A1.2 • Unit 9 • Forty Below

English Animated • *Getting Around* • The Prairie Line, Toronto to Vancouver Student's Book
pages 182–203 • 22 pp • ~9 hours

Part 0 • The Big Picture ♦ A • THE WORLD

{width=6.

6in}

The prairie, ten past eight in January, minus thirty-eight — Fourteen things to find. One of the four came out for forty seconds and it has been nine minutes.

How does weather change a day?

By the end of this unit you can make a plan, change it, and say what it depends on.

♦ A • THE WORLD

A place where the weather is not a topic of conversation but a timetable

♦ B • THE SYSTEM

be going to • the present continuous for arrangements • against *will* • 22 words for weather • *going to* as one word

♦ C • THE PERFORMANCE

You make a plan with somebody and change it twice

0A • Find it — fourteen things

Find these in the picture. Write the number.

☐ snow ☐ ice ☐ the sun ☐ a cloud ☐ the sky ☐ the wind ☐ a track ☐ a train ☐ a coat ☐ a window ☐ a door ☐ a light ☐ a bag ☐ a step

Three of these words are not in the picture. Which three?

rain · a storm · spring

0B • Guess it

Look at the four people beside the train. **Which one came out for forty seconds?** Say one thing. You can use these words:

cold · coat · wait · stand · nine

0C • Say it

Record. Thirty seconds. Do not prepare.

What are you doing at the weekend, and what would change it?

You will listen to this again on the last page.

Part 1 • Vocabulary Lab 1 B • THE SYSTEM

1A • Meet — a year on this line

{width=6.

6in}

Four seasons, and what each one does to a railway — Each line has the days lost beside it. The season with the fewest is the one nobody plans for.

weather	A word for all of it, and nobody here uses it alone.
forty below	Not a temperature here. A category, with its own rules.
season	Four names, and on this line there are really two.
check the forecast	Done by the crew four times a day in winter and never in July.
cancel a plan	What the weather does to you.
call off	What you do, before the weather does it for you.

1B • Meet — the words

weather • rain • snow • wind • sun • cloud • storm • ice • degrees • cool • wet • dry • season • spring • autumn • sky

Write each word under the right picture.

{width=6.

6in}

One year, in section — Eleven conditions. Eleven words. The January band is the thinnest and the most expensive.

1C • Sort — the weather, or what it does to you?

Put each word in the right box. **Two of them can go in both. Which two, and why?**

snow • cool • storm • wet • ice • dry • wind • degrees • cloud • sky

**SOMETHING IN THE
SKY**

SOMETHING YOU FEEL BOTH

1D • What people do about weather

check the forecast	Four times a day in January. It is right about three times.
cancel a plan	The plan is gone and nothing replaces it.
call off	The same thing, said by the person responsible.
put off	Not gone. Moved. A completely different conversation.
a bit of rain	Three words that mean <i>do not change anything</i> .
forty below	Two words that mean <i>change everything</i> .

Now say them. Two of these six end a plan and one of them moves it. **Which is which, and which two are not about plans at all?**

1E • Stretch — the phrases you will need today

check the forecast · cancel a plan · put off · call off · a bit of rain

Match each phrase to the moment you need it.

1. It is Thursday and the thing is on Saturday. → _____
2. Somebody is suggesting you stay at home and you do not want to. → _____
3. The match is not happening and it will not happen later either. → _____
4. The match is not happening today and it is happening next Tuesday. → _____
5. You are the person who has to decide, and forty people are waiting. → _____

1F • The hard one

f It depends on the weather.

Practise it three times. **Five words that are a refusal, a plan and a weather forecast at the same time.**

1G • Own it

Write down one plan you have for next week and one thing that would stop it. Do not write your name. The class guesses whose plan it is.

Part 2 • Listening ◆ A • THE WORLD

{width=6.

6in}

On the platform, both looking up — He is working out whether it will run. She is working out when to say so.

2A • On the platform 🎧 Track 9.1

Before you listen. It is minus thirty-eight and the forecast says minus forty-four tonight. **Guess: will the train run?**

Listen once. One question. What is the forecast for tonight?

Listen again. Complete the table.

	Plan	Changed to
tonight		
tomorrow morning		
the weekend		

Listen again. True or false?

- They are going to cancel the service. ☐ T ☐ F
- The train is leaving at six tomorrow. ☐ T ☐ F
- She is going to tell the passengers tonight. ☐ T ☐ F
- It is going to snow. ☐ T ☐ F

Noticing. Four sentences from the recording.

