A1.2 • Unit 6 • The Dining Car in 2035

English Animated • *Getting Around* • The Prairie Line, Toronto to Vancouver Student's Book
pages 116–137 • 22 pp • ~9 hours

Part 0 • The Big Picture ♦ A • THE WORLD

The dining car, seven in the evening, second sitting — Fourteen things to find. Four tables have people at them who did not arrive together.

What will the next ten years bring?

By the end of this unit you can predict, offer and decide, all with one word.

♦ A • THE WORLD

♦ B • THE SYSTEM

♦ C • THE PERFORMANCE

A dining car that loses money and is the only reason anybody books this train

will for prediction, for an offer and for a decision made this second • 22 words for change • *maybe* and *probably* • the 'll you cannot hear

You predict one thing about ten years

◆ A • THE WORLD

A dining car that loses money and is the only reason anybody books this train

from now and say how sure you are

0A • Find it — fourteen things

Find these in the picture. Write the number.

☐ a table ☐ a hatch ☐ a window ☐ a chair ☐ a cup ☐ a light ☐ a door ☐ a machine ☐ a phone ☐ a clock ☐ a plate ☐ a menu ☐ a bottle ☐ a bag

Three of these words are not in the picture. Which three?

a robot • a city • energy

0B • Guess it

Look at the four tables where the people did not arrive together. **Which table has been talking the longest?** Say one thing. You can use these words:

table • together • phone • look • talk

0C • Say it

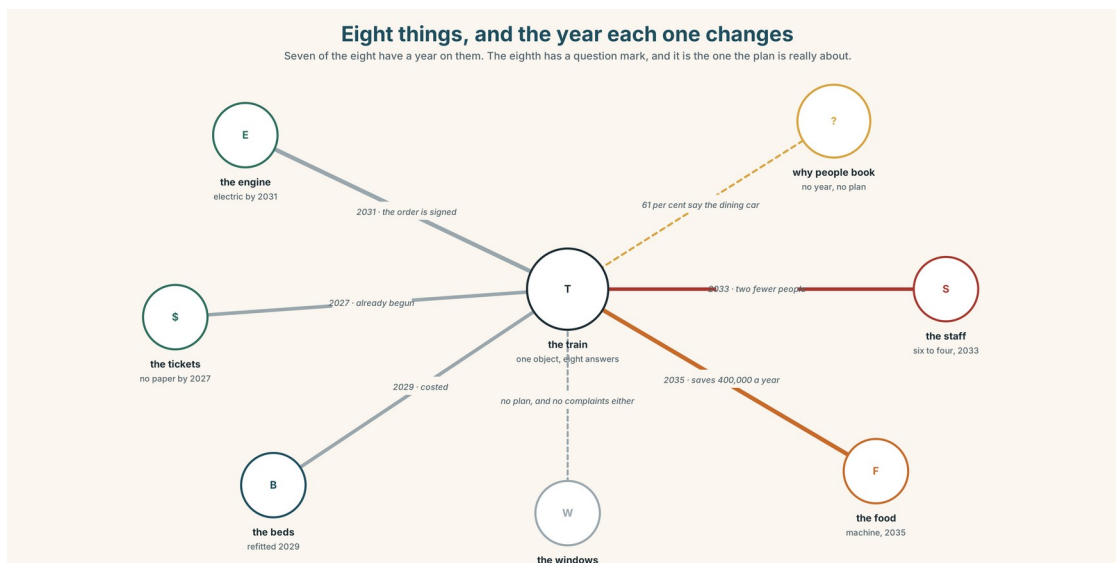

Record. Thirty seconds. Do not prepare.

What will be different in ten years about the way you travel?

You will listen to this again on the last page.

Part 1 • Vocabulary Lab 1 ◆ B • THE SYSTEM

1A • Meet — what changes and what does not

{width=6.

