like an error.

Above 10%, stop and ask somebody. Do not fix it.

Words	96
Numbers	four

Added by R.A., version 2, after a 6% mismatch that was not an error. Felix had been waiting until Monday for six years without noticing that he did it.

"The usual check" — usual to whom?

Four instructions, no number anywhere

The day, and the reason for the day

A branch, in order, with a probability on it

This is the one Felix could not have written

A ceiling, and permission to stop

Six years of doing it without knowing he did it

{width=6.6in}

Page 19, before and after — The second version was written by the person who did not know. That is why it works.

Read page 19 of the handover document — before and after Ruth's edit.

1. What did the original page tell you to do?
2. What three things did Ruth add?
3. **Which of her additions could Felix have written, and which could he not?**
4. What is the only instruction on the page with a number in it?
5. **Find the sentence that only makes sense if you already know the answer.**

5F • Writer analysis

- Felix writes for somebody who already knows. Ruth writes for somebody who does not.
- **The document got better because the wrong person edited it. Is that a method or an accident?**

5G • Text against text

The emails say the document failed. Page 19 says it worked. Two sentences on how both are true. The second begins *"The forty pages did the thing that..."*

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Twenty-one verbs that demand a pattern

Six verbs, six patterns, one meaning — All six describe stopping somebody. The grammar after each one is different.

6A • Sort — which pattern?

Sort all twenty-one into three columns: **+ to • + from -ing • + of / on / for -ing.**

want someone to • accuse someone of • congratulate someone on • teach someone to • enable someone to • advise someone to • remind someone to • persuade someone to • expect someone to • allow someone to • warn someone about • invite someone to • help someone to • ask someone to • stop someone from • blame someone for • encourage someone to • force someone to • tell someone to • prevent someone from • urge someone to • warn someone against

6B • Chunk completion

1. She _____ me _____ taking the shortcut, and she was right.
2. He _____ me _____ losing the file, which was not fair.
3. They _____ her _____ passing after four attempts.
4. Nothing _____ you _____ asking.
5. The handover document _____ her _____ start on Monday instead of guessing.

6C • The three warnings

warn someone to • warn someone against • warn someone about

Three patterns, three meanings. Write a sentence for each, all about the same machine.

6D • Contrast Clinic — *to*, *bare*, and *-ing*

Six items.

1. I watched him _____ (fit) the whole thing — forty minutes.
2. They made us _____ (sign) it.
3. I watched him _____ (fit) it as I walked past.
4. They forced us _____ (sign) it.
5. She allowed me _____ (go) early.
6. She let me _____ (go) early.

Then: in pairs 1/2 and 5/6, what changed apart from the grammar?

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

Where the stress goes in a three-word verb

The stress sits on the particle
In a three-word verb the small word carries the beat. Move it and you change the job.

go	o	ver	it	check it
GO	o	ver	it	do it again
walk	you	THROUGH	it	step by step, with you
pass	it	ON		to the next person
take	it	IN		understand and retain
put	UP	with	it	tolerate

6in}

{width=6.

The stress sits on the particle — In a three-word verb the small word carries the beat. Move it and you change the job.

7A • Hear 🎧 Track 7.3

go **O**ver it • walk you **T**HROUGH it • pass it **O**N • take it **I**N • get **O**N with it • put **U**P with it

The stress is on the particle, not the verb. Mark it in six more.

7B • Say

"I'll go over it once, walk you through it, and then you pass it on."

7C • Make it mean something

"Go over it." — stress on **go**: do it again. "Go over it." — stress on **over**: check it.

Say both. Your partner says which job you just gave them.

Twenty seconds: **teach something, out loud, to nobody.** Three times, faster.

Part 8 • Writing ♦ C • THE PERFORMANCE

Instructions that survive one handover • 140 words

{width=6.

6in}

What survives a handover — The same procedure, traced through two handovers and six months.

8A • Read the model

Running the Wednesday reconciliation — for whoever does this next

Run it on Wednesday, not Tuesday. The figures come in late on Tuesday and you will reconcile against half a day. [the reason is the thing Felix had stopped noticing]

Compare the two totals. If they are within 2%, file it. If they are more than 2% apart, do these in order: check the source file first, because that is wrong about half the time. If the source file is fine, wait and run it again on Monday — a payment can land between the two pulls, and it looks exactly like an error. [the second branch exists because somebody found it the hard way]

I have never known it be more than 6% apart. If you see double figures, stop and ask somebody rather than fixing it.

The thing I got wrong for two years: I assumed a mismatch meant somebody had made a mistake. Usually it means you ran it on the wrong day. [the author's own error, named]

Questions about the writer's choices:

1. Why does the branch about Monday exist, and who put it there?
2. The last paragraph admits two years of being wrong. What does that do for the reader?
3. **One instruction has a number in it and one has "about half the time". Why keep the vague one?**

8B • The anti-model

Perform the reconciliation in accordance with the standard process. Investigate any discrepancies and escalate as appropriate. Ensure all checks are completed prior to filing.

Name three decisions a new person still has to make after reading this.

8C • Generate • 8D • Plan

who this is for → when, and why then → the normal case → the branch → the limit, and what to do at it → what you got wrong

8E • Draft 1 — 140 words

8F • Peer review — two criteria

☐ Is there a step where I would have to guess? ☐ Did the writer admit something they got wrong?

8G • Draft 2 • 8H • Test it twice

Give it to somebody. Then give **their** version to a third person. **What survived two handovers?**

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

WORK FILE • The Handover

The handover checklist nobody fills in
Four columns. Most handovers complete the first two and leave the others blank.

HANDOVER CHECKLIST • OUTGOING POST HOLDER

Leaving
Incoming
Overlap

F. Mutiso
R. Adeyemi
4 working days

TASK	WHEN	WHAT GOES WRONG	WHO TO ASK
Reconciliation	Wed	—	—
Supplier payments	Fri	—	—
Month-end pack	last working day	Late figures	—
Quarterly return	Q+14 days	—	—
Audit sample	on request	—	Priya

Known gaps declared by the outgoing holder
Nothing declared.

The outgoing holder completes columns 1 and 2 in an average of eleven minutes. Columns 3 and 4 are left blank in roughly four handovers out of five, not because the knowledge is withheld but because the question "what goes wrong?" has no answer available to somebody for whom it has stopped going wrong.

Four days is the whole budget

Column 1 and 2 — eleven minutes, complete

Column 3 — one entry out of five

Column 4 — one name, and she was asked later

"Nothing declared" is almost never true

And here is why it is not dishonesty

{width=6.

6in}

The handover checklist nobody fills in — Four columns. Most handovers complete the first two and leave the others blank.

9A • The four things a handover has to carry

Read the handover checklist. **Rank the four by how often they are missed.**

what you do • when you do it • what goes wrong • who to ask when it does

9B • The invisible knowledge test

List five things you do at work or in your studies **that you have never been told and never told anybody**. Five minutes. Most people stall at three.

9C • Write the hardest one

Take the one from 9B that is hardest to put into words. **Write it in under eighty words**, for somebody who has never done it.

9D • The successor's edit

Swap. Read somebody else's. **Write the question you would have to ask them**. Give it back. They add the answer. **That is the handover**.

9E • Transfer

Find out one thing this week that nobody told you and that you now do automatically. Write it down before you forget that you ever did not know it.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

Nine days, four emails, eighteen months — Half the class sees the document; half sees what the successor found out. Neither sees both.

10A • Relay

Half the class sees the written document; half sees what the successor found out. Rebuild.

10B • Simplify

Explain the reconciliation to somebody doing it on Wednesday for the first time, **in four minutes, on the phone, while they do it.**

10C • Compress

The four emails into 60 words for a manager who wants to know whether the handover worked. Defend three cuts.

10D • Online interaction

Write the message to Felix telling him that page 19 was wrong. **He wrote forty pages in his own time.**

10E • Across languages

Teach a partner one phrase in your language — **not by translating it.** Only demonstrate. Then: what did you do when demonstrating failed?

Part 11 • The Decision ♦ C • THE PERFORMANCE

Four days, or forty pages

Felix leaves on the 30th. His replacement starts on the 27th. That is four days of overlap, and Felix has eleven days of work left that only he can do.

- **Spend the four days teaching.** His eleven days become somebody else's problem, and two of them cannot be done by anybody else before March.
- **Spend the four days finishing, and write the forty pages in the evenings.** He has done this before. The pages are good and the gaps are the things he has stopped noticing.
- **Ask for the start date to move.** It costs the business three weeks of an empty seat, and he has no standing to ask.

11A • The evidence

1. **Page 19** from Part 5, before and after.
2. **The chart:** what survives one handover, two handovers, and six months.
3. **The voice.** Ruth, twenty-five seconds: *"The forty pages were the only reason I knew where to put the thing I found out."*

11B • Steelman

Argue the option you like least. Two minutes.

11C • Deliberate

I think he should _____, because _____. The strongest argument against me is _____, and my answer to it is _____.

11D • Decide — eighty words, two reasons

11E • Model decision

He should write the pages and finish the eleven days, and I think the four days of teaching is the romantic answer.

Teaching in person transmits more per hour than any document — that is not in dispute, and if he had four weeks I would say spend them. He has four days, and four days of sitting beside somebody produces a person who can do the normal case and has met none of the exceptions, because the exceptions do not happen to order. In March she will hit the 6% case and he will be gone either way.

What the forty pages do is different. They are not a teacher; they are a place to put things. Ruth's own sentence is the argument: the pages were why she knew where p.19 was. A document that is wrong in a findable place beats a conversation that was right and is now unrecoverable.

He should spend one of the four days on the exceptions only, and let the normal case go in the document.

11F • The Reveal

What happened. He wrote the pages and worked the eleven days. He gave Ruth one afternoon, not four days, and spent all of it on the things that go wrong.

Eighteen months later the document is on version 4 and about a third of it is Ruth's. The section Felix was proudest of — a long explanation of why the system was designed that way — was deleted in version 2 by Ruth, who said nobody needed it.

He found out, and minded, and said nothing.

The handover worked. The part he most wanted to pass on was the part that did not survive.

Was the reasoning sound? And: was Ruth right to cut it?

Part 12 • Landing ♦ all three lines

12A • Recycle — twelve items

Six from this unit.

1. I want you _____ (check) it twice.
2. She let me _____ (borrow) it.
3. I saw him _____ (leave) — the whole thing.
4. She _____ me _____ taking the shortcut.
5. It's a hands-_____ job.
6. He talked me _____ doing it his way.

Four from Units 1–6.

7. The rule _____ (bring) in after a fire. (*Unit 6*)
8. If you _____ (press) override, it _____ (log) your name. (*Unit 5*)
9. You _____ prop that door open. (*Unit 4*)
10. I _____ (see) him on Thursday — arranged. (*Unit 3*)

Two from *Making Plans* (A2.1).

11. The person _____ wrote it had done it for six years. (*relative clause*)
12. She _____ (not / be allowed) to use the big scissors on day one. (*obligation range*)

12B • Consolidate

120 words, one paragraph. Somebody teaching you something: what they wanted you to do, what they let you do, what they made you do, what they saw you doing. Six items from Part 6.

12C • Can-do, with evidence

12F • Next

Unit 8 • What grows where you are?

B1.1 • Unit 8 • Four Hundred Kilometres

English Animated • *Taking a Position* • Jengo House, Nairobi Student's Book pages 148–167 •
20 pp • ~11.5 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

Esther's eleven acres at Limuru, 06.40 — Two fields are in rotation. One is lying fallow. Twelve things here have names.

What grows where you are?

By the end of this unit you will give a two-minute presentation on one crop's journey — from the ground it came out of to the hand that paid for it.

◆ A · THE WORLD

Where food comes from, what the distance costs, and who the word *local* is for

◆ B · THE SYSTEM

Relative clauses reduced, and with prepositions · defining and non-defining, returning · 24 words for land and cultivation · 21 relative structures for formal writing · holding a long noun phrase together

◆ C · THE PERFORMANCE

A presentation that traces one thing from the soil to the shelf

0A · Find it

Twelve things on this smallholding. Four of these sixteen are not there.

furrow · terrace · irrigation line · drip tape · water tank · shade netting · seedbed · compost heap · drying rack · weighing scale · crate stack · boundary hedge · greenhouse · tractor · beehive · windbreak

0B · Guess it

Two of the fields are in rotation and one is lying fallow. **Which is fallow, and what is the evidence?**

0C · Say it

Record thirty seconds. *What grows where you are?* If you do not know, say that. Unprepared.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

{width=6.

6in}

From the soil to the shelf — Six stages. The dashed arrow is the one nobody can trace after it happens.

1A • Meet — from the ground up

Use the network. Name the word at each stage.

soil • yield • irrigation • drought • crop • harvest • smallholder • cooperative • rotation •
fertiliser • erosion • perennial

1B • Sort — how fast can you change it?

Order from **changes in a season** to **takes a generation**.

the soil • who you sell to • the rotation • what you plant • the terraces • how you irrigate

Mark the point where it stops being this year's decision.

1C • Sort — odd one out, and why

1. yield • harvest • crop • rotation
2. drought • erosion • fertiliser • irrigation
3. smallholder • cooperative • perennial • grower
4. set aside • die back • turn over • plough back

1D • Stretch — the phrases

1. Only a third of it is _____ **land**; the rest is too steep.
2. Coffee is a _____ **crop** — you cannot eat it and you cannot store it long.
3. Two fields are planted and one is left to **lie** _____.
4. Mangoes are cheap in January and absurd in July: they are **out of** _____.
5. **The growing** _____ is shorter every year by about four days.
6. If the rains fail twice, _____ **security** stops being an abstraction.

1E • Stretch — four phrasal verbs, one field

set aside · die back · turn over · plough back

Two are things a farmer does deliberately. One is something a plant does. One is both.

1F • The two sayings

a bad year · the land knows

One is an explanation and one refuses to be one. **Which, and who says each?**

Corpus Note *Local* collocates with *produce*, *economy* and *supplier*. It does not collocate with any distance. English has no agreed number behind the word, which is why it appears on so many labels.

1G • Own it

Name one thing you ate this week. **Say how far it travelled, or say that you do not know.** Both answers are the task.

Part 2 • Listening ♦ A • THE WORLD

{width=6.

6in}

A grower and a buyer, with a crate between them — One of them is looking at the crate. One of them is looking at the other.

2A • It says local on the box 📻 Track 8.1

Before you listen. A grower and a buyer, with a crate between them. **Which one is looking at the crate?**

Gist — one listen, one question. How far has the produce in the crate actually travelled?

Detail — complete the frame.

Distance	Price	Season
the grower's		
the other		
supplier's		

Inference. The grower says "*the ones I sold you in March were mine.*" **What is she admitting about the ones in July?**

Attitude. The buyer says "*I didn't know that*" — and then does not ask a follow-up. **Which sound tells you he is not surprised?**

Noticing. Six sentences. Sort them.

1. *The farm which supplies us is four hundred kilometres away.*
2. *The farm supplying us is four hundred kilometres away.*
3. *The grower who I buy from has eleven acres.*
4. *The grower I buy from has eleven acres.*
5. *The cooperative, of which she is a member, sets the price.*
6. *The cooperative she's a member of sets the price.*

A. the full relative clause · **B.** the same thing, shorter · **C.** formal, with the preposition moved

2B • Decoding clinic Track 8.2

Forty seconds. Four jobs.

1. Where does she pause inside the long sentence?
2. Catch the three distances.
3. *the farm supplying us* — is there a word missing, and can you hear where?
4. *of which* — what happens to the two words?

Transcripts, page 178.

Part 3 • Grammar Lab 1 B • THE SYSTEM

Shortening a relative clause, and moving a preposition

3A • Notice

Return to the six sentences.

1. Compare 1 and 2. **Which two words disappeared?**
2. Compare 3 and 4. **Which word disappeared, and why is it allowed to?**
3. In 4, could you also remove the words in sentence 1? Try it. **What is the rule?**
4. Compare 5 and 6. The preposition has moved. **Which version would you say out loud?**
5. In 5, why *of which* and not *of that*?

3B • See

What you can leave out, and what you cannot
You may drop the relative pronoun only when it is the object. Drop the subject and the sentence loses its spine.

the grower who I buy from

who is the OBJECT of buy from - you may drop it

the grower I buy from - still complete

but: the grower WHO SUPPLIES me - subject, never droppable

If dropping the pronoun leaves two verbs with nothing between them, you dropped the wrong one. And that never follows a preposition: of which, not of that.

{width=6.

6in}

What you can leave out, and what you cannot — You may drop the relative pronoun only when it is the object. Drop the subject and the sentence loses its spine.

3C • Know

Reducing a relative clause

Full	Reduced	When you can
the farm which supplies us	the farm supplying us	active verb → <i>-ing</i>
the crates which were packed yesterday	the crates packed yesterday	passive → past participle
the grower who I buy from	the grower I buy from	drop <i>who/which/that</i> when it is the object
the grower who supplies me	× <i>the grower supplies me</i>	never when it is the subject

Moving the preposition

the cooperative she's a member of — normal speech *the cooperative of which she is a member* — formal writing × *the cooperative of that she is a member* — *that* never follows a preposition

Watch out. You can drop the relative pronoun only when it is the object of its clause. If dropping it leaves two verbs with no subject between them, you have dropped the wrong one.

Why it matters. A reduced clause packs more into a sentence, which is what reports and labels do. It also hides things: *produce grown locally* does not say by whom, or how local.

3D • Use — controlled

Reduce each clause if you can. **Two of these cannot be reduced — say why.**

1. The farm which supplies the market is in the next county.
2. The crates which were loaded on Tuesday went out first.

3. The grower who I met last year has stopped.
4. The cooperative which sets the price has four hundred members.
5. The variety which they planted in 2019 needs less water.
6. The hedge which was planted to stop erosion is forty years old.