- It's going to get colder.*
- We're leaving at six tomorrow.*
- I'll tell them.*
- I'm going to check again at four.*

Sentences 1 and 4 both use *going to* and they are doing different jobs. What are they?

2B • Decoding clinic 🎧 Track 9.2

Twenty seconds of Tom at speed. Three jobs.

- 1. Count how many future forms you hear.
- 2. *Going to* is three syllables and he says it in one. Write what you hear.
- 3. He says *we're leaving* about something that has not happened. How can a present tense do that?

Transcripts, page 156.

Part 3 • Grammar Lab 1 ♦ B • THE SYSTEM

Three futures, and how to choose

3A • Notice

Look at the four sentences in Part 2 again.

- 1. In sentence 1, what is the evidence for the prediction?
- 2. In sentence 4, when was the decision made?
- 3. In sentence 2, is there an arrangement, or only an intention?
- 4. In sentence 3, when was that decision made?

3B • See

6in}

Three futures, three starting points — The arrow starts where the decision was made, not where the thing happens.

3C • Know

evidence now	be going to	It's going to get colder — look at the sky.
a decision already	be going to	I'm going to check

made		<i>again at four.</i>
an arrangement with others	present continuous	<i>We're leaving at six tomorrow.</i>
decided as you speak	<i>will</i>	<i>I'll tell them.</i>

The question is when the future was decided, not when it happens. All three of these can describe the same Saturday. What differs is how long the speaker has known.

6in}

{width=6.

Four questions, four futures — Most learners only ever use the fourth. Ask the first three before you reach it.

the form	<i>am / is / are + going to + the plain verb</i>
the negative	<i>It isn't going to rain. We aren't leaving until six.</i>
the question	<i>Is it going to rain? What are you doing at the weekend?</i>
the conditions	<i>It depends on the weather. · if it rains...</i>

Why it matters. Almost everything anybody says about tomorrow is one of these three, and choosing the wrong one does not make you wrong — it makes you sound as if you decided just now.

3D • Use — controlled

Complete with **going to**, the present continuous, or **will**.

Look at that sky. It (1) _____ (snow). We (2) _____ (leave) at six tomorrow — it is on the board and the crew have been told. I (3) _____ (check) the forecast again at four. I decided this morning. The telephone is ringing. — Don't move, I (4) _____ (get) it. What (5) _____ you _____ (do) at the weekend?

3E • Use — guided

Choose the right future for each one and write the sentence.

1. There are black clouds and a wind getting up.
2. You and three colleagues have booked a table for Friday.
3. Somebody has just asked you for help with a bag.
4. You decided last week to take a course in the spring.
5. The train leaves at 06.10 and it is in the timetable.

3F • Use — open

In pairs. Make a plan for Saturday together. **Change it twice: once because of the weather and once because of a person.** Every sentence must use one of the three futures.

3G • Check — six items, mark your own

1. Look at that sky. It _____ snow. (*three words*)
2. We _____ at six tomorrow. (*arranged, and on the board*)
3. I _____ check again at four. (*decided this morning — three words*)
4. The phone is ringing — I _____ get it. (*deciding now*)
5. × *I will check it again at four, I decided this morning.* → correct it.
6. × *It's going to rain, I think — no, look, it's raining already.* → which future was wrong?

The decision arrow that started too late

✗ I'll check it again at four.

Will says the decision is being made right now. If you decided eight hours ago, the listener hears a sudden idea where there was a plan. Nothing is ungrammatical - what has happened is that you have made yourself sound unprepared.

✓ I'm going to check it again at four.

Going to reaches back to the moment of the decision, or to the evidence you can see. It is the ordinary future for anything you have thought about, which is most things, and it is the one learners use least.

What the writer thought:
Will is taught first and taught as THE future, so it becomes the default. In real speech going to and the present continuous between them do most of the work, and will is reserved for offers, promises and things decided mid-sentence.

{width=6.

6in}

The decision arrow that started too late — The decision arrow that started too late

0-3 → Workbook pp. 36-39. **4-5** → Part 6. **6** → page 200.