6in}

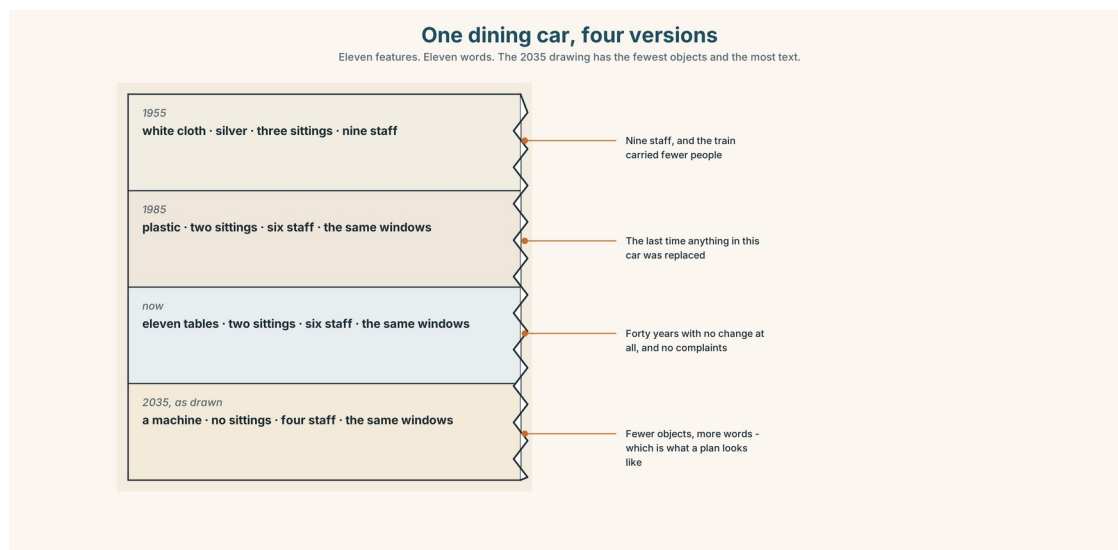

Eight things, and the year each one changes — Seven of the eight have a year on them. The eighth has a question mark, and it is the one the plan is really about.

future	A word people use when they mean next year.
change	The only thing on this list that is a noun and a verb with no difference.
replace	What happens to a machine.
improve	What is promised when something is replaced.
disappear	What actually happens to about a third of them.
work out	The verb for finding the answer when nobody has told you.

1B • Meet — the words

future • change • machine • robot • energy • electric • car • city • job • world • year • soon • grow • disappear • improve • replace

Write each word under the right picture.

{width=6.

6in}

One dining car, four versions — Eleven features. Eleven words. The 2035 drawing has the fewest objects and the most text.

1C • Sort — the thing, or what happens to it?

Put each word in the right box. **Two of them can go in both. Which two, and why?**

machine • improve • robot • disappear • energy • replace • car • grow • city • change

A THING	SOMETHING THAT HAPPENS	BOTH
---------	------------------------	------

1D • The verbs of ten years

in ten years	Far enough away that nobody who decides will still be there.
get better	Two words, and almost always about a thing.
get worse	Two words, and almost always about a system.
a lot of people	The phrase that arrives when nobody has counted.
find out	Somebody tells you, or you look.
work out	Nobody tells you. You do it yourself, from what you have.

Now say them. Two of these six are about information and two are about direction. **Which is which, and what are the other two?**

1E • Stretch — the phrases you will need today

in ten years • get better • get worse • find out • work out

Match each phrase to the moment you need it.

1. You telephone somebody who has the answer. → _____
2. You have four numbers and no answer, and nobody is going to give you one. → _____
3. You are talking about something nobody can check. → _____
4. The new machine is faster and quieter. → _____
5. The new system is faster and nobody can use it. → _____