3E • Use — guided

Rewrite each in the formal pattern, moving the preposition.

1. The cooperative she's a member of.
2. The season we depend on.
3. The three growers we buy from.
4. The extent to things have changed. *(fix it first)*

3F • Use — open

Describe three people and three places using one reduced clause each. Your partner's job: say whether each clause could be put back to its full form.

3G • Check — six items

1. The woman _____ runs the stall has been there thirty years. *(can you drop it?)*
2. The woman _____ I spoke to has been there thirty years. *(can you drop it?)*
3. The boxes _____ (pack) on Tuesday are the ones to send.
4. The cooperative, _____ she is a member, sets the price. *(formal)*
5. The field _____ (lie) fallow this year was planted in 2023.
6. The extent _____ the season has shortened is now measurable. *(formal)*

0-3 → Workbook pp. 62-64. **4-5** → Part 6. **6** → p. 159.

Why this sentence has lost its subject

✗ The grower supplies us has eleven acres.

subject pronoun dropped

the clause boundary

who was the subject of supplies. Dropping it leaves supplies and has side by side with nothing to join them, so the reader has to reread to find out which verb belongs to the grower.

✓ The grower supplying us has eleven acres.

reduced to -ing instead

the clause boundary

If you want the shorter version of a subject clause, you do not delete the pronoun - you turn the verb into -ing. Now the reader can see at a glance which verb is the main one.

What the writer thought:
The writer thought the rule was that you can always drop who and which. You can drop them only when they are the object of their own clause.

6in}

{width=6.

Why this sentence has lost its subject — Why this sentence has lost its subject

Part 4 • Speaking ◆ C • THE PERFORMANCE

4A • Fluency sprint — 4 / 3 / 2

Describe a meal, from the shop backwards. Four minutes, three, two.

4B • The functional core — tracing something back

The same tomato, two months apart

Learner A has the farm record. Learner B has the shelf label. Find out whether it is true.

March

Limuru - 40 km - Esther Wanjiku

July

Meru - 400 km - 406 members

Describe only. The labels are identical.

9 differences — find them all

The same tomato, two months apart — Learner A has the farm record. Learner B has the shelf label. Find out whether it is true.

Language Bank

tracing	<i>it starts with · from there it goes to · by the time it reaches us</i>
hedging a number	<i>somewhere around · at a rough guess · nobody really knows, but</i>
the gap	<i>what the label doesn't say is · the part nobody counts is</i>
landing it	<i>so the short answer is · which means that when you buy it, you are paying for</i>

Information gap. Learner A has the farm's records. Learner B has the shelf label. Neither sees the other. **Find out whether the label is true.**

4C • The performance — one crop, two minutes

Trace one thing from soil to shelf. Two minutes, uninterrupted, then two questions you have not seen. **You must name one number you are not sure about, and say why.**

4D • Observer

Listen for **one thing**: where did the speaker's chain of custody break?

4E • Two criteria

- ☐ Did I say where my numbers came from? ☐ Did I name the step I could not account for?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

An explainer called "**What the word local is doing.**" The first line is:

There is no legal definition of local, which is not an oversight.

What do you expect? One sentence.

5B • Skim — sixty seconds

Find the paragraph that defends the word.

What the word local is doing

There is no legal definition of local, which is not an oversight. Several have been proposed, and each has failed for the same reason: any distance you pick is correct somewhere and absurd somewhere else. Thirty miles is a reasonable radius in a dense country and meaningless in a sparse one. A rule written for one landscape fails in the next valley.

In the absence of a number, the word is doing something other than measuring. It is signalling. When a label says local, the claim it is making is not geographic; it is a claim about the kind of supply chain the buyer is joining — short, visible, and with a person at the end of it who could in principle be visited.

Most of the time this is roughly honest. The produce travelled a distance the buyer would accept if they knew it, and the grower is a person the shop could name. The failure cases are specific. The first is seasonality: a shop that sells a crop twelve months a year is importing for at least part of it, and the label does not usually change in July. The second is aggregation: a cooperative, of which the grower is one of four hundred members, can truthfully describe produce as coming from its members while a given crate has no traceable field at all. The third is processing: a thing grown four hundred kilometres away and packed ten kilometres away is, under several voluntary schemes, locally packed, which on a label looks identical.

The defence of the word is worth stating, because the critique is easy and the alternative is worse. A buyer who knows nothing uses the word as a weak signal and is usually not badly misled by it. A buyer who insists on a number ends up with a certification scheme, and certification costs money, and the growers who cannot afford it are precisely the smallholders the word was supposed to protect. Replace a vague word with a precise one and you have not made the system more honest. You have made it more expensive to enter.

What would help is not a definition but a habit: printing the distance, printing the month, and printing the name of the farm the crate came from. None of those requires a scheme. All of them are harder to write on a label than the word local, which is the actual reason they are not there.

5C • Close reading

1. Why has no legal definition of *local* succeeded?
2. What does the writer say the word is claiming, if not a distance?
3. **Name the three failure cases and give an example of each.**
4. What is the argument *for* keeping the vague word?
5. **Why would a certification scheme hurt smallholders in particular?**

6. What three things does the writer propose, and what is the stated reason they are absent?

5D • Vocabulary in context

oversight • radius • signalling • aggregation • traceable • voluntary scheme

5E • The counter-text

Two labels on the same market floor
Both are true. Only one of them tells you anything.

LABEL B - THIS STALL

Grown by PROUDLY LOCAL Distance from this stall Locally sourced produce. Supporting local farmers. Fresh from the farm to your table. Proudly local, every day .	Esther Wanjiku, Limuru 40 km Packed on Tuesday same day Available November to June Picked in October Packed in October Packed in October
--	---

Label A is accurate. The produce is packed ten kilometres away, which several voluntary schemes permit to be described as locally packed, and the phrase on the label is locally sourced, which is not a defined term. Nothing on Label A is false.

Four phrases, none of them measurable

The only number on the label is the packing distance
Ten kilometres - from wherever it was grown

A person, who could be visited

A number you can disagree with

The four months it is not available, volunteered

How much of the premium arrives

And none of Label A is a lie

6in}

Two labels on the same market floor — Both are true. Only one of them tells you anything.

Read the two labels and answer.

1. What does each label actually claim?
2. **Which of the three failure cases does each one fall into?**
3. One label gives a distance. Is it the distance you would want?
4. What is the packing date, and what is missing next to it?
5. **Which of the two is more honest, and which is more informative? They are not the same label.**

5F • Writer analysis

- The explainer concedes before it criticises. Where exactly?
- **The last paragraph blames label size. Is that the real reason? What would the writer say if pressed?**

5G • Text against text

The explainer says printing the distance would help. One label prints a distance. Two sentences on whether it helped. The second begins "*The number is true, and...*"

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Twenty-one ways to attach a clause formally

6in}

Six ways to attach the same clause — The same information, six registers. Each layer is further from speech.

6A • Sort — speech, writing, or both?

Sort all twenty-one. Six belong in both.

notably • whose • whereby • wherein • none of which • partly • of which • stem from • at which point • chiefly • the extent to which • all of which is to say • of whom • most of which • namely • solely • largely • give rise to • thereof • respectively • in which

6B • Chunk completion

1. A scheme _____ growers certify each other was tried in 2019.
2. The crates, _____ were damaged, were sent back.
3. _____ the season has shortened is now measurable.
4. The erosion _____ the loss of the hedge.
5. Two failures, _____ aggregation and seasonality, account for most of it.

6C • Register sort

Which of these would survive in a label? Which only in a report? **Three would appear in neither, and would still be said out loud.**

6D • Contrast Clinic — reduce it, or don't

Six items. Reduce where you can; mark where you cannot and say why.

1. The grower who we buy from has eleven acres.
2. The grower who supplies us has eleven acres.
3. The cooperative which sets the price has four hundred members.
4. The hedge which was planted in 1984 is still there.

5. The variety which was planted in 2019 needs less water.
 6. The field which lies fallow this year was planted in 2023.
-

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

Holding a long noun phrase together

6in}

Where to breathe in a long noun phrase — The same sentence twice. One of them a listener can follow.

7A • Hear 🎧 Track 8.3

The same long phrase, said two ways. **One of them you can follow.**

the cooperative of which the grower we buy from is a member

7B • Say

Mark the chunks. Say it with a short pause at each boundary, and no pause anywhere else.

the cooperative || of which || the grower we buy from || is a member

7C • Make it mean something

Read this aloud so a listener could write it down:

The field lying fallow this year, which was planted in 2023 with a variety needing less water, belongs to a cooperative most of whose members have under five acres.

Where did you breathe? Mark it. Compare with three other people.

7D • Fluency 20 🟡

Twenty seconds: **one thing, traced back three steps.** Three times, faster.

Part 8 • Writing ♦ C • THE PERFORMANCE

What this is and where it came from • 140 words

{width=6.

6in}

Eleven shillings, and where they go — The premium on a kilo of in-season tomatoes, traced to the end.

8A • Read the model

These tomatoes were grown by Esther Wanjiku, whose plot is eleven acres at Limuru, forty kilometres from this stall. [the grower is named in sentence one, and the number is specific]

They were picked on Tuesday and packed the same afternoon in crates belonging to the cooperative she is a member of, which has four hundred and six members and sets a floor price.

From July to October we cannot get them from her, because they do not grow here then. In those months ours come from Meru, four hundred kilometres away, and we will say so on the board. [the honest sentence, given before anybody asks]

They cost more than the imported ones on the next stall. The difference is about eleven shillings a kilo, and roughly seven of that reaches Esther. [the premium is stated, and so is how much actually arrives]

Questions about the writer's choices:

1. Why name the grower before anything else?
2. The July sentence is volunteered. **What does the writer buy with it?**
3. The last line says how much of the premium reaches the grower. **Most sellers do not. Why not?**

8B • The anti-model

Locally sourced produce. Supporting local farmers. Fresh from the farm to your table.
Proudly local, every day.

Each phrase is defensible. **Name three things a buyer still does not know.**

8C • Generate • 8D • Plan

what it is → who grew it, named → how far, with a number → when it is not available, and what happens then → what it costs, and where the difference goes

8E • Draft 1 — 140 words

8F • Peer review — two criteria

☐ Could I visit the person who grew this? ☐ Did the writer tell me something they did not have to?

8G • Draft 2 • 8H • Publish

On the stall, at the size a stall can carry.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

STUDY FILE • Note Systems

Four note systems, one page each
Match each to the kind of text it was designed for before you read the annotations.

FOUR WAYS OF TAKING THE SAME NOTES

1 - LINEAR
Heading. Point. Sub-point. Sub-point. Heading. Point. Follows the speaker exactly and records almost everything. Impossible to compare two sources in.
Designed for a lecture that is already well organised

2 - CORNELL
Narrow left column for cues, wide right column for notes, strip at the foot for a summary written afterwards. The summary is the whole method and is the part people skip.
Designed for material you will be tested on

3 - MIND MAP
One idea in the centre, branches outward. Excellent for a subject you already half know. Useless at speed, because you must decide where a thing goes before you can write it.
Designed for planning, not capturing

4 - MATRIX

	distance	grower	season	price
Label A	no	no	no	no
Label B	48 km	named	Nov-Jun	+11
explainer	argues no	proposes	proposes	-

Claims across the top, sources down the side. The only one of the four built for comparing, and the only one that makes a gap visible as a blank cell.

Records most - organises nothing

The summary strip is the method

...and it is written after, which is why it is skipped

You must know the shape before you start

A blank cell is a finding

Four sources, one question, one page

{width=6.

6in}

Four note systems, one page each — Match each to the kind of text it was designed for before you read the annotations.

9A • Four methods, four texts

Four note systems. Four kinds of text. **Match them before you read 9B.**

linear · Cornell · mind map · matrix an explainer · a lecture · four sources on one question · a process you have to perform

9B • Test it

Take notes on the Part 5 explainer **twice**: once linear, once as a matrix. Four minutes each.

9C • The retrieval test

Close the notes. **Write down everything you can remember.** Then open each set and count what each one recovered.

9D • The method nobody uses

The matrix — claims across the top, sources down the side — is the only one of the four designed for **comparing**. **Which of your four pieces of coursework this term needed comparing?**

9E • Transfer

Take notes in a real lecture, meeting or video this week using a method you do not normally use. **Bring both the notes and your opinion of them.**

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

One crate, one year — Half the class sees the growing band. Half sees the price band. Neither sees both.

10A • Relay

Half the class sees the growing band; half sees the price band. Rebuild by speaking.

10B • Simplify

Explain the two labels from Part 5 to somebody choosing between them with a queue behind them. **Nine seconds, then nine more if they ask.**

10C • Compress

The explainer into 60 words for a stallholder who has to decide what to print. Defend three cuts.

10D • Online interaction

Write the post for the stall's page explaining why the price went up in July. **The cheaper stall is in the same group.**

10E • Across languages

Does your language have a word doing the job of *local*? **Is it as vague? Is the vagueness useful in the same way?**

Part 11 • The Decision ♦ C • THE PERFORMANCE

Esther, or Meru

The stall's tomatoes come from Esther at Limuru, forty kilometres away, from November to June. For the other four months she has none, and the stall buys from Meru, four hundred kilometres away, at about two thirds of the price.

The stall next door sells Meru tomatoes all year and is eleven shillings a kilo cheaper. Customers have started saying so.

- **Buy from Esther all year** — she can grow under netting, but the cost rises and the quality in July is honestly worse.
- **Buy from Meru all year** and stop saying local. Cheaper, consistent, and Esther loses a third of her income.
- **Split it, and say so on the board** — Esther in season, Meru out of season, with the distance and the month printed.

11A • The evidence

1. **The two labels** from Part 5.
2. **The chart:** what the price difference is, and how much of it reaches the grower.
3. **The voice.** Esther, thirty seconds: *"November to June I can plan. July I do other work. If you take November to June, I don't do other work — I stop."*

11B • Steelman

Argue the option you like least. Two minutes.

11C • Deliberate

I think they should _____, because _____. The strongest argument against me is _____, and my answer to it is _____.

11D • Decide — eighty words, two reasons

11E • Model decision

Split it and print the month and the distance on the board.

Buying from Esther all year is the answer I want and I think it is the sentimental one. Netting raises her cost, the July crop is worse, and a stall that sells a bad tomato in July does not get the customer back in November. It also quietly makes her dependent on a single buyer, which is not a kindness.

Going to Meru all year is coherent and it is the one I would defend if the stall were failing. It is not. Eleven shillings a kilo is a real difference and it is not an existential one, and Esther's thirty seconds is the whole argument against it: the eight months are what make the other four survivable.

Printing the month and the distance costs nothing and it is the only option that makes the customer's complaint answerable. "Why is it dearer?" currently has no answer at the stall. It should have one, in writing, before anybody asks.

11F • The Reveal

What happened. They printed it. In the first month three customers said they had not known, and two of them bought the cheaper ones anyway and said so pleasantly.

Takings fell about four per cent over the year. Esther's November-to-June order grew by a fifth, because two restaurants saw the board and asked who she was.

The stall next door copied the board in March and now prints the distance too. Theirs says 400 km every month of the year, and their takings did not move at all.

The honest board cost them four per cent and found Esther two restaurants. And the competitor proved the information changes nothing for people who were never going to pay more.

Was the reasoning sound? And: who was the board actually for?

Part 12 • Landing ♦ all three lines

12A • Recycle — twelve items

Six from this unit.

1. The woman _____ I spoke to has been there thirty years. (*can you drop it?*)
2. The boxes _____ (pack) on Tuesday go first.
3. The cooperative, _____ she is a member, sets the price.
4. Only a third is _____ land.
5. One field is left to lie _____.
6. _____ the season has shortened is measurable.

Four from Units 1–7.

7. I want you _____ (check) it twice. (*Unit 7*)
8. The rule _____ (bring) in after a fire. (*Unit 6*)
9. If you _____ (press) override, it _____ (log) your name. (*Unit 5*)
10. You _____ prop that door open. (*Unit 4*)

Two from *Making Plans* (A2.1).

11. The grower _____ supplies us has eleven acres. (*defining relative*)
12. The crop _____ (grow) in July comes from Meru. (*passive*)

12B • Consolidate

120 words, one paragraph. Trace one thing you consumed this week back three steps. Use at least three reduced relative clauses and three items from Part 6.

12C • Can-do, with evidence

I can...	My evidence	Sure?
shorten a relative clause without breaking the sentence	Part 3G score	☐ ☒ ☒

12F • Next

Unit 9 • Who gets to tell it?

B1.1 • Unit 9 • Whose Story

English Animated • *Taking a Position* • Jengo House, Nairobi Student's Book pages 168–187 • 20 pp • ~11.5 hours

Part 0 • The Big Picture ♦ A • THE WORLD

6in}

The interview, 14.10 — Twelve things in this room are recording. One person has not agreed to any of them.

Who gets to tell it?

By the end of this unit you will report the same event three times, for three audiences — and say which of the three you would put your name to.

◆ A • THE WORLD	How an account becomes a story, and what is lost at every retelling
◆ B • THE SYSTEM	The full range of reporting verbs · reported statements, returning · 24 words for witness and adaptation · 21 verbs that carry a judgement with them · stress on the reporting verb
◆ C • THE PERFORMANCE	Three accounts of one event, and a decision about which one is yours

0A • Find it

Twelve things being recorded in this picture. Four of these sixteen are not there.

a phone on a table · a notebook · a lanyard with a press pass · a voice recorder · a consent form · a camera · a tripod · a laptop · a whiteboard with names · a printed list · a signed release · a clip microphone · a boom pole · a lighting stand · a teleprompter · a studio clock

0B • Guess it

One person in this room has not agreed to be recorded. Which, and what tells you?

0C • Say it

Record thirty seconds. *Think of a story that was told about you. Who told it?* Unprepared.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

6in}

{width=6.