Part 4 • Speaking ♦ C • THE PERFORMANCE

4A • Fluency starter — the plan that keeps changing

One person states a plan. The next changes it because of the weather. The next changes it again because of a person. **Round the room, and nobody may use a future form that has just been used.**

4B • The functional core — making and changing plans

The same Saturday, planned twice

The left plan has a condition on every item. The right has none.

with conditions

if it rains · if the road is closed · if he can't come — still a day

no conditions

one plan · one road · one person — and it rained at 11.30

Find the six. The two plans are identical until half past eleven on Saturday morning. What happens then?

6 differences — find them all

The same Saturday, planned twice — The left plan has a condition on every item. The right has none.

Language Bank

a plan	<i>I'm going to... · We're meeting at...</i>
an arrangement	<i>We're leaving at six. · What are you doing at the weekend?</i>
a condition	<i>It depends on the weather. · If it rains, we'll...</i>
changing it	<i>We're going to put it off. · They've called it off.</i>

Information gap. Learner A has the forecast. Learner B has the plans for the weekend. **Decide together what to cancel, what to put off and what to leave.**

4C • The performance — the plan that changes twice

Make a plan with your partner for a day, out loud. **Three minutes.** You must:

use all three futures · attach one condition · change the plan once because of the weather and once because of a person · end by agreeing on something

Record it.

4D • Observer

One person listens for **one thing**: did anybody use *will* for something they had already decided?

4E • Two criteria

☐ Did I use *going to*, the present continuous and *will*, each at least once? ☐ Did my plan survive both changes?

Part 5 • Reading ♦ A • THE WORLD

5A • Predict

The title is "**The timetable that tells the truth.**" What do you think is wrong with the one they have?

5B • Read — sixty seconds

The timetable that tells the truth

In July this train is late about four times in ten. In January it is late nine times in ten, and by an average of two hours and forty minutes.

The timetable is the same in both months.

The crew know this. Every winter they tell passengers at Winnipeg that the arrival time on their ticket is not going to happen, and every winter about a third of those passengers are angry, and all of that anger lands on a person standing in a corridor who did not write the timetable.

There is a second timetable. The crew have it. It is the real one, and it was made by a planner in 2011 who worked out the winter times from eleven years of data, and it has never been printed because printing it would be an admission.

The company is not going to print it. They have said so twice.

5C • Answer

1. How often is the train late in July?
2. How late is it on average in January?
3. Who tells the passengers?
4. When was the second timetable made?
5. **Why has the real timetable never been printed?**
6. **The last line says the company has said so twice. Why does the writer mention that it was twice?**

5D • Vocabulary in context

Guess from the text. Then check.

by an average of • lands on • did not write it • worked out • an admission

5E • The counter-text

5E • The counter-text

The crew forecast sheet — Everything on it is a number except the last line.

Read the sheet and answer.

1. What is the temperature at Mirror Lake?
2. **What is the expected delay at Winnipeg, and what does the printed timetable allow?**
3. What is the confidence figure for tonight?
4. **What does the line at the bottom say, and who is it protecting?**

5F • Two texts

The ticket says the train arrives at 09.40. The crew sheet says it will arrive at about 12.20.

Which one is the timetable? Say one sentence.

Part 6 • Vocabulary Lab 2 ♦ B • THE SYSTEM

Tonight, tomorrow, and this weekend

One plan, six weathers
In the first four the plan survives. In the fifth it moves. In the sixth it stops being a plan.

1

clear - nothing changes

2

a bit of rain - nothing changes

3

heavy rain - you take a coat

4

wind - you change where, not whether

5

snow - you put it off to Tuesday

6

forty below - it is not a plan

{width=6.

6in}

One plan, six weathers — In the first four the plan survives. In the fifth it moves. In the sixth it stops being a plan.

6A • The ones that catch everybody

tonight / this evening

tonight is after dark; *this evening* starts earlier

this weekend

no *on*, no *at*, no *the*

next week

no *the* either — *next week*, not *the next week*

put off / call off

moved, or ended. The difference is a whole conversation

6B • Say them

tonight • tomorrow • this weekend • next week • afternoon • evening • winter • summer

6C • Chunk

1. What are you _____ at the weekend? (*the arrangement question*)
2. It _____ rain. (*three words — evidence, in front of you*)
3. We're _____ at six tomorrow. (*arranged with other people*)
4. It _____ the weather. (*three words — the refusal*)
5. They've _____ the match. (*two words — it is not happening at all*)
6. We're going to _____ until Tuesday. (*two words — it has moved*)

6D • Contrast Clinic

Six items. **put off** or **call off**?

