

Table of Contents

A1.1 • Unit 6 • Two Streets from the Café

English Animated • *Starting Out* • Escola Monte, Lisbon Student's Book pages 116–137 • 22 pp
• ~9 hours

Part 0 • The Big Picture ♦ A • THE WORLD

The market at seven, down the hill — Fourteen things to find. Two of the stalls are selling the same thing at the same price.

Where does breakfast come from?

By the end of this unit you can buy food, ask the price, and say how much you want.

♦ A • THE WORLD

♦ B • THE SYSTEM

♦ C • THE PERFORMANCE

A market at seven, two streets from a café that opens at half past six

countable and uncountable • *how much* and *how many* • 22 words for food and shops • the words for containers and amounts • /i:/ and /e/, and joining words together

You run a stall, and you buy from

◆ A • THE WORLD

A market at seven, two streets from a
café that opens at half past six
somebody else's

0A • Find it — fourteen things

Find these in the picture. Write the number.

- ☐ bread ☐ rice ☐ cheese ☐ milk ☐ an egg ☐ an apple ☐ a tomato ☐ a fish ☐ water ☐ a box
☐ a crate ☐ a bag ☐ a van ☐ a sign

Three of these words are not in the picture. Which three?

sugar • salt • tea

0B • Guess it

Look at the two stalls selling the same thing. **Why is there a queue at one and nobody at the other?** Say one thing. You can use these words:

sign • price • cheap • people • know

0C • Say it 🟡

Record. Thirty seconds. Do not prepare.

What did you eat this morning, and where did it come from?

You will listen to this again on the last page.

Part 1 • Vocabulary Lab 1 ◆ B • THE SYSTEM

1A • Meet — one breakfast, backwards

6in}

{width=6.

One breakfast, backwards — Six things in a cup and on a plate, and how far each of them came.
One line leaves the page.

bread	Two streets. Four hours old.
milk	Eleven kilometres. Yesterday evening.
coffee	Six thousand kilometres. Three weeks on a ship.
egg	Forty kilometres. Tuesday.
sugar	Nobody at the café knows. Nobody has ever asked.
water	Under the street. It is the only one that did not travel.

1B • Meet — the words

bread · rice · cheese · milk · egg · apple · tomato · chicken · fish · water · tea · coffee · sugar · salt

Write each word under the right picture.

the front crates

tomato · apple · the ones people see first

the table

cheese · bread · egg · the scales

under the table

rice · sugar · salt · in packets and sacks

the van behind

milk · water · fish · what has not come out yet

You can count these. One, two, eleven

You can count the eggs. You cannot count the cheese

None of these can be counted. All of them can be weighed

And the van is where run out of is decided

{width=6.6in}

6in}

One stall, in section — Eleven foods. Eleven words. Put each word where it actually sits.

1C • Sort — can you count it?

Put each word in the right box. **Two of them can go in both. Which, and why?**

chicken · water · cheese · apple · tomato · fish · milk · rice · egg · bread

	YOU CANNOT COUNT IT	
ONE, TWO, THREE		BOTH

1D • The two shops

market	Six stalls. Open at six. Closed by two. Cash.
shop	Open all day. A fridge. A card machine. Twenty per cent more.
How much is it?	The question you need in both.
a bit of	When you do not want a number and you do not want a lot.
run out of	What happens at half past eleven on a Saturday.

Now say them. One of these five is a question and one is a problem. **Which is which, and which two are places?**

1E • Stretch — the phrases you will need today

a loaf of bread · a bottle of water · a kilo of rice · a bit of · run out of

Match each phrase to the moment you need it.

1. You are thirsty and there is a shop. → _____
2. You are cooking for six people. → _____
3. You want cheese but not much cheese. → _____
4. It is Sunday and the café has no milk. → _____
5. You want the whole thing, not slices. → _____

1F • The hard one

f That's all, thanks.

Practise it three times. **It is how you end every transaction in English, and without it the other person keeps offering.**

1G • Own it

Write down three things you bought this week and where. Do not write your name. The class guesses whose week it is.

Part 2 • Listening ♦ A • THE WORLD

6in}

{width=6.

Seven o'clock at the stall — He buys for a cafe. She has sold here for nineteen years. Neither says the real question.

2A • Seven o'clock at the stall 🎧 Track 6.1

Before you listen. Marco buys for the café every Tuesday. **Guess: does he know the price before he asks?**

Listen once. One question. How much does a kilo of tomatoes cost?