From the event to what people remember — Six stages. Something is lost at every arrow, and two of them are irreversible.

1A • Meet — from event to story

Use the network. Name the word at each stage.

witness • account • testimony • version • angle • source • anonymity • adapt • dramatise • composite • disclaimer • hearsay

1B • Sort — cline of distance from the event

Order from **closest** to **furthest**.

what was written down • what you saw • what was published • what you said you saw • what happened • what people now remember

Mark where it stops being evidence.

1C • Sort — odd one out, and why

- witness • source • testimony • hearsay
- account • version • angle • composite
- adapt • dramatise • disclaimer • composite
- leave out • play down • write up • track down

1D • Stretch — the phrases

- She said it **on the** _____, so it can be printed with her name.
- He said it _____ **the record**, which means you may know it and not use it.
- _____ **-hand** evidence is what you saw yourself.
- The paper gave him a **right of** _____ before publishing.
- The film says it is **based on a** _____ **story**, which is not a claim about accuracy.
- The scene never happened; that is **artistic** _____.

7. Her brother owns the building, which is a _____ of interest.

1E • Stretch — four phrasal verbs, one edit

leave out · play down · write up · track down

Two happen before the story exists. Two happen to it afterwards.

1F • The two sayings

that's not how it happened · whose story is it?

One is a correction. One is a claim of ownership. **Which does more damage in a meeting?**

Corpus Note *Claim* and *say* report the same words. In news writing, *claim* appears beside a following denial about four times as often as *say* does. The verb is doing the work before the reader reaches the evidence.

1G • Own it

Describe something that happened to you in two sentences. **Then describe it as somebody who dislikes you would.** Change no facts.

Part 2 • Listening ♦ A • THE WORLD

6in}

A recorder on the table — Watch who put it there, and who is looking at it.

2A • What she's actually here for 📻 Track 9.1

Before you listen. A journalist and Wanjiru, with a recorder on the table. **Who put it there?**

Gist — one listen, one question. What story has the journalist already decided to write?

Detail — complete the frame.

What she asks about

What she keeps
returning to

the first five minutes

the last five minutes

Inference. Wanjiru says "*I'd rather you spoke to Mariam.*" **Why is she saying that, and does it work?**

Attitude. The journalist says "*of course*" three times. **Which one is agreement?**

Noticing. Six sentences. Sort them by what the reporting verb does to the claim.

1. *She said the landlord had refused.*
2. *She claimed the landlord had refused.*
3. *She admitted the landlord had refused.*
4. *She insisted the landlord had refused.*
5. *She confirmed the landlord had refused.*
6. *She alleged the landlord had refused.*

A. the claim costs the speaker something · **B.** it was already known · **C.** neutral · **D.** the writer doubts it

2B • Decoding clinic Track 9.2

Forty seconds. Four jobs.

1. Count the reporting verbs.
2. Which word is stressed in "*she CLAIMED she didn't know*"?
3. Catch the two dates.
4. *said that* — what happens to *that*?

Transcripts, page 179.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

Choosing the verb that reports

3A • Notice

Return to the six sentences. **The reported words are identical in all six.**

1. Which one is neutral?
2. Which two suggest the writer does not believe it?
3. In sentence 3, what does *admitted* tell you about the speaker's position?
4. In sentence 5, what does *confirmed* tell you about what the writer already knew?
5. **A lawyer would object to one of these in a news report. Which, and why?**

3B • See

6in}

Five things a reporting verb can do — The reported words do not change. The verb changes what the reader concludes.

3C • Know

Group	Verbs	What the writer is doing
neutral	say · tell · state · report · add · note	reporting, taking no position
doubting	claim · allege · maintain · purport	signalling distance from the claim
conceding	admit · concede · acknowledge · accept	the speaker said something against their own interest
confirming	confirm · recall · point out · stress	the writer already had it
refusing	deny · refuse · decline to comment · dispute	the speaker pushed back

And the pattern each takes:

admit / deny / recall + -ing or + that · refuse / claim + to + verb or + that · insist / stress / point out + that only

Watch out. *Admit* makes the speaker's own words costly to them. Using it where *say* would do is not neutral reporting — it is an edit with no fingerprint on it.

Why it matters. Change one verb and you have changed what the reader thinks, without changing a single reported word. This is the most powerful thing in this book and the hardest to see.

3D • Use — controlled

Choose the reporting verb. **More than one works in some; say what each would do.**

Wanjiru (1) _____ that the landlord had refused to pay. He (2) _____ ever having been asked. The inspector (3) _____ out that the report had been sent twice. Mariam (4) _____ that she had considered leaving, which she had not said publicly before. The managing agent (5) _____ to comment. The journalist (6) _____ that two tenants had contacted her first.

3E • Use — guided

Rewrite each sentence three times, with a neutral, a doubting and a conceding verb. **Then say which you would publish.**

1. "I didn't know the toilet was an issue."
2. "We offered to pay half."
3. "Nobody raised it with me."

3F • Use — open

Report the same thing to two people: somebody who will act on it, and somebody who will be upset by it. Your partner says which reporting verbs you used, and what they gave away.

3G • Check — six items

1. He _____ (deny) _____ (be) there at all.
2. She _____ (admit) that she _____ (not read) it.
3. They _____ (refuse) _____ (give) a reason.
4. He _____ (point) out that the lease _____ (expire) in March.
5. The agent _____ (decline) to comment.
6. She _____ (insist) that nobody _____ (tell) her.

0-3 → Workbook pp. 70-72. 4-5 → Part 6. 6 → p. 179.

Why this sentence convicts somebody

✗ She admitted the toilet had never been built.

admitted - costly to her

neutral / loaded

admitted tells the reader the speaker said something against her own interest. If she simply answered a question about a building she does not own, the verb has invented a confession.

✓ She said the toilet had never been built.

said - no position taken

neutral / loaded

said reports and claims nothing about the speaker. If the fact is damning, the reader can reach that themselves, which is the only version a correction cannot be demanded for.

What the writer thought:
The writer thought admitted was a more interesting word than said. It is a different claim, and it is a claim about the speaker, not the facts.

{width=6.

6in}

Why this sentence convicts somebody — Why this sentence convicts somebody

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency sprint — 4 / 3 / 2

A story you have told more than once. Four minutes, three, two. **Notice what you have stopped saying.**

4B • The functional core — attributing and distancing

Two accounts of one afternoon
Learner A has one account. Learner B has the other. Find the real disagreement.

account one

the refusal came first

account two

the refusal came third

Describe only. Most of what looks like disagreement is not.
8 differences — find them all

{width=6.6in}

Two accounts of one afternoon — Learner A has one account. Learner B has the other. Find the real disagreement.

Language Bank

attributing	<i>according to · she's quoted as saying · in her words</i>
distancing	<i>she claims · it's been suggested that · I can't verify this, but</i>
refusing to pass it on	<i>that's not mine to repeat · you'd have to ask her</i>
correcting	<i>that's not how it happened · the order is the other way round · I'd stress that nobody refused</i>

Information gap. Learner A has what one person said. Learner B has what another said. Neither sees the other. **Find out what they disagree about, and what they only appear to disagree about.**

4C • The performance — three tellings

Three audiences, two minutes each: **a friend · a committee · somebody who was there.** Same event. You may not change a fact.

4D • Observer

Listen for **one thing**: what appeared in two versions and not in the third?

4E • Two criteria

- ☐ Did I keep every fact the same? ☐ Could the person who was there recognise their own part?
-

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

A personal essay called "**The quote I gave.**" The first line is:

I said eleven words to a journalist in 2019 and I have been described by them ever since.

What do you expect? One sentence.

5B • Skim — sixty seconds

Find the paragraph where the writer stops blaming the journalist.

The quote I gave

I said eleven words to a journalist in 2019 and I have been described by them ever since. The words were accurate. I said them. They are in my voice on her recording, and if I heard somebody else say them I would think exactly what everybody thought about me.

What I did not say, in the forty minutes either side of them, was the part that made them make sense. She did not leave it out to damage me. She left it out because it took two minutes to explain and the eleven words took four seconds, and she had six hundred words for the whole piece. I have since written to a length limit myself and I know what it does to you.

For about three years I told this story as something that was done to me. I was good at telling it. There is a version with a pause in it that gets a reaction.

The version is not honest, and I worked out why in an argument with somebody who had been in the room. She pointed out that I had chosen the eleven words. Not the edit — the words. I had reached for a phrase that was sharper than what I actually thought, because I was being recorded and because sharp phrases get agreed with. The journalist did not put a performance in my mouth. She printed one I had already given her.

That is a less comfortable story and it has no pause in it.

What I do now is simple and I recommend it without being certain it is right. I say the dull version first. If it is the only thing I say, it is the only thing that can be used. The cost is that I am quoted much less often, and that the people who are quoted instead are the people reaching for the sharp phrase, which is how the sharp phrase became the thing people believe.

5C • Close reading

1. How many words did the writer say, and how long was the piece?
2. Why does the writer say the journalist left out the context?
3. **What did the person who had been in the room point out?**
4. What does the writer mean by "a version with a pause in it"?

5. **What does the writer do now, and what is the stated cost?**
6. The last clause is an accusation against nobody in particular. **Who is it against?**

5D • Vocabulary in context

accurate · length limit · reach for (*reached for a phrase*) · performance · dull (*the dull version*)
· quoted

5E • The counter-text

The transcript, and the six hundred words

Everything printed is in the transcript. The transcript is four thousand words long.

AS PUBLISHED - 600 WORDS

... and look, the honest answer is that nobody was watching it. **It was a shambles** - admits former director. We were four people doing the work of nine and the reporting was ~~the thing that slipped and this original story had to go to the public~~. I have a character, I'm a bit of a clown but I need to be seen ~~at the time~~. **Not the work** - the paperwork is fine and I would defend the work to anybody."

Words in transcript: 4,100
What was cut
What was cut

SENTENCE	IN TRANSCRIPT	PRINTED
"nobody was watching it"	yes	no
"four people doing the work of nine"	yes	no
"It was a shambles"	yes	YES
"Not the work - the paperwork"	yes	no
"I would defend the work to anybody"	yes	no

Nothing printed is inaccurate. The sentence that limits the quote - "Not the work, the paperwork" - follows it immediately in the recording and would have cost eleven words. The headline verb is admits. In the transcript he is answering a question he was asked.

- The sentence that makes it make sense
- 61 of 4,100 words - 1.5%
- "admits" in the headline. He was answering a question
- Four of the five sentences gone
- The one that survived is the shortest
- Eleven words would have changed the piece

The transcript, and the six hundred words — Everything printed is in the transcript. The transcript is four thousand words long.

Read the published piece and the full transcript extract, side by side.

1. How many words of the transcript survived into the piece?
2. **Which sentence in the transcript explains the quote, and where would it have gone?**
3. What reporting verb did the journalist use?
4. Find the sentence in the piece that is not in the transcript at all. **Where did it come from?**
5. **Was anything untrue printed?**

5F • Writer analysis

- The essay refuses an easy villain. **At what cost to the essay?**
- The piece is 600 words and the transcript is 4,000. **Is the essay's argument an argument against length limits, or against something else?**

5G • Text against text

The essay says the journalist printed a performance he had already given. The transcript shows him giving it. Two sentences on whether that settles it. The second begins *"What it does not settle is..."*

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Twenty-one verbs that judge while they report

6in}

Six degrees of distance from a claim — The same sentence reported six ways. The writer gets further away each time.

6A • Sort — what does the verb add?

Sort all twenty-one into five groups: **neutral • doubting • conceding • confirming • refusing.**

confirm • according to • be quoted as saying • point out • back up • claim • admit • go on to say
• stand by • put it another way • maintain • no comment • words to that effect • concede •
stress • recall • acknowledge • refuse • insist • deny • allege

6B • Chunk completion

1. She _____ her original statement under questioning.
2. He _____ it _____, saying the figure was closer to twelve.
3. The agent said "_____ " and put the phone down.
4. _____ the inspector, the report was sent twice.
5. He said he had been misled, or _____.

6C • Register sort

Which appear in a news report? Which in a court transcript? Which only in speech? **Four appear in all three.**

6D • Contrast Clinic — one claim, six verbs

Six items. The reported words do not change.

"The landlord refused to pay."

1. She _____ that the landlord refused to pay. (*it costs her to say so*)

2. She _____ that the landlord refused to pay. (*you doubt it*)
3. She _____ that the landlord refused to pay. (*neutral*)
4. She _____ that the landlord refused to pay. (*you already knew*)
5. She _____ that the landlord refused to pay. (*she is being contradicted and will not move*)
6. She _____ that the landlord refused to pay. (*legally unproven*)

Then: which one would a lawyer insist on, and why?

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

Stressing the reporting verb

{width=6.

6in}

Which word you lean on — The same seven words. Where the stress lands tells the listener what you think of her.

7A • Hear 🎧 Track 9.3

She **SAID** she didn't know. — (*she said it; whether it is true is not my problem*) She said she **DIDN'T** know. — (*the content is the point*) She **CLAIMED** she didn't know. — (*I am telling you something about her*)

7B • Say

Say all three. Your partner says what you think of her.

7C • Make it mean something

"He admitted he'd forgotten."

Stress **admitted**, then **forgotten**. One is sympathetic. One is not.

7D • Fluency 20 🟡

Twenty seconds: **report one thing three ways — neutral, doubting, conceding**. Three times.

Part 8 • Writing ♦ C • THE PERFORMANCE

The same event, for three readers • 140 words

{width=6.

6in}

What happens to a quote between recording and publication — Two hundred interviews, transcript length against published length.

8A • Read the model — three versions, one event

To a friend: *The landlord finally paid half. It took four months, an insurance letter and Priya leaving, and I'm not going to pretend I feel good about it.*

To the tenants' meeting: *The landlord has agreed to fund fifty per cent, following the insurer's query about the 2019 report. Works are scheduled for January. Obi obtained the quotes; the survey came in at 96,000 against an assumption of 160,000. [names, numbers, sequence. No feelings, and none implied]*

To the landlord: *Thank you for confirming the fifty per cent. I've attached the quotes and the survey. Obi will coordinate access with your contractor. We'll keep the invoice separate from the service charge, as agreed. [nothing about the four months. Nothing about the insurer]*

Questions about the writer's choices:

1. All three are true. **What is in the first that is in neither of the others?**
2. The second mentions the insurer. The third does not. **Why?**
3. **Which version would you be most comfortable having the other two readers see?**

8B • The anti-model

Following extensive discussions, agreement has been reached regarding the accessibility works. All parties have worked constructively and a positive outcome has been achieved for everyone involved.

Who does this version protect, and from what?

8C • Generate • 8D • Plan

the facts, listed • who each reader is • what each one will do with it • what each one does not need • what you would be ashamed to have hidden

8E • Draft — all three versions

8F • Peer review — two criteria

☐ Are all three factually identical? ☐ Is there anything in one that the others needed?

8G • The third criterion

Put your name on one of them. Which, and why that one?

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

CULTURE FILE • What's Funny Here?

Four jokes, four assumptions
Read them before the annotations. Mark the ones you merely understand.

FOUR THINGS PEOPLE FOUND FUNNY LAST YEAR	
1 A sign outside a cafe: "We do not have wifi. Talk to each other and pretend it is 1995." You need to know Travels	that cafes have wifi, and that 1995 is before it almost everywhere
2 "The meeting could have been an email. The email could have been a silence." You need to know Travels	the office complaint it is built on anywhere with meetings
3 A radio presenter, after a long government statement: "Well. There we are then." You need to know Travels	the statement, the presenter, and that the understatement is the whole joke badly - it is a tone, not a line
4 A note left on a shared fridge: "Whoever is taking the milk - I know it is you, Daniel." You need to know Travels	that there is a Daniel, and that everybody knows only inside the building

The ones that travel are not the best jokes. These are the ones whose assumptions are

A fact, and a date. Both common

This one survives translation intact

A shared frustration, not a shared fact

A tone. You cannot translate a tone

Requires a specific person in a specific building

The best joke here travels least

{width=6.

6in}

Four jokes, four assumptions — Read them before the annotations. Mark the ones you merely understand.

9A • Four jokes

Four short pieces of humour, one from each of four places. **Which do you find funny, and which do you merely understand?** They are different experiences.

9B • What a joke assumes

For each: **what do you have to already know?** A fact, a person, a convention, a frustration? The ones that travel are rarely the ones with the best jokes in them.

9C • Your own

Bring something funny from your own language or context. **Explain what has to be known.** Then: is it still funny once explained?

9D • Humour that is not for you

Some jokes exclude by design. Some exclude by accident. **How do you tell, from inside and from outside?**

9E • The hard one

A story told about somebody gets a laugh in a meeting. **The person is in the room.** Write the sentence you would say — or defend saying nothing.

9F • Transfer

Watch something comic in English this week that you do not fully get. **Write down the exact moment you lost it.** That is the cultural boundary, located.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

Four thousand words to eleven — Half the class sees the transcript band. Half sees the publication band. Neither sees both.

10A • Relay

Half the class sees the transcript band; half sees the published band. Rebuild by speaking.

10B • Simplify

Explain the difference between *on the record*, *off the record* and *on background* to somebody about to speak to a journalist in twenty minutes.

10C • Compress

The essay into 60 words for somebody who has just been quoted badly. Defend three cuts.

10D • Online interaction

Write the reply to a post that has misreported something you said. **It has 400 shares.**

10E • Across languages

Report the same sentence in your language with a neutral verb and a doubting one. **Does your language carry the doubt in the verb, or somewhere else?**

The profile

A journalist wants to write about Jengo House. She is good, the piece will be read, and two of the six tenants would benefit from it enormously.

The story she wants is about the accessible toilet: four months, an insurer, a landlord who moved only when his own money was at risk, and a woman who left before it was built.