1. The match is next Tuesday instead. _____
2. The match is not happening at all. _____
3. The meeting has moved to Thursday. _____
4. The trip is cancelled and there is no new date. _____
5. We'll do it next month instead. _____
6. There will be no concert this year. _____

Part 7 • Pronunciation & Fluency Lab ♦ B • THE SYSTEM

Three syllables in one

Three syllables in one		
Before a verb, going to always shrinks. Before a place name it never does.		
going to	→	g o n n a only before a verb
I am going to	→	u m u n u h four words, two beats
are you going to	→	a y u g u n n a same again
want to	→	w a n n a the same shrinking
going to Winnipeg	→	g o i n g t o W i n n i p e g before a place it keeps every syllable

6in}

{width=6.

Three syllables in one — Before a verb, going to always shrinks. Before a place name it never does.

7A • Hear

going to → *gonna* — and before a verb it is almost never said in full **I'm going to** → *um-uh-nuh* · **are you going to** → *a-yuh-gunnuh* Before a **noun** it does not shrink: *I'm going to Winnipeg* keeps all three syllables.

7B • Say

Say each one three times. Then say this:

I'm going to check the forecast, and then I'm going to Winnipeg. — one shrinks and one does not.

7C • Make it mean something

Say these two:

I'm gonna go. — a plan, and it sounds like speech *I am going to go.* — the same plan, and now you are being firm about it

The shrunken form is the normal one. Saying it in full is not more polite. Which one sounds like an argument?

7D • Fluency 20

Twenty seconds: **six things you are going to do this month, with one condition each.** Three times, faster.

Part 8 • Writing C • THE PERFORMANCE

A plan with a condition • 50–70 words

8A • Read the model

We're leaving on Saturday at six. The tickets are booked. [an arrangement, with the proof]

It's going to be cold — minus thirty on Friday night, and it doesn't warm up. [a prediction with evidence]

If the road is closed we're going to go on Sunday instead. We're not going to cancel it. [the condition, and what will be done — the difference between moving and cancelling]

I'll telephone you on Friday either way. [the decision made as the writer writes]

Questions about the writer's choices:

1. *The tickets are booked.* **Why is the evidence more useful than the plan?**
2. *We're not going to cancel it.* **Why say what will not happen?**
3. The last line uses a different future from the other three. **Why?**

8B • The anti-model

We will go on Saturday. We will leave at six. If the weather is bad we will decide later. I will call you.

Correct English, four futures, and all four are the wrong one. **Rewrite it with one arrangement, one prediction with evidence, one condition, and one decision made as you write.**

8C • Plan

the arrangement, with proof → the prediction, with evidence → the condition and what you will do → the decision made now

8D • Write — 50 to 70 words

8E • Peer review — two things only

☐ Are at least two different futures used, and is each one right? ☐ Is there one condition, and does it say what happens if it is met?

8F • Publish

Swap with a partner. **They mark the one sentence they would act on without asking you anything.**

STUDY FILE • The plan and the weather

6in}

One study month, in section — The bottom layer is the only one still standing on the thirtieth.

9A • The week that goes wrong

6in}

The first of next month — Five panels. The fifth is identical to the first, and that is the problem.

What people plan	thirty days, no exceptions
What happens	a bad week, about once a month, for

What people do

What a real plan has

reasons nobody controls
stop, and restart on the first of something
a bad-week version, written down in advance

9B • Write the bad-week version

Take your study plan and write the version for the week when everything goes wrong. **It should be about a fifth of the size and it must not be zero.** That version is the plan.

9C • Role play — the forecast

In pairs. One of you describes next month. The other asks *What are you going to do if...?* four times, each time about something going wrong. **No answer may be *I don't know*.**

9D • Your forty below

Everybody has a condition under which they do nothing — illness, a deadline, a bad week. **Name yours, and write the two minutes of English you could still do in it.**

9E • Transfer — before next week

Use the bad-week version for seven days, even if the week is fine. Bring it back and say whether you missed the full one.

Part 10 • Mediation & Interaction ♦ C • THE PERFORMANCE

6in}

{width=6.

One year on the line — Three of these bands move with the year. The fourth is a straight line across all of it.

10A • Relay

Half the class has the forecast sheet. Half has the printed timetable. **Build the real winter by speaking.** Ten minutes.

10B • Simplify — for one person

A passenger at Winnipeg asks: *Will we arrive at twenty to ten?* **Answer in three sentences.** They have a connection, and you are standing in a corridor.