Listen again. Complete the table.

	How much / how many	Price
tomatoes		
eggs		
bread		

Listen again. True or false?

- Marco buys two kilos of tomatoes. ☐ T ☐ F
- There aren't any eggs left. ☐ T ☐ F
- He pays with a card. ☐ T ☐ F
- He asks the price before he chooses. ☐ T ☐ F

Noticing. Four questions from the recording.

- How much is it?*
- How many do you want?*
- How much rice do you need?*
- How many eggs are there?*

Two use *much* and two use *many*. What decides?

2B • Decoding clinic 🎧 Track 6.2

Twenty seconds of the stallholder at speed. Three jobs.

- 1. Count how many prices she says.
- 2. She says *a kilo of* as one word. Write what you hear.
- 3. *How much is it* has four words and two sounds in the middle. Where do the words join?

Transcripts, page 152.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

Things you count and things you weigh

3A • Notice

Look at the four questions in Part 2 again.

- 1. What kind of word comes after *how many*?
- 2. What kind of word comes after *how much*?
- 3. Can you say *two breads*? What do you say instead?
- 4. One word in the list can be counted in a shop and not in a kitchen. Which?

3B • See

Things you count and things you weigh

The same wheat is bread and a sandwich. The food did not change. The language did.

six eggs

countable

eleven apples

countable

some bread

uncountable

some rice

uncountable

two loaves of bread

the bridge

How many goes with the blue. How much goes with the orange. The green is the bridge; put a container in front and anything becomes countable again.

6in} {width=6.

Things you count and things you weigh — The same wheat is bread and a sandwich. The food did not change. The language did.

3C • Know

countable	you can put a number in front	<i>an egg · two eggs · eleven apples</i>
uncountable	no number, no plural	<i>bread · water · rice · cheese · coffee</i>
asking	how many + countable · how much + uncountable	<i>How many eggs? How much rice?</i>
the bridge	a container makes anything countable	<i>two loaves of bread · three bottles of water</i>

It is not about the food. It is about how the language decided to look at it. *Bread* is uncountable and *a sandwich* is countable, and they are the same wheat.

6in}

The container is the bridge — Bread cannot take a number. A loaf can, and it carries the bread across with it.

some / any

some bread · some eggs · Is there any rice? There isn't any milk.

a lot of

works with both: a lot of bread · a lot of eggs

a bit of

only uncountable: a bit of cheese, never a bit of eggs

Why it matters. Every time you buy food, order in a café or follow a recipe, you have to choose between these two shapes, and the choice is in the first two words.

3D • Use — controlled

Complete with **how much, how many, a bit of, a lot of** or **any**.

(1) _____ eggs do you want? — Six, please. (2) _____ rice do you need? — Half a kilo. There isn't (3) _____ milk left. We need (4) _____ milk for the morning. Just (5) _____ cheese, please. Not much.

3E • Use — guided

Make a question with *how much* or *how many*.

1. He wants four apples.
2. She needs two litres of water.
3. They buy a kilo of rice every week.
4. There are twelve eggs in the box.
5. The café uses three loaves of bread a day.

3F • Use — open

In pairs. One of you has a kitchen with six things in it. The other is cooking tonight. **Find out what there is, and how much, in six questions.**

3G • Check — six items, mark your own

1. _____ bread do you want?
2. _____ apples are there?
3. There isn't _____ water in the bottle.
4. I only want _____ bit of cheese.
5. × *How many rice do you need?* → correct it.
6. × *I bought two breads.* → correct it.

The number with nothing to land on

✗ I bought two breads.

two

A number needs something with edges to count. Bread, in English, is a substance like water or sand: it has no edges, so the number has nothing to settle on. Many languages count it happily, which is why this error is so common and so invisible to the person making it.

✓ I bought two loaves of bread.

two

Loaves are objects. The number lands on them and the bread hangs underneath, unchanged and still uncountable. Every container word in this unit does the same job: bottle, packet, kilo, slice, piece.

What the writer thought:
The mistake is not in the food, it is in the picture. Ask yourself whether you could draw a line round one of them. One egg, yes. One bread, no - you would have to draw a loaf, and that is the word you need.

{width=6.

6in}

The number with nothing to land on — The number with nothing to land on

0–3 → Workbook pp. 24–27. **4–5** → Part 6. **6** → page 134.