1F • The hard one

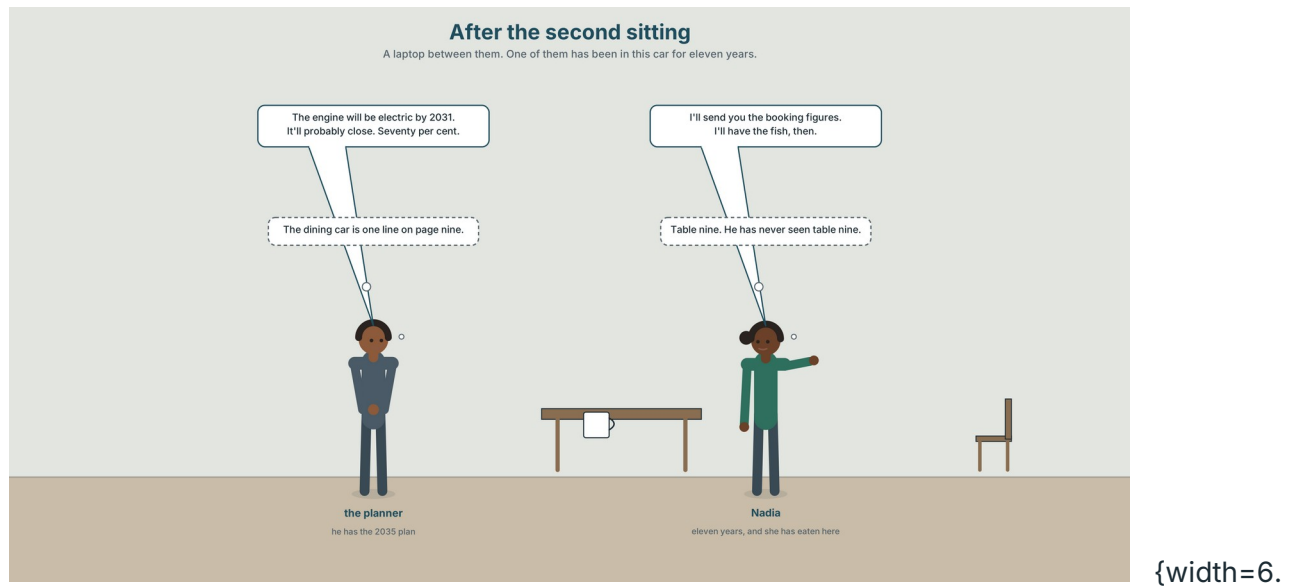

f We'll see.

Practise it three times. **Two words. It is not agreement and it is not disagreement, and everybody uses it to end a conversation they are losing.**

1G • Own it

Write down one thing you think will be different in ten years and one thing you think will be exactly the same. Do not write your name. The class guesses whose card it is.

Part 2 • Listening ◆ A • THE WORLD

6in}

After the second sitting — A laptop between them. One of them has been in this car for eleven years.

2A • After the second sitting 🎧 Track 6.1

Before you listen. The dining car loses about four hundred thousand dollars a year. **Guess: will the company keep it?**

Listen once. One question. What year does the plan talk about?

Listen again. Complete the table.

	What will change	How sure
the engine		
the dining car		
the crew		

Listen again. True or false?

- The engine will be electric by 2035. ☐ T ☐ F
- He says the dining car will definitely close. ☐ T ☐ F
- She offers to send him the booking figures. ☐ T ☐ F
- They agree. ☐ T ☐ F

Noticing. Four sentences from the recording.

- The engine will be electric.*
- I'll send you the figures.*
- I'll have the fish, then.*
- It'll probably close.*

All four use will. One is a prediction, one is an offer, one is a decision made at that second, and one is a prediction with a doubt in it. Which is which?

2B • Decoding clinic 🎧 Track 6.2

Twenty seconds of the planner at speed. Three jobs.

- 1. Count how many times he says *will* or *'ll*.
- 2. In *I'll* and *it'll*, how many sounds does *will* contribute?
- 3. He says *probably* twice and *definitely* once. Which one is he less sure about?

Transcripts, page 153.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

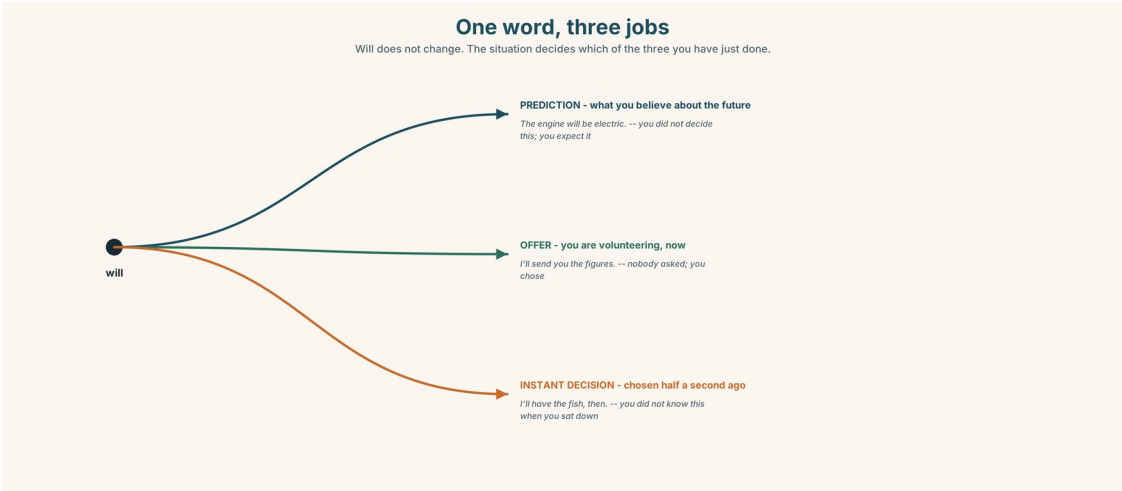

One word, three jobs again

3A • Notice

Look at the four sentences in Part 2 again.

- 1. What is the form of the verb after *will*?
- 2. Does *will* change for *he*, *she* or *they*?
- 3. In sentence 3, when did the speaker decide?
- 4. In sentence 4, which word carries the doubt?

3B • See

{width=6.