10C • Online

Write **one message** making a plan with a classmate for next week. **Three sentences.** One arrangement, one prediction, one condition.

10D • Your language

Does your language have different ways of talking about the future depending on when you decided? **Say I'm going to call her and I'll call her in your language.** Are they different?

Part 11 • The Decision ♦ C • THE PERFORMANCE

The timetable that tells the truth

In January the train is late nine times in ten, by an average of two hours forty. The printed timetable allows nothing for it.

Option one: print the real winter timetable. Passengers would arrive expecting the true time. The advertised journey becomes three hours longer and bookings would probably fall.

Option two: keep it. Ninety per cent of winter passengers are told at Winnipeg by a crew member, and about a third of them are angry at that crew member.

Option three: print both. Summer times in large type, winter times beneath them in the same size, and a line saying which months are which.

11A • The evidence

The arrivals board at Vancouver, a January morning
The same train, the same arrival. Two different printed times.

the printed time

09.40 printed · 12.20 actual · 11 at the desk · 2 complaints

the winter time

12.30 printed · 12.20 actual · 0 at the desk · 0 complaints

Find the six. One of them is how many people are at the information desk, and it is the only one that costs a wage.

6 differences — find them all

6in}

The arrivals board at Vancouver, a January morning — The same train, the same arrival. Two different printed times.

 **Track 9.6.** Nadia, 20 seconds: "I tell about ninety people a week in January that their ticket is wrong. It is not wrong. It just isn't true. Somebody decided that it was better for me to say it than for the company to print it."

11B • Talk about it

In threes. Use the frame. Everybody says one.

I think the company should _____, because _____.

Words you can use: *weather · snow · ice · winter · forecast · cancel a plan · put off*

11C • Decide

Write **two sentences**. Choose, and say why.

I think the company should _____, because _____.

11D • Model decision

Print both, in the same size. The honest timetable costs bookings and the dishonest one costs a person in a corridor ninety conversations a week. Printing both costs a line of type, and it is the only one of the three in which nobody is asked to say something they do not believe.

11E • The Reveal

What happened. The company printed both. Winter bookings fell four per cent in the first year, which was less than anybody had predicted, and complaints at Vancouver fell by two thirds.

Then something nobody expected: the four per cent came back the following year and brought others. People had started booking the winter service on purpose, because a company that prints a three-hour delay is a company that tells you things.

One question. You do not have to answer it out loud.

They were protecting the bookings. What had they been spending to protect them?

Part 12 • Landing ♦ all three lines

12A • Recycle — twelve items

1. Look at that sky. It _____ snow. (*three words*)
2. We _____ at six tomorrow. (*arranged*)
3. The phone is ringing — I _____ get it. (*deciding now*)
4. What are you _____ at the weekend?
5. It _____ the weather. (*three words*)
6. We're going to _____ the match until Tuesday. (*two words*)
7. They've _____ the concert. (*two words — it is not happening*)
8. I _____ every morning in winter. (*three words — the crew do it four times a day*)
9. It's only _____ . (*three words — do not change anything*)
10. It's _____ tonight. (*two words — minus forty*)
11. (*Unit 8*) _____ you ever worked abroad?
12. (*Unit 7*) You _____ touch it. (*forbidden*)

12B • Consolidate — one task, everything in it

Write a plan for one day next month, in six sentences. One arrangement, one prediction with evidence, one decision you have already made, one condition, and one thing you will not do.

12C • Can-do, with evidence

☐ I can make a plan and change it. **Evidence:** 4C, 8D ☐ I can choose between the three futures. **Evidence:** 3G ☐ I can attach a condition to a plan. **Evidence:** 6C ☐ I can say *going to* the way it is actually said. **Evidence:** 7C

12D • Replay 🟡

Record 0C again. **Listen to both.** What is different?

12E • Glossary — thirty-five words, as a map

IN THE SKY • rain • snow • wind • sun • cloud • storm • ice • sky **HOW IT FEELS** • cool • wet • dry • degrees **THE YEAR** • season • spring • autumn • winter • summer • weather **WHAT YOU DO** • check the forecast • cancel a plan • put off • call off **HOW BAD** • a bit of rain • forty below **WHEN** • tonight • tomorrow • this • weekend • next week • afternoon • evening • forecast **TALKING ABOUT IT** • going to • What are you doing...? • It depends on the weather.

12F • Next

Unit 10 • What story do you tell twice?