Priya has not agreed to be named. She has not refused either. She has said *"I'd rather not be the reason."*

- **Do the piece with the story she wants.** Priya is central whether or not she is named — in a building of six people, "a tenant" is not anonymity.
- **Offer a different story** — the workspace, the economics, the survey that came in at 96,000. She will probably decline.
- **Refuse.** Keep the relationship, lose the coverage, and the story goes untold.

11A • The evidence

1. **The transcript and the published piece** from Part 5.
2. **The chart:** what happens to a quote between recording and publication.
3. **The voice.** Priya, thirty seconds: *"I'd rather not be the reason. I'm not saying don't. I'm saying I'd rather not be the reason."*

11B • Steelman

Argue the option you like least. Two minutes.

11C • Deliberate

I think they should _____, because _____. The strongest argument against me is _____, and my answer to it is _____.

11D • Decide — eighty words, two reasons

11E • Model decision

Go back to Priya and ask her the actual question, which nobody has asked her.

I am aware this is not one of the three options and that it delays everything by a week. It is the only move that does not decide something about her without her.

"I'd rather not be the reason" is not a refusal and treating it as consent is the thing this whole unit is about. It is also not an invitation to protect her by deciding for her, which is what refusing the piece would be. She is an adult with an interest in the building and in her own privacy, and she is the only person who can weigh them.

The question is not "may we name you". It is: "the piece will exist, you will be identifiable whether or not you are named, and here are the three versions. Which would you rather read about yourself?" That is a harder question and it is the honest one.

If she says no after that, refuse the piece and say why.

11F • The Reveal

What happened. They asked her. She thought about it for four days and said yes, named, on condition that the piece said she had left for a job and not because of the building — which was true, and which she had never said to anybody.

The piece ran. It was fair. Two sentences about her were lifted into a follow-up article elsewhere without the condition attached, and that version is the one that comes up when you search her name.

She has never mentioned it. Wanjiru found it eight months later.

They did the honest thing, and it was honest, and a second publication they had no contact with undid the only condition she asked for.

Was the reasoning sound? And: was there a version of this where that could not have happened?

Part 12 • Landing ♦ all three lines

12A • Recycle — twelve items

Six from this unit.

1. He _____ (deny) _____ (be) there at all.
2. She _____ out that the lease expired in March.
3. The agent _____ to comment.
4. She said it _____ the record, so it cannot be printed.
5. The film is based on a _____ story.
6. Her brother owns the building — a _____ of interest.

Four from Units 1–8.

7. The grower _____ I buy from has eleven acres. (*Unit 8 — can you drop it?*)
8. I want you _____ (check) it twice. (*Unit 7*)
9. The rule _____ (bring) in after a fire. (*Unit 6*)
10. If it _____ (be) up to me, I _____ (change) it. (*Unit 5*)

Two from *Making Plans* (A2.1).

11. She said she _____ (not receive) the letter. (*reported speech*)
12. The piece, _____ ran in March, was fair. (*relative clause*)

12B • Consolidate

120 words, one paragraph. Report one disputed event using at least six reporting verbs from Part 6, from at least three of the five groups.

12C • Can-do, with evidence

I can...	My evidence	Sure?
choose a reporting verb that says what I actually think of the claim	Part 3G score	☐ ☒ ☒
tell the same true story	Part 8, all three	☐ ☒ ☒

I can...	My evidence	Sure?
three ways for three readers		
recognise when humour assumes something I do not have	Part 9B	☐ ☒ ☒
decide about a story that is partly somebody else's	Part 11D	☐ ☒ ☒

12D • Replay

Part 0C again. Compare.

12E • Glossary — forty-five items, as a map

THE EVENT · witness · account · testimony · first-hand · hearsay · source **THE STORY** · version · angle · adapt · dramatise · composite · based on a true story · artistic licence **THE RULES** · on the record · off the record · right of reply · anonymity · a conflict of interest · disclaimer **EDITING** · leave out · play down · write up · track down **NEUTRAL** · say · tell · add · note · according to · be quoted as saying · go on to say **DOUBTING** · claim · allege · maintain **CONCEDING** · admit · concede · acknowledge **CONFIRMING** · confirm · recall · point out · stress · back up · stand by **REFUSING** · deny · refuse · no comment · words to that effect · put it another way **SAYINGS** · that's not how it happened · whose story is it?

12F • Next

Unit 10 • What is a fair day's work?

B1.1 • Unit 10 • A Fair Day

English Animated · *Taking a Position* · Jengo House, Nairobi Student's Book pages 188–207 · 20 pp · ~11.5 hours

Part 0 • The Big Picture ♦ A • THE WORLD

6in}

Jengo House, 06.50, before anybody else — Twelve things here record somebody working. One person has no record anywhere.

What is a fair day's work?

By the end of this unit you will negotiate a working agreement and write it up — in a form the person it is about would sign.

◆ A • THE WORLD

What work is worth, who sets that,
and what six years of goodwill is

◆ B • THE SYSTEM

Degree modifiers · *the more ... the more* · comparatives and superlatives, returning · 24 words for pay and conditions · 21 ways to size a difference · stress on the modifier

◆ C • THE PERFORMANCE

A negotiated agreement, written up,
signed by both sides

0A • Find it

Twelve things that record somebody's work. Four of these sixteen are not there.

a timesheet · a rota · a payslip · a contract on a shelf · a handwritten hours book · a swipe card · a cash envelope · a bank transfer screen · a cleaning schedule · a signed-for delivery book · a key with a tag · a staff photo · a pension statement · a union notice · a P45 · a uniform

0B • Guess it

One person in this picture has no written record of their work anywhere in the building. Which, and what is the evidence?

0C • Say it

Record thirty seconds. *What is a fair day's work?* Unprepared. This is the last Part 0 of the book, and the last replay is at the end.

Part 1 • Vocabulary Lab 1 ♦ B • THE SYSTEM

6in}

{width=6.

What a job is made of — Six parts. Grace has two of them. The dashed lines are the ones that do not exist for her.

1A • Meet — what a job is made of

Use the network. Name the word at each node.

wage • salary • overtime • contract • probation • notice • severance • union • grievance • rota • turnover • headcount

1B • Sort — cline of security

Order from **most secure** to **least**.

paid in cash • a rolling contract • zero-hours • a fixed-term contract • a permanent contract • a handshake

Mark where the law stops helping you. Then find out whether you marked it in the right place.

1C • Sort — odd one out, and why

1. wage • salary • overtime • turnover
2. probation • notice • severance • grievance
3. union • rota • headcount • cover
4. lay off • take on • clock in • cover for

1D • Stretch — the phrases

1. She is on a _____-hours contract, so nothing is guaranteed.
2. A _____ **wage** is what you can actually live on, not what the law requires.
3. Saturday is paid at **time and a** _____.
4. He took the hours back as time off **in** _____.
5. She has worked here six years and has never been **on the** _____.
6. Three of the five are paid **cash in** _____.

7. Nights and Sundays are _____ **hours**, and they are paid as if they were not.

1E • Stretch — four phrasal verbs, one workforce

lay off · take on · clock in · cover for

Two are things the employer does. Two are things the worker does. **Which one is sometimes both?**

1F • The two sayings

that's the job · nobody does it for the money

Both are used to end a conversation about pay. **Who says each, and which one is harder to argue with?**

Corpus Note *A fair day's work* appears in English about forty times more often than *a fair day's pay*, although the full saying contains both. The half that survived is the half about the worker.

1G • Own it

Describe one job you have done. **Say what was written down and what was not.**

Part 2 • Listening ♦ A • THE WORLD

6in}

A document on the table that nobody is touching — One of them brought it. Watch whose hands are nearer.

2A • Six years 🎧 Track 10.1

Before you listen. Wanjiru and Grace, and a document on the table that nobody is touching. **Who brought it?**

Gist — one listen, one question. Does Grace want the contract?

Detail — complete the frame.

	Now	Under the contract
hours		
pay		
flexibility		

Inference. Grace says "*it's a lot more than I thought.*" **She is talking about the money. What else is she talking about?**

Attitude. Wanjiru says "*it's up to you*" twice. **One of them is true.** Which sound?

Noticing. Six sentences. Sort them by how big the difference is.

1. *It's slightly better than she's on now.*
2. *It's considerably better than she's on now.*
3. *It's nowhere near what she should be on.*
4. *It's not nearly enough.*
5. *It's far more than the going rate.*
6. *The more hours she takes, the less she can choose.*

A. a small difference · **B.** a relationship between two things · **C.** a large one

2B • Decoding clinic Track 10.2

Forty seconds. Four jobs.

1. Which word in "*a lot more than I thought*" is stressed?
2. Catch the three amounts.
3. *considerably* — how many syllables does she actually say?
4. *far more* — what happens between the two words?

Transcripts, page 180.

Part 3 • Grammar Lab 1 B • THE SYSTEM

Saying how much bigger

3A • Notice

Return to the six sentences.

1. Which three words make the difference sound **small**?
2. Which three make it sound **large**?
3. In sentence 3, *nowhere near* — is that bigger or smaller than *not nearly*?
4. Sentence 6 has two halves that move together. **What happens to the word order?**
5. Try "*It's very better.*" **Why not?**

3B • See

{width=6.

6in}

How big is the difference? — The number does not change. The modifier is the offer.

3C • Know

Size	Modifier	Example
tiny	slightly · marginally · a little · a bit	<i>slightly better</i>
moderate	somewhat · rather	<i>somewhat better</i>
large	much · far · a lot · considerably · substantially · significantly	<i>far better</i>
enormous	a great deal · infinitely · appreciably	<i>a great deal better</i>
not at all	nowhere near · not nearly · barely	<i>nowhere near enough</i>
equal	just as · every bit as	<i>just as good</i>

The more ... the more structure

The more hours she takes, **the less** she can choose. **The sooner** we write it down, **the better**.

Comparative first in each half. No *that*. The second half is the consequence.

Watch out. *Very* modifies an adjective; it cannot modify a comparative. *Very good* ✓ *very better* ×. Use *much*, *far* or *a lot*.

Why it matters. In a negotiation, the modifier is the offer. *Slightly more* and *considerably more* can describe the same number, and the person across the table hears the word, not the number.

3D • Use — controlled

The contract is (1) _____ better than her current arrangement on paper, and (2) _____ worse on one thing she has not mentioned. The hourly rate is (3) _____ higher — about nine per cent. The hours, however, are fixed: (4) _____ hours she accepts, (5) _____

freedom she has to take the other work she does on Tuesdays. Six years of goodwill is (6) _____ near a legal position, which is the argument for signing something.

3E • Use — guided

Rewrite each one so the difference sounds **larger**, then **smaller**. The number does not change.

1. It's better than before.
2. There's a difference in the hours.
3. The rate has gone up.

3F • Use — open

Compare two jobs, two places or two years using four different degree modifiers and one *the ... the ...* structure. Your partner says which comparison you were trying to make sound big.

3G • Check — six items

1. It's _____ better than last year — about two per cent.
2. It's _____ better than last year — nearly double.
3. That's _____ near enough.
4. _____ more I read it, _____ less I like it.
5. It's _____ as good as the other one. (*equal*)
6. She's _____ better paid than she was. (*not "very"*)

0-3 → Workbook pp. 78-80. 4-5 → Part 6. 6 → p. 199.

Why very cannot do this job

✗ The new rate is **very** better than the old one.

very + comparative

adjective / comparative

very intensifies an adjective: very good, very fair. A comparative is already a measurement of a gap, and very has no way to size a gap. English uses much, far, a lot or considerably instead.

✓ The new rate is **much** better than the old one.

much + comparative

adjective / comparative

much, far, a lot, considerably and substantially all size the gap. They are not stronger versions of very; they are a different kind of word doing a different job.

What the writer thought:
The writer thought very was a general intensifier. It intensifies a quality. Sizing a difference needs a different set of words entirely.

6in}

{width=6.

Why very cannot do this job — Why very cannot do this job

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency sprint — 4 / 3 / 2

The best job you have had, and why. Four minutes, three, two.

4B • The functional core — negotiating

The same offer, two framings — Learner A has what the employer can afford. Learner B has what the worker needs.

Language Bank

opening a position

what I'd be looking for is · in principle, yes — with one thing

sizing a gap

that's not far off · we're nowhere near · that's a bigger gap than it looks

trading

I could move on the hours if · that works for me provided

closing

so shall we write that down? · I'd rather we both signed something

when it fails

they knocked it back · not by a long way · we could scale it up later

Information gap. Learner A has what the employer can afford. Learner B has what the worker needs. Neither sees the other. **Find out whether an agreement exists.**

4C • The performance — the agreement

In pairs, twenty minutes. **You must end with something written that both of you sign**, or with a written statement of exactly where you stopped and why.

4D • Observer

Listen for **one thing**: who said a number first, and what happened to it?

4E • Two criteria

- ☐ Did we write it down while we were still in the room? ☐ Would the other person's version of this conversation match mine?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

A review of a book about informal work. The first line is:

There is a chapter missing from this otherwise excellent book, and I think I know why.

What do you expect? One sentence.

5B • Skim — sixty seconds

Find the paragraph where the reviewer praises the book most.

The chapter that isn't there

There is a chapter missing from this otherwise excellent book, and I think I know why.

Handshakes is a study of informal work arrangements across four cities, and it is far better than the literature it joins. The fieldwork is exhaustive — four hundred and eighty interviews over three years — and the author resists almost every temptation available to her. She does not romanticise informality, which is the standard failure of the sympathetic account. She does not treat it as simply exploitation waiting to be formalised, which is the standard failure of the policy account. She is considerably better than both camps at holding two things at once: that informal arrangements are often chosen, and that being able to choose them is not the same as having a choice.

The best chapter is the fourth, on what she calls the goodwill ledger. Her argument is that a long informal arrangement accumulates a kind of credit on both sides — the worker who has stayed, the employer who has paid in hard months — and that this credit is real, is valuable, and is destroyed by formalisation. A contract converts six years of mutual obligation into twelve months' notice. That is a far worse deal than it looks, and nobody records it as a loss because it was never recorded as an asset.

What is missing is the chapter on what happens afterwards. The book follows people up to the moment of formalisation and stops. In the two cases where she does follow through, both workers end up marginally better paid and substantially less free, and in one of them the arrangement ends within a year — and the author notes this in a footnote.

A footnote. The most important finding in four hundred and eighty interviews, in a footnote.

I do not think this is carelessness. I think the finding is uncomfortable for everybody who would otherwise agree with her, including the reviewer, and that she knew it and did not want the book to be read as an argument against writing things down. It would have been. It would also have been the honest version, and the book is good enough that it could have carried it.

5C • Close reading

1. What is the fieldwork base of the book?
2. **What are the two standard failures the reviewer says the author avoids?**
3. Explain *the goodwill ledger* in your own words.

4. What does the reviewer say a contract converts six years into?
5. **What is in the footnote, and why does the reviewer object to its being there?**
6. **The reviewer says the author knew. What does the reviewer think she was protecting?**

5D • Vocabulary in context

exhaustive • romanticise • informality • ledger • accumulate • formalisation

5E • The counter-text

Two sides of the same agreement
Everything on the left is an improvement. The thing on the right is not on the page.

	NOW	PROPOSED	CHANGE
Hours	set by her	12, fixed Mon-Fri	fixed
Rate	477/hr	520/hr	+9%
Paid	cash, weekly	transfer, monthly	monthly
Notice	none	3 months either way	new
Sick pay	none	statutory	new
Record	none	written agreement	new
Tuesdays	other work	not mentioned	—

Clause 4 - Hours
The Contractor shall attend for not less than twelve hours per week, Monday to Friday, at times to be agreed with the Tenants Committee.

Clause 9 - Termination
Either party may terminate this agreement by giving three months written notice. This agreement supersedes all prior arrangements between the parties.

Six years of arrangement is superseded by clause 9 at the moment of signature. The hours clause moves the timing from her to a committee. Neither change is mentioned in the covering email, which describes the agreement as "a rise and some protection".

- Five improvements, and they are real
- Fixed. She currently chooses
- Monthly - four weeks before the first payment
- The Tuesdays line is blank. Nobody has asked
- "to be agreed" - that is the whole loss, in four words
- Six years superseded, in one clause
- And the covering email says "a rise and some protection"

{width=6.

6in}

Two sides of the same agreement — Everything on the left is an improvement. The thing on the right is not on the page.

Read the two sides of the agreement and answer.

1. What is the current hourly rate, and what is the proposed one?
2. **How many hours a week does the proposal fix, and what does Grace currently do?**
3. What does the proposal give her that she does not have?
4. **What does it take away that is not written anywhere on the page?**
5. Find the notice period. **Compare it to six years.**

5F • Writer analysis

- The review praises the book for holding two things at once. **Does the review do the same?**
- **"A footnote." Two words as a paragraph. What is it doing that a sentence would not?**

5G • Text against text

The review says formalisation destroys the goodwill ledger. The agreement is a page of improvements. Two sentences on whether both are true. The second begins *"The improvement is real, and..."*

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Twenty-one ways to size a difference

6in}

Sizing a gap, six ways — The same nine per cent, described at six strengths.

6A • Sort — the scale

Put all twenty-one on a line from **no difference** to **enormous difference**.

somewhat · every bit as · much · marginally · slightly · a good deal · not nearly · just as · the more... the more · by far · infinitely · if anything · far · nowhere near · a great deal · significantly · considerably · substantially · the sooner... the better · appreciably · barely

and three that size a change rather than a gap: knock back · scale up · not by a long way

6B • Chunk completion

1. It is _____ the hardest job in the building.
2. She is _____ as quick as anybody they have hired since.
3. _____, she does more now than she did in 2020.
4. _____ we write it down, _____ for both of us.
5. It is _____ what she should be on.