6in}

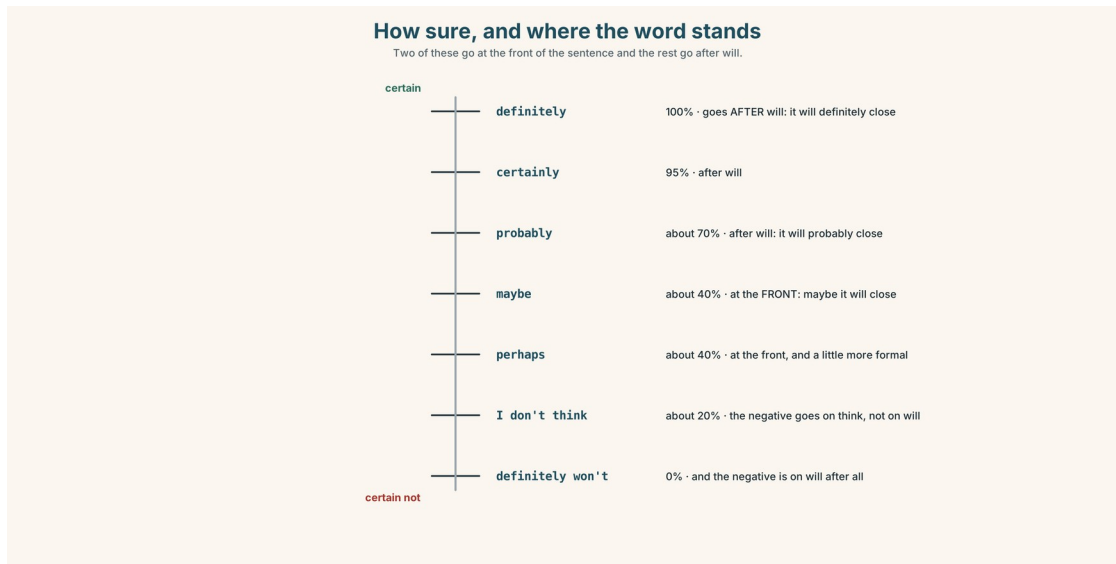

One word, three jobs — *Will* does not change. The situation decides which of the three you have just done.

3C • Know

prediction	what you think will happen	<i>The engine will be electric.</i>
offer	you are volunteering	<i>I'll send you the figures.</i>
instant decision	decided as you speak	<i>I'll have the fish, then.</i>
negative	won't	<i>It won't close. They</i>

won't agree.

Will never changes. No *s*, no *to*, no *do* in the question: *will I, will she, will they*. This is the fourth helper of its kind and the family is now closed: *can, should, must, will*.

{width=6.

6in}

How sure, and where the word stands — Two of these go at the front of the sentence and the rest go after will.

very sure	<i>definitely · certainly · sure</i>
fairly sure	<i>probably · I think...</i>
not sure	<i>maybe · perhaps · possible</i>
refusing to say	<i>We'll see. · Who knows?</i>

Where they stand. *Maybe* and *perhaps* go at the front of the sentence. *Probably* and *definitely* go after *will* and before the verb: *It will probably close.*

Why it matters. Nobody can predict anything. What people can do is say how sure they are, and the whole value of a prediction is in that second piece of information.

3D • Use — controlled

Complete with **will, won't, 'll, probably** or **maybe**.

The engine (1) _____ be electric by 2035. The dining car (2) _____ close — about seventy per cent, he says. I (3) _____ send you the booking figures this evening. (4) _____ they'll change their minds. (5) _____ you be here in ten years? — No, I (6) _____ .

3E • Use — guided

Turn each one into a prediction with *will*, and add a word that says how sure you are.

1. The dining car closes.
2. The crew gets smaller.
3. Trains get faster.

4. The route stays the same.
5. People stop booking.

3F • Use — open

In pairs. Make five predictions about this town in ten years. **Your partner must say how sure they think you are, and you must say whether they are right.**

3G • Check — six items, mark your own

1. The engine _____ be electric. (*prediction*)
2. I _____ send you the figures. (*an offer, contracted*)
3. It _____ close. (*negative*)
4. It will _____ close. (*about seventy per cent sure*)
5. × *The engine will to be electric.* → correct it.
6. × *She wills come tomorrow.* → correct it.

To, in the same gap, a second time

✗ The engine will to be electric.

You met this gap with can in the first book and with should two units ago. Will is the same kind of word, and the rule has not changed: helper, verb, nothing in between. The family is small and now closed: can, could, should, must, will, might.

✓ The engine will be electric.

One helper, one plain verb. The same is true of the negative and the question: It won't be electric. Will it be electric? Nothing is ever added to the verb and nothing is ever put in front of it.

What the writer thought:
Going to is the other way of talking about the future and it does take to - I am going to be late. The to belongs to going, not to the future, and learners who have met going to first carry the to across.