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency starter — the shopping chain

The first person says one thing they need and how much. The next repeats it and adds theirs.
Nobody may use the same container twice.

4B • The functional core — buying and selling

The same stall, two Tuesdays
Same hour, same tomatoes, same price. One of them has a piece of card on it.

with a sign

2.20 a kilo · the farm · the village · 9 people

no sign

2.20 a kilo · nineteen years · nobody, at seven

Find the six. One of them is not on the stall at all - it is in front of it, and it is what the sign bought.

6 differences — find them all

{width=6.

The same stall, two Tuesdays — Same hour, same tomatoes, same price. One of them has a piece of card on it.

Language Bank

asking the price

How much is it? · How much are they? · How much is a kilo?

saying the amount

a loaf of bread · a bottle of water · a kilo of rice · half a kilo

softening it

just a bit of... · about two hundred grams

ending it

That's all, thanks.

Information gap. Learner A has a shopping list with amounts. Learner B has a stall with prices and three things missing. **Buy the whole list, or find out what you cannot have.**

4C • The performance — the market ●

Half the class sets up a stall. Half buys. **Ten minutes, then swap.** As a seller you must:

give a price without being asked once · run out of one thing · offer something instead

As a buyer you must buy four things and **spend less than ten euros. Record it.**

4D • Observer

One person listens for **one thing**: did any buyer walk away without saying *That's all, thanks.?*

4E • Two criteria

☐ Did I use a container word for at least two things? ☐ Did I ask the price before I chose, at least once?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

The title is "**The stall with nobody at it.**" Why would two identical stalls have different queues?

5B • Read — sixty seconds

The stall with nobody at it

There are two tomato stalls at the market, side by side. The tomatoes are the same. The price is the same: two euros twenty a kilo.

At seven in the morning there are nine people at the first stall and nobody at the second.

The first stall has a small handwritten sign. It says the name of the farm and the name of the village. It does not say the tomatoes are better, because they are not better.

The second stall has no sign at all. The woman behind it has sold tomatoes here for nineteen years. Everybody who knows her buys from her, and there are not many of those left, because the people who knew her are old now and they come at nine, not at seven.

Nine people at seven. Four people at nine. The same number by the end of the day, and only one of the two stalls thinks it is winning.

5C • Answer

1. How much is a kilo of tomatoes?
2. How many people are at the first stall at seven?
3. What does the sign say?
4. How long has the second woman sold tomatoes here?
5. **Why do her customers come at nine and not at seven?**
6. **The last line says only one of them thinks it is winning. Which one, and is it right?**

5D • Vocabulary in context

Guess from the text. Then check.

side by side • a handwritten sign • there are not many of those left • by the end of the day • thinks it is winning

5E • The counter-text

The till receipt from the shop
The same six things Marco buys at the market. Everything here is a number except one line.

ITEM	AMOUNT	EUR
TOMATOES	1 kg	3.18
BREAD	2 loaves	1.48
MILK	6 x 1 L	5.34
EGGS	12	3.68
RICE	1 kg	1.85
CHEESE	220 g	4.87
TOTAL	19.36	
CARD	**** 4417	
TIME	07.04	
ITEMS	6	

Three ten a kilo. The market is two euros twenty

Six times one litre - the amount is in the line, not just the price

Two hundred and twenty grams. Weighed, not counted

Seven minutes past seven. He was here before the market opened

Tuesdays, before nine. Exactly when he goes to the market

AND IN SMALL PRINT:
"10% off your next shop, Tuesdays only, before 9 a.m." The only line on this receipt that is not about what you bought. It is about when you come back.

6in}

The till receipt from the shop — The same six things Marco buys at the market. Everything here is a number except one line.

Read the receipt and answer.

1. How much is the milk?
2. **How many litres of milk are there, and how do you know?**
3. What is the total?
4. **What is the offer at the bottom, and what does it want you to do?**

5F • Two texts

The market sells tomatoes at two euros twenty a kilo. The receipt says three euros ten.

Is the shop expensive? Say one sentence. **Then say what the receipt does not tell you.**

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

The words that make things countable

The same rice, six times
The rice never changes. The word in front of it changes in every panel.

1

loose in a sack: rice

2

a kilo of rice

3

a packet of rice

4

a jar of rice

5

a bowl of rice

6

and on the plate: rice again

6in}

The same rice, six times — The rice never changes. The word in front of it changes in every panel.