6C • Register sort

Which of these would you write in a contract? Which say out loud? **Five belong in both, and one appears only in reviews.**

6D • Contrast Clinic — the modifier is the offer

Six items. **The number is identical in each pair. Only the modifier changes.**

1. The rate is _____ higher. / The rate is _____ higher. (9% — *make it sound small, then large*)
2. There are _____ more hours. / There are _____ more hours. (*four hours*)

3. It's _____ better than before. / It's _____ better than before. (*the same offer*)

Then: in a negotiation, who benefits from each version?

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

Stressing the modifier

6in}

{width=6.

Selling it, or softening it — Four readings of the same four words. The stress tells the listener what you want.

7A • Hear 🎧 Track 10.3

It's **SLIGHTLY** better. — (*I am managing your expectations*) It's slightly **BETTER**. — (*it is better, and I want you to notice*) It's **FAR** better. — (*the size is the news*) It's far **BETTER**. — (*the improvement is the news*)

7B • Say

All four. Your partner says whether you are selling it or softening it.

7C • Make it mean something

"It's a lot more than I thought."

Say it as relief. Say it as suspicion. **Same seven words.**

7D • Fluency 20 🟡

Twenty seconds: **two things compared, three different modifiers.** Three times, faster.

Part 8 • Writing ♦ C • THE PERFORMANCE

An agreement the other person would sign • 150 words

{width=6.

6in}

What the agreement gives, and what it takes — Everything above the line is on the page. The one below it is not.

8A • Read the model

Working agreement — Grace Wairimu and Jengo House tenants

Grace has cleaned this building since 2020 under an arrangement neither side wrote down. This replaces it. [says what it replaces, and admits there was something]

Hours. Twelve hours a week, Monday to Friday, worked at times Grace sets. Not fixed by us. [the thing she would lose, protected explicitly]

Rate. 520 an hour, reviewed each January against the cost of living, not against our budget. [names the benchmark, which is the whole argument]

Notice. Three months either way. We know six years of goodwill is worth considerably more than three months, and we cannot write six years into a contract. This is the gap, and we are naming it rather than pretending it is not there.

If this is worse for you than what you have, do not sign it. Tell us which clause and we will look at it again.

Questions about the writer's choices:

1. Why say "neither side wrote it down" rather than nothing?
2. **The notice clause admits the agreement is worse in one respect. Why include that?**
3. The last line invites refusal. **What does that buy, and what does it risk?**

8B • The anti-model

This agreement sets out the terms of engagement between the parties. The Contractor shall provide cleaning services as reasonably required. Remuneration shall be as per Schedule 1. Either party may terminate on one month's written notice. This agreement supersedes all prior arrangements.

Legally tighter and ethically worse. **Name three things it does to the previous six years.**

8C • Generate • 8D • Plan

what it replaces → the thing the other person would lose, protected first → the benchmark → the gap you cannot close, named → permission to refuse

8E • Draft 1 — 150 words

8F • Peer review — two criteria

☐ Would the person this is about sign it? ☐ Is there a loss in here that the writer has admitted?

8G • Draft 2 • 8H • Publish

Give it to the person it is about, and do not be in the room while they read it.

Part 9 • The File ♦ A • THE WORLD + C • THE PERFORMANCE

WORK FILE • The Difficult Message

Four difficult messages

Rank them by how badly they are written before you read the right-hand column.

FOUR MESSAGES SENT LAST WEEK

A - the refusal

"Hi! Hope you had a good weekend. Thanks so much for the detailed proposal - it is clear you put a lot of work into it and the team really appreciated the thinking. We have had a long discussion about resourcing for the next quarter and, as you know, things are quite tight at the moment. We will not be taking it forward."

Bad news in sentence 5

B - the correction

"Sorry, I think there may have been a slight misunderstanding on my part, possibly, about what was agreed - although I may well have got this wrong - regarding the date."

Apologises for being right

C - the bad news

"The contract has not been renewed. I am sorry. I pushed for it and lost. Your last day is 31 March and I will write you a reference this week whether or not you ask for one."

Bad news in sentence 1

Reader can do something, immediately

D - the apology

"I am sorry you felt that the process was unclear. It was always our intention to communicate openly and I am sorry if that did not come across."

Apologises for your feelings

Four sentences of warmth, then the refusal

The reader has already guessed by sentence two

Hedged into meaninglessness

"possibly" and "I may well have got this wrong" - they did not

Sentence one. Then a reason, then a date, then an offer

This is the only one of the four that respects the reader

"sorry you felt" apologises for nothing at all

{width=6.

6in}

Four difficult messages — Rank them by how badly they are written before you read the right-hand column.

9A • Four messages

Four difficult messages: a refusal, a correction, bad news, and an apology. **Rank them by how badly each is written**, before you read the annotations.

9B • The four failures

Each one fails in a named way: **burying it** · **over-explaining** · **apologising for the wrong thing** · **leaving the reader with nothing to do**. Match them.

9C • The rule

Bad news goes in the first or second sentence. Never the third.

Test it: rewrite the worst of the four so the news is in sentence one. **Is it crueller, or just shorter?**

9D • Write one

Pick a real difficult message you have been avoiding. **Write it in under eighty words**. Bad news by sentence two. One thing the reader can do.

9E • Transfer

Send it. Then write down what actually happened, and compare it with what you expected.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

Six years, and the eleven months after — Half the class sees the money band. Half sees the hours band. Neither sees both.

10A • Relay

Half the class sees the money band; half sees the hours band. Rebuild by speaking.

10B • Simplify

Explain the proposed agreement to Grace's daughter, who is twenty-two, reads contracts for a living, and will tell her mother what to do.

10C • Compress

The review into 60 words for somebody deciding whether to formalise an arrangement this week.

10D • Online interaction

Write the message to the other five tenants explaining why you are proposing to pay more. **Two of them will read it as a criticism of the last six years.**

10E • Across languages

How does your language describe an arrangement that is real and not written down? **Is there a single word? Is it respectful?**

Part 11 • The Decision ♦ C • THE PERFORMANCE

Grace's contract

Grace has cleaned Jengo House for six years. There is no contract. She is paid weekly in cash, sets her own hours, and does other work on Tuesdays and Thursdays that nobody has ever asked about.

The tenants want to put her on a written agreement: twelve fixed hours, nine per cent more an hour, three months' notice, paid by transfer.

- **Formalise it as proposed.** More money, legal protection, and her Tuesdays become a problem she has to raise.
- **Leave it.** She has said she is happy. Six years says something. And she has no notice, no record, and nothing if she is ill.
- **Formalise it on her terms** — she sets the hours, the rate is benchmarked, and the agreement says so in writing. It is harder to administer and two of the six tenants will object.

11A • The evidence

1. **The two sides of the agreement** from Part 5.
2. **The chart:** what she earns now, what she would earn, and what she loses.
3. **The voice.** Grace, thirty seconds: *"It's a lot more than I thought. I'd just want to know what happens on a Tuesday, and I don't want to have to ask every week."*

11B • Steelman

Argue the option you like least. Two minutes.

11C • Deliberate

I think they should _____, because _____. The strongest argument against me is _____, and my answer to it is _____.

11D • Decide — eighty words, two reasons

11E • Model decision

Formalise it on her terms, and accept that it is harder and that two people will object.

Leaving it is the option that respects her stated view and I think it fails her. Six years with nothing written down is not an arrangement; it is an arrangement that has not yet been tested. The test arrives when somebody is ill, or when the building changes hands, and at that point goodwill is held entirely by people who will have moved on.

Formalising it as proposed is worse than leaving it. It takes the one thing she has — control of her own week — and converts it into a clause she would have to negotiate for, having just been given a rise. Her thirty seconds is explicit about this and it is the only new information anybody has: she did not ask about the money.

The third option costs the tenants administrative effort and costs her nothing. That asymmetry is the argument. The two who object will be objecting to effort, and it is not their Tuesdays.

11F • The Reveal

What happened. They wrote it her way. The hours clause says *at times set by Grace, not less than twelve hours weekly*, which took four drafts because nobody had written a clause like it before and two of the drafts were worse than no clause at all.

Eleven months later the building changed hands. The new owner's managing agent asked for all service arrangements in writing within fourteen days. Grace's was the only one that existed.

She was kept on. Two of the other arrangements in the building — a window cleaner and a man who did the gutters — were not.

The clause nobody knew how to write was the only thing in the building that survived the sale.

Was the reasoning sound? And: the window cleaner had been there nine years. Whose job was it to write his down?

Part 12 • Landing ♦ all three lines • end of book

12A • Recycle — twelve items

Six from this unit.

1. It's _____ better than last year — about two per cent.
2. _____ more hours she takes, _____ less she can choose.
3. That's _____ near enough.
4. Saturday is paid at time and a _____.
5. She has never been on the _____.
6. Nights and Sundays are _____ hours.

Four from across this book.

7. She _____ out that the lease expired in March. (*Unit 9*)
8. The grower _____ I buy from has eleven acres. (*Unit 8*)
9. I want you _____ (check) it twice. (*Unit 7*)
10. The rule _____ (bring) in after a fire. (*Unit 6*)

Two from *Making Plans* (A2.1).

11. If she _____ (not sign), nothing _____ (change). (*first conditional*)
12. She _____ (work) here since 2020. (*present perfect, for/since*)

12B • Consolidate

150 words, one paragraph. Compare your work or study now with three years ago. Use **four** degree modifiers, one *the ... the ...* structure, and six items from Part 6.

12C • Can-do, with evidence

I can...	My evidence	Sure?
size a difference deliberately, and hear it when somebody else does	Part 3G score	☐ ☒ ☒

I can...	My evidence	Sure?
negotiate an agreement and write it down before leaving the room	Part 4C, signed	☐ ☒ ☒
write a difficult message with the news in the first two sentences	Part 9D, sent	☐ ☒ ☒
decide about somebody else's arrangement without deciding for them	Part 11D	☐ ☒ ☒

12D • Replay — and the book replay

Listen to your Part 0C from this unit, and record it again.

Then find your Part 0C from Unit 1 — *Who is a city built for?* — and listen to it. That was 110 hours ago. **Record an answer to it now.**

Write one sentence about what changed. Not about your English. About what you say.

12E • Glossary — forty-five items, as a map

WHAT YOU ARE PAID · wage · salary · overtime · time and a half · a living wage · cash in hand · on the books **THE ARRANGEMENT** · contract · probation · notice · severance · zero-hours · a fair day's work **THE WORKPLACE** · rota · cover · cover for · turnover · headcount · unsocial hours · union · grievance **WHAT HAPPENS** · lay off · take on · clock in · in lieu **SAYINGS** · that's the job · nobody does it for the money **SMALL** · slightly · marginally · barely · somewhat · a little **LARGE** · far · much · considerably · substantially · significantly · appreciably · a great deal · by far · a good deal · infinitely **NOT AT ALL** · nowhere near · not nearly **EQUAL** · just as · every bit as **PAIRED** · the more... the more · the sooner... the better · if anything

12F • End of *Taking a Position*

Ten units. Ten decisions, and not one of them had a right answer.

In six of the ten, the reasoning was sound and something was still lost. In two, the person it was about was not in the room when it was decided. In one — Grace's — the thing nobody knew how to write was the only thing that survived.

Next: B1.2 • Weighing It Up — Hospital Regional, Valdivia. Where the decisions are the same shape and the cost of getting them wrong is a person.

Answer Key

Open tasks — speaking, writing, discussion — are not keyed. Their success criteria are in the unit, at 4E and 8E.

B1.1 • Unit 1 • Ground Floor

0B • Guess it **Open**. Better reasons use evidence in the drawing: the planning notice on the hoarding (which names demolition of the single-storey structures), the two-metre frontage with no lease visible, the scaffold already up next door. Worse reasons are predictions about the kind of street it is, with nothing in the picture behind them. Mark the reason, not the choice.

1B • Sort — how much is destroyed? **Least to most destroyed, as most groups order them:** do up • repaint • refit • convert • extend • redevelop • demolish.

Do up and *repaint* are regularly swapped, and the swap is the useful disagreement: *repaint* changes less of the fabric, *do up* changes more but is cheaper and shorter. *Extend* destroys almost nothing and takes longest. The question to put back to the class is **what are you measuring** — fabric, cost, or how long people are out.

2A • Three people on the same street 📞 Track 1.1 **1 A • 2 C • 3 C • 4 A • 5 B • 6 B** **Noticing** — the six sentences are keyed above, by letter.

Gist — Tom. He is the only one with somewhere to go and the only one who talks about the street as a view rather than a living.

Detail — Grace: was workshops and people she knew; is scaffolding and a lift that breaks; will be flats she cannot afford to clean in. Mr Kamau: was quiet and poor; is busy and expensive; will be finished, and he says *it's progress*. Tom: was nothing to look at; is noisy; will be worth more than he paid.

Inference — "I've been here twenty-two years and nobody has written my name down" and "they put the notice up in English." Neither sentence contains a worry; both report a position she has no standing in.

Attitude — the vowel in *progress*: lengthened and falling, which carries resignation. The word itself is approving; the sound is not.

3D • Use — controlled 1 opened • 2 was • 3 were repairing • 4 rented • 5 died • 6 went • 7 had ... raised • 8 worked (*or was working*)* • 9 blocked (*or was blocking*)* • 10 did not complain • 11 bought

3E • Use — guided **Order:** Mwangi rented the frontage from Otieno → Otieno died → the first tower was finished → Mwangi was working by lamp for eleven days → the second tower took the open ground → the drivers moved three streets away.

Model connecting text: *Mwangi had rented the frontage from Otieno for fifteen years before Otieno died in 2009. By the time the first tower was finished in 2014, the rent had already risen twice. For eleven days afterwards he was working by lamp, because the new building blocked the sun until ten. The second tower then took the open ground, and the drivers moved three streets away.*

5C • Close reading 1 Open ground, where matatu drivers parked and argued.

2 Because the first tower blocked the sun until after ten in the morning for eleven days after it was finished.

3 Before, he repaired work clothes; now he takes in suits. And his customers are young people

who have just started earning and bought the wrong size online — a different trade, not a smaller one.

4 That he raised the rent twice and then forgot about it. The detail does two things: it explains why Mwangi is still there at all, and it makes the displacement of the other thirteen businesses a matter of attention rather than malice.

5 Their rent went up, they moved somewhere cheaper, and then that place got expensive too. The sentence refuses the word *failure* and describes a process instead.

6 That the new buildings brought him the customers he has now — and that the lane had been dangerous after dark for years before anyone built anything.

5D · Vocabulary in context **frontage** — the width of street a stall or shop occupies · **stretch** — a length of one street, treated as a unit · **sentimental** — attached to the past in a way that gets in the way of judgement · **trading** — still open and doing business · **take in** — alter a garment to make it narrower · **the lane had been dangerous** — past perfect: dangerous before the period the sentence is about, and the point is that it was dangerous *first*

5E · The counter-text 1 Demolition of the existing single-storey structures and erection of a nine-storey building: commercial floorspace at ground and first floor, residential above, with access, servicing and landscaping.

2 25 February 2026 — twenty-one days from publication on 4 February.

3 Development Control, PO Box 30075, in writing.

4 One: the applicant, Westrand Holdings (Nominee) Ltd — and *Nominee* means that is not a person either. No individual is named anywhere on the notice.

5 Nothing, through this route: representations received after the closing date will not be taken into account. They can inspect the application at the public counter, 09:00–15:00 Monday to Thursday — which is when a person with a job is at work.

6A · Register sort

both — by the time · at first · in the meantime **speech** — back then · ever since · up to that point · from then on · before long · later on **the planning notice** — thereafter · subsequently · previously The three in both columns are the ones with no register marking at all: *by the time, at first, in the meantime*. The notice column is Latinate and the speech column is Germanic, which is the whole pattern and is worth saying out loud.

6B · Chunk completion 1 By · 2 Until · 3 ever · 4 before · 5 At / Later

6C · Semantic map **EARLIER**: previously · up to that point · back then · at first · before long (*relative to a later point*)

AT THE SAME TIME: in the meantime · ever since (*a span running up to now*)

LATER: thereafter · subsequently · from then on · later on · before long

A BOUNDARY: by the time · from then on · up to that point · at first

Three sit in two zones: **from then on** (*later, and a boundary*), **up to that point** (*earlier, and a boundary*), **before long** (*earlier or later, depending on the anchor*). Accept any placing the learner can justify with a sentence.

6D · Contrast Clinic — past simple against past perfect

1 closed — a dated event. (*Pairs with 2.*) **2** had already closed — before the notice. **The difference**: in the first the period ran its course; in the second the notice went up after it was over. **3** had left — before that year. (*Pairs with 4.*) **4** left — during that year. **The difference**: four by 2016 is a running total; four in 2016 is one year's worth, and the two can describe completely different streets. **5** had expired — before she read it. (*Pairs with 6.*) **6** expired — the same day. **The difference**: in the first she was a day too late; in the second she still had hours.

7C · Make it mean something The elided version — /aɪ dəʊnəʊ wɒt ðeɪ juːstə duː/ — sounds like a person. The fully articulated one sounds like a document read aloud. You would want the second when you are being quoted, when you are speaking to somebody who is straining to follow, or when the precise words matter more than the relationship — a dictation, a legal statement, a number read back.

12A · Recycle — twelve items 1 had closed · 2 was working · 3 was · 4 priced · 5 use · 6 Until · 7 had not received · 8 By · 9 None · 10 a · 11 which / that · 12 goes

B1.1 · Unit 2 · What It Costs To Make

0B · Guess it **Open — keep the number.** The cloth is 1,302 of a 4,800 jacket, which is about 27 per cent. Most classes guess much higher, usually between a half and two thirds. The point in Part 8 is that the guess is wrong in a predictable direction: people price the material they can see and not the hours they cannot.

1B · Sort — who carries the risk? **Paid first to paid last:** the cloth merchant (*cash on collection*) · the trim supplier (*30 days*) · the machinists (*weekly*) · the workshop's landlord (*monthly*) · Mariam (*on invoice, 60 days*) · the buyer's own company (*on sale*).