6in}

To, in the same gap, a second time — To, in the same gap, a second time

0–3 → Workbook pp. 24–27. **4–5** → Part 6. **6** → page 134.

Part 4 • Speaking ◆ C • THE PERFORMANCE

4A • Fluency starter — the prediction round

Everybody makes one prediction about next week. **Each one must have a different certainty word, and there are eight of them.**

4B • The functional core — predicting and offering

The same forecast, twice
The left one has a certainty word on every line. The right one has none.

with certainty words

certain · 70% · maybe · no idea — four claims you can test

without them

will · will · will · will — four claims you cannot test

Find the six. Only one of the two can be argued with. Which, and why is that a good thing?

6 differences — find them all

{width=6.6in}

The same forecast, twice — The left one has a certainty word on every line. The right one has none.

Language Bank

predicting

It will... · It won't... · It'll probably...

how sure

definitely · probably · maybe · perhaps · certainly

offering

I'll send it. · I'll do that.

refusing to predict

We'll see. · Who knows? · It depends.

Information gap. Learner A has the company's plan for 2035. Learner B has the booking figures. Find the one prediction in the plan that the figures contradict.

4C • The performance — ten years

Make **three predictions about ten years from now** — about your town, your work or your life. **Two minutes.** You must:

give a different certainty word to each one · offer to do one thing · say one thing you are certain about and one you have no idea about

Record it.

4D • Observer

One person listens for **one thing**: did any prediction arrive without a certainty word?

4E • Two criteria

☐ Did each of my three predictions have a different level of certainty? ☐ Did I use 'll rather than will at least once?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

The title is "**Four hundred thousand dollars a year.**" What do you think loses that much money?

5B • Read — sixty seconds

Four hundred thousand dollars a year

The dining car loses about four hundred thousand dollars a year. Everybody at head office knows this number. It is in every plan.

The company also surveys passengers. The survey asks why people chose this train instead of flying, which takes five hours instead of four nights. Sixty-one per cent say the dining car. Nobody at head office quotes that number, because it is in a different document.

In the 2035 plan, the dining car is replaced by a machine that sells sandwiches. The plan says this will improve the service, and it probably will — the sandwiches will be fresher and they will always be available, and nobody will wait forty minutes for a table.

What the plan does not say is what will happen at table nine, where four strangers have been talking for an hour and a half, and where two of them will exchange addresses before the train reaches Jasper.

5C • Answer

1. How much does the dining car lose?
2. What does the survey ask?
3. What percentage say the dining car?
4. What does the 2035 plan replace it with?
5. **Why does the writer say the plan probably will improve the service?**
6. **The last paragraph is about one table. Why end a finance argument there?**

5D • Vocabulary in context

Guess from the text. Then check.

head office • surveys passengers • a different document • always be available • exchange addresses

5E • The counter-text

One page of the 2035 plan

Five predictions, five confidence figures, one saving column, and a risks line with one word in it.

PRAIRIE LINE - PLAN 2035 - PAGE 9 OF 61

PREDICTION	BY	CONF.
ELECTRIC TRACTION	2031	96%
PAPERLESS TICKETING	2027	99%
BERTH REFIT	2029	92%
CREW 6 TO 4	2033	74%
DINING CAR REPLACED	2035	78%

SAVINGS

Crew reduction\$1.1 m / year

Dining car\$0.4 m / year

Ticketing\$0.2 m / year

Total\$1.7 m / year

RISKS:

"Reputational." One word, on a page with eleven numbers on it. The booking survey is in a different document, in a different department, and nobody has ever printed the two pages next to each other.

Ninety-six per cent, and the order really is signed

Seventy-four. The first number on this page that anybody argued about. Seventy, and it is the lowest confidence on the page

One point seven million. That is what this page is for

One word. The survey says sixty-one per cent

{width=6.

6in}

One page of the 2035 plan — Five predictions, five confidence figures, one saving column, and a risks line with one word in it.

Read the page and answer.

1. How many predictions are on the page?
2. Which prediction has the lowest confidence, and what is the percentage?
3. What is the total saving?
4. The risks line has one word in it. What would you put there instead, and why is one word not enough?