6A • The ones that catch everybody

a packet of / a bag of	the packet is sealed; the bag is what you carry it home in
a tin of / a jar of	metal, and glass. English has a different word for each
a piece of / a slice of	a slice is cut flat off something bigger
half a kilo	not a <i>half kilo</i> . The <i>a</i> moves

6B • Say them

bag • box • bottle • packet • tin • jar • kilo • gram • litre • half • piece • slice

6C • Chunk

1. a _____ of bread (*the whole one*)
2. a _____ of water (*you can carry it*)
3. a _____ of rice (*one thousand grams*)
4. a _____ of cheese (*cut flat*)
5. a _____ of tomatoes (*metal, and it opens with a ring*)
6. _____ a kilo (*five hundred grams*)

6D • Contrast Clinic

Six items. ***much*** or ***many***?

1. How _____ eggs do you want?
 2. How _____ bread is there?
 3. How _____ apples are in the box?
 4. How _____ is a kilo of rice?
 5. How _____ bottles are there?
 6. How _____ water do we need?
-

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

/i:/ and /e/, and words that join

{width=6.

6in}

Long ee and short e — Cheese and bread. The jaw moves between these two and most learners keep it still.

7A • Hear

/i:/ long: cheese · tea · meat · need · three /e/ short: bread · egg · ten · cent · left the joins: a kilo of → a KEE-lo-vuh · How much is it? → How-mu-chi-zit

7B • Say

Say each group three times. Then say this:

Three eggs and a bit of cheese. — both vowels, three times each, in one sentence.

7C • Make it mean something

Say these two:

a bit of cheese — four words, and you hear two How much is it? — four words, and you hear two

English joins the end of one word to the start of the next. This is why you cannot hear words you already know. Which words have disappeared into which?

7D • Fluency 20

Twenty seconds: **six things you need from a shop, with the amount.** Three times, faster.

Part 8 • Writing ♦ C • THE PERFORMANCE

A shopping list that somebody else can use • 40–60 words

8A • Read the model

For the café, Tuesday. [who and when, first]

Four kilos of tomatoes — the stall on the left, not the one with the sign. [the amount, and where]

Two loaves of bread. If there isn't any brown, white is fine. [the amount, and what to do if it is not there]

Six litres of milk. Don't buy the cheap one — it is cheap because it is two days old. [the amount, and the reason]

Questions about the writer's choices:

1. Every line has an amount. **What happens to the person shopping if one line does not?**
2. *If there isn't any brown, white is fine.* **What does that one sentence save?**
3. The last line gives a reason. **Why is a reason more useful than an instruction?**

8B • The anti-model

tomatoes, bread, milk, eggs, cheese, rice

Correct English, and the person who takes it to the market will come back with the wrong thing six times. **Add an amount to every line and one instruction for when something is missing.**

8C • Plan

who and when → the amounts → what to do if something is missing → one reason

8D • Write — 40 to 60 words

8E • Peer review — two things only

☐ Does every item have an amount with a container or a weight? ☐ Could a stranger shop from this list without telephoning you?

8F • Publish

Swap lists. **Your partner shops from your list, on paper, and tells you where they got stuck.**

Pouring four hours into Sunday

Five panels. Watch where it stops going in.

1

The plan: four hours

2

Hour 1 - it goes in

3

Hour 2 - slower

4

Hour 3 - it spills

5

Hour 4 - nothing

in}

Pouring four hours into Sunday — Five panels. Watch where it stops going in.

What people plan	four hours on Sunday
------------------	----------------------

What goes in	about seventy minutes
What they conclude	<i>I need a longer Sunday.</i>
What is true	the container is the wrong shape, not too small

9B • How much, not how long

An hour of English in which you say nothing is not an hour of English. **Count what you produced, not how long you sat there.** Write down one number from last week: how many sentences did you actually say out loud?

9C • Role play — the study stall

In pairs. One of you is selling study time by the hour. The other is buying with four hours a week. **Negotiate. The seller must offer at least one package the buyer has not thought of.**

9D • The container you already have

You have a container that is exactly the right shape and you are not using it: the journey, the queue, the kettle, the walk. **Name yours, and say how much it holds.**

9E • Transfer — before next week

Write down, for seven days, how many English sentences you said out loud. One number a day. Bring the seven numbers.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

6in} {width=6.

One breakfast, as distance and time — The cheapest thing on the plate travelled furthest and was touched by the most people.