Who carries the risk: Mariam. She has paid for cloth, trims and labour before anybody has bought a jacket, and her invoice is settled after the buyer has sold them. If nobody buys, the buyer records no loss and she has forty jackets and an empty account.

2A · Forty jackets 🗣️ Track 2.1 **1 A · 2 B · 3 A · 4 B · 5 A · 6 B Noticing** — the six sentences are keyed above.

Gist — No. He leaves without placing it; what he places is a sample order.

Detail — Price: he says *we're working to a number*; she hears that the number is already fixed and is not hers. Quantity: he says *forty to start*; she hears that forty is the whole order. Timing: he says *fairly soon*; she hears a date she will be held to and he will not.

Inference — *We've been looking at a few workshops* is the continuous, which points at the activity rather than a result. If he had been to three workshops he would say *we've spoken to three* — a countable result. The continuous is doing the work of a number he does not have.

Attitude — the second *I can do that* has a falling-rising tone on *can* and a longer vowel. The first is an offer; the second is a concession with a cost in it.

3D · Use — controlled 1 has been working · 2 has made · 3 has trained · 4 has not been sleeping · 5 has gone (*or has been going*)* · 6 have been doing · 7 have never had · 8 have been hearing

3E · Use — guided 1 I've been writing emails to them. **Changes:** the three disappear and the effort appears — it now sounds like a complaint rather than a report.

2 We've looked at four suppliers. **Changes:** a countable result replaces an activity, and the speaker becomes answerable for the number.

3 She's cut the cloth for forty. **Changes:** the morning disappears and the work is finished.

4 They've been paying in instalments. **Changes:** two becomes a pattern, and the sentence stops saying how much is left.

5C · Close reading 1 The price on the invoice, and nothing else.

2 Four days of rework when the first batch comes back with the seams wrong; two weeks of delay while a replacement is cut; the senior fitter's time on a problem the cheaper workshop was never equipped to avoid.

3 The buyer records no loss at all. The cost shows up as a sourcing problem eighteen months later, and nobody connects the two.

4 A single figure with a name attached — the invoice — as against a figure that has to be built from four departments, three quarters and one person's weekend. The first always wins an argument, whatever it leaves out.

5 That the workshops which survive are the ones that learned to put the assembled number on the page before anybody asked for it.

6 Because the obvious reading is that buyers are being mean, and the piece is arguing that they are hitting the targets they were given. Naming that early stops the reader dismissing the argument as a complaint about people.

5D · Vocabulary in context **procurement** — the function that buys, measured on price · **rework** — doing again what was done wrong, and the cost falls on the other side · **underpricing** — quoting below the real cost, usually without knowing it · **deferred** — put off, and still owed — here maintenance · **assembled** (the assembled number) — built from parts held by different people · **subsidising** — paying part of somebody else's cost out of your own margin

5E · The counter-text 1 Cloth 1,302 + lining 118 + trims 186 + labels 124 = **1,730**.

2 Eleven hours — 1.5 cutting, 8.0 making, 1.5 finishing — at 150 an hour, the workshop rate rather than the machinist rate. **1,650** in all.

3 Sampling: eleven hours across three rounds, costed at zero. It is on the sheet because the work was really done; it is at zero because it is carried by the workshop and charged to nobody. Putting it on the page at zero is the one honest move available.

4 1,080 on 4,800 — **22.5 per cent**.

5 The sampling line. Eleven hours at 150 would be 1,650, which is more than the margin on the whole batch of forty — and it is the assembled number the article says nobody puts on the page.

6A · Sort — which group?

this points at a result — finalised · outstanding · incomplete · twice already · in one go · provisional · cumulative · so far **this points at an activity** — steadily · repeatedly · keep at · ongoing · all morning · gradually · for the last six months · intermittent · up to now · bit by bit · I've been meaning to... · get through · throughout **The three that go in both:** *so far* (a running total, and a period still open), *up to now* (the same), and *cumulative* (a result built out of an activity). *get through* is arguable as a fourth — *I got through* it is a result, *I've been getting through* it an activity.

6B · Chunk completion 1 bit / bit · 2 in / go · 3 outstanding · 4 final / finalised · 5 been meaning

6C · Collocation grid **ongoing:** costs ✓ · work ✓ · progress ✓ — *ongoing payment* ×
outstanding: costs ✓ · payment ✓ · work ✓ — *outstanding progress* ✓ (but it means "excellent", not "unfinished", which is the trap)

cumulative: costs ✓ · progress ✓ — *cumulative payment* ✓ · *cumulative work* ×

provisional: costs ✓ · payment ✓ · progress ✓ — *provisional work* ×

The one nobody says: *ongoing payment*. *Ongoing costs* and *outstanding payment* are both ordinary; the two words simply do not combine.

6D · Contrast Clinic — simple against continuous

1 has been cutting — *since seven* fixes a span, so the activity is the point. **2** has been chasing — *for a month* is a span, and the sentence is a complaint about effort. **3** has cut — forty is a countable result. **4** have been speaking — *all week* is a span, and no number is offered. **5** have spoken — three is a result the speaker can be held to. **6** has sent — *twice* counts completed actions.

7C · Make it mean something The natural, elided version sounds like somebody defending their work: the reductions carry fluency, and fluency reads as confidence. The fully pronounced version sounds like a witness statement — every syllable separable, because somebody may need to write it down.

12A · Recycle — twelve items 1 has been making · 2 has made · 3 outstanding · 4 breaks · 5 unpaid · 6 been meaning · 7 had closed · 8 priced · 9 Until · 10 use · 11 had not received · 12 None

B1.1 · Unit 3 · The Name On The Door

0B · Guess it The plate for the first-floor office. The lettering is newer than the others and the screw holes beside it are the old ones, re-used — so the plate was swapped without moving the fixing. The business it names left two years ago, which the hoarding behind it dates.

1B · Sort — cline of permanence **Easiest to change → hardest, as most groups order them:** nickname · spelling on an email · the name on a lanyard · the name on a payslip · the name on a passport · citizenship.

Where it stops being a choice: most classes mark it between the lanyard and the payslip, because the payslip is the first one that needs somebody else's agreement. A defensible alternative is between the payslip and the passport, because a payslip can be changed by asking once and a passport cannot. The disagreement is the task.

2A · Three ways to say what happens next 🗣️ Track 3.1 **1 C · 2 D · 3 B · 4 A Noticing** — the four sentences are keyed above.

Gist — the Thursday meeting. It is the only one of the four that is in a diary and has another person in it.

Detail — *I'm seeing him on Thursday*: decided, by her and him together. *I'm going to tell him*: decided, by her alone, before now. *I'll call you back*: decided at that moment, for the listener. *The lift goes out of service at six*: decided by nobody in the conversation — it is a timetable.

Inference — *I'm calling you back at four*. The present continuous reports an arrangement that exists; *I'll call you back* is produced on the spot to end the call, and both speakers know it.

Attitude — the vowel in *have*: lengthened, with a fall-rise. The words are identical both times and only the second one is reluctant.

3D · Use — controlled 1 is meeting · 2 is going to tell · 3 will take · 4 runs out · 5 am not doing · 6 am going to sit (*or am sitting*)*

3E · Use — guided 1 **More:** *I'm looking at it this afternoon*. **Less:** *I might look at it*. **Socially:** the continuous puts it in a diary and makes it checkable; *might* hands the listener the knowledge that it may not happen, which is more honest and less reassuring.

2 **More:** *We're reviewing the contract on Monday*. **Less:** *We're thinking of reviewing the contract*. **Socially:** *going to* is a decision already taken; the continuous adds a date and therefore an obligation; *thinking of* withdraws the decision.

3 **More:** *I'm due to meet them on the fourteenth*. **Less:** *I'm hoping to meet them next week*.

Socially: *be due to* makes the meeting institutional — somebody else is also expecting it — while *hoping to* makes the speaker the only person who would notice if it did not happen.

5C · Close reading 1 Because the registrar was watching, and the mother put something longer on the certificate.

2 Having two names in two rooms — something that changed depending on which room you were

in, with no secrecy and no decision in it.

3 That one of the names was going to have to win. The mother decided, in about half a second, not to correct the teacher.

4 The gap is between choosing and letting the paperwork choose. The long name was already on the register, the library card, the inoculation record and a bank account; choosing the short one would have meant nineteen arguments with institutions, each demanding a document in the name being left behind. So the choice was made by what already existed.

5 The school register, the library, the clinic (inoculation record), the bank, and the registry itself. All five hold a record in the long name, and each one requires another to verify it — which is what makes them collectively immovable.

6 Nothing in the documents. What changed is the narrator: having thought for eleven years that the short name was the one that did not count, they have started to mind that when their mother dies nobody alive will use it.

5D · Vocabulary in context **registrar** — the official who records a birth and whose presence changed the name · **inoculation record** — a clinic's vaccination card, here one of the institutions holding the long name · **carry** (carrying the name) — bear it as the recorded form, so the document can be used as proof of it · **mind** (I have started to mind) — be troubled by, in the understated British sense · **count** (the one that did not count) — be treated as real by institutions

5E · The counter-text 1 Six.

2 Two persons who have known the applicant for not less than five years and who are not related to the applicant by blood or marriage.

3 It does not say. The small print says applications are processed in the order received and that the registry does not give an estimated processing time — the only honest sentence on the form, and it is in the smallest type.

4 It remains on record; gazette publication, where required, is arranged separately. The form does not say the old name is removed anywhere, which is the point of 5C question 4.

5 **Four**. The form fee (1,000), the certified copies of the identity card and passport (400 + 400), the sworn statutory declaration (2,500) and the photographs (600) — 4,900 in all, and no two of them are in the same place on the page. (*Accept five if gazette publication is counted, since it is "arranged separately" and therefore charged separately.*)

5C on the two texts: the form **supports** the extract. Six documents, four fee points, two witnesses of five years' standing, and no processing time is a description of nineteen arguments compressed into one page. **The more honest document is the form** — it at least admits it will not tell you how long it takes.

6A · Cline — how bound are you? **Fully committed** → **free to walk away:**

commit · promise · arrange · be due to · be set to · be about to · imminently · shortly · intend · aim · look set to · be likely to · expect · anticipate · as things stand · provisionally · be thinking of · hesitate · put off · I was going to... · back out of.

*The useful arguments: **be about to** and **imminently** are about time, not commitment, and learners place them high because imminence feels binding. **I was going to...** is the most bound-sounding phrase on the list and is the least binding thing anybody says.*

6B · Chunk completion 1 due · 2 about · 3 thinking · 4 As / stand · 5 backed

6C · Register sort **Contract only:** be due to · provisionally · as things stand · imminently. **Speech only:** be thinking of · I was going to... · back out of · put off. **Both:** intend · arrange · expect · commit. (*Accept anticipate in both.*) The pattern: the contract column takes phrases that can be dated or disclaimed, and the speech column takes phrases that attribute a state of mind.

6D · Contrast Clinic — the four futures

1 is starting — present continuous: a fixed arrangement with another party. 2 are announcing — an arrangement already in place. (*are going to announce* is acceptable and slightly weaker.)* 3 closes — present simple: a timetable, decided by nobody present. 4 'll sort — decided at this moment, for the listener. 5 am not going to sign — an intention formed before now, which the week makes explicit. 6 'll go — decided on the spot.

7C · Make it mean something I didn't say she stole it (*somebody else did*) · I **didn't** say it (*I deny saying it at all*) · I didn't **say** it (*I implied it*) · I didn't say **she** stole it (*somebody else stole it*) · I didn't say she **stole** it (*she borrowed it*) · I didn't say she stole **the** money (*she stole different money*) · I didn't say she stole the **money** (*she stole something else*).

12A · Recycle — twelve items 1 am seeing · 2 expires · 3 'll · 4 backed · 5 goes · 6 proof · 7 has been making · 8 breaks · 9 had closed · 10 priced · 11 which · 12 was working

B1.1 · Unit 4 · Nobody's Job

0B · Guess it The propped second-floor fire door, the unsigned first-aid box, and the absence of an accessible toilet. **How to find out:** read the 2019 inspection report, which has an *action by* column — and note that items 1 and 2 say *occupier* while item 3 is blank. Then read the lease, which the report itself says is where responsibility is allocated.

1B · Sort — cline of obligation **Absolute** → **optional**: a duty of care · a right · standard practice · a recommendation · a courtesy · a preference.

Where it stops being enforceable: between *a right* and *standard practice*. A duty of care and a right are both actionable; standard practice is evidence of what a reasonable person would do, which is weaker and is still used in court. The argument worth having is whether standard practice belongs above or below the line — it is the only item that changes status depending on who is suing whom.

2A · It's not our building 🗣️ Track 4.1 1 C · 2 C · 3 A · 4 A · 5 B · 6 B **Noticing** — the six sentences are keyed above. **Now:** 1, 3, 5. **Then:** 2, 4, 6.

Gist — No. One person agrees to find out who owns the common parts, which is not an action on the problem.

Detail — Wanjiru cannot authorise work on the common parts; she says the landlord should. Mr Kamau cannot spend on a building he leases; he says the tenants' association should. Priya cannot do anything at all as a sub-tenant; she says somebody should write it down.

Inference — *Required by whom* is unsaid because naming the requirement would name the document, and the document is the lease, which is between him and the landlord. The passive with no agent is doing exactly the work Unit 6 will name.

Attitude — the second *fine* is level-then-falling with a long vowel and a glottal stop at the end. The first rises. Same word, and the second closes the subject rather than accepting anything.

3D · Use — controlled 1 had to maintain · 2 did not have to provide · 3 must not block · 4 had to submit · 5 did not have to include · 6 has to include (*or must include*)*

3E · Use — guided 1 *We mustn't tell the tenants*. **Changed:** from an absence of obligation to a prohibition — the thing moves from optional to forbidden.

2 *You don't have to use that door*. **Changed:** from a prohibition to a release — the door becomes available but unnecessary.

3 *He didn't have to sign it*. **Changed:** the signing may still have happened; only the necessity is removed.

4 *They didn't need to park there.* **Changed:** from prohibition to absence of need — and note that *needn't have parked* would mean they did and it was pointless.

5C · Close reading 1 19 September 2019.

2 That the premises met the regulations **then in force** sufficiently that nothing was a contravention on that date. It does **not** mean full compliance, and nobody anywhere defines the gap between substantial and full.

3 The propped second-floor fire door; first-aid provision not signed; no accessible sanitary facility.

4 Item 3. From the document alone: it is the only one of the three with no entry in the *action by* column, so no person or role was ever attached to it.

5 That where a material change of use is undertaken the premises will be assessed against the regulations in force at that date, and the noted items may become requirements in due course.

6 E. Wanyama, in the capacity of **Inspecting Officer (reporting only)** — which is the capacity that cannot direct anybody to do anything.

5D · Vocabulary in context **premises** — the building and its land, as a legal unit · **in force** — applying at that date, and the three words the whole argument rests on · **substantial** — enough, but not full, and the shortfall is undefined · **for attention** — noted without being required · **in due course** — at an unstated future point · **capacity** — the role somebody acts in, which here limits what the signature can do

5E · The counter-text 1 Nothing. *Noted* acknowledges receipt and commits to no action, which is why it is the most-used word in institutional email.

2 It does not say. The report says the premises were assessed against the regulations then in force and that responsibility between owner and occupier is a matter for the lease — *so required* could mean the regulations, the report or the lease, and the sentence works because it means none of them.

3 A material change of use — which the report names as the trigger. The email makes that sound like an external event; in fact it is something the owner himself would initiate.

4 **The email.** Forty-one words with a reason in them travels; nine hundred words with a blank cell in a table does not. That is the lesson of the unit.

6A · Sort — strength **Binding** → **entirely optional**:

mandatory · compulsory · binding · obliged · required · banned · have no choice but to · be supposed to · be meant to · should have · needn't have · permitted · be free to · exempt · let off · didn't have to · get out of · discretionary · voluntary · optional · it's up to you.

*The arguments worth having: **banned** is absolutely binding and is a prohibition rather than an obligation, so some classes put it at the far end instead. **be supposed to** and **be meant to** sound binding and are the two weakest things on the list that are not explicitly optional.*

6B · Chunk completion 1 voluntary / optional · 2 exempt · 3 no choice but to · 4 needn't · 5 got out

6C · Register sort **Contract only**: mandatory · binding · exempt · discretionary · compulsory · permitted. **Speech only**: let off · get out of · it's up to you · be meant to · didn't have to. **Both**: obliged · required · voluntary · optional · should have. (*Accept banned in both.*)

6D · Contrast Clinic — *mustn't* against *don't have to*

1 *mustn't* — a prohibition. The wrong way round (*don't have to*) would make a fire door optional. 2 *mustn't* — a prohibition. *Don't have to* would turn a boundary into a convenience.

3 *don't have to* — a release. *Mustn't* would forbid somebody from doing unpaid work, which is an odd thing to forbid and a very different sentence. 4 *don't have to* — no obligation.

Mustn't would mean booking is not allowed, which some venues do mean, and that is the trap. 5 *needn't* — it happened and was unnecessary. *Didn't have to* would suggest it may not

have happened at all. **6** mustn't — a prohibition with a reason attached. *Don't have to* would be an invitation.

7C · Make it mean something Said at speed, with no stress on the modal, it is kind: *you didn't have to come in* releases the listener. With *DIDN'T* stressed it is an accusation — it says the coming in was unnecessary and somebody has made a point of it. The words are identical and only the stress decides which conversation you are having.