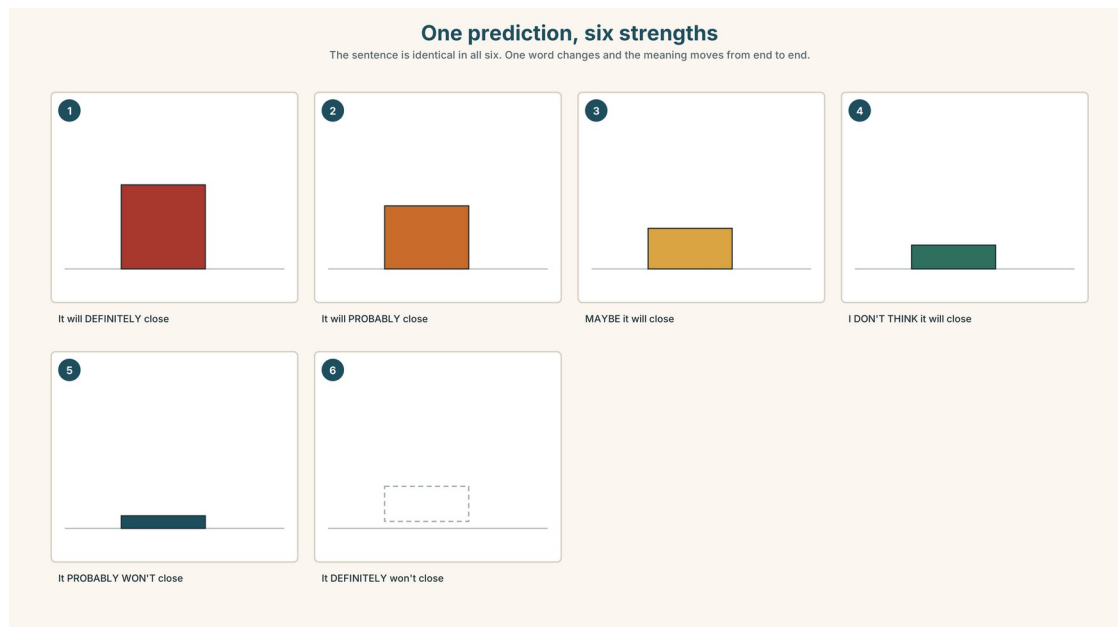

5F • Two texts

The plan says the dining car will be replaced and the service will improve. The survey says sixty-one per cent chose this train because of the dining car.

Can both be true? Say one sentence.

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Saying how sure you are

{width=6.

6in}

One prediction, six strengths — The sentence is identical in all six. One word changes and the meaning moves from end to end.

6A • The ones that catch everybody

maybe / perhaps	at the front of the sentence
probably / definitely	after <i>will</i> and before the verb
I don't think it will	English puts the negative on <i>think</i> , not on <i>will</i>
sure / certain	adjectives, so they need <i>am</i> , <i>is</i> or <i>are</i> in front

6B • Say them

maybe • probably • perhaps • certainly • sure • definitely • possible • impossible • hope

6C • Chunk

1. It will _____ close. (*about seventy per cent*)
2. _____ they'll change their minds. (*at the front, and not sure*)
3. I _____ it'll stay. (*the positive one*)
4. I _____ it'll close. (*the negative goes here, not on will*)
5. _____ . (*two words, and you are ending the conversation*)
6. _____ ? (*two words, and you are refusing to guess*)

6D • Contrast Clinic

Six items. **maybe** or **probably**?

1. _____ it will close. (*at the front, not sure*)
2. It will _____ close. (*after will, fairly sure*)
3. _____ they'll agree. (*at the front*)
4. They'll _____ agree. (*after will*)
5. _____ he'll be there. (*at the front*)
6. He'll _____ be there. (*after will*)

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

The word that shrank to one sound

The word that shrank to one sound			
Written in full above, said below. In every one, the wi has gone.			
I will	→	I ll	one sound left of a four-letter word
he will	→	he ell	the I joins the pronoun
it will	→	it ll	two beats become one
they will	→	they ll	same again
that will	→	that ll	and this one too
will not	→	won t	the only one that changes the vowel instead

{width=6.

6in}

The word that shrank to one sound — Written in full above, said below. In every one, the wi has gone.

7A • Hear

I will → *I'll* • **he will** → *he'll* • **it will** → *it'll* • **they will** → *they'll* **will not** → *won't* — and this one changes the vowel, not just the length.

7B • Say

Say each one three times. Then say this:

I'll ask and they'll probably say no, but it'll be quick. — three contractions, one sentence.

7C • Make it mean something

Say these two:

I'll do it. — an offer, and it sounds like nothing at all *I WILL do it.* — a promise, or an argument, and the full form is the whole difference

The contraction is the normal form. Using the full form is not more correct; it is more emphatic, and sometimes more angry. Which is which?

7D • Fluency 20

Twenty seconds: **six predictions about next year, each with a different certainty word.** Three times, faster.