10A • Relay

Half the class has the market prices. Half has the shop receipt. **Build the cheapest possible breakfast by speaking.** Ten minutes.

10B • Simplify — for one person

A new student asks: *Where do I buy food around here?* **Answer in four sentences.** Include one thing that is not about price.

10C • Online

Write **one message** to a classmate: ask them to buy you two things and say the amounts. **Two sentences.**

10D • Your language

Does your language count bread? **Say two breads in your language.** Is it strange? Which foods does your language count that English does not?

Part 11 • The Decision ◆ C • THE PERFORMANCE

Bread, two streets away

Marco's café uses three loaves of bread a day.

The bakery two streets away sells him bread at one euro ten a loaf. It is baked at five in the morning, four hours before he needs it. He walks there and back and it takes him twenty-two minutes.

The supermarket at the top of the street sells bread at seventy cents. It is delivered at six. It is forty seconds from his door.

Three loaves a day, six days a week. The difference is about fifty euros a year, and twenty-two minutes a day.

11A • The evidence

The same counter at half past nine
Bakery bread on the left, supermarket bread on the right. Three customers in both.

the bakery, 1.10

3 loaves · 22 minutes walking · 0 left at two

the supermarket, 0.70

3 loaves · 40 seconds · 1 left at two

Find the six. One of them is at the end of the day, not at half past nine, and it is the one that decides the money.

6 differences — find them all

{width=6.

6in}

The same counter at half past nine — Bakery bread on the left, supermarket bread on the right. Three customers in both.

 **Track 6.6.** Marco, 20 seconds: "It's fifty euros. Fifty euros is nothing. But it's twenty-two minutes, and at seven in the morning twenty-two minutes is not nothing."

11B • Talk about it

In threes. Use the frame. Everybody says one.

I think Marco should buy the bread from _____, because _____.

Words you can use: *bread · shop · market · cheap · expensive · minute · customer*

11C • Decide

Write **two sentences**. Choose, and say why.

I think Marco should buy the bread from _____, because _____.

11D • Model decision

The bakery, but not for the bread. The twenty-two minutes is the only time in Marco's day when he is outside and nobody is asking him for anything, and he has been calling it a cost. It is the most useful fifty euros he spends.

11E • The Reveal

What happened. Marco kept the bakery. He did not do it for any of the reasons on this page. He did it because the baker tells him what is selling in the street, and he changes what he makes on the strength of it.

Then something he did not expect: when the bakery was closed for two weeks in August, his takings fell by more than the bread was worth, and it took him until October to work out why.

One question. You do not have to answer it out loud.

Marco was comparing two prices. What was he actually buying?

Part 12 • Landing ♦ all three lines

12A • Recycle — twelve items

1. How _____ bread do you want?
2. How _____ eggs are there?
3. There isn't _____ milk left.
4. I want just a _____ of cheese.
5. a _____ of bread (*the whole one*)
6. a _____ of water (*you can carry it*)
7. a _____ of rice (*one thousand grams*)
8. a _____ of cheese (*cut flat*)
9. We have _____ of sugar. (*two words — there is none left*)
10. That's _____, thanks.
11. (*Unit 5*) There _____ eleven desks in the room.
12. (*Unit 4*) _____ I have a receipt, please?

12B • Consolidate — one task, everything in it

Write a shopping list for six people eating together, in six lines. Every line must have an amount. Two must use a container word, one must use a weight, and one must say what to do if the thing is not there.

12C • Can-do, with evidence

☐ I can buy food and ask the price. **Evidence:** 4C ☐ I can use *how much* and *how many* correctly. **Evidence:** 3G, 6D ☐ I can say an amount with a container or a weight. **Evidence:** 6C, 8D ☐ I can hear where English joins words together. **Evidence:** 7C

12D • Replay

Record 0C again. **Listen to both.** What is different?

12E • Glossary — thirty-five words, as a map

YOU CAN COUNT THEM • egg • apple • tomato **YOU CANNOT** • bread • rice • cheese • milk • chicken • fish • water • tea • coffee • sugar • salt **WHERE** • market • shop **CONTAINERS** • bag • box • bottle • packet • tin • jar **AMOUNTS** • kilo • gram • litre • half • piece • slice **BUYING** • a loaf of bread • a bottle of water • a kilo of rice • How much is it? • a bit of • run out of • That's all, thanks.

12F • Next

Unit 7 • What do you do for fun?