12A · Recycle — twelve items 1 mustn't · 2 don't have to · 3 didn't have to · 4 care · 5 waiver · 6 obligation · 7 am seeing · 8 has been making · 9 had closed · 10 breaks · 11 had · 12 None

B1.1 · Unit 5 · The Rota

0B · Guess it **Three differences**: the Sunday night name, the Thursday early that is blank on the screen and filled in marker on the board, and the two names against the same Saturday on the board where the screen has one. **People follow the whiteboard**, because it is the one that can be changed in ten seconds by the person standing in front of it.

1B · Sort — what can be automated? **Easiest → hardest to automate**: when the bins go out · who covers a sick shift · who gets the last desk · who is told first · who gets a reference · who is let go. **Where to stop**: most people stop after *who gets the last desk*, because *who is told first* is the first decision whose output is a relationship rather than an allocation. The useful disagreement is with somebody who stops after the bins — ask them what makes a sick shift different, and the answer is the favour economy in Part 5.

2A · It did what we told it 🎧 Track 5.1 **1 A · 2 C · 3 B · 4 A · 5 C · 6 B Noticing** — the six sentences are keyed above.

Gist — it stopped people swapping shifts. Not by forbidding it: by leaving nothing to swap.

Detail — Fairness rule (no more than two nights consecutively): produced a rota nobody could plan around, because it moved people every week. Availability rule (weight by declared availability): produced an incentive to declare less availability. Seniority rule (break ties by length of service): produced the same four people on every Sunday.

Inference — the favour economy. The system removed the thing that was holding the place together, and nobody noticed because it was never written down anywhere and so never appeared in any report of what changed.

Attitude — the stress and the lengthened vowel on *actually*, with a fall-rise. *Actually* concedes an objection, and the objection is one he has already had with himself.

3D · Use — controlled 1 goes · 2 reallocates · 3 asks · 4 will have to · 5 had been · 6 would look

3E · Use — guided **1 Further**: *If we switched it off, we would lose the audit trail*. **Closer**: *If we switch it off, we lose the audit trail* → *When we switch it off, we lose the audit trail*. **Changes**: the second conditional makes it a thought experiment; *when* makes it a plan.

2 Further: *If she had complained, they would have listened*. **Closer**: *If she complains, they will listen*. **Changes**: the third conditional closes the possibility entirely and turns it into a reproach.

3 Further: *If you pressed override, it would log who did it*. **Closer**: *If you press override, it logs who did it* is already zero — the closest move is *Pressing override logs who did it*, which removes the condition and states a property.

5C · Close reading 1 No person works more than two nights consecutively; weight allocation by declared availability; break remaining ties by length of service.

2 *Working correctly* implies it is doing the right thing. *Working as specified* says only that it matches the document — and the document can be wrong. People hear the first and stop asking questions.

3 Swapping: before the system, somebody who could not do a Sunday found somebody who could, and owed them one. It was not in the spec because it is not a rule — it is a favour economy, and nobody writes those down.

4 That it had got harder to change a shift.

5 Because he answered a different question from the one she was asking, and did it confidently. Being right about the question he answered is what let him stop listening to hers.

6 The override first and the allocator second — and he would make the override cost thirty seconds instead of an email. If the cheapest thing to do is the thing the system wanted, it is a rule rather than a tool.

5D · Vocabulary in context **specified** — written into the requirements document, as against merely intended · **audit** (audit it against the spec) — check line by line for conformance · **weight** — give more or less influence to a factor · **break ties** — decide between candidates the rules rank equally · **override** (*noun*) — the manual route round the automatic decision · **allocator** — the component that assigns shifts

5E · The counter-text 1 Three: 1.1, 1.2, 1.3.

2 Length of service — rule 1.3.

3 Clause 2. **Three**: written authorisation from the space manager; submitted not less than 48 hours in advance; stating the reason. And a fourth consequence — allocation is re-run for the affected week.

4 Clause 3 puts shift trading between individuals explicitly **out of scope**, along with preference ranking. The spec knows the thing exists and declines to carry it.

5 The space manager and the system owner, T. Fraser. **Neither had worked a Sunday** — which is the sentence in the interview that the document silently confirms.

6A · Sort — how direct is the link? **A direct cause → a loose association:**

result in · thereby · hence · consequently · as a result · which means that · consequence · the upshot is · outcome · in which case · end up · repercussion · knock-on · trade-off · worst case · otherwise · provided that · as long as · conversely · inadvertently · one thing leads to another.

*The arguments: **provided that** and **as long as** are conditions rather than causes and some classes take them off the line altogether — accept that if they say why. **inadvertently** describes how a cause operated, not how strong it was, and is the one item most often misplaced at the strong end.*

6B · Chunk completion 1 upshot · 2 thereby · 3 as long / provided · 4 otherwise · 5 in which case

6C · Register sort **Report only**: thereby · hence · consequently · repercussion · conversely · inadvertently. **Speech only**: one thing leads to another · end up · worst case · knock-on · the upshot is. **Both**: as a result · consequence · outcome · trade-off. (*Accept in which case in both.*)

6D · Contrast Clinic — zero, first, second

1 press / logs — **zero conditional**: a property of the system, true every time. 2 were / would fix — **second**: not real, and the speaker is not the landlord. 3 switch / will lose — **first**: a real possibility today. 4 had asked / would have happened — **third**: the past, closed. 5 doesn't come / will cover — **first**: real, and tomorrow. 6 gets / fails — **zero**: always true, a physical fact.

7C · Make it mean something **A genuine offer**: rising tone on *want*, the whole phrase light and short. **A withdrawal of interest**: falling tone, flat, with a slight pause before it — it hands the decision over because the speaker has stopped caring. **An ultimatum**: level stress on all three words with a hard final consonant and no rise — it means *and live with it*.

12A · Recycle — twelve items 1 press / logs · 2 were / would change · 3 edge · 4 oversight · 5 thereby · 6 as long / provided · 7 mustn't · 8 am seeing · 9 has been making · 10 priced · 11 who / that · 12 will wait

B1.1 · Unit 6 · The Rule Nobody Follows

0B · Guess it The no-cooking notice (a kettle and a microwave are on the shelf beneath it), the no-storage notice (boxes are stacked against it), and the bicycle notice (a bike is chained to the first-floor rail behind it). In each case the evidence is the thing the notice forbids, placed in front of the notice and visibly settled — dust, a cable tie gone grey, a box with a date on it.

1B · Sort — cline of authority **Hardest → easiest to change**: a statute · a regulation · a lease clause · a published policy · a written procedure · a notice on a door · standard practice.

Where it stops being a rule: most classes mark it between the written procedure and the notice on the door, because the notice is the first one nobody has to agree to. A good counter-argument puts the line lower — standard practice is cited in court, and a notice on a door is not. Defend the mark, not the order.

2A · It's on the door 📶 Track 6.1 **1 A · 2 B · 3 C · 4 B · 5 A · 6 B Noticing** — the six sentences are keyed above.

Gist — No. Nobody says so; the conversation ends with the wedge still in place.

Detail — Fire-door rule: 2019, by the managing agent, after a fire; last applied at the 2019 inspection. Key-return rule: 2019, by the managing agent; applied continuously, because it is the only one with a charge attached. No-cooking rule: 2014, by nobody anybody can name; never applied.

Inference — *It was brought in after something* is the most important sentence because it is the whole unit in seven words: an agentless passive, a vague noun, and a rule that everybody obeys the shape of and nobody can account for. The *something* was a fire, and the fact that nobody says so is why the rule has no force.

Attitude — the falling-rising tone on *know* and the slight pause before it. He knew. A genuine *I didn't know* is flat and quick.

3D · Use — controlled 1 The fire door was propped open again. (*agent dropped — nobody will say who*)

2 The rule was brought in by the managing agent after a fire in 2019. (*agent kept — it is the point*)

3 The policy has not been reviewed since 2022. (*agent dropped — there is no doer*)

4 The wedge will be removed before the inspection. (*agent dropped — and this is the sentence the unit is suspicious of*)

5 Keys must be returned to the box by six. (*agent dropped — a rule addressed to everybody*)

6 The door was wedged with an extinguisher by a tenant. (*instrument and agent both kept*)

3E · Use — guided 1 *It was decided not to enforce it*. **Gains**: it stops being one person's judgement and becomes institutional. **Loses**: the person who can be asked why.

2 *The policy was written in 2019*. **Gains**: the focus moves to the document and its date. **Loses**: the fact that the author was the landlord's agent, which is the reason it reads as it does.

3 *The rule has been ignored for a year*. **Gains**: it becomes a property of the rule rather than an accusation. **Loses**: the two tenants, and with them any possibility of enforcement.

5C · Close reading 1 That a rule does not apply any more. It is never produced in writing because there is nothing to produce.

2 Making a rule takes a decision somebody can point at afterwards; unmaking one takes the same decision with none of the credit and all of the exposure. So rules only ever accumulate.

3 Paragraph three. The writer used to think the accumulation was simply untidy and that the answer was a periodic cull.

4 It holds a space — it can be produced at a moment of crisis, and the decade of being ignored will not help you then. And it marks a boundary: everybody knows the door should not be propped, and they know it from the notice, not from enforcement.

5 A live rule that has quietly become dead without anybody noticing — because then nobody is shrugging. The organisation believes it is operating and the people believe it was never serious; neither side is lying, and the gap is where the incident comes from.

6 That the honest version of *which rules do we believe are working?* can only be answered by somebody who does not already know the answer. It matters because every person inside the organisation does already know, which is what makes the audit useless.

5D · Vocabulary in context **repealed** — formally cancelled, by the same kind of act that created it · **accumulate** — build up without anything removing them · **asymmetry** — the imbalance between the cost of making and unmaking · **cull** — a deliberate clearing-out · **produced** (at a moment of crisis) — brought out and relied on · **operating** (the rule is operating) — in force and having an effect, as against merely existing

5E · The counter-text 1 Nine.

2 Issued March 2019, by "The Management" — which names nobody.

3 **Rule 2** (keys returned by 18:00) is the only one with a consequence: a replacement is charged. The other eight have a dash in the *if breached* column.

4 Rule 1: fire doors must not be propped open, since 2019 — and the *if breached* column is empty. The notice says nothing at all will happen.

5 The small print: "The Management reserves the right to vary, waive or not enforce any of these conditions at its discretion." A rule the issuer may decline to enforce at will is not a rule; it is a notice about a preference.

6A · Sort — how hidden is the doer? **Completely hidden → almost named:**

mistakes were made · steps have been taken · it was decided · it is understood · be brought about · be done away with · notionally · duly · hereby · retrospectively · is thought to be · is said to · is widely regarded as · it emerged that · it turned out that · supposedly · purportedly · ostensibly · reportedly · allegedly · apparently · unilaterally · nobody will say who.

*The two to argue about: **nobody will say who** is at the named end because it concedes that a doer exists and is being withheld — which is more informative than any passive. **unilaterally** names no one and tells you there was exactly one of them.*

6B · Chunk completion 1 It was understood · 2 was done away · 3 Steps have been taken · 4 emerged · 5 unilaterally

6C · Register sort **Official notice:** hereby · duly · retrospectively · notionally · be brought about.

Newspaper: allegedly · reportedly · purportedly · ostensibly · is said to · is widely regarded as.

Speech only: nobody will say who · it turned out that · be done away with. **In two:** it is understood · supposedly · apparently · is thought to be · it emerged that · mistakes were made (*notice and newspaper*).

6D · Contrast Clinic — *by* against *with*, agent against instrument

1 with — an instrument. 2 by — an agent. 3 by — an agent. 4 by ... using (*or from*)* — the agent takes *by*, the template is a means and prefers *using* or *from*; *with* is possible and reads oddly. 5 by — an agent, in name only, which is the joke. 6 with ... by — instrument first, agent second, which is the normal order when both appear.

7C · Make it mean something The fast version is for a meeting: it is how the sentence is actually said, and slowing it down would sound like a correction. The fully articulated version is for a recorded line, a dictation, or any moment when somebody has to write the words down — because the lost /t/ in *enforced twice* is exactly where a transcript goes wrong.

12A · Recycle — twelve items 1 is inspected · 2 was brought · 3 by ... with · 4 accordance · 5 emerged · 6 Steps have been · 7 press / logs · 8 mustn't · 9 am seeing · 10 breaks · 11 which · 12 was inspected

B1.1 · Unit 7 · Show Me Once

0B · Guess it The one at the desk, with the leaver reading from a screen and the arriver holding nothing. In the other two handovers the arriver has the tool, the keyboard or the cloth in their hands. The one that will fail is the one where the knowledge is being described rather than done — which is the forty-page document in Part 5.

1B · Sort — cline of control **Most teacher-controlled → most learner-controlled:** instruct · demonstrate · model · cue · prompt · stand back.

Where teaching stops: most marks fall between *model* and *cue*, because a cue is the first move that requires the learner to produce something. A defensible alternative is between *cue* and *prompt* — a prompt supplies part of the answer, a cue only points at it. Compare marks; the argument is the task.

2A · Four days to hand over 🗨️ Track 7.1 **1 A · 2 A · 3 C · 4 B · 5 C · 6 B Noticing** — the six sentences are keyed above.

Gist — the tension. She decides not to explain it, and lets the apprentice get it wrong once instead.

Detail — First time: she says *hold it like this* and does it herself, slowly, with the apprentice watching. Second time: she says almost nothing and puts her hands over the apprentice's. Third time: she says *go on then* and stands back, and does not touch the cloth at all.

Inference — to herself. Nobody else is in the room at that point, and the sentence is the instruction she is giving herself not to intervene.

Attitude — the second *got it*, which is shorter, lower and has no rise at the end. The first rises, which is the sound of somebody hoping they have got it.

3D · Use — controlled 1 to hold · 2 do · 3 use · 4 cutting · 5 to notice · 6 explaining

3E · Use — guided 1 She allowed me to use the machine. (*allow takes to**; let takes the bare infinitive)*

2 He forced us to stay late. (*force takes to**; make takes the bare infinitive)*

3 I watched her cutting it. (*the -ing makes it part of the action rather than all of it*)

4 They wanted me to come back. (*want takes to**, like tell — but tell can take a that clause and want cannot)*

5C · Close reading 1 Forty pages, and most of it is screenshots.

2 That p.19 says "run the usual check" without saying what the usual check is; and that p.31 carries a note saying "ask Felix about the Tuesday thing".

3 It was a note Felix wrote to himself. The Tuesday thing is that the figures come in late on Tuesdays, so the reconciliation is run on Wednesday.

4 It has made the handover describe the parts he still notices and omit the parts he does not —

which are exactly the parts six years of practice have made automatic, and therefore the parts a new person needs.

5 That a gap of more than two per cent can be caused by a payment landing between the two pulls, in which case you wait and run it again on Monday. It was not in the document because Felix did not know it — he had been doing it without noticing.

6 On the grounds that the forty pages were the only reason Ruth knew p.19 was where to put the missing paragraph. The document could not contain the knowledge, and it could carry the structure the knowledge belongs in.

5D · Vocabulary in context **reconciliation** — checking two records of the same thing against each other · **pull** (between the two pulls) — one extraction of data from a system · **land** (a payment lands) — arrive and register, at a moment nobody controls · **the usual check** — the phrase that marks knowledge the writer has stopped seeing · **screenshots** — pictures of a screen, which carry steps and not reasons · **source file** — the original record the two totals are reconciled against

5E · The counter-text 1 "Run the usual check." Nothing else.

2 What the usual check is (compare the two totals); the threshold (more than about two per cent); and what to do when the source file is fine (a payment landed between the two pulls — wait and run it again on Monday).

3 Felix could have written the first two: he knows them and simply did not notice he knew. He could **not** have written the third, because he did not know it — Ruth got it from Priya.

4 The two per cent threshold.

5 "Run the usual check." It is an instruction only to somebody who already knows what it means, which is the definition of a handover that cannot hand anything over.

6A · Sort — which pattern?

+ **to** — want someone to · teach someone to · enable someone to · advise someone to · remind someone to · persuade someone to · expect someone to · allow someone to · invite someone to · help someone to · ask someone to · encourage someone to · force someone to · tell someone to · urge someone to + **of / on / for -ing** — accuse someone of · congratulate someone on · warn someone about · blame someone for · warn someone against + **from -ing** — stop someone from · prevent someone from *help someone to* also works without the *to* (*help her carry it*), which is the one verb on this list that takes both. *warn* appears twice because it takes three patterns, which is what 6C is about.

6B · Chunk completion 1 warned ... against · 2 blamed ... for · 3 congratulated ... on · 4 prevents / stops ... from · 5 enabled ... to

6C · The three warnings **warn someone to**: *She warned me to keep my hand clear of the needle.* — an instruction. **warn someone against**: *She warned me against using the big scissors on the first day.* — do not do it. **warn someone about**: *She warned me about the tension on that machine.* — information, with no instruction attached, and the listener decides what to do with it.

6D · Contrast Clinic — *to*, bare, and *-ing*

1 fit — bare infinitive: the whole action, start to finish. 2 sign — *make* takes the bare infinitive. 3 fitting — *-ing*: part of the action, caught in progress. 4 to sign — *force* takes *to*. 5 to go — *allow* takes *to*. 6 go — *let* takes the bare infinitive. 1 / 3: the bare infinitive says he saw all of it; the *-ing* says he saw some of it on his way past. 5 / 6: the grammar differs and the register does too — *allow* is institutional and implies a rule, *let* is personal and implies a decision by one person.

7C · Make it mean something Stress on **go** means *do it again* — the stress falls on the verb of repetition. Stress on **over** means *check it* — the particle carries the meaning, as it does in most phrasal verbs. Two jobs, one phrase, and in a handover the difference is an afternoon.

12A · Recycle — twelve items 1 to check · 2 borrow · 3 leave · 4 warned ... against · 5 on · 6 into · 7 was brought · 8 press / logs · 9 mustn't · 10 am seeing · 11 who / that · 12 was not allowed

B1.1 · Unit 8 · Four Hundred Kilometres

0B · Guess it The middle field. The evidence: no crop rows and no bare worked soil either — it carries an even low cover with flowering weeds through it, the gate has grass grown across the opening, and there are no wheel ruts going in. The two outer fields have rows at different heights, which is the rotation.