Part 8 • Writing C • THE PERFORMANCE

A prediction • 50–70 words

8A • Read the model

In ten years the engine will be electric. That one is certain — the order is signed. [the prediction, and the evidence]

The dining car will probably close. I'd say seventy per cent. [a prediction with a number attached to the doubt]

I don't think the route will change. There is nowhere else to put it. [the negative in the English place, with a reason]

What I can't predict is whether anybody will still want four nights. We'll see. [the honest admission, last]

Questions about the writer's choices:

1. *the order is signed.* **Why put the evidence immediately after the prediction?**
2. *I'd say seventy per cent.* **What does a number do that *probably* does not?**
3. The last line admits the writer does not know. **Does that make the first three weaker?**

8B • The anti-model

In ten years everything will be different. Technology will improve. Trains will be faster and better. People will travel more. The future will be interesting.

Correct English, and it is true of every decade since 1850. **Rewrite it with two dates, one number for your confidence, and one thing you cannot predict.**

8C • Plan

the certain one, with evidence → the likely one, with a number → the one you doubt, with a reason → what you cannot predict

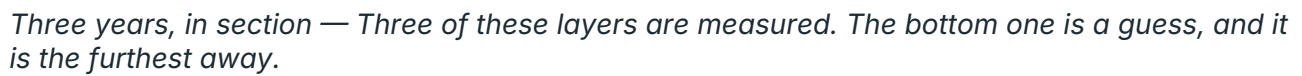

8D • Write — 50 to 70 words

8E • Peer review — two things only

☐ Does every prediction carry a level of certainty? ☐ Is there one thing the writer admits not knowing?

8F • Publish

On the wall, with no names and **with the date. Keep them. Read them again in a year.**

The curve nobody draws — Five panels. The fifth is the only measurement in the set.

What happens	about one level in a year, with four months that feel like nothing
What that is worth	at this rate, B1 in two years and B2 in four
Why nobody believes it	because the only evidence is a recording nobody made

9B • Predict your own year

Write three sentences about where your English will be in twelve months. **Put a percentage on each one.** Keep the paper. You will be surprised, and not in the direction you expect.

9C • Role play — the planner and the person

In pairs. One of you has a spreadsheet of hours. The other has a life. **Plan the next twelve months of study. Nobody may say every day.**

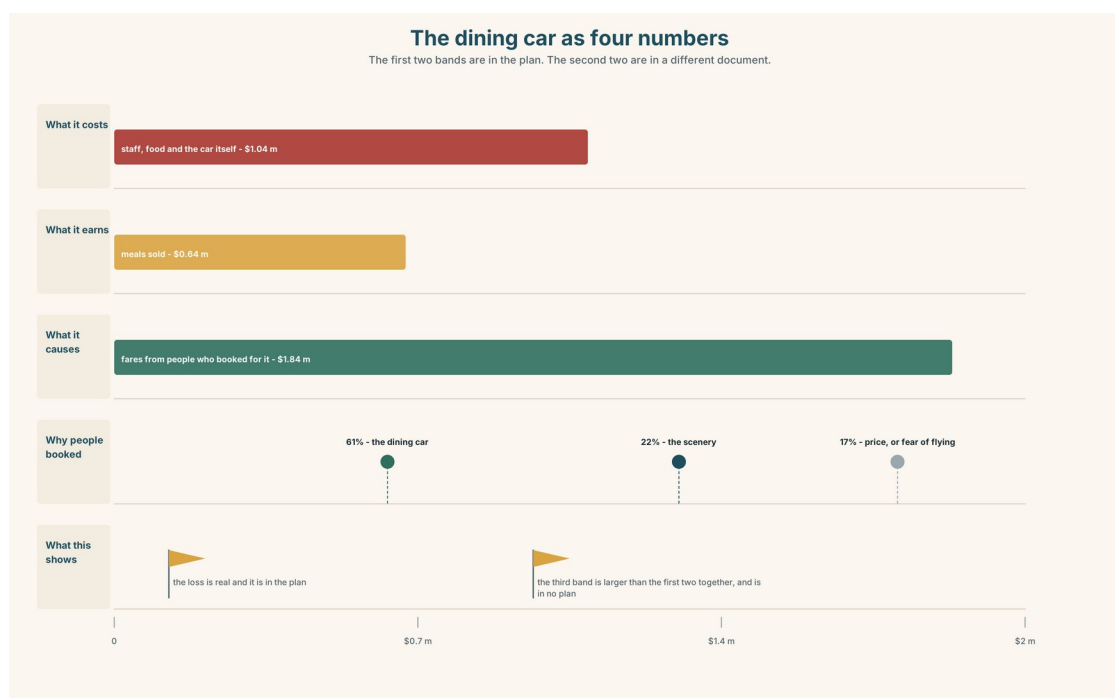

9D • The thing you could not do last year

Name one thing you can do in English now that you could not do twelve months ago. **Then predict the equivalent thing for next year.** That prediction is the useful one.