1B · Sort — how fast can you change it? **Changes in a season → takes a generation:** what you plant · who you sell to · the rotation · how you irrigate · the soil · the terraces.

Where it stops being this year's decision: between *the rotation* and *how you irrigate* for most groups — irrigation needs capital and usually a neighbour's agreement. A good argument puts it earlier: a rotation is a three-to-seven year commitment the moment you start it.

2A · It says local on the box 📻 Track 8.1 **1 A · 2 B · 3 A · 4 B · 5 C · 6 B Noticing** — the six sentences are keyed above.

Gist — four hundred kilometres. It is July, and July produce comes from Meru.

Detail — The grower's: 40 km, +11 a kilo, November to June. The other supplier's: 400 km, cheaper, all year.

Inference — that the ones in July are not hers. The past tense and the explicit *in March* do the work; she has told the truth about March in order not to say anything about July.

Attitude — the flat, falling *that* with no rise and no pause after it. A real discovery takes a breath and a question; this one closes the subject, which is how you know he had decided not to ask.

3D · Use — controlled 1 The farm supplying the market is in the next county.

2 The crates loaded on Tuesday went out first.

3 **Cannot be reduced.** *Who* is the object of *met*, not the subject — you can only drop it: *The grower I met last year has stopped.*

4 The cooperative setting the price has four hundred members.

5 **Cannot be reduced.** *Which* is the object of *planted* — *The variety they planted in 2019 needs less water.*

6 The hedge planted to stop erosion is forty years old.

3E · Use — guided 1 The cooperative of which she is a member.

2 The season on which we depend.

3 The three growers from whom we buy.

4 First the repair: *The extent to which things have changed.* It is already in the formal pattern — the original was missing *which*.

5C · Close reading 1 Because any distance is correct somewhere and absurd somewhere else: thirty miles is reasonable in a dense country and meaningless in a sparse one, and a rule written for one landscape fails in the next valley.

2 It is signalling — a claim about the kind of supply chain the buyer is joining: short, visible, with a person at the end of it who could in principle be visited.

3 **Seasonality**: a shop selling a crop twelve months a year is importing for part of it and the label does not change in July. **Aggregation**: a cooperative of four hundred members can truthfully say produce comes from its members while a given crate has no traceable field. **Processing**: grown four hundred kilometres away, packed ten away, is *locally packed* under several voluntary schemes and looks identical on a label.

4 A buyer who knows nothing uses it as a weak signal and is usually not badly misled. Insisting on a number ends in certification.

5 Because certification costs money, and the growers who cannot afford it are precisely the smallholders the word was supposed to protect. A precise word does not make the system more honest; it makes it more expensive to enter.

6 Printing the distance, the month, and the name of the farm the crate came from. None requires a scheme; all are harder to write on a label than the word *local*, which is the actual reason they are absent.

5D · Vocabulary in context **oversight** — here the *failure to notice* sense, and the sentence denies it · **radius** — a distance measured outward from a point · **signalling** — conveying what kind of thing this is rather than a fact about it · **aggregation** — many growers' produce pooled, after which no crate has a field · **traceable** — able to be followed back to a specific source · **voluntary scheme** — a certification nobody is obliged to join, which is why it costs and why it excludes

5E · The counter-text 1 Label A claims to be local, four times, and states no grower, no distance and no picking date — only that it was packed at Ruiru, 10 km. Label B states the grower, the distance (40 km), the picking and packing dates, the season, what happens outside the season, and the price split.

2 Label A falls into **processing** (packed ten kilometres away, grown somewhere unstated) and into **seasonality** (no month anywhere). Label B falls into none: it names the July to October source as Meru, 400 km.

3 Label A gives a distance — 10 km — and it is the **packing** distance, which is not the one you would want. Label B gives the growing distance, which is.

4 Label B gives *picked Tuesday, packed Tuesday, same day*. Label A gives no date at all; what is missing next to *packed at Ruiru* is **when**, and without it the ten kilometres tells you nothing.

5 **Label B is both**, which is the trap in the question — but the useful answer is that Label A is not dishonest. Every word on it is true. It is uninformative, and the unit's point is that truthful and informative are separate tests.

6A · Sort — speech, writing, or both?

both — notably · whose · partly · of which · namely · largely **writing** — whereby · wherein · none of which · chiefly · the extent to which · of whom · most of which · solely · give rise to · thereof · respectively · in which **speech** — stem from · at which point · all of which is to say The six in both are the ones with no Latinate flavour and no legal history: *whose, of which, notably, partly, namely, largely*. *at which point* is arguable in both — it is common in speech and in minutes.

6B · Chunk completion 1 whereby · 2 most of which · 3 The extent to which · 4 stems from · 5 namely

6C · Register sort **Would survive on a label**: namely · partly · largely. **Report only**: whereby · wherein · thereof · the extent to which · respectively · give rise to · none of which · of whom · solely · chiefly · in which · of which · notably. **In neither, and still said out loud**: all of which is to say · stem from · at which point.

6D · Contrast Clinic — reduce it, or don't

1 Cannot be reduced. *Who* is the object of *from*. Drop it instead: *The grower we buy from...* **2** The grower supplying us has eleven acres. **3** The cooperative setting the price has four

hundred members. **4** The hedge planted in 1984 is still there. **5** The variety planted in 2019 needs less water. **6** The field lying fallow this year was planted in 2023.

7C · Make it mean something The natural breath points are after *this year*, after *less water*, and before *most of whose members*. Three breaths, four units. Readers who breathe only twice lose the listener at *belongs to*, because by then three noun phrases are open at once. Compare marks: the disagreement is almost always about whether to breathe before or after *which was planted*.

12A · Recycle — twelve items 1 who / that — **yes, it can be dropped** (*object of spoke to*)* · 2 packed · 3 of which · 4 arable · 5 fallow · 6 The extent to which · 7 to check · 8 was brought · 9 press / logs · 10 mustn't · 11 who / that · 12 grown

B1.1 · Unit 9 · Whose Story

0B · Guess it The person at the end of the table with the notebook closed and their chair pushed back from it. Everybody else is inside the recorder's arc and leaning in; that one has moved out of it, has nothing on the table, and is the only person not looking at the device.

1B · Sort — cline of distance from the event **Closest → furthest**: what happened · what you saw · what you said you saw · what was written down · what was published · what people now remember.

Where it stops being evidence: most groups mark it after *what was written down*, because publication introduces an editor. A harder and better mark is after *what you saw* — everything from *what you said you saw* onwards is testimony, and the unit is about what happens between those two lines.

2A · What she's actually here for 📡 Track 9.1 **1 C · 2 D · 3 A · 4 D · 5 B · 6 D** **Noticing** — the six sentences are keyed above. (*Insist* is doubting in a different register: it reports that the speaker is being contradicted and will not move, which is why it reads as defensive.)*

Gist — a piece about a landlord refusing to pay for accessibility work and tenants being left to it.

Detail — First five minutes: the building, the lease, the 2019 report. Last five minutes: she keeps returning to whether anybody has been injured — which is the sentence the piece needs and the thing nobody can say.

Inference — Wanjiru is trying to move the quote to somebody whose position it would not damage. It does not work: the journalist writes down that she said it, and "*I'd rather you spoke to Mariam*" is itself quotable.

Attitude — the second. The first and third are level and quick, marking a turn; the second falls and is longer, and is the only one that agrees with anything.

3D · Use — controlled 1 said / claimed / alleged — *said* reports it, *claimed* doubts it, *alleged* marks it legally unproven

2 denied

3 pointed

4 admitted / conceded — both say it cost her something; *conceded* implies she was argued into it

5 refused

6 confirmed / disclosed — *confirmed* means it was already known, *disclosed* that it was not

3E · Use — guided 1 **Neutral**: *He said he had not known the toilet was an issue*. **Doubting**: *He claimed he had not known...* **Conceding**: *He admitted he had not known...* — and *admitted* is the trap: not knowing is not a confession, so the conceding verb invents a fault. **Publish**: the neutral one.

2 **Neutral:** *They said they had offered to pay half.* **Doubting:** *They claimed...* **Conceding:** *They acknowledged...* **Publish:** the neutral one, unless the offer is disputed, in which case *claimed* is honest and *said* is not.

3 **Neutral:** *He said nobody had raised it with him.* **Doubting:** *He maintained...* **Conceding:** *He conceded...* **Publish:** the neutral one — and note that *maintained* is the verb that makes a person look like they are losing.

5C · Close reading 1 Eleven words; the piece was six hundred.

2 Not to damage him. The explanation took two minutes and the eleven words took four seconds, and she had six hundred words for the whole piece.

3 That he had chosen the eleven words — not the edit, the words.

4 A telling of the story shaped for effect: there is a pause in it that gets a reaction. It is a performance of being wronged, and it is the version he was good at.

5 He says the dull version first, so that if it is the only thing he says it is the only thing that can be used. The cost is that he is quoted much less often.

6 Against the system that selects for the sharp phrase — and, by the last clause, against everybody who keeps reaching for one, the writer included. It is an accusation that cannot be delivered to a person, which is why it is in the last clause.

5D · Vocabulary in context **accurate** — true as recorded, which the piece turns out not to settle · **length limit** — the word count that does the cutting · **reach for** — choose, quickly and half-consciously, because it is to hand · **performance** — speech shaped for an audience rather than for the truth · **dull** (the dull version) — the unquotable, accurate one · **quoted** — selected and printed, which is a thing done to you and partly by you

5E · The counter-text 1 Sixty-one of four thousand one hundred — about 1.5 per cent.

2 "Not the work — the paperwork." It follows the quote immediately in the recording and would have cost eleven words. It belongs directly after "*It was a shambles,*" he said.

3 **admits** — in the headline. In the transcript he is answering a question he was asked, which is not an admission.

4 "The former director said the organisation had grown too quickly." It is the journalist's summary of *we were four people doing the work of nine... growing that fast* — a fair paraphrase that is not a sentence he said.

5 **No.** Every printed word is in the transcript or is a fair paraphrase of it. The piece is accurate and misleading at the same time, which is the whole argument of the unit.

6A · Sort — what does the verb add?

confirming — confirm · point out · back up · stand by **neutral** — according to · be quoted as saying · go on to say · put it another way · words to that effect · recall **doubting** — claim · maintain · stress · insist · allege **conceding** — admit · concede · acknowledge **refusing** — no comment · refuse · deny *stress* is doubting only by implication — it reports that the speaker thought emphasis was needed, which a reader hears as defensiveness. Accept it as neutral if a learner argues the case; the argument is the point.

6B · Chunk completion 1 stood by · 2 put ... another way · 3 no comment · 4 According to · 5 words to that effect

6C · Register sort **News report:** according to · be quoted as saying · claim · allege · admit · confirm · deny · refuse · insist. **Court transcript:** concede · acknowledge · maintain · stand by · recall · words to that effect. **Speech only:** no comment · put it another way · back up · go on to say. **In all three:** admit · deny · confirm · point out.

6D · Contrast Clinic — one claim, six verbs

1 admitted (or conceded)* 2 claimed 3 said 4 confirmed 5 insisted (or maintained)* 6 alleged **A lawyer insists on alleged.** It is the only one of the six that reports the claim without the publication adopting it — *said* and *confirmed* both commit the publisher to something, and *claimed* implies a judgement the publisher would have to defend.

7C · Make it mean something Stress on **admitted** is unsympathetic: the admission is the news, and the sentence is about his having been caught. Stress on **forgotten** is sympathetic: the forgetting is the news, and the admitting is taken for granted — which is the version that treats him as somebody telling the truth.

12A · Recycle — twelve items 1 denied being · 2 pointed · 3 refused · 4 off · 5 true · 6 conflict · 7 who / that — **yes, it can be dropped** · 8 to check · 9 was brought · 10 were / would change · 11 had not received · 12 which

B1.1 · Unit 10 · A Fair Day

OB · Guess it Grace. Everybody else in the picture has something with their name on it — a lanyard, a pigeonhole, a name on a door, a rota. She has a mop bucket and a key, and the key is on the committee's ring, not hers. Six years, and the only evidence she works there is that the building is clean.

1B · Sort — cline of security **Most secure → least:** a permanent contract · a fixed-term contract · a rolling contract · zero-hours · paid in cash · a handshake.

Where the law stops helping: most people mark it after zero-hours. In most jurisdictions that is **wrong** — a zero-hours worker and a cash-in-hand worker usually both have statutory rights, and the thing that fails is not the law but the evidence. The line to mark is where the written record stops, which is one step earlier than people think, and that is the finding of the unit.

2A · Six years 🎧 Track 10.1 **1 A · 2 C · 3 C · 4 C · 5 C · 6 B Noticing** — the six sentences are keyed above.

Gist — not straightforwardly. She wants the money and the sick pay and does not want the fixed hours; she never says no, and she never says yes.

Detail — Hours: now set by her; under the contract twelve a week, fixed Monday to Friday at times agreed with the committee. Pay: now 477 an hour, cash, weekly; proposed 520 an hour, transfer, monthly. Flexibility: now total; under the contract, none on weekdays — and Tuesdays are not mentioned anywhere.

Inference — the loss. *More than I thought* is about the money and about how much the arrangement has been worth to her all along — six years of goodwill she had not priced, and which clause 9 supersedes at signature.

Attitude — the first. It is level and quick. The second falls and is slower, with a pause before it, which is the sound of somebody who has a preferred answer.

3D · Use — controlled 1 considerably / substantially · 2 marginally / slightly · 3 appreciably / significantly · 4 the more · 5 the less · 6 nowhere

3E · Use — guided **1 Larger:** *It's a great deal better than before.* **Smaller:** *It's marginally better than before.*

2 Larger: *There's a substantial difference in the hours.* **Smaller:** *There's slightly more in the hours.*

3 Larger: *The rate has gone up significantly.* **Smaller:** *The rate has gone up a little.* In each case the number is identical and the modifier is the whole offer.

5C · Close reading 1 Four hundred and eighty interviews across four cities over three years.
 2 Romanticising informality — the standard failure of the sympathetic account; and treating it as exploitation waiting to be formalised — the standard failure of the policy account.
 3 A long informal arrangement builds credit on both sides: the worker who stayed, the employer who paid in hard months. The credit is real and valuable, and it is destroyed by formalisation.
 4 Twelve months' notice. (*In the agreement in 5E it is three months, which is worse still.*)
 5 The finding that in both cases she followed through, the workers ended up marginally better paid and substantially less free, and in one case the arrangement ended within a year. The reviewer objects because it is the most important finding in four hundred and eighty interviews and it is in a footnote.
 6 The book — from being read as an argument against writing things down. The reviewer thinks it would have been read that way, that the honest version would have said it anyway, and that the book was good enough to carry it.

5D · Vocabulary in context **exhaustive** — complete, leaving nothing out · **romanticise** — treat as better than it is because it is informal · **informality** — arrangements with no written terms · **ledger** — a running account of what each side is owed · **accumulate** — build up over time without anybody recording it · **formalisation** — writing the arrangement down, which is also what destroys the ledger

5E · The counter-text 1 477 an hour now; 520 proposed — about nine per cent.
 2 Twelve hours a week, Monday to Friday, at times agreed with the Tenants Committee. She currently sets her own hours and works elsewhere on Tuesdays.
 3 Statutory sick pay, three months' notice either way, and a written agreement — three things she has none of.
 4 Six years of accumulated obligation. Clause 9 says the agreement supersedes all prior arrangements between the parties, so at the moment of signature the ledger is set to zero. Nothing on the page says so, and the covering email does not mention it.
 5 Three months, either way. **Against six years** — the arrangement that is being replaced is twenty-four times longer than the protection replacing it, and that trade is the whole unit.

6A · Sort — the scale **No difference → enormous difference:**
 every bit as · just as · barely · marginally · slightly · somewhat · appreciably · if anything · much · significantly · considerably · substantially · a good deal · a great deal · far · by far · not nearly · nowhere near · infinitely.
*The relationship pair — **the more... the more and the sooner... the better** — does not belong on the line at all: it sizes a dependency, not a gap. Say so rather than placing them.*
*The three that size a change: **scale up** (make bigger), **knock back** (reduce, usually by refusal), **not by a long way** (a gap, at the far end).*
*Note that **not nearly** and **nowhere near** are large gaps stated negatively, which is where most groups go wrong.*

6B · Chunk completion 1 by far · 2 every bit · 3 If anything · 4 The sooner / the better · 5 nowhere near

6C · Register sort **Contract:** substantially · significantly · appreciably · not less than · considerably.
Speech only: every bit as · a good deal · by far · nowhere near · not by a long way · knock back.
Both (five): much · far · slightly · marginally · somewhat. **Reviews only:** infinitely.

6D · Contrast Clinic — the modifier is the offer

1 marginally higher / significantly higher — both describe nine per cent. 2 slightly more hours / a good deal more hours — both describe four. 3 somewhat better / far better — the same offer, twice. **Who benefits:** the side making the offer wants the small modifier when the change is a cost to them and the large one when it is a concession. Here the committee

wants *significantly higher* for the rate and *slightly more* for the hours — the same sentence pair, chosen in opposite directions, from one set of numbers.

7C · Make it mean something **Relief**: rising-falling on *lot*, the whole phrase quick and light, with the stress early. **Suspicion**: level stress spread across *a lot more*, slower, with a pause before *than I thought* and a slight rise at the end — which turns the sentence into a question about why.

12A · Recycle — twelve items 1 marginally / slightly · 2 The / the · 3 nowhere · 4 half · 5 books · 6 unsocial · 7 pointed · 8 who / that — **yes, it can be dropped** · 9 to check · 10 was brought · 11 does not sign / will change · 12 has worked / has been working