9E • Transfer — before next week

Write five predictions about your own English, each with a percentage, and seal them. Open them at the end of A1.2.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

{width=6.

6in}

The dining car as four numbers — The first two bands are in the plan. The second two are in a different document.

10A • Relay

Half the class has the 2035 plan. Half has the booking survey. **Build the whole picture by speaking.** Ten minutes.

10B • Simplify — for one person

Somebody asks: *Why does the company want to close the dining car?* **Answer in four sentences.** Be fair to the company.

10C • Online

Write **one message** to a classmate predicting two things about next year. **Three sentences.** Two certainty words and one offer.

10D • Your language

Does your language have one word for the future, like *will*? **Say it will rain tomorrow in your language.** How many words, and where is the future marked?

Part 11 • The Decision ♦ C • THE PERFORMANCE

The dining car in 2035

The dining car loses four hundred thousand dollars a year. Sixty-one per cent of passengers say it is why they chose the train.

Option one: close it. Replace it with a machine. Saves four hundred thousand, and the sandwiches will be fresher.

Option two: keep it exactly as it is. Nothing improves, nothing gets worse, and in 2035 somebody will have this argument again with worse numbers.

Option three: make it the product. Advertise the train as four nights of dinner with strangers. Costs about two hundred thousand to try and will either work completely or not at all.

11A • The evidence

Table nine at nine in the evening
As it is, and as the 2035 plan draws it. Same table, same four people.

as it is	2035, as drawn
4 strangers · 2 bottles · 0 phones · 4 still there at ten	4 strangers · 4 wrappers · 4 phones · 0 still there at ten
	

Find the six. One of them is how many people are still there at ten, and that is the number nobody has forecast.
6 differences — find them all

{width=6.6in}

Table nine at nine in the evening — As it is, and as the 2035 plan draws it. Same table, same four people.

 **Track 6.6.** Ruth, 20 seconds: "They'll close it. I know they'll close it. Nobody will decide to close it — it'll just cost too much one year and then it'll be gone, and the people who decide will never have eaten in it."

11B • Talk about it

In threes. Use the frame. Everybody says one.

I think the company will _____, because _____.

Words you can use: future · change · machine · improve · disappear · replace · in ten years

11C • Decide

Write **two sentences**. Choose, and say why.

I think the company should _____, because _____.

11D • Model decision

Try option three for two years and measure the right thing. The four hundred thousand is real and so is the sixty-one per cent, and the company has never once put them in the same document. Two hundred thousand to find out is cheap compared with being wrong for twenty years.

11E • The Reveal

What happened. The company tried it on two services. Bookings on those two rose eleven per cent and the dining car still lost money — about three hundred thousand instead of four.

Then something nobody expected: the eleven per cent were almost all people travelling alone, and the company had spent nine years designing everything for families.

One question. You do not have to answer it out loud.

They measured the dining car for twenty years. What had they never measured?

Part 12 • Landing ♦ all three lines

12A • Recycle — twelve items

1. The engine _____ be electric. (*prediction*)
2. I _____ send you the figures. (*an offer, contracted*)
3. It _____ close. (*negative*)
4. It will _____ close. (*seventy per cent*)
5. _____ they'll agree. (*at the front, not sure*)
6. I don't _____ it'll close.
7. _____ . (*two words — ending the conversation*)
8. _____ ? (*two words — refusing to guess*)
9. I need to _____ what it costs. (*two words — nobody will tell me*)
10. Things will _____ before they get better. (*two words*)
11. (*Unit 5*) You _____ sit down. (*advice*)
12. (*Unit 4*) It's not _____ . (*standing alone, belonging to me*)

12B • Consolidate — one task, everything in it

Write five predictions about the place where you live, ten years from now. Each with a different level of certainty, one negative, one offer, and one thing you cannot predict.

12C • Can-do, with evidence

☐ I can predict, offer and decide with *will*. **Evidence:** 4C, 8D ☐ I can say how sure I am. **Evidence:** 6D ☐ I can put the certainty word in the right place. **Evidence:** 6C ☐ I can hear and say 'll. **Evidence:** 7C

12D • Replay

Record 0C again. **Listen to both.** What is different?

12E • Glossary — thirty-five words, as a map

THE WORD • future • year • soon • in ten years **THE THINGS** • machine • robot • energy • electric • car • city • job • world **WHAT HAPPENS** • change • grow • disappear • improve • replace • get better • get worse **FINDING OUT** • find out • work out • a lot of people **HOW SURE** • maybe • probably • perhaps • certainly • sure • definitely • possible • impossible • hope **SAYING IT** • I think... • I don't think... **REFUSING TO SAY** • We'll see. • Who knows?

12F • Next

Unit 7 • What must everyone do?
